Qui vult vitam dat.

Cic.

THE infinitely wise author of nature has assigned to the eyes and ears the most useful and important offices of life: the structure of those delicate tender organs is so exquisitely minute, the mechanism and properties of their various parts so admirably curious, that they may be filled with propriety, the miracles of nature! The great variety of dangers and diseases, manifest and occult, to which these precious senses are exposed; the little attention that hath hitherto been paid to the improvement of this noble science; and so few, properly qualified, have engaged in its practice, that to study them in any degree suitable to their importance is full business for life.

The inestimable blessings and great advantages which attend a perfect enjoyment of the sight and hearing are obvious to all; but the deplorable and truly pitiable condition of the blind and deaf, is attended with such solitary discomfort, such gloomy ideas, and constant uneasiness of mind, as no one can be truly sensible of, who has not in some measure experienced it himself. How nobly therefore, how deserving of the nicest cultivation must that art be, that can restore sight to the blind, hearing to the deaf, speech to the dumb, and keep in order the springs of those master-pieces of creative wisdom! That art must needs be divine, because, thus assisted, the wonders of nature and of art, opening on the mind, expand it with the most exalted apprehensions of the great art!

To the inhabitants of MARYLAND,
DR. G R A H A M
O C U L I S T and A U R I S T,

MOST respectfully offers his best services, and acquaints them that he intends positively to be at New-Town-Chester, in Maryland, on Wednesday the 15th of September next, where he will continue two weeks; and on Friday the 1st of October, be purposed to be at Baltimore-Town; there to practise till the 1st of November; at those places such persons whose circumstances or situation have precluded them from receiving assistance at Philadelphia, may consult him in all disorders of the eye and its appendages; and in every species of deafness; hardness of hearing, ulcerations, noise in the ears, &c. Those persons who have had the unspeakable misfortune of being born deaf and dumb, and those who labour under any impediment in their speech, by applying personally, will probably be assisted. Those persons likewise whose eyes are utterly perished, or sunk in their heads, may have the deformity removed by artificial eyes, so curiously fixed and adapted to the orbits, as to have, in appearance, the beauties, motion, &c. of a natural eye in its healthy state.

Medicine and Surgery have always been his favourite study; but the structure and diseases of those tender, sympathetic, and nearly connected organs, to which nature has assigned the most important offices of life, have for many years particularly engaged his attention and practice; whence, regardless of vague conjectural hypotheses, he has, on rational principles, deduced methods of cure, improved and confirmed by the most accurate observations in a course of practice, the most extensive, and the most successful of any of his contemporaries in Europe, or on this vast continent.

The candid and intelligent inhabitants of these parts of the British colonies can readily distinguish true merit from pretended knowledge. To conciliate therefore their favour, Dr. Graham begs leave to assure them, that, with tenderness and moderation, even to the poorest individual, his best abilities shall at all times be exerted to serve them; and as the success, which daily attends his practice, is a better testimony of his skill than any thing he might advance in his own behalfs, let it suffice only to mention, that after several years study, at the justly celebrated university of Edinburgh, he has travelled in pursuit of knowledge, in his favourite branches, attending the infirmaries and hospitals, as well as the lectures of the most eminent professors in Europe.

Since his arrival at Philadelphia, in October, 1771, many hundred patients have been cured or relieved of the following disorders, many of which had been of long standing, and deemed incurable, by other practitioners, even by gentlemen who otherwise do honour to the profession; the success attending their practice sufficiently convincing that they are worthy and capable of the greatest charge with which they are entrusted. The chief disorders are as follow, viz. Periodical, partial, and total blindness, whether occasioned by a cata-ract, glaucoma, or gutta serena; weakness, and dimness of sight; squinting, pain, swelling, and inflammation of the eyes; spots, specks, pearls, or films, occasioned by small-pox, blaws, or extraneous substances; weak, watery, red, spongy, and ulcerated eye-lids; spasmodic twitchings of the muscles; involuntary weeping of the tears; surcums and excrescences; fistulae lacrymales. Total and periodical deafness; thicknes of hearing; pain and inflammations; painful sensations in consequence of loud sounds; cracking, itching, continual and remitting noises in the ears; offensive runnings, occasioned by colds, swelling, swimming, picking, and improper applications, or by long and severe sickness; insects and extraneous bodies getting into the ears; ulcerations with caries of the bones; polypi, &c. and several persons born deaf and dumb; stammering, &c.

The poor, who apply properly recommended, will be assisted gratis, with advice, medicines and manual operations, as their respective cases may require; and for that purpose he will appropriate every morning, between

the hours of five and seven. The doctor intirely positively to sail for England in a few months; thence, therefore, who have occasion for assistance in sight, hearing, or speech, must apply immediately.

The doctor intends not to form any partiality, but so attend to patients in regular order as they apply, or as they give in their names at the bar of the coffee-house, or head tavern in each place.

Equi pauperibus prodit, locupletibus agit,
Equi neglegit paucis senibusque nocet.

HOR. Early yesterday morning died, at his house in Portman-square, the Rt. Hon. James Cranston, Lord Cranston, of Creting, in the county of Roxburgh, in

the kingdom of Scotland.

Mount Vernon, July 15 1773;

THE subscriber, having obtained patents, for upwards of 20,000 acres of land, on the Ohio and great Kanawha, being part of 200,000 acres, granted by proclamation, in 1754, (10,000 of which are situated on the banks of the first mentioned river, between the mouths of the two Kanawhas; the remainder on the Great Kanawha; or New River, from the mouth, or near it, upwards in one continued survey) proposes to divide the same into any sized tenements that may be desired, and lease them upon moderate terms, allowing a reasonable number of years, rent free; provided that, within the space of two years from next October, three acres for every fifty contained in each lot, and proportionable for a lesser quantity, shall be cleared, fenced, and tilled, and that by or before the time limited for the commencement of the first rent, five acres for every hundred, and proportionably, as above, shall be inclosed and laid down in good grass for meadow; and moreover, that at least fifty good fruit trees for every like quantity of land, shall be planted on the premises.

Any persons inclinable to settle upon these lands, may be more fully informed of the terms, by applying to the subscriber, near Alexandria, in Virginia, or, in his absence, to Mr. Lund Washington; and will do well in communicating their intentions before the 1st of October next, in order that a sufficient number of lots may be laid off to answer the demand.

As these lands are among the first which have been surveyed, in the part of the country where they lie, it is almost needless to premise, that none can exceed them in luxuriance of soil, or convenience of situation; all of them lying upon the banks either of the Ohio, or Kanawha, and abounding in fine fish and wild fowl of various kinds, as also in most excellent meadows, many of which (by the bountiful hand of nature) are in their present state almost fit for the scythe.

From every part of these lands water carriage is now had to Fort-Pitt, by an easy communication, and from Fort-Pitt up the Monongahela to Red Stone, vessels of convenient burthen may, and do pass continually; from whence, by means of Cheat River, and other navigable branches of Monongahela, it is thought the portage to Patowmack may, and will be reduced within the compass of a few miles, to the great ease and convenience of the settlers, in transporting the produce of their lands to market; to which may be added that, as patents have now actually passed the seals, for the several tracts here offered to be leased, settlers on them may cultivate and enjoy the land in peace and safety, notwithstanding the unsettled councils, respecting a new colony on the Ohio; and as no right money is to be paid for these lands, and a quitrent of two shillings sterling a hundred, demandable some years hence only, it is highly presumable that they will always be held upon a more desirable footing, than where both these are laid on with a very heavy hand. It may not be amiss further to observe, that if the scheme for establishing a new government on the Ohio, in the manner talked of, should ever be effected, these must be among the most valuable lands in it, not only on account of the goodness of the soil, and the other advantages above enumerated, but from their convenience to the seat of government, which more than probable will be fixed at the mouth of the Great Kanawha.

GEORGE WASHINGTON.

Baltimore, August 31, 1773.

A PERSON properly qualified, and who can come well recommended, to do the business of a county clerk, will meet with good encouragement on application to,
