Dr. Hull's Truss
For the relief and cure of Hernia, or Rupture.

Dr. AMOS G. HULL, having witnessed, during twenty five years practice in Surgery, the distress and misery attending the disease of Rupture and the fatal consequences frequently incident to it, and being convinced that the unhappy effects were generally the result of badly constructed Trusses or the neglect to use any, was prompted from feelings of professional duty, and an anxious desire to witness a more effectual remedy to devote a share of his time to the construction of an instrument for that purpose. He is now satisfied that he has brought into successful operation a Truss, constructed on a new principle and adapted to all cases of Rupture in both sexes; always, without an exception, relieving the individual of confinement, or keeping up the bowels, and often, especially in young persons, and recent cases, effecting a permanent cure.

Let it be observed that the pad of this truss, instead of being convex, like that of all other Trusses, is slightly concave, like the open palm of the hand. This pad being placed over the rupture and the spring of the truss exerting its power upon the centre of it, the strong pressure is made by its circular margin, around the rupture opening and a diminished pressure by its centre. It thereby not only prevents the escape of the bowel, but approximates, and often unites the ruptured part so as to effect a radical cure of the complaint.

The following testimonials in its favor are submitted to the public:
Extract from the second Edition of "Fletcher's Modern Practice of Physic," Boston 1826.
A great variety of Trusses, formed on different principles, have been from time to time, introduced to public notice, but with one exception it may be asserted, that they have been found altogether deficient in those first principles upon which such instruments ought to be formed. It is within a few years that a Truss has been invented by Dr. A. G. Hull, a respectable Physician and Surgeon of New York, and late President of the New York Medical Society, which is incomparably superior in its principles and properties to any of those previously in use. Dr. Hull is exclusively entitled to the credit of first adopting the true surgical principle for the radical cure of Hernia. He happily conceived the idea that the pad of the Truss should be so constructed as simply to support the muscular fibres around the ring or aperture as much as possible in the state in which they are maintained in perfect health. Unless this be attained the parts can never recover their natural tone, whatever may be the degree of pressure applied.

Valentine Mott, M. D. Professor of Surgery in the University of New York deposes:
The great and signal benefits which are produced by this Truss result from its strict observance to and accordance with Scientific and surgical principles. Its mechanical adaptation to the parts, the simplicity of its construction, the limited motion, nicely graduated by experiment, to the different attitudes of the body, and to the action of the muscles; the permanency of its location on the body, and its pressure on the circumference of the abdominal ring, arguatively, the tendency of which is to strengthen and restore the weakened parts, to contract the aperture, and ultimately to accomplish a cure of the disease.

"The operation and effects of this Truss is therefore directly the reverse of which being convex tended to enlarge the dimensions of the rupture opening." "I have doubted it in my own practice to the exclusion of all others, and am of opinion that the union of physical design and mechanical structure in this instrument render it what has long been the desideratum of practical surgeons in Europe and America."

T. W. Hunter, M. D. of New York deposes as follows:—"In two very interesting cases of Scrotal Hernia (which is the worst and most difficult kind) that came under my care, it was worn with perfect comfort, and effected a complete cure of both in less than twelve months. This Truss is approved of by the most eminent Surgeons in the United States and Europe, particularly by the celebrated Sir Astley Cooper of London."

Joseph Evans, late of Philadelphia, Leather Merchant deposes as follows:—"Having been ruptured about seven years ago, I applied to Dr. Hull, in person, who furnished me with one of his Trusses, and after wearing it a short six months, I found myself entirely cured, so much so that I can walk about with safety, without wearing the Truss, and in my opinion it is one of the greatest improvements and blessings to mankind that is known."

Extract from the Medical Review and Journal, conducted by Professors Eberle and M. C.ellan, Philadelphia, "We have applied Dr. Hull's Truss upon eight different patients, two of which were affected with Double Scrotal Hernia, and the results of our experience have been so satisfactory

that we cannot avoid offering our testimony in favour of the new Truss, which we consider as altogether the best that we have as yet been made acquainted with."

N. B. Dr. Hull's Trusses adapted to the different species of rupture to which males, females and children are subject, are kept at the office of Dr. Knapp, No. 37 East Fayette street, opposite the First Presbyterian Church, who will attend to their application, &c. and where those labouring under this disease are invited to call. Persons residing at a distance can be fitted by sending a measure of the body near the hip. Orders from Country Physicians and Druggists, will be duly attended to.

Trustee's Sale.
By virtue of a decree of the Honourable the High Court of Chancery of Maryland, the subscriber will expose at public sale, on the premises on **TUE. DAY THE 12th DAY OF JUNE NEXT,**

If fair, if not the next fair day, between the hours of 12 and 4 o'clock, **Part of a Tract of Land** called Mountville, containing twenty acres. This land lies in Anne Arundel county, about half a mile from the Lover's Ferry on the Patuxent river, within full view of the City of Baltimore, and distant therefrom about a mile and three quarters. There is a comfortable Log House on the land and an excellent Peach Orchard, Strawberries and Raspberries are cultivated in abundance. This land is valuable on account of its contiguity to the city of Baltimore, and can be made a first rate market farm, which if attended to by the owner, would yield a handsome revenue. A further description is deemed unnecessary, as it is presumed that persons inclined to purchase will view the premises previous to the day of sale. The terms of sale, as prescribed by the decree, are, Cash on the day of sale, or on the ratification thereof by the Chancellor. On payment of the purchase money, the trustee is authorized to execute a deed to the purchaser.

PROPOSAL
FOR PRINTING
The Journals of the Conventions of the Province of Maryland,
Held in the City of Annapolis, in the years 1774, 1775 and 1776.
If sufficient encouragement be offered, the Subscriber proposes to publish, in one volume octavo, the Journals of the Conventions of the Province of Maryland in the years 1774, 75 and '76. It is believed that there are not more than two copies of these Journals now extant; and from the circumstance that they were printed in pamphlet form, and unbound, it may be fairly concluded that they, too, must in a few years be destroyed by the mere decay of time. These Journals are the only authentic evidence of the Political History of Maryland, during that interesting and unquiet period. Although we have, in abundance, histories of Maryland, as connected with the association of Provinces and Colonies, at that time formed, for mutual protection against the improper assumption of power on the part of the Mother Country, yet none of these works embrace what may be termed its Domestic and Internal Political History.
This part of the history of Maryland it should be her pride to hand down to posterity, not only on account of its deep interest, but as a public State Record of the voluntary sacrifices, daring spirit, and determined resolution of her citizens, during this period of doubt and dismay.
In the confident expectation that the citizens of Maryland will consider the proposed publication of sufficient importance to entitle it to their patronage, the Subscriber is induced to issue these proposals.
The Price per Copy, not to exceed \$2 00.

DECISIONS
OF THE
Court of Appeals of Maryland.
PUBLISHED
By Subscription.
THE DECISIONS
OF THE
COURT OF APPEALS OF MARYLAND.
To be Reported by Thomas Harris, Esquire, Clerk of the Court of Appeals, and Beverly Johnson, Esquire, Attorney at Law.

These Decisions will form a continuation of the first volume of Reports already published by Messrs. Harris and Johnson which closes with the year 1805. It is proposed to publish the Decisions in a Series of Numbers, each to contain not less than one hundred and twenty five pages, and four numbers to constitute a volume. The last number of each volume will contain a full and complete Index. This mode of publication, it is conceived, possesses advantages which give it a decided preference to that of publishing the Reports in bulky volumes. It ensures the earlier publication of the Reports and as not more than four numbers will be published in a year, the expense will not be so sensibly felt.

TERMS
The price of each number of the Reports will be \$1 25, payable on delivery.
Subscriptions to the above work are received at GEO. SHAW'S Store the Maryland Gazette Office, and the respective Offices of the County Clerks of this State.

Notice
TO TRIPASS. RS.

THE SONG OF THE JANISSARY.
They trod down the mighty—By sea and by shore,
Our name be a watchword and terror no more!
The eagle been hurl'd from his throne in the air!
We've fix'd a home in the grim lion's lair!
We've trod down the mighty! The victor when life was poured forth like a flood!
The warriors of empire! the mates of the brave!
The frenzied who hallow'd the land of the slave!
Our name is a scream and our sabres are rust,
We place a sulphur gory in dust,
And again shall the flash of our sabres be there!
The name of our Aga be known—
He'll tread on o'er shadows the mosque and the throne;
He'll shall our foeman grow pale when he hears
The tread and the shout of the fierce Janissaries!
Case—for a time may the tyrant prevail,
And his Pacha before us shall kneel;
But that time shall be in blood from the throne,
We've worn, haughty Mahmoud! shall have by night,
The warriors of ages who fought and who bled,
Othman and Amurath—the deathless though dead—
They've desired to pass like the sunshine of spring,
To fly to the wind, and their neck to the string!
The Prophet! the waves of the Euxine shall stop,
The rays from the concave like hail stones shall drop,
The traitor and coward may hope to tread down
The fleshless in soul, the undim'd in renown.
We warn thee, stern Mahmoud! thy hour is at hand;
Thou hast sharpen'd the lance, thou hast kindled the brand;
We're gathering like tempests that gather by night,
To—to to thee, King! when we burst in our might!
Expedition to the North Pole.
The official letter addressed by Captain Parry to the first Lord of the British Admiralty, wherein his plans are detailed, is a curious and interesting document. It is as follows:
To the Right Hon. Viscount Melville, &c.
Copy Admiralty, 13th April 1826.
My Lord—Among the enterprises which yet remain unaccomplished, and of which the object is to complete our knowledge of the surface of the globe, it appears to me that there is none more desirable to be undertaken, and (considering the nature of such enterprises) few so easily practicable, as an attempt to reach the North Pole of the earth. Having long been in the habit of contemplating such an enterprise, and being confirmed in my own opinion of its practicability by a written plan of Captain Franklin, now in my possession, I beg leave to lay before your Lordship my views on this interesting subject.
There can be no doubt of the practicability of reaching, in any year (as is the annual custom of the whalers) that part of Spitzbergen called "Clopen Cliff," lying in latitude 79. 52, about the middle or towards the close of May; so that the party might set off to the northward of the 1st of June. The distance of Clopen Cliff from the Pole is 600 miles.
The method which I consider a practicable one of accomplishing the proposed object, is by means of boats being "runners" attached to them in the manner of sledges, so as to admit of their being hauled over the ice when no open water presented itself, and again launched at pleasure. The frame of these boats, which I propose should be two in number, should consist of larch or hickory, so as to be at once light, tough and flexible. The principal fastening to be of copper, of the least brittle kind, and the rest to be lashings of thong, so as to render the whole as yielding and elastic as possible, consistently with sufficient strength and stiffness. The official letter addressed by Captain Parry to the first Lord of the British Admiralty, wherein his plans are detailed, is a curious and interesting document. It is as follows:
To the Right Hon. Viscount Melville, &c.
Copy Admiralty, 13th April 1826.
My Lord—Among the enterprises which yet remain unaccomplished, and of which the object is to complete our knowledge of the surface of the globe, it appears to me that there is none more desirable to be undertaken, and (considering the nature of such enterprises) few so easily practicable, as an attempt to reach the North Pole of the earth. Having long been in the habit of contemplating such an enterprise, and being confirmed in my own opinion of its practicability by a written plan of Captain Franklin, now in my possession, I beg leave to lay before your Lordship my views on this interesting subject.
There can be no doubt of the practicability of reaching, in any year (as is the annual custom of the whalers) that part of Spitzbergen called "Clopen Cliff," lying in latitude 79. 52, about the middle or towards the close of May; so that the party might set off to the northward of the 1st of June. The distance of Clopen Cliff from the Pole is 600 miles.
The method which I consider a practicable one of accomplishing the proposed object, is by means of boats being "runners" attached to them in the manner of sledges, so as to admit of their being hauled over the ice when no open water presented itself, and again launched at pleasure. The frame of these boats, which I propose should be two in number, should consist of larch or hickory, so as to be at once light, tough and flexible. The principal fastening to be of copper, of the least brittle kind, and the rest to be lashings of thong, so as to render the whole as yielding and elastic as possible, consistently with sufficient strength and stiffness. This frame being covered with lea-

THE SONG OF THE JANISSARY.
They trod down the mighty—By sea and by shore,
Our name be a watchword and terror no more!
The eagle been hurl'd from his throne in the air!
We've fix'd a home in the grim lion's lair!
We've trod down the mighty! The victor when life was poured forth like a flood!
The warriors of empire! the mates of the brave!
The frenzied who hallow'd the land of the slave!
Our name is a scream and our sabres are rust,
We place a sulphur gory in dust,
And again shall the flash of our sabres be there!
The name of our Aga be known—
He'll tread on o'er shadows the mosque and the throne;
He'll shall our foeman grow pale when he hears
The tread and the shout of the fierce Janissaries!
Case—for a time may the tyrant prevail,
And his Pacha before us shall kneel;
But that time shall be in blood from the throne,
We've worn, haughty Mahmoud! shall have by night,
The warriors of ages who fought and who bled,
Othman and Amurath—the deathless though dead—
They've desired to pass like the sunshine of spring,
To fly to the wind, and their neck to the string!
The Prophet! the waves of the Euxine shall stop,
The rays from the concave like hail stones shall drop,
The traitor and coward may hope to tread down
The fleshless in soul, the undim'd in renown.
We warn thee, stern Mahmoud! thy hour is at hand;
Thou hast sharpen'd the lance, thou hast kindled the brand;
We're gathering like tempests that gather by night,
To—to to thee, King! when we burst in our might!
