Prolegomena. In the following Index, all the names, recorded in the present handwriting, are translated from the original German records of the congregation. In making the translation, perfect accuracy has been aimed at. No time or pains has therefore been spared, in order to reach this result. Hours have been spent, and the records of a dozen years consulted, in order to determine satisfactorily a single name, in every case where this could not be done otherwise. The orthography of the surnames is literally and invariably that of the original.

The following letters are used interchangeably; so that when a name cannot be found under one of them, the other should be consulted.
