

[(b) The term "professional engineer" within the meaning and intent of this article shall mean a person who, by reason of his special knowledge of the mathematical and physical sciences and the principles and methods of engineering analysis and design, acquired by professional education and practical experience, is qualified to practice engineering as hereinafter defined as attested by his legal registration as a professional engineer.]

*(b) The term "professional engineer," within the meaning and intent of this article, shall mean a person who has been duly registered and licensed under the requirements of this article.*

[(c) The term "engineer-in-training" as used in this article shall mean a candidate for registration as a professional engineer who is a graduate in an approved engineering curriculum of four years or more from a school or college approved by the Board as of satisfactory standing, or who has had four years or more of experience in engineering work of a character satisfactory to the Board; and who, in addition, has successfully passed the examination in the fundamental engineering subjects prior to completion of the requisite years of experience in engineering work, as provided in Section 12 of this article, and who shall have received from the Board, as hereinafter defined, a certificate stating that he has successfully passed this portion of the professional examinations.]

*(c) The term "engineer-in-training," within the meaning and intent of this article, shall mean a person who complies with the requirements for education, experience and character, and has passed an examination in the fundamental engineering subjects, as provided in Sections 12 and 14 of this article.*

[(d) The term "practice of engineering" within the meaning and intent of this article shall mean any professional service or creative work requiring engineering education, training, and experience and the application of special knowledge of the mathematical, physical, and engineering sciences to such professional services or creative work as consultation, investigation, evaluation, planning, design, and supervision of construction for the purpose of assuring compliance with specifications and design, in connection with any public or private utilities, structure, buildings, machines, equipment, processes, works, or projects. The practice of engineering shall not include the work ordinarily performed by persons who operate or maintain machinery or equipment nor to general real estate practices such as appraising, evaluating or estimating the value of real property.

A person shall be construed to practice or offer to practice engineering, within the meaning and intent of this article, who practices any branch of the profession of engineering; or who by verbal claim, sign, advertisement, letterhead, card, or in any other way represents himself to be a professional engineer, or through the use of some other title implies that he is a professional engineer; or who holds himself out as able to perform, or who does perform any engineering service or work or any other professional service designated by the practitioner or recognized by educational authorities as engineering.]

*(d) The term "practice of engineering," within the meaning and intent of this article, shall mean any service or creative work the performance of which requires engineering education, training, and experience in the application of special knowledge of the mathematical,*
