PARIS, August 7. TESTERDAY a large decked boat was flopped upon the river, loaded with gun-powder and small shot; the commander or captain produced a passport, figued by the maiquis de la Fayette, and countersigned by the marquis de la Salle, second in command. The populace immediately inferred there was some plot against their liberty, ran to the hotel de Ville to call on the marquis la Fayette for an explanation concerning the powder, and loudly demanded his head. -The marquis pacified the incensed multitude, and making them remark that it bore no resemblance with that upon the passport, and that it was a snare designedly laid to avert from him the affections of the people. The populace, thinking then it must be the marquis of la Salle, went to his house, broke it open, my wishes, that my ability might be equal to my searched all his papers, and put a seal upon all his effects. zeal. He luckily was not within. While they were gone there, M. la Fayette assembled some militia to guard all the avenues of the hotel de Ville, in order to prevent the multitude from returning there. The project remains in a style of mystery, as it is not possible the gentlemen above-mentioned could be concerned in the proceedings; if they had, the populace would readily have been appealed, by their avowing the powder to be intended for the defence of the people. A SECOND GUN-POWDER PLOT.

Two gentlemen went to his palace that day, and re-

quested the honour of an audience. The prince was then writing in his closet; and just as he was going to defire the person who had announced the gentlemen, to shew them in, another perfon entered with a letter, on the cover of which was

written-"To be delivered without a moment's loss of time." This letter, which the duke immediately read, con-

tained the warning above-mentioned. The duke resolved not to admit the two gentlemen to his presence; but at the same time he did not think proper to cause them to be apprehended, for, by the liveries of the fervants, their families were known, and known to be great and powerfully allied.

The message he sent to them was, that " He was too bufily employed to be visible to any person what-

ever out of his family." The gentlemen hearing this, appeared to be greatly disappointed, and drove off full speed.

" I am told, (though I confefs I do not give full credit) that unto this hour, there are lamentations and calls heard in the Bastile, of prisoners who cannot be found or got at, the people being ignorant of the avenues or means to their abode, and few befides the governor (who is now dead) knowing the way, or having the means. It is possible those who know it, may be in the power of a governmental bribe, to keep the fecret, and let the prisoners sooner expire than be liberated. "An expedition of 250 volunteers, under the command of colonel John Harding, started about the first of August from the Falls of Ohio, for the Great Weawtown, on the Wabash, and, after marching four days in the Indian country, we met with a party of about twenty Indians, some of whom being squaws and child dren, a bloody engagement ensued; I think there were near two hundred guns fired, and only three Indian fellows, a boy and four squaws, killed, and two young squaws taken prisoners. The loss on our side was only two men wounded, one in the arm, and the other under the shoulder blade. Major Brown received a bad hurt by a fall; but they are all recovering. The plunder taken from the Indians came to fourteen shillings
