

Is Governor McLane so wedded to Baltimore ways, that he must needs have a herd of cattle pasturing on the grounds around the Executive Mansion, which has cost so much of the State's money to beautify? Such unsightly division of the State Mansion grounds is offensive to the esthetic tastes of Annapolitans.

Perhaps the Governor has taken the suggestion given by the CAPITAL some days ago to our Corporation, to let the city out as a grazing farm during the summer months, and has caught on to the idea; or is this unsightly fence intended to hide from the public gaze the Executive's private wash? We should like to know.
