A MESSAGE FROM MARYLAND'S GOVERNOR J. MILLARD TAWES

This is the 1966 edition of Maryland's Official Highway and Wildlife Resources Map. Our State has made significant strides both in highway construction and in providing outdoor recreational facilities, so that those who travel within our borders may be assured of both efficient transportation, and the opportunity to enjoy our natural resources. With the aid of these maps, the motoring public will be able to make the best possible use of the highway system and become better acquainted with the outdoor recreational facilities administered by State agencies.

Featured on the wildlife map are the public hunting grounds, lakes and ponds, hatcheries, refuges, boat ramps and education areas maintained by the Department of Game and Inland Fish. I recommend also that you visit the fine picnic areas, forests and parks established by the Department of Forests and Parks.

Wherever you travel in our State, you will find accommodations staffed by people anxious to serve you and eager to help you enjoy Maryland.

Finally, I want to point out that Maryland's roadbuilders have incorporated every modern concept of safety into our highways. Won't you show an equal interest and drive with care, observing all the rules of the road established for your safety? I also urge all travelers to help us keep Maryland beautiful.

In the hope this map will be both interesting and helpful, I am with every good wish,

Sincerely yours,

J. Millard Tawes
