

**Dr. Hall's Truss**  
For the relief and cure of Hernia, or Rupture.

Dr. AMOS G HULL, having practiced in Surgery, the distress and misery attending the disease of Rupture, and the fatal consequences frequently incident to it, and being convinced that the unhappy effects were generally the result of badly constructed Trusses, or the neglect to use any, was prompted from feelings of professional duty, and an anxious desire to devote a share of his time to the construction of an instrument for that purpose. He is now satisfied that he has brought into successful operation a Truss, constructed on a new principle and adapted to all cases of Rupture in both sexes; always, with out an exception, fulfilling the indication of confining or keeping up the bowel, and often, especially in young persons and recent cases, effecting a permanent cure.

Let it be observed that the pad of this truss, instead of being convex like that of all other Trusses, is slightly concave, like the open palm of the hand. This pad being placed over the rupture and the spring of the truss exerting its power upon the centre of it, the strong pressure is made by its circular margin, around the rupture opening and a diminished pressure by its centre. It thereby not only prevents the escape of the bowel, but approximates, and often unites the ruptured part so as to effect a radical cure of the complaint.

The following testimonials in its favour, are submitted to the public.

Extract from the second edition of "Thatcher's Modern Practice of Physic," Boston 1836.

"A great variety of Trusses, formed on different principles, have been from time to time, introduced to public notice; but with one exception it may be asserted, that they have been found altogether deficient in those just principles upon which such instruments ought to be formed. It is within a few years that a Truss has been invented by Dr. A. G. Hull, a respectable Physician and Surgeon of New York, and late President of the Oneida Medical Society, which is incomparably superior in its principles and properties to any of those previously in use. Dr. Hull is exclusively entitled to the credit of first adapting the true surgical principle for the radical cure of Hernia. He happily conceived the idea that the pad of the Truss should be so constructed as simply to support the muscular fibres around the ring or aperture as much as possible, in the state in which they are maintained in perfect health. Unless this be attained the parts can never recover their natural tone, whatever may be the degree of pressure applied."

Valentine Mott, M. D. Professor of Surgery in the University of New York declares:

"The great and signal benefits which are produced by this Truss result from its strict subservance to and accordance with Scientific and Surgical principles. Its mechanical adaptation to the parts, the simplicity of its construction, the limited motion, and the different attitudes of the body, and to the action of the muscles; the permanency of its location on the body, and its pressure on the circumference of the abdominal ring, are qualities, the tendency of which is to strengthen and restore the weakened parts, to contract the aperture, and ultimately to accomplish a cure of the disease.

"The operation and effects of this Truss therefore directly the reverse of all Trusses heretofore in use; which being convex tended to enlarge the dimensions of the rupture opening." "I have adopted it in my own practice to the exclusion of all others, and am of opinion that the union of physical design and mechanical structure in this instrument render it what has long been the desideratum of practical surgeons in Europe and America.

T. W. Hunter, M. D. of New York deposes as follows: "In two very interesting cases of Scrotal Hernia (which is the worst and most difficult kind), that came under my care, was worn with perfect comfort, and effected a complete cure of both in less than twelve months. This Truss is approved of by the most eminent Surgeons in the United States and Europe particularly by the celebrated Sir Astley Cooper, of London.

Joseph Evans, late of Philadelphia, Leather Merchant deposes as follows: "Having been ruptured about seven years ago, I applied to Dr. Hull, in person, who furnished me with one of his Trusses, and after wearing it a short time, I found myself so much relieved, so much so that I could walk about with safety, without wearing the Truss. This in my opinion is the best of all Trusses, and I am desirous to be mentioned that is known."

Extract from the Medical Review and Journal, conducted by Professors Roberts and Meigs, Philadelphia. "We have applied Dr. Hull's Truss upon eight different patients, two of which were attended with Double Scrotal Hernia, and a great relief of our experiences have been satisfactory."

CHURCH-STREET, ANNAPOLIS.

From the N. York Com. Adv. AMERICAN SUNDAY SCHOOL UNION. The third anniversary of this institution was celebrated on Tuesday the 22nd ult. in the Rev. Dr. Wilkeson's Church, in Philadelphia. A friend of ours, who was present, has communicated the following:—

At the appointed hour (4 o'clock) the church was crowded with a highly respectable audience. In the pulpit, I observed the Rev. Dr. Green of Philadelphia; Dr. Hillier, of Orange, New Jersey; the Rev. Ezra Stiles Ely, of Philadelphia; and the Rev. Mr. Doughty, of the M. E. Church. On the platform erected for the occasion, were the officers and managers, and the gentlemen selected to address the meeting. In the front gallery were about two hundred females, selected from several Sunday Schools, who sung a ode and hymn written by Mr. W. B. Tappan. In the rear of the young ladies, a number of gentlemen were standing, who took the base and counter parts of the tunes; and I never heard singing which appeared to have such a powerful effect upon a congregation; it was the most harmonious concord of sweet sounds, I ever listened to. The exercises commenced with an address to the Throne of Grace, by the Rev. Dr. Hillier, after which the following ode was sung:

God, our God, his power revealing,  
Bids his sun, with wings of healing  
Rise on each benighted clime:  
Scatter vale and humbled mountain,  
Roll his conquering car to days;  
See! his brightness like a fountain,  
Flooding all the glazing highway.

By the tender mercies glowing,  
Where reign'd his hatred and his maim;  
With Redemption thrill these wires,  
From his chosen Sunday School;  
Beh! Error's night dispelling,  
Bidding grace in rivers flow,  
From Antarctic, to the dwelling  
Of the lowly Esquimaux.

Wake the harp, ye angels! ever  
Warble, ye melodious choirs!  
Sweet your minstrelsy, yet never  
With Redeption thrill these wires,  
"Tis our song, and all your glory,  
Starry crowns and hymns above,  
Faith, while children lip the story  
Of a saviour's dying love.

The Treasurer's report was then read, from which it appeared that the receipts, during the past year amounting to \$27,752.73— and that the expenditures were nearly equal to the receipts.

The Rev. Doctor Ely read the Managers Report. It was very long, interesting document, & listened to with profound attention.—I had not means with me of taking notes, and indeed, which rendered it impracticable to follow the reader, with any thing like correctness. If I mistake not, the report stated, that at the present time the American Sunday School Union, have under its care, one hundred and fifty-nine thousand two hundred and twenty-six children, taught by twenty-two thousand two hundred and ninety-seven teachers, and that the schools numbered two thousand and four hundred and eighty-one. During the past year, it has been ascertained that fourteen hundred and eighty-one, have experienced a change of heart, and have attached themselves to some religious denomination: of this number seven hundred and twenty-three were teachers, teachers, and seven hundred and fifty-seven were scholars.
