R A G U 8 A, Seplember 13:

AHIS republick is again in the greatest distress, the Porte haports to carry over a number of Albanians to Syria and Grand Cairo, to act there against Ali Bey, who, notwith-standing his defeat; is become more formidable than ever.

The Government would gladly dispense with furnishing these vessels, that they might-not incur the resentment of the Russians; but the Pa-cha of Albania has protested in the strongest terms. that if we furnish not the vessels demanded, he will that if we furnish not the veners demanded, he will come with a numerous army; and put all the country belonging to the republick to fire and fword. Thus we find ourfelves in a very dangerous fituation: If we supply not the vessels required, we expose ourselves to the sury of the Turks; if we furnish them we shall be invested by a Russian naval force, which has several times already threatened to boribard our division designs. times already threatened to bombard our city and re-

CONSTANTINOPLE, Sept. 12. We had another dreadful fire here, in the night of the 5th instant, which burnt down 200 houses: As combustible mat-ter was found in several parts of the town, it is not doubted but some evil-designing persons occasioned this fire, with an intent to destroy the whole city. All the Turks who do not belong to this capital are either fat to the army or to the places they belong to. All persons who were out of work are employed on the publick buildings, and in short every method is taking

Visuna, Od. 3. The general report here is, that the war between the Russians and the Turks is on the point of becoming more bloody and more animated that ever. It is added that the former will be efficationly supported by a powerful ally.

The last letters from Constantinople advise, that the supported by a making in the Stales of the Grand Signor are immense.

The above advices, add, that transports with ammution arrive there dally from a foreign power, and the there are in the dock yards a great number of the which have been confiruted and finished under the direction of experienced foreigners.

The armiffice between the Ruffians and the Turks has been prolonged 40 days beyond the term fixed, and the negociations for a peace are renewed between Mar-shal Romanzow and the Grand Vizir. The congress would never have been broke off if the Ruffian plentpotentiaries had been more moderate; and it is now certain that Count Orlow, who affilted in that capacity at Fockzany, is difgraced. On the other hand, the court of Vienna has declared to the Porte; that unless the peace be concluded in four weeks, the cannot avoid, in purfuance of her treaty with Ruffia, acting in concert with that power against the Turks.

The frequent fires which have hap-pened in different countries have awakened the attention of this; to find out means to prevent this calamity, and till now no other method has been thought possible to prevent it, except the precaution of the police and administration; but Glasser, a physician of Henneberg, a learned German, has invented a varnish which will not take fire; to prove the virtue of which, three houses were built of wood in a field a two of them were covered with this varnish, the third not; and being all fet fire to, those varnished were preserved, while the unvarnished one was burnt down.

Upon the fullest twidence I am now warranted to declare, that if the scribby had been continued by them, a much greater majority than that declared by the Spatisfs at the close of the poll would have appeared at the finishing of the scrutiny, and many scenes of ed at the finishing of the scrutiny, and many feenes of iniquity and corruption been laid open to all mankin.
