

- (I) A STORM DRAINAGE SYSTEM;
- (II) DRAINAGE FOR A STREET OR ROAD; OR
- (III) A GRADE DESIGN OF A STREET OR ROAD.

REVISOR'S NOTE: Paragraph (1) of this subsection is new language substituted for former Art. 56, § 330 (h)(1) and the second clause of (g). While it was not entirely clear from a literal reading of former § 330(g) and (h), on careful analysis, the Business Occupations Article Review Committee determined that the practice of property line surveying consists of all of those activities that constitute the practice of land surveying, except those activities that require knowledge of grade designs and drainage. Therefore, paragraph (1) of this subsection specifies that, subject to the listed exclusions, "practice property line surveying" means "to practice land surveying". Paragraph (2)(i) and (ii) of this subsection retains the excluded activities that formerly appeared in Art. 56, § 330(h)(2).

Paragraph (2)(iii) of this subsection is new language added to state expressly that preparing "a grade design of a street or road" is not practicing property line surveying. This addition conforms to the practice of the profession and of the Board.

In the introductory language of paragraph (2) of this subsection, the reference to "preparing a plan" is added for clarity.

The definition is stated in the infinitive form to allow minor verb variations of the defined phrase without taking these variations out of the scope of the definition.

Defined term: "Practice land surveying" § 15-101

- (I) PROFESSIONAL LAND SURVEYOR.

"PROFESSIONAL LAND SURVEYOR" MEANS, UNLESS THE CONTEXT REQUIRES OTHERWISE, A LAND SURVEYOR WHO IS LICENSED BY THE BOARD TO PRACTICE LAND SURVEYING.

REVISOR'S NOTE: This subsection is new language derived without substantive change from former Art. 56, § 330(d).

The former word "registered" is deleted to conform to changes in terminology made throughout this article. See the General Revisor's Note to this article.
