# Information About the Maryland Register and COMAR

## MARYLAND REGISTER

The Maryland Register is an official State publication published every other week throughout the year. A cumulative index is published quarterly.

The Maryland Register is the temporary supplement to the Code of Maryland Regulations. Any change to the text of regulations published in COMAR, whether by adoption, amendment, repeal, or emergency action, must first be published in the Register.

The following information is also published regularly in the Register:

- Governor's Executive Orders
- Attorney General's Opinions in full text
- Open Meetings Compliance Board Opinions in full text
- State Ethics Commission Opinions in full text
- Court Rules
- District Court Administrative Memoranda
- Courts of Appeal Hearing Calendars
- Agency Hearing and Meeting Notices
- Synopses of Bills Introduced and Enacted by the General Assembly
- Other documents considered to be in the public interest

### CITATION TO THE MARYLAND REGISTER

The Maryland Register is cited by volume, issue, page number, and date. Example:

- 19:8 Md. R. 815—817 (April 17, 1992) refers to Volume 19, Issue 8, pages 815—817 of the Maryland Register issued on April 17, 1992.

### CODE OF MARYLAND REGULATIONS (COMAR)

COMAR is the official compilation of all regulations issued by agencies of the State of Maryland. The Maryland Register is COMAR's temporary supplement, printing all changes to regulations as soon as they occur. At least once annually, the changes to regulations printed in the Maryland Register are incorporated into COMAR by means of permanent supplements.

### CITATION TO COMAR REGULATIONS

COMAR regulations are cited by title number, subtitle number, chapter number, and regulation number. Example: COMAR 10.08.01.03 refers to Title 10, Subtitle 08, Chapter 01, Regulation 03.

### DOCUMENTS INCORPORATED BY REFERENCE

Incorporation by reference is a legal device by which a document is made part of COMAR simply by referring to it. While the text of an incorporated document does not appear in COMAR, the provisions of the incorporated document are as fully enforceable as any other COMAR regulation. Each regulation that proposes to incorporate a document is identified in the Maryland Register by an Editor's Note. The Cumulative Table of COMAR Regulations Adopted, Amended or Repealed, found online, also identifies each regulation incorporating a document. Documents incorporated by reference are available for inspection in various depository libraries located throughout the State and at the Division of State Documents. These depositories are listed in the first issue of the Maryland Register published each year. For further information, call 410-974-2486.

## HOW TO RESEARCH REGULATIONS

An Administrative History at the end of every COMAR chapter gives information about past changes to regulations. To determine if there have been any subsequent changes, check the "Cumulative Table of COMAR Regulations Adopted, Amended, or Repealed" which is found online at [www.dsd.state.md.us/CumulativeIndex.pdf](http://www.dsd.state.md.us/CumulativeIndex.pdf). This table lists the regulations in numerical order, by their COMAR number, followed by the citation to the Maryland Register in which the change occurred. The Maryland Register serves as a temporary supplement to COMAR, and the two publications must always be used together. A Research Guide for Maryland Regulations is available. For further information, call 410-260-3876.

### SUBSCRIPTION INFORMATION

For subscription forms for the Maryland Register and COMAR, see the back pages of the Maryland Register. Single issues of the Maryland Register are \$15.00 per issue.

### CITIZEN PARTICIPATION IN THE REGULATION-MAKING PROCESS

Maryland citizens and other interested persons may participate in the process by which administrative regulations are adopted, amended, or repealed, and may also initiate the process by which the validity and applicability of regulations is determined. Listed below are some of the ways in which citizens may participate (references are to State Government Article (SG), Annotated Code of Maryland):

- By submitting data or views on proposed regulations either orally or in writing, to the proposing agency (see "Opportunity for Public Comment" at the beginning of all regulations appearing in the Proposed Action on Regulations section of the Maryland Register). (See SG, §10-112)
- By petitioning an agency to adopt, amend, or repeal regulations. The agency must respond to the petition. (See SG §10-123)
- By petitioning an agency to issue a declaratory ruling with respect to how any regulation, order, or statute enforced by the agency applies. (SG, Title 10, Subtitle 3)
- By petitioning the circuit court for a declaratory judgment on the validity of a regulation when it appears that the regulation interferes with or impairs the legal rights or privileges of the petitioner. (SG, §10-125)
- By inspecting a certified copy of any document filed with the Division of State Documents for publication in the Maryland Register. (See SG, §7-213)

## REGULATIONS CODIFICATION SYSTEM

Under the COMAR codification system, every regulation is assigned a unique four-part codification number by which it may be identified. All regulations found in COMAR are arranged by title. Each title is divided into numbered subtitles, each subtitle is divided into numbered chapters, and each chapter into numbered regulations.

**09.12.01.01D(2)(c)(iii)**  
 Title            Chapter            Section            Paragraph  
                   Subtitle            Regulation        Subsection        Subparagraph

A regulation may be divided into lettered sections, a section divided into numbered subsections, a subsection divided into lettered paragraphs, and a paragraph divided into numbered subparagraphs.

## Cumulative Table of COMAR Regulations Adopted, Amended, or Repealed

This table, previously printed in the Maryland Register lists the regulations, by COMAR title, that have been adopted, amended, or repealed in the Maryland Register since the regulations were originally published or last supplemented in the Code of Maryland Regulations (COMAR). The table is no longer printed here but may be found on the Division of State Documents website at [www.dsd.state.md.us](http://www.dsd.state.md.us).

### Table of Pending Proposals

The table below lists proposed changes to COMAR regulations. The proposed changes are listed by their COMAR number, followed by a citation to that issue of the Maryland Register in which the proposal appeared. Errata pertaining to proposed regulations are listed, followed by “(err)”. Regulations referencing a document incorporated by reference are followed by “(ibr)”. None of the proposals listed in this table have been adopted. A list of adopted proposals appears in the Cumulative Table of COMAR Regulations Adopted, Amended, or Repealed.

MARYLAND RULES OF PROCEDURE
TITLE 1 - GENERAL PROVISIONS
CHAPTER 300 - GENERAL PROVISIONS

AMEND Rule 1-322.1 to clarify its applicability, to add a Committee note, to add a cross reference, to delete references to birth dates, to permit the filing of personal identifier information required to implement a court order, to correct internal references, and to make stylistic changes, as follows:

Rule 1-322.1. EXCLUSION OF PERSONAL IDENTIFIER INFORMATION IN COURT FILINGS

(a) Applicability
This Rule applies only to pleadings and other papers filed in an action on or after July 9, 2013 by a person other than a judge or

judicial appointee. The Rule does not apply to administrative records, business license records, or notice records, as those terms are defined in 16-1001 (a).

*Committee note:* Although not subject to this Rule, judges and judicial appointees should be aware of the purpose of the Rule and refrain from including personal identifier information in their filings, unless necessary.

*Cross reference:* For the definition of “action,” see Rule 1-202. For the prohibition against including certain personal information on recordable instruments, see Code, Real Property Article, §3-111. For the prohibition against publicly posting or displaying on an Internet Website certain personal information contained in court records, including notice records, see Code, Courts Article, §1-205.

[(a)] (b) Generally

[Unless] Except as otherwise provided in this Rule, required by law, [or] permitted by court order, or required to implement a court order, the following personal identifier information shall not be included in any electronic or paper filing with a court:

(1) an individual’s Social Security number[, or taxpayer identification number[, or date of birth]; or

(2) the numeric or alphabetic characters of a financial or medical account identifier.

[(b)] (c) Exceptions

Unless otherwise provided by law or court order, section [(a)] (b) of this Rule does not apply to the following:

(1) a financial account identifier that identifies the property allegedly subject to forfeiture in a forfeiture proceeding; or

(2) the record of an administrative agency proceeding[.];

[(3) in a charging document, the date of birth of the defendant; or

(4) a court record filed prior to July 1, 2013.]

[(c)] (d) Alternatives

If, by reason of the nature of the action, it is necessary to include in a filing personal identifier information described in section [(a)] (b) of this Rule, the filer may:

(1) include in the filing only the last four digits of the Social Security or taxpayer identification number[, the year of the individual’s birth,] or the last four characters of the financial or medical account identifier, unless that identifier consists of fewer than eight characters, in which event all characters shall be redacted;

*Committee note:* Financial accounts include credit and debit card accounts, bank accounts, brokerage accounts, insurance policies, and annuity contracts. PIN numbers or other account passwords also may need to be redacted, as well as health information identifiers.

(2) file the unredacted document under seal, if permitted by order of court;

(3) if the full information is required to be provided only to another party or to a court official, other than a judge or judicial appointee, provide the information separately to that party or official and file only a certificate that the information has been so provided;

*Committee note:* It may be necessary to provide personal identifier information to a court official, including a clerk, sheriff, or constable, in order for that official to send or serve notices, summonses, or other documents. Subsection [(c)(2)(A)] (d)(3) of this Rule is not intended to permit *ex parte* communications with a judge.

(4) if the full information is required to be in the filing and the filing is a paper filing, file the paper in duplicate, one copy with the information redacted as required by section [(a)] (b) of this Rule and one copy without redaction, together with instructions to the clerk to

shield the unredacted copy in conformance with the Rules in Title 16, Chapter 1000; or

(5) if the full information is required to be in the filing and the filing is electronic, designate, in conformance with the applicable electronic filing requirements, the information to be redacted or shielded for purposes of public access.

*Cross reference:* See Rule 20-201.

[(d)] (e) Protective Orders

For good cause, the court may, by order, in a case:

(1) require redaction of additional information; and

(2) limit or prohibit a nonparty’s remote electronic access to a document filed with the court.

*Committee note:* Other than remote access to docket entries, nonparties currently do not have remote access to documents filed with the court, except under certain limited circumstances, such as in asbestos-related litigation.

[(e)] (f) Non-conforming Documents

(1) Waiver

A person waives the protection of section [(a)] (b) of this Rule as to the person’s own information by filing it without redaction and not under seal.

(2) Sanctions

If a person fails to comply with this Rule, the court on motion of a party or on its own initiative, may enter any appropriate order.

*Committee note:* This Rule does not affect the discoverability of personal information.

*Source:* This Rule is in part derived from Fed. R. Civ. P. 5.2 (2007) and is in part new.

# Emergency Action on Regulations

## Symbol Key

- Roman type indicates text existing before emergency status was granted.
- *Italic type* indicates new text.
- [Single brackets] indicate deleted text.

## Emergency Regulations

Under State Government Article, §10-111(b), Annotated Code of Maryland, an agency may petition the Joint Committee on Administrative, Executive, and Legislative Review (AELR), asking that the usual procedures for adopting regulations be set aside because emergency conditions exist. If the Committee approves the request, the regulations are given emergency status. Emergency status means that the regulations become effective immediately, or at a later time specified by the Committee. After the Committee has granted emergency status, the regulations are published in the next available issue of the Maryland Register. The approval of emergency status may be subject to one or more conditions, including a time limit. During the time the emergency status is in effect, the agency may adopt the regulations through the usual promulgation process. If the agency chooses not to adopt the regulations, the emergency status expires when the time limit on the emergency regulations ends. When emergency status expires, the text of the regulations reverts to its original language.

## Title 08

# DEPARTMENT OF NATURAL RESOURCES

## Subtitle 02 FISHERIES SERVICE

### Notice of Emergency Action

[13-203-E]

The Joint Committee on Administrative, Executive, and Legislative Review has granted emergency status to:

(1) Amendments to Regulations **.01** and **.02** under **COMAR 08.02.05 Fish**;

(2) Amendments to Regulation **.04** under **COMAR 08.02.11 Fishing in Nontidal Waters**; and

(3) New Regulations **.01** and **.02** under a new chapter, **COMAR 08.02.25 Gear**.

**Emergency status began: July 1, 2013.**

**Emergency status expires: December 27, 2013.**

### Comparison to Federal Standards

There is no corresponding federal standard to this emergency action.

### Estimate of Economic Impact

**I. Summary of Economic Impact.** The emergency action has an economic impact.

| II. Types of Economic Impact.               | Revenue (R+/R-)     | Magnitude      |
|---|---------------------|----------------|
|   | Expenditure (E+/E-) |                |
| A. On issuing agency:                       | NONE                |                |
| B. On other State agencies:                 | NONE                |                |
| C. On local governments:                    | NONE                |                |
|   | Benefit (+)         | Magnitude      |
|   | Cost (-)            |                |
| D. On regulated industries or trade groups: |                     |                |
| Recreational anglers                        | (+)                 | Indeterminable |

E. On other industries or trade groups:

Bait and tackle shops and gear manufacturers (+) Indeterminable

F. Direct and indirect effects on public: NONE

**III. Assumptions.** (Identified by Impact Letter and Number from Section II.)

D. The regulations will have an overall positive economic impact on the regulated industry. Recreational users will now be legally able to use a small trap for bait purposes. They will also be able to use crossbows for fishing. There is also a negative economic impact because finfish trotlines are limited to 25 hooks per line, and other nonactive line fishing gear is limited to no more than 25 lines per person. The Department is not aware of persons using more nonactive line fishing gear than is purposed. Overall, the recreational and charter boat community may see some slight indeterminable positive impact from the ability to use traps and catch their own bait.

E. By allowing new gear, bait shops and gear manufacturers may see a slight increase in their revenues as they are now able to sell more types of gear for use in the recreational fishery in Maryland. The amount of the impact is indeterminable and will depend on user demand.

### Economic Impact on Small Businesses

The emergency action has minimal or no economic impact on small businesses.

## Subtitle 02 FISHERIES SERVICE

### Notice of Emergency Action

[13-193-E]

The Joint Committee on Administrative, Executive, and Legislative Review has granted emergency status to amendments to:

- (1) Regulation .07 under COMAR 08.02.05 Fish; and
- (2) Regulation .03 under COMAR 08.02.12 Endangered and Threatened Fish Species.

Emergency status began: June 17, 2013.

Emergency status expires: August 29, 2103.

### Comparison to Federal Standards

There is no corresponding federal standard to this proposed action.

### Estimate of Economic Impact

I. Summary of Economic Impact. The proposed action has a negative economic impact.

### II. Types of Economic Impact.

| Revenue (R+/R-) | Expenditure (E+/E-) | Magnitude |
|-----------------|---------------------|-----------|
|-----------------|---------------------|-----------|

A. On issuing agency: NONE

B. On other State agencies: NONE

C. On local governments: NONE

| Benefit Cost (-) | (+) | Magnitude |
|------------------|-----|-----------|
|------------------|-----|-----------|

D. On regulated industries or trade groups:

- (1) Revenue (-) 146,426
- (2) Expenditures (-) Indeterminable

E. On other industries or trade groups: NONE

F. Direct and indirect effects on public:

- (1) Bait and Tackle Stores (-) Indeterminable
- (2) Recreational Fishermen and Crabbers (-) Indeterminable

III. Assumptions. (Identified by Impact Letter and Number from Section II.)

D(1). The projected decrease in revenue to the commercial industry is a 20% reduction of the dockside value for the 10-year average Atlantic menhaden harvest in Maryland. The actual annual reduction will vary by year, but should average around 20% as this is the target level of reduction in landings required by the Atlantic States Marine Fisheries Commission. Seafood dealers will also see a reduction in revenue as there will be fewer menhaden for them to sell. The reduction in revenue for seafood dealers is indeterminable as there is no way to calculate the lost profits of the dealers with regards to the reduction of the menhaden harvest.

D(2). There will likely be an indeterminable amount of increased expenditure by the commercial industry because of these regulations. Atlantic menhaden is the preferred bait of crab pot fishermen. As such, a reduction in bait availability caused by these regulations could increase the price of bait and therefore increase operating costs for individual fishermen. It is likely that the industry will find alternatives for bait or compensate for lower menhaden availability through fishing behavior, but some increase in expenditures is likely.

F(1). Tackle stores often sell bait to fishermen, including Atlantic menhaden. With the reduction in the menhaden harvest, bait stores will have less access to menhaden to sell in their stores. The amount of these reductions is not quantifiable due to pricing variability and unknown distribution of sales.

F(2). Recreational anglers use Atlantic menhaden for bait in various fisheries in the Chesapeake Bay and along the Atlantic Coast. If bait prices increase due to lower than normal supply, these anglers will have to pay more to use menhaden as bait. Individual fishermen's response to increased bait price or unavailability will vary, making quantifying any effect difficult.

### Economic Impact on Small Businesses

The proposed action has a meaningful economic impact on small business. An analysis of this economic impact follows.

### Subtitle 13 MARYLAND INFANTS AND TODDLERS PROGRAM

#### 13A.13.01 *Provision of Early Intervention Services to Infants and Toddlers and Their Families*

Authority: Education Article, §§8-416, Annotated Code of Maryland Federal Regulatory Reference: 34 CFR 99, 300, 303

##### Notice of Final Action

[13-016-F]

On March 28, 2013, the Maryland State Board of Education adopted the repeal of existing Regulations .01—.13 and new Regulations .01—.14 under COMAR 13A.13.01 *Provision of Early Intervention Services to Infants and Toddlers and Their Families*. This action, which was proposed for adoption in 40:2 Md. R. 132—144 (January 25, 2013), has been adopted with the nonsubstantive changes shown below.

**Effective Date: August 5, 2013.**

##### Attorney General's Certification

In accordance with State Government Article, §10-113, Annotated Code of Maryland, the Attorney General certifies that the following changes do not differ substantively from the proposed text. The nature of the changes and the basis for this conclusion are as follows:

There are 22 changes to the proposed regulations. Five changes are typographical. Fourteen changes make the applicable law explicit in the regulations. Three changes do not worsen the position of any group affected by the regulation or the general public and they could reasonably have been anticipated by the participants in the rulemaking.

The four typographical changes are:

Regulation .03B(13): Corrects a citation which read “defined in §(40)” to “as defined in §(49).”

Regulation .05C(2): Corrects a citation which read “assessments described in §B of this regulation” to “assessments described in §C(1) of this regulation.”

Regulation .07B(3)(h): Corrects a citation which read “Regulation .07 of this chapter” to “Regulation .09 of this chapter.”

Regulation 09E(2): Corrects an omission and deletes one word. The original language “The local lead agency shall convene an IFSP team meeting transition planning meeting [...] with the approval of the child’s to discuss any preschool special education services” was corrected to “The local lead agency shall convene an IFSP team [[meeting]] transition planning meeting [...] with the approval of the child’s family to discuss any preschool special education services.”

Fifteen changes make the applicable law explicit in the regulations. These changes are not substantive because they merely reflect the legal requirements that implicitly governed the proposed regulations – that services provided to children with disabilities age 0 to 2 will conform to requirements in existing federal law, the Individuals with Disabilities Education Act and its corresponding regulations. The fifteen changes are:

Regulation .03B(39): Amends the definition of ‘multidisciplinary’ by adding consistent with 34 CFR §303.24.

Regulation .03B(45)(a)(v): Amends the definition of ‘parent’ by adding consistent with Regulation .13 of this chapter.

Regulation .04B(2)(c): Corrects a citation which read “Regulation .11 of this chapter” to “Regulation .12 of this chapter.”

Regulation .04B(3)(a): Corrects a citation which read “Regulation .10 of this chapter” to “Regulation .11 of this chapter.”

Regulation .04B(3)(b): Corrects a citation which read “Regulation .11 of this chapter” to “Regulation .12 of this chapter.”

Regulation .04B(7)(b): Corrects a citation which read “Regulation .03B(28) of this chapter” to “Regulation .03B(29) of this chapter.”

Regulation .05A(1)(b): Corrects a citation which read “Regulation .11 of this chapter” to “Regulation .12 of this chapter.”

Regulation .05A(3)(c): Corrects a citation which read “Regulation .03B(11) of this chapter” to “Regulation .03B(12) of this chapter.”

Regulation .05E(1): Corrects a citation which read “Regulation .03B(28) of this chapter” to “Regulation .03B(29) of this chapter.”

Regulation .05E(5): Corrects a citation which read “Regulation .03B(28) of this chapter” to “Regulation .03B(29) of this chapter.”

Regulation .07B(3)(h): Corrects a citation which read “Regulation .07 of this chapter” to “Regulation .09 of this chapter.”

Regulation .08C(6): Adds consistent with 34 CFR §303.112.

Regulation .09B(11): Corrects a citation which read “Regulation .11 of this chapter” to “Regulation .12 of this chapter.”

Regulation .11B(3): Corrects a citation which read “Regulation .09A of this chapter” to “Regulation .10A of this chapter.”

Regulation .12C: Corrects a citation which read “Regulation .13C of this chapter” to “Regulation .14C of this chapter.”

Three changes do not worsen the position of any group affected by the regulation or the general public and they could reasonably have been anticipated by the participants in the rulemaking. These changes occurred in response to public comments received from school systems, disability and special education advocates, parents, and others in the community.

Regulation .03B(11)(a): Amends the definition of ‘Developmental delay’ by adding “using a child’s adjusted or chronological age” after “A 25 percent delay”, and before “and as measured and verified by appropriate diagnostic instruments and procedures, in one or more of the following developmental areas.”

Regulation .03B(2): Adds a definition “Adjusted age means, for children born before 37 weeks gestation, the number of weeks born prematurely subtracted from the infant’s chronological age. An infant’s adjusted age is used until the infant’s adjusted age is twelve months.”

All infants are evaluated for disabilities in part by determining when they achieved developmental milestones and whether their milestone achievements are delayed compared to their peers. Several commenters, including the University of Maryland School of Medicine, the Maryland Developmental Disabilities Council, infants and toddler programs, advocates for children with disabilities, parents, grandparents, family members, and the State Interagency Coordinating Council (SICC) requested the addition of the ‘adjusted age’ definition in .03B(2) and .03B(11)(a). Commenters noted that some Maryland Infants and Toddlers Programs use a child’s chronological age while others used an adjusted age, and that the United States Department of Education’s Office of Special Education Programs (OSEP) recommended clarifying this inconsistency during a review of Maryland’s services to infants and toddlers with disabilities, as the inconsistency causes duplication of services, which is barred under 34 CFR § 303.302(c)(2)(i) and the use of criteria different than that used by Neonatal Intensive Care Units (NICUs) failed to comply with service coordination requirements under 34 CFR 303.302(c)(1). Commenters also noted that the SICC identified that Infant and Toddler Programs were not consistent in the use of chronological age or adjusted age and advised MSDE as required under 34 CFR § 303.651 that this inconsistency be corrected.

The adjusted age is only applicable to those children born prematurely and potentially referred to local Infants and Toddlers

Program (ITPs) following release from a NICU (Neonatal Intensive Care Unit). NICU follow-up clinics use certain criteria to follow prematurely born children at risk for developmental delay. Many of these children will make up their developmental delay through ongoing monitoring with the NICU follow-up clinic prior to age one. Using adjusted age ensures that Infant and Toddler Programs do not duplicate services to infants receiving services from NICU follow-up clinics.

If the ITPs use chronological age, both the NICU follow-up clinics and the ITPs may be serving the same children (duplication). This is inconsistent with 34 CFR §303.302(c)(2). Also including adjusted age provides consistency for parents across NICUs and LITPs (coordination) consistent with 34 CFR §303.302(c)(1). The ITPs would be speaking the same language that parents are hearing from the NICUs.

These changes clarify for statewide practice that proper evaluation for infants born prematurely is not based on their chronological age but on their adjusted age. These changes are not substantive because the changes reflect the legal requirements on coordination and non-duplication that implicitly governed the proposed regulations. These changes also comply with the recommendations given by the SICC and OSEP and ensure consistency across Maryland Infant and Toddler programs as with other agencies that serve children with disabilities, e.g. Neo-natal Intensive Care Unit (NICUs). This change increases program efficiency by reducing duplicative efforts to serve this population, which allows more children to be served.

Regulation .09B(2)(a): Amended the requirement to have a meeting to develop a child's transition plan "when the child is 24-months-old" to at the IFSP meeting closest to the child's second birthday. This change clarifies the timelines regarding which IFSP meeting will include development of the child's transition plan out of Infants and Toddlers services.

## Symbol Key

- Roman type indicates existing text of regulation.
- *Italic type* indicates proposed new text.
- [Single brackets] indicate text proposed for deletion.

## Promulgation of Regulations

An agency wishing to adopt, amend, or repeal regulations must first publish in the Maryland Register a notice of proposed action, a statement of purpose, a comparison to federal standards, an estimate of economic impact, an economic impact on small businesses, a notice giving the public an opportunity to comment on the proposal, and the text of the proposed regulations. The opportunity for public comment must be held open for at least 30 days after the proposal is published in the Maryland Register.

Following publication of the proposal in the Maryland Register, 45 days must pass before the agency may take final action on the proposal. When final action is taken, the agency must publish a notice in the Maryland Register. Final action takes effect 10 days after the notice is published, unless the agency specifies a later date. An agency may make changes in the text of a proposal. If the changes are not substantive, these changes are included in the notice of final action and published in the Maryland Register. If the changes are substantive, the agency must repropose the regulations, showing the changes that were made to the originally proposed text.

Proposed action on regulations may be withdrawn by the proposing agency any time before final action is taken. When an agency proposes action on regulations, but does not take final action within 1 year, the proposal is automatically withdrawn by operation of law, and a notice of withdrawal is published in the Maryland Register.

**Notice of Proposed Action**

[13-198-P-I]

The Maryland Health Care Commission proposes to adopt new Regulation .01 under **COMAR 10.24.13 State Health Plan for Facilities and Services: Hospice Services**. This action was considered by the Commission at an open meeting held on June 20, 2013, notice of which was given through publication in the Maryland Register, under State Government Article, §10-506, Annotated Code of Maryland.

**Statement of Purpose**

The purpose of this action is to replace the hospice services portion of the State Health Plan Chapter on nursing home, home health agency, and hospice services, with a new Chapter focused solely on hospice services. The purpose is to account for changes in the health care system that have occurred since this portion of the State Health Plan was last updated in 2007. This update includes policies, certificate of need review standards and procedural rules, and a need projection methodology.

This section is intended to provide a policy blueprint for the Commission and affected industries to address issues related to the provision of hospice services. It also provides procedural rules and standards as well as a methodology to guide the certificate of need review process.

**Comparison to Federal Standards**

There is no corresponding federal standard to this proposed action.

**Estimate of Economic Impact**

**I. Summary of Economic Impact.** This new chapter provides planning policies, certificate of need review standards, and a need methodology to guide the development of hospice services.

| E. On other industries or trade groups:     | (+)                 | Moderate      |

F. Direct and indirect effects on public: (+) Significant

**III. Assumptions.** (Identified by Impact Letter and Number from Section II.)

A. Maryland Health Care Commission. The Commission accepts certificate of need (CON) proposals from applicants when need has been identified. This Chapter identifies some need for increase in hospice capacity. There may also be staff reviews that occur due to purchase or reconfiguration of existing hospices, or CON reviews of development of inpatient units. There are new policy directions for hospice care articulated in the chapter. Any anticipated CON reviews and staff efforts to support this Chapter can be accommodated by current staff within the Commission’s budget.

B(1). Medicaid. Medicaid accounts for a very small proportion of hospice care since it is primarily reimbursed under Medicare. In 2011, Medicaid was the payor for three percent of hospice patients. Therefore, any development of hospice programs should have minimal impact on the Medicaid program.

B(2). Office of Health Care Quality. Any new hospice programs approved by the Commission would need to be licensed by the Office of Health Care Quality (OHCQ). Since there is only a moderate increase in overall capacity projected, this will have a minimal impact on the number of licensing and certification surveys currently conducted by OHCQ staff and thus can be accommodated within their budget. There are policies and goals articulated within the chapter that involve the Commission working with OHCQ, and this is consistent with the policy direction of OHCQ and the Commission.

C. Local Government. Since local governments are not direct providers of hospice services, there will not be an impact on local government providers. The Commission plans to work on outreach to underserved populations, which should benefit local governments.

D. Regulated Industries or Trade Groups. The proposed regulations are expected to have a positive impact on regulated industries. By providing clear policy direction, projecting small controlled growth, and developing standards and policies for CON review, the Commission is providing direction for future growth and changes in the industry. In addition, the Commission plans to work with the industry in the use of quality measures as well as education and outreach to underserved communities.

E. Other Industries or Trade Groups. Not relevant

F. Public. Since the chapter includes a methodology to project need for hospice services, these programs can be developed to meet projected demand for services. Also, the Commission will work with the hospice industry to help educate the public about the availability of hospice services.

**Economic Impact on Small Businesses**

The proposed action has minimal or no economic impact on small businesses.

**Impact on Individuals with Disabilities**

The proposed action has no impact on individuals with disabilities.

Comments will be accepted through 4:30 p.m. on August 26, 2013. A public hearing has not been scheduled.

**Subtitle 07 MARYLAND  
TRANSPORTATION AUTHORITY**

**11.07.07 Electronic Toll Collection and Toll Violation Enforcement**

Authority: Transportation Article, §§4-205, 4-312, 21-1414, 21-1415, 26-401, and 27-110[.]; Courts and Judicial Proceedings Article, §§ 7-301, 7-302; Annotated Code of Maryland

**Notice of Proposed Action**  
[13-195-P]

The Executive Secretary of the Maryland Transportation Authority (MDTA) proposes to repeal existing Regulations .01—.06 and adopt new Regulations .01—.09 under COMAR 11.07.07 **Electronic Toll Collection and Toll Violation Enforcement**. This action was considered by the Chairman and members of the Maryland Transportation Authority at an open meeting held on March 28, 2013, notice of which was given through placement on the MDTA website (www.mdta.maryland.gov).

**Statement of Purpose**

The purpose of this action is to repeal existing regulations and adopt new regulations to clarify the process of electronic toll collection and toll violation enforcement pursuant to House Bill 420, Chapter 113, Acts of 2013.

**Comparison to Federal Standards**

There is no corresponding federal standard to this proposed action.

**Estimate of Economic Impact**

**I. Summary of Economic Impact.** The MDTA will expend funds to establish the computer program needed to implement the new video toll enforcement process. The proposed process will allow the effective collection of unpaid tolls due to the MDTA. If vehicle owners disregard notice of toll due ("NOTD") an increase in funds may be realized as a result of the addition of the \$50 civil penalty.

| II. Types of Economic Impact.               | Revenue (R+/R-)         |           |
|---|-------------------------|-----------|
|   | Expenditure (E+/E-)     | Magnitude |
| A. On issuing agency:                       | (R+)                    | Unknown   |
| B. On other State agencies:                 | (R+)                    | Unknown   |
| C. On local governments:                    | NONE                    |           |
|   | Benefit (+)<br>Cost (-) | Magnitude |
| D. On regulated industries or trade groups: | (-)                     | Unknown   |
| E. On other industries or trade groups:     | (-)                     | Unknown   |
| F. Direct and indirect effects on public:   | (-)                     | Unknown   |

**III. Assumptions.** (Identified by Impact Letter and Number from Section II.)

A. The MDTA will likely receive additional funds because it will now be collecting the \$50 civil penalty, which previously was uncollected.

B. The MVA will now be able to refuse renewal or suspend vehicle registrations for unpaid tolls. This is new and will result in increase revenue because of the fee related to removing the restriction for non-renewal or suspension.

D., E., and F. If members of a trade group or regulated industry do not pay their Notice of Toll Due within the allowed 30 days they will be subject to the \$50 civil penalty.

**Economic Impact on Small Businesses**

The proposed action has a meaningful economic impact on small business. An analysis of this economic impact follows:

The financial impact on small businesses is unknown because we are unable to know the number of small businesses that will not pay the toll during the NOTD phase of the process.

**Impact on Individuals with Disabilities**

The proposed action has no impact on individuals with disabilities.

**Opportunity for Public Comment**

Comments may be sent to Patrick A. Fleming, Manager of Government Relations, Maryland Transportation Authority, 2310 Broening Hwy, Ste 120, Baltimore MD 21224, or call 410-537-1089, or email to pfleming2@mdta.maryland.gov, or fax to 410-537-5653. Comments will be accepted through August 26, 2013. A public hearing has not been scheduled.

**Open Meeting**

Final action on the proposal will be considered by The Maryland Transportation Authority during a public meeting to be held on September 26, 2013 at 9 am, at 2310 Broening Hwy, Baltimore, MD 21224.

The purpose of this action is to permit domestic partners enrolled in the State Employee and Retiree Health and Welfare Benefits Program as of June 30, 2013, to continue their health benefits coverage throughout the 2014 Calendar Plan Year. This action serves to provide domestic partners with a sufficient transition period prior to the repeal of domestic partner benefits. Emergency regulations were submitted simultaneously to implement these changes in time for the short Plan Year that begins July 1, 2013. Under the Civil Marriage Protection Act same sex couples may now legally marry in Maryland, thus obviating the need to provide coverage for same sex domestic partners.

**Comparison to Federal Standards**

There is no corresponding federal standard to this proposed action.

**Estimate of Economic Impact**

The proposed action has no economic impact.

**Economic Impact on Small Businesses**

The proposed action has minimal or no economic impact on small businesses.

**Impact on Individuals with Disabilities**

The proposed action has no impact on individuals with disabilities.

The Secretary of the Environment proposes to:

(1) Amend Regulations .02 and .03 under **COMAR 26.09.01 General Administrative Provisions;**

(2) Amend Regulations .02, .03, .05, .07, and .11 under **COMAR 26.09.02 Applicability, Determining Compliance, and Allowance Distribution;**

(3) Amend Regulations .01, .02, .04, .05, and .09 under **COMAR 26.09.03 Offset Projects;** and

### Statement of Purpose

The purpose of this action is to amend regulations under Code of Maryland Regulations (COMAR) 26.09, Maryland CO<sub>2</sub> Budget Trading Program, with program improvements developed in conjunction with other participating states during the 2012 Comprehensive Region Greenhouse Gas Initiative (RGGI) Program Review. This proposed action includes the following revisions:

1. A reduction in the Maryland CO<sub>2</sub> emissions budget;
2. Adjustments to the emissions budget through 2020 to offset the large private bank of allowances to ensure a binding cap;
3. Adoption of a new mechanism, the Cost Containment Reserve (CCR), to reduce price volatility in the allowance market;
4. The addition of an interim compliance period;
5. The addition of new "minimum reserve price" and "long term contract price" definitions;
6. Replacement of the existing afforestation offset protocol with a new, more inclusive, forest offset protocol;
7. Revisions to other definitions.

### The Regional Greenhouse Gas Initiative

The Healthy Air Act was signed into law on April 6, 2006 and required Maryland to join the Regional Greenhouse Gas Initiative (RGGI) by July 2007. Maryland joined RGGI when Governor Martin O'Malley signed RGGI's multi-state Memorandum of Understanding (MOU) on April 20, 2007. The Department subsequently adopted COMAR 26.09.01 to .03, implementing the "Maryland CO<sub>2</sub> Budget Trading Program", which became effective on July 17, 2008. COMAR 26.09.04 ("Auctions") became effective as a permanent regulation on August 25, 2008.

RGGI is comprised of nine states in the Northeast and Mid-Atlantic regions. These states adopted market-based carbon dioxide (CO<sub>2</sub>) cap and trade programs designed to reduce emissions of CO<sub>2</sub>, a greenhouse gas, from fossil fuel-fired electricity generators with a nameplate capacity of 25 megawatts or greater. RGGI currently is comprised of Connecticut, Delaware, Maine, Massachusetts, New Hampshire, New York, Rhode Island, Vermont, and Maryland. New Jersey discontinued participation after the end of the first compliance period, 2009-2011. Participating RGGI states require electricity generators to have acquired, through regional auction or secondary market transactions, one CO<sub>2</sub> allowance for every ton of CO<sub>2</sub> emitted over a 3-year compliance period. Auction proceeds fund a number of state programs, including energy efficiency programs that result in lower CO<sub>2</sub> emissions through reduced electricity demand. Further, auction proceeds fund renewable energy projects which reduce the amount of CO<sub>2</sub> emissions generated by fossil-fuels electricity generators.

The RGGI program has several unique features unlike other cap and trade programs in the U.S. The allowances are controlled by the states and can be allocated or sold to sources. Most states have opted to auction the allowances to sources through quarterly auctions. Proceeds from the auctions are used to fund energy efficiency programs to reduce demand for electricity and provide a means to lower CO<sub>2</sub> emissions. The states conducted the first quarterly regional auction in September 2008, and the program officially began in January 2009.

RGGI set a cap of 188,076,976 tons of CO<sub>2</sub> emissions for the region, based on average 2000 to 2002 CO<sub>2</sub> emissions from electricity generators subject to the program. Maryland receives 37,503,983 CO<sub>2</sub> allowances each year through 2013. Maryland will receive 20,360,944 CO<sub>2</sub> allowances in 2014. Between 2015 and 2020, Maryland will annually receive 2 ½ percent fewer CO<sub>2</sub> allowances, as the RGGI cap reduces by 10 percent during that time. Maryland has set aside 7,388,491 allowances in 4 different set aside accounts to account for special needs or programs.

RGGI has completed its first control period, 2009-2011. The regional auctions have generated almost a billion dollars in revenue for the states. These funds were used to provide funding for energy efficiency and renewable energy programs, rebates to ratepayers, bill payment for low income ratepayers and general fund relief.

### The 2012 Comprehensive Program Review Process

Each participating state's CO<sub>2</sub> Budget Trading Program is based on the 2008 RGGI Model Rule, which was developed to provide guidance to states as they implemented the RGGI program. RGGI participating states have completed a 2012 Program Review, which consisted of a comprehensive evaluation of program successes, program impacts, the potential for additional reductions, emissions leakage, and offsets.

Amendments to the Model Rule were developed by the RGGI state staff as part of the Program Review. This effort was supported by an extensive regional stakeholder process that engaged the regulated community, environmental non-profit and other organizations with technical expertise in the design of cap-and-trade programs.

Carbon dioxide emissions in the RGGI region have declined substantially. One factor contributing to the decrease in regional emissions has been a shift in use of natural gas over coal and oil for fuel at electricity generators due to a significant decrease in the price of natural gas. Another factor is an economic downturn that began in late 2008. As electric generating companies acquired CO<sub>2</sub> allowances equal to their emissions, some CO<sub>2</sub> allowances offered at the regional auctions were not sold. Maryland regulations allow these allowances to be offered for sale at a subsequent auction or to be retired. With demand for allowances through the auction smaller than the amount of allowances offered, the participating states held the unsold allowances until the end of the first compliance period. This allowed the states to determine whether demand exists for the allowances or whether retirement would provide the best environmental benefit. The states determined that the unsold allowances should be retired and retired 102,631,137 allowances. Maryland retired 19,794,971 unsold allowances.

### Maryland Set Asides

Maryland retains four set aside accounts for special purposes. The four set aside accounts are: 1) the Limited Industrial Exemption Set Aside; 2) the Long Term Contract Set Aside; 3) the Clean Generation Set Aside; and the 4) Voluntary Renewable Set Aside. The Limited Industrial Exemption Set Aside allows the Department to retire allowances equal to the emissions of industrial sources that generate their own electricity but have been exempted from RGGI because they do not sell electricity to the grid. The Long Term Contract Set Aside allows sources with long term contracts prescribing what those sources may charge for electricity to obtain a set amount of allowances at the auction reserve price. The Clean Generation Set Aside provides allowances to new, clean fossil-fuel electric generation sources as an incentive. The incentive lasts for 6 years. The Voluntary Renewable Set Aside allows the Department to retire allowances proportional to renewable energy credits purchased voluntarily to be retired on behalf of RGGI.

In addition to some of the allowances going unsold at auction, many of the CO<sub>2</sub> allowances allocated to Maryland's set-aside accounts were not utilized. The Department previously reviewed the need and usage of the set asides. The Department determined the set asides served useful purposes but recognized usage could be sporadic. The process for populating the set aside accounts was revised to retain unused set aside allowances in the accounts and only add new allowances to replenish the accounts to their regulatory limit. In this manner, more current year allowances would go directly

to auction. Although some of these allowances may go unsold, this process allows a greater percentage of Maryland's allowances to enter the marketplace earlier.

Amendments to COMAR 26.09:

1. Reduction in the Maryland CO<sub>2</sub> Emissions Budget

The Regional Emissions Cap in 2014 will be equal to 91 million tons. The original 2.5% per year reduction to the regional RGGI cap for the years 2015 through 2020 is maintained. This change reflects the substantial drop in CO<sub>2</sub> emissions since 2006 and serves to preserve these reductions. The Maryland CO<sub>2</sub> emissions budgets for 2014-2020 are similarly reduced.

2. Adjustments to the Emissions Budget through 2020 to Offset the Large Private Bank of Allowances

The private bank of allowances is addressed through the following two distinct budget adjustments:

- The First Control Period Interim Adjustment for Banked Allowances (first adjustment), adjusts the budget for 100 percent of the first control period private bank of allowances (vintages 2009, 2010, & 2011) held by market participants as of the end of the first control period, that are in addition to the total quantity of first control period emissions. The first adjustment timing and algorithm is described in the regulations and is made over the 7 year period 2014-2020.

- The Second Control Period Interim Adjustment for Banked Allowances (second adjustment), adjusts the budget for 100 percent of the 2012 and 2013 vintage allowances held by market participants as of the end of 2013, that are in addition to the total quantity of 2012 and 2013 emissions. The Second Control Period adjustment timing and algorithm is described in the regulations and will be determined for the 6 year period from 2015 through 2020 based on the actual size of the 2012 and 2013 vintage private bank at the beginning of 2014. This change helps to ensure a binding cap, given the opportunity for sources to accumulate surplus low cost allowances while states implement the regulatory changes needed to establish the lower cap.

3. Adoption of a new mechanism, the Cost Containment Reserve (CCR), to Reduce Price Volatility in the Allowance Market

The Cost Containment Reserve

These amendments create a cost containment reserve (CCR) and specify how it will be used in order to provide flexibility and cost containment for the program. The CCR would consist of a fixed quantity of allowances, in addition to the cap, that would be held in reserve, and only made available for sale if allowance prices were to exceed predefined price levels.

- The regulations prescribe an annual CCR withdrawal limit of MD's portion of the total RGGI 5 million allowances in 2014, and an annual CCR withdrawal limit of MD's portion of the total RGGI 10 million allowances thereafter. The CCR would initially be populated in 2014, and in subsequent years would be replenished only as needed to maintain the withdrawal limit.

- Allowances from the CCR would be fully fungible.

- The CCR allowances would be made available immediately in any auction in which demand for allowances at prices above the CCR trigger price exceeds the supply of allowances offered for sale in that auction.

- If the CCR is triggered, the CCR allowances will only be sold at or above the CCR trigger price.

- CCR Trigger Prices: \$4 in 2014, \$6 in 2015, \$8 in 2016, and \$10 in 2017. Each year after 2017, the CCR trigger price will increase by 2.5%.

Offset Trigger Mechanisms

The regulations delete the existing offset price triggers that raise the allowable percentage of offsets and that allow the use of international CO<sub>2</sub> emission credit retirements. The allowable offset percentage would remain at 3.3%, and only those offset credits that

satisfy all regulatory requirements for a specific project category (including any new categories added) may be used for compliance. These changes are consistent with the decision to add a CCR mechanism and address the need for cost control in a much more transparent and predictable way. These changes help to reduce price volatility through increasing supply when prices are rising quickly.

4. The addition of an Interim Compliance Period

The regulations create interim control periods that include the following components:

- The addition of new defined terms, including:

- "Interim Control Period," defined as each of the first 2 calendar years of each 3-year control period.

- "Excess Interim Emissions," defined as any emissions (above 50%) over the amount of allowances held at the end of each Interim Control Period.

- A new general requirement for sources to hold allowances to cover 50% of emissions for each Interim Control Period, subject to the existing true-up process and a March 1 deadline.

- The final compliance true-up at the end of the 3-year control period will continue to require sources to hold allowances to cover 100% of the emissions for the 3 years.

- The allowances already deducted to meet each of the two annual Interim Control Period obligations will be subtracted from the 3-year compliance true-up obligation.

- Each ton of Excess Interim Emissions will be considered a violation, subject to the ordinary existing enforcement provisions of the relevant agency on an annual basis.

- The deletion of existing offset triggers and regulatory terms related to the potential to extend the control period to 4 years. This change simplifies the program and ensures that sources are maintaining their compliance obligations.

5. The Addition of New "minimum reserve price" and "long term contract price" Definitions

Reserve Price

The regulations simplify the reserve price calculation. The reserve price is set at \$2.00 in 2014 and increases by 2.5 percent each year thereafter. Use of the Consumer Price Index to adjust the reserve price is eliminated, as well as the definition of "current market reserve price". The "long term contract price" is defined in the same manner as the "minimum reserve price".

6. Replacement of the Existing Afforestation Offset Protocol with a New, More Inclusive, Forest Offset Protocol

Forestry Offset

The regulations contain language that substitutes a new offset category known as "Sequestration of carbon due to reforestation, improved forest management or avoided conversion" that States may adopt in lieu of the existing Afforestation category.

A RGGI U.S. Forests Offset Protocol has been developed, based mainly on the California Air Resources Board (CARB) U.S. Forests Offset Protocol, to include:

- Improved Forest Management;

- Avoided Conversion; and

- Reforestation (which would replace the existing RGGI Afforestation category type).

Wherever possible, the Model Rule intentionally maintains consistency with the CARB protocol to leverage work done by CARB and the Climate Action Reserve (CAR).

One difference between the RGGI and CARB protocols is the approach to addressing reversals and ensuring permanence of offset projects. The RGGI protocol uses a discounting approach, instead of the buffer account approach used by CARB. Forestry projects that have generated credits in a voluntary offset program would be permitted to transfer to the RGGI program, assuming that they meet all other RGGI requirements and there is no double-counting. The general additionality requirements for existing RGGI offset

There is no corresponding federal standard to this proposed action.

**Estimate of Economic Impact**

**I. Summary of Economic Impact.** The lowering of the regional CO<sub>2</sub> cap to 91 million will result in positive economic benefits to the Maryland economy. The money raised from the auction of allowances will be reinvested in the Maryland economy to provide more jobs and reduce energy usage. Maryland revenues from the regional CO<sub>2</sub> allowance auction are deposited in the Strategic Energy Investment Fund (SEIF). The Maryland Energy Administration (MEA) administers the fund, allocating the proceeds to various purposes as directed by statute. Many agencies benefit from these proceeds, including MEA. The proceeds fund various energy efficiency, renewable energy and climate change programs, as well as low income bill payment and other low income energy assistance programs. The power sector and commercial and industrial industries will experience some additional costs as a result of the lowered cap. However, residents and the renewable energy and construction sector will benefit.

**III. Assumptions.** (Identified by Impact Letter and Number from Section II.)

A. Department revenues are expected to increase as a result of higher allowance prices even though the number of CO<sub>2</sub> allowances Maryland will sell as a result of the lower CO<sub>2</sub> allowance budget will decrease.

B. SEIF revenues are projected to increase as a result of higher allowance prices even though Maryland’s CO<sub>2</sub> allowance budget decreases. MEA is responsible for the administration of Maryland’s portion of the RGGI auction proceeds. The projected revenue is based on economic modeling of future allowance prices and the quantity of allowances available each year from 2014-2020. Increased energy efficiency and renewable energy spending resulting from the lowered CO<sub>2</sub> cap is projected to result in a net positive gain of jobs within Maryland, which may increase the tax revenues to the State government

C. A number of programs funded through SEIF are specific to local governments, including several revolving loan programs and energy efficiency programs. As the fund increases more revenues can be allocated these programs.

D(1). The power sector will be responsible for buying the allowances necessary to comply with the regulation. This will increase their operating costs. \$415.4 million is the difference between projected allowance expenditures with the 165 million ton regional cap and the new cap of 91 million tons. Additionally, there may be technology changes or improvements implemented by the generators to reduce emissions. These potential additional costs are not quantified at this time.

D(2). The construction industry will benefit from the increased spending on energy efficiency improvements to homes, businesses and government buildings.

D(3). Renewable energy can be purchased for credits by the energy producers subject to the RGGI regulations. As such there will be increased demand for, and increased spending on, renewable energies. Furthermore, 2.34% of the RGGI auction proceeds are reinvested in clean and renewable energy.

E(1). Analysis provided by RGGI, Inc. projects the average yearly commercial energy bill will increase by \$27 dollars.

E(2). Analysis provided by RGGI, Inc. projects the average yearly industrial energy bill will increase by \$154 dollars.

F(1). Analysis provided by RGGI, Inc. projects the average yearly residential energy bill for Maryland households will decrease by \$15 dollars.

F(2). Analysis provided by RGGI, Inc. projects a net gain of employment as a result of the lower cap. This will create additional jobs within Maryland.

F(3). There are several health benefits that will result from lowering GHG emissions in Maryland. Improved air quality will result in lower health risks to the Maryland population. A report by the Interagency Working Group on the Social Cost of Carbon, United States Government, 2010, finds that the social cost of 1 ton of carbon dioxide ranges from \$5 to \$55. As a result of the lower regional CO<sub>2</sub> cap, emissions in Maryland are expected to decrease by roughly 50 million tons through 2020.

**Economic Impact on Small Businesses**

The proposed action has minimal or no economic impact on small businesses.

**Impact on Individuals with Disabilities**

The proposed action has an impact on individuals with disabilities as follows:

These regulations may have a positive impact on individuals with disabilities, especially those with limited mobility, by providing low cost opportunities to weatherize their homes. Reduced energy costs allow individuals with disabilities to remain at home during extreme weather conditions. Extreme temperatures often exacerbate numerous respiratory and cardiovascular diseases.

**Opportunity for Public Comment**

The Department of the Environment will hold a public hearing on the proposed action on August 28, 2013 at 10 a.m. at the Department of the Environment, 1800 Washington Boulevard, 1st Floor Conference Rooms, Baltimore, Maryland 21230-1720. Interested persons are invited to attend and express their views. **.05 Sequestration of Carbon due to [Afforestation] Reforestation, Improved Forest Management, or Avoided Conversion.**

A. [Afforestation] *Forest Offset* Project Standards. Offset projects that [sequester carbon through the conversion of land from a nonforested to a forested condition] *involve reforestation, improved forest management, or avoided conversion* shall qualify for the award of CO<sub>2</sub> allowances if they meet the requirements of this regulation *and the forest offset protocol*.

B. Eligibility. *Eligible forest offset projects shall satisfy all eligibility requirements of the forest offset protocol and this regulation.*

(1) Eligible offset projects shall occur on land that has been in a nonforested or partially forested state for at least 10 years preceding the commencement of the offset project.

(5) Plant species to be planted or established via natural regeneration and a forest management plan.]

D. Carbon Sequestration Baseline Determination. *Baseline onsite carbon stocks shall be determined as required in sections 6.1.1, 6.1.2, 6.2.1, 6.2.2, 6.2.3, 6.3.1, and 6.3.2 of the forest offset protocol, as applicable.*

(1) The existing sequestered carbon within the offset project boundary shall be calculated before commencement of the offset project. The carbon sequestration baseline shall be determined based on a sum of measurements of the carbon content of the carbon pools described in this section, made not more than 12 months before offset project commencement.

(2) The carbon content shall be calculated for live above-ground tree biomass, live below-ground tree biomass, soil carbon, dead organic matter, and coarse woody debris, unless the baseline measurement for this carbon pool is at or near zero, in which case measurement of this carbon pool during the allocation period is optional.

(3) The carbon content may be calculated for live above-ground nontree biomass and dead organic matter forest floor.

(4) The carbon content shall be calculated individually for each carbon pool within the offset project boundary.

(5) To increase the accuracy of measurement and verification, the area within the offset project boundary shall be divided into sub-populations that form relatively homogenous units. When defining sub-populations, the project sponsor shall consider:

(a) Vegetation and tree species, including existing vegetation and trees and those to be utilized as part of the offset project activity; and

(b) Site factors, including soil type, elevation, slope, age class, and other factors as warranted.

(6) Calculation of sequestered carbon for each carbon pool in each reporting sub-population shall be based on the following:

$$CO_2 \text{ tons} = [(A \times C/ha)(44/12)] / 0.9072$$

where:

(a) A = Area in hectares within each reporting sub-population;

(b) C = Carbon content (metric tons of carbon for each carbon pool); and

(c) C/ha = Mean carbon content per hectare for each carbon pool.

(7) Total carbon contained within the offset project boundary shall be calculated as follows:

$$TC_{pb} = TC_{latb} + TC_{lbtb} + TC_s [+ TC_{lantb} + TC_{doff} + TC_{docwd}]$$

where:

(a)  $TC_{pb}$  = Total carbon content within the offset project boundary (sum of carbon content of all carbon pools in all reporting sub-populations);

(b)  $TC_{latb}$  = Sum of carbon content of live above-ground tree biomass in all reporting sub-populations;

(c)  $TC_{lbtb}$  = Sum of carbon content of live below-ground tree biomass in all reporting sub-populations;

(d)  $TC_s$  = Sum of carbon content of soil carbon in all reporting sub-populations;

(e)  $TC_{lantb}$  [option] = Sum of carbon content of live above-ground non-tree biomass in all reporting sub-populations;

(f)  $TC_{doff}$  [option] = Sum of carbon content of dead organic matter, forest floor in all reporting sub-populations; and

(g)  $TC_{docwd}$  = Sum of carbon content of dead organic matter, coarse woody debris in all reporting sub-populations.

(8) Each individual carbon pool to be measured shall be directly measured using a measurement protocol and sample size that achieves a demonstrated quantified accuracy for the combined carbon pool measurement such that there is 95 percent confidence that the resulting reported value is within 10 percent of the true mean. Measurement and sampling practices shall meet the following requirements:

(a) An adequate sample size that meets the requirements; and

(b) The minimum number of required sampling plots for each sub-population shall be determined based on the following:

$$n = (s \times 1.960) / (\text{mean} \times re)^2$$

where:

(i) n = Required number of sample plots for each reporting sub-population;

(ii) s = Standard deviation;

(iii) mean = Mean reported carbon content for the sample population; and

(iv) re = Level of sampling error (0.08) to assure a total maximum error of 10 percent for the 95 percent confidence interval, which assumes total error due to measurement error of 0.02.

(9) Direct measurement procedures shall be consistent with current forestry good practice and the guidance contained in U.S. Department of Energy, Office of Policy and International Affairs, Technical Guidelines, Voluntary Reporting of Greenhouse Gases (1605(b)) Program, "Section 3, Measurement Protocols for Forest Carbon Sequestration," in Chapter 1 (Emissions Inventories) Part I Appendix (Forestry).]

E. Calculating Carbon Sequestered. *Net GHG reductions and GHG removal enhancements shall be calculated as required by section 6 of the forest offset protocol. The project's risk reversal rating shall be calculated as required by Appendix D of the forest offset protocol.*

(1) Carbon sequestration shall be determined using a base year approach, where the amount of carbon sequestered is measured as a net increase in carbon relative to the base year measurement.

(2) Carbon sequestration shall be the amount of net additional carbon sequestered during each reporting period, based upon aggregate carbon uptake and carbon emissions for the sum of carbon pools, relative to the baseline carbon content or the carbon content as of the previous reporting period, if above the baseline carbon content, as applicable.

(3) CO<sub>2</sub> offset allowances shall be issued based on the amount of net additional carbon sequestered within the offset project boundary during each reporting period, as represented in tons of CO<sub>2</sub>.

(4) Stock-Change Approach.

(a) Sequestered carbon shall be calculated using a stock-change approach as follows:

$$NCS_t = I_t - I_{t-1}$$

where:

(i) NCS<sub>t</sub> = Net carbon sequestered in reporting period t;

(ii) I<sub>t</sub> = Inventory of carbon stock for all carbon pools in all reporting sub-populations within the offset project boundary in reporting period t; and

(iii) I<sub>t-1</sub> = Inventory of carbon stock for all carbon pools in all reporting sub-populations within the offset project boundary in the reporting period immediately preceding reporting period t.

(b) Each of the carbon pools that were measured as part of the baseline determination shall be remeasured using the same methodology and to the same or better quantified precision as that used for the baseline determination.

(c) The net change in each carbon pool's carbon stock in each reporting sub-population is calculated by subtracting the baseline carbon stock, or carbon stock at the previous monitoring, if above the baseline carbon content, from the carbon stock at the time of the current monitoring.

(d) Net carbon stock change for the offset project is the sum of the net changes in the carbon stock of all applicable pools in all reporting sub-populations within the offset project boundary, less 10 percent to account for potential losses of sequestered carbon. This 10 percent discount may not be required if the project sponsor retains long-term insurance, approved by the Department, that guarantees replacement of any lost sequestered carbon for which CO<sub>2</sub> offset allowances were awarded.]

F. Monitoring and Verification Requirements. [Total carbon stock within the offset project boundary shall be calculated not less than every 5 years. Monitoring and verification are as follows:] *Monitoring and verification is subject to the following requirements:*

(1) [Monitoring and verification reports shall include data from direct measurement of carbon content for all plots used to determine baseline and reporting period carbon content] *Monitoring and verification reports shall include all forest offset project data reports submitted to the Department, including any additional data required by section 9.2.2 of the forest offset protocol; [and]*

(2) [The consistency application shall include a monitoring and verification plan certified by the Department or an independent accredited verifier, including:] *The consistency application shall include a monitoring and verification plan certified by an independent verifier accredited pursuant to Regulation .08 of this chapter, which shall consist of a forest carbon inventory program, as required by section 8.1 of the forest offset protocol; and*

(i) *Notification by the Department will occur after the verified estimate of carbon stocks has been submitted to the Department, or after 1 year has elapsed since the occurrence of the reversal if the project sponsor fails to submit the verified estimate of carbon stocks; and*

(ii) *If the forest owner does not surrender valid CO<sub>2</sub> allowances to the Department within 6 months following notification by the Department, the forest owner will be subject to an enforcement action and each CO<sub>2</sub> equivalent ton of carbon sequestration reversed will constitute a separate violation of this regulation and applicable State law.*

(d) *Project Termination. Requirements for project termination are as follows:*

(i) *Within 6 months of project termination, the project sponsor shall surrender to the Department or its agent for retirement, a quantity of CO<sub>2</sub> allowances in the amount calculated pursuant to project termination provisions in the forest offset protocol; and*

(3) [The conservation easement shall require that the land be managed in accordance with environmentally sustainable forestry practices] *Disposition of Forest Sequestration Projects After a Reversal. If a reversal lowers the forest offset project's actual standing live carbon stocks below its project baseline standing live carbon stocks, the forest offset project will be terminated by the Department.*

J. *Timing of Forest Offset Projects. The Department may award CO<sub>2</sub> offset allowances under Regulation .09 of this chapter only for forest offset projects that are initially commenced on or after January 1, 2014.*

K. *Projects that Have Been Awarded Credits Under a Voluntary Greenhouse Gas Reduction Program.*

(1) *For projects that have been awarded credits under a voluntary greenhouse gas reduction program, the number of CO<sub>2</sub> Offset Allowances will be calculated pursuant to the requirements of this regulation, without regard to the number of credits that were awarded to the project under the voluntary program.*

(2) *The provisions of Regulation .02C(6) and F(2)(b) may not apply to forest projects that have been awarded credits under a voluntary greenhouse gas reduction program provided that the following conditions are satisfied:*

#### Official Handgun Roster

The following is a list of handguns manufactured after January 1, 1985 that have received final approval by the Handgun Roster Board and that are not otherwise prohibited by law. Manufacturers are listed alphabetically. Be advised that the Handgun Roster has been amended in accordance with Senate Bill 619, Chapter 456 of the Laws of Maryland, effective June 1, 1994, which prohibits the sale of certain assault pistols in the State of Maryland. Please consult the law or Firearms Bulletin 94-1, which is available from the Maryland State Police Licensing Division, for more information on assault pistols and Senate Bill 619's prohibition on certain detachable magazines with a capacity of more than 20 rounds of ammunition.

It is unlawful to manufacture for distribution or sale or to sell or offer for sale in Maryland any handgun manufactured after January 1, 1985 that is not officially on the Handgun Roster, except for the manufacture of prototype models required for design, development, testing, and approval by the Board. Neither the State of Maryland nor any agency, officer, or employee of the State assumes any liability for injuries caused by any handgun on the Handgun Roster.
