FOR THE FISCAL YEAR ENDED JUNE 30, 2015

#### **EXECUTIVE**

Lawrence J. Hogan, Jr. *Governor* 

BOYD K. RUTHERFORD Lieutenant Governor

Peter Franchot
Comptroller

BRIAN E. FROSH Attorney General

Nancy K. Kopp Treasurer

#### JUDICIAL

Mary Ellen Barbera Chief Judge Court of Appeals of Maryland

#### LEGISLATIVE

THOMAS V. MILLER, JR. President of the Senate

Michael E. Busch Speaker of the House of Delegates

## The Seal of The Comptroller of the Treasury

The Comptroller of the Treasury was created by Maryland's state constitution of 1851 to have "general superintendence of the fiscal affairs of the state." More specifically, the Comptroller's Office was created to keep watch over the State Treasurer whose activities had previously gone unchecked. The seal was authorized by the Maryland General Assembly on March 10, 1858, effective May 1, 1858. The seal is decorated with a shield bearing the coats-of-arms (family symbols) of the Calvert and Crossland families — the paternal and maternal lineage of George Calvert, first baronet of Baltimore, who founded the Maryland Colony in 1634.

Among the symbols on the seal are crossed keys, symbolizing security. The two keys also represent the two constitutional fiscal officers: the Comptroller and the Treasurer. By law, all money paid out of the State Treasury has to be approved by both.

Further symbols are: an eagle, symbolizing higher vision; a caduceus, symbol of commerce and negotiation; a safe, symbolizing financial security; and a dog, symbolizing the Comptroller's role as watch dog or guardian of the public trust. The Seal also bears the Comptroller's motto, "Crescite et Multiplicamini," which is Latin for "Increase and Multiply."

## A Message from Comptroller Peter Franchot

I am truly honored and deeply humbled to serve in my third term as Maryland's Comptroller, becoming the fourth Comptroller in our state's storied history to do so, and only the third to serve three consecutive terms. It is a profound privilege to represent the citizens

of Maryland and to carry on the 164-year legacy of public service established by all the legendary Comptrollers who occupied this office before me, particularly Maryland icons Louis L. Goldstein and William Donald Schaefer.

The continued success of our agency reflects a strong commitment to delivering new and higher standards of taxpayer service based on respect, responsiveness and results. This unwavering dedication has earned the agency national acclaim as the most efficient and effective Comptroller's Office in the country. Through strategic investments in advanced technology we have recaptured nearly \$4.6 billion in delinquent taxes rightfully owed to the State. A record number of Marylanders are now filing their taxes electronically and receiving their refunds, on average, within three business days. We've reunited nearly \$528 million in unclaimed property, and have intercepted tens of millions in overdue child support payments and delivered them to children in need.

We are also focused on pursuing reforms to ensure Maryland is well-positioned for long-term success and prosperity: a multi-year moratorium on new or increased taxes or major regulatory changes in order to restore a sense of certainty, provide families with enough financial security to spend disposable income, and to allow businesses the confidence to invest capital and create jobs; an overhaul of the State's procurement process to ensure taxpayers are getting the best deal for their hard-earned money by requiring a greater dedication to transparency, competition and attentive management; and a steadfast commitment to providing the next generation with the financial knowledge they need to lead productive lives.

I remain dedicated to the values of my predecessors and humbled by the opportunity to continue to serve our great state and improve the life of every Marylander.

Comptroller Peter Franchot

# Three Newly Renovated PORTRAITS OF MARYLAND COMPTROLLERS

Now installed with the Permanent Exhibit in the Louis L. Goldstein Treasury Building

#### DENNIS CLAUDE (ca. 1782-1863) Anne Arundel County Military Surgeon Comptroller - 1861

With a distinguished career as a War of 1812 military surgeon, and Mayor of Annapolis for four decades, 79-year-old Claude was appointed Comptroller for a few months during the 1861 war crisis. Governor Henry H. Hicks brought in Claude to prevent Abram Jarrett from taking office. Jarrett was the choice of a legislature that supported Maryland secession to the southern Confederacy.

Maryland's 5th Comptroller, Dennis Claude, was painted with oil on canvas c.1910-20 by portrait artist Meredith Janvier (1872-1936). Meredith Janvier was born in Albemarle County, Va., in 1872 and died in Baltimore in 1936. Janvier was best known for photographing the leading men of Baltimore in the early 20th century, however, he also was a respected author, book collector and painter. There are 15 portraits in the state-owned art collection by Janvier, primarily of treasurers and comptrollers.

This portrait of Maryland's 13th Comptroller, J. Frank Turner, was painted with oil on canvas by an unknown artist.

#### J. FRANK TURNER (1844-1916) Talbot County, Lawyer, Democrat

Talbot County, Lawyer, Democratic Comptroller - 1884-1888

Turner began his career as a Register of Wills and Clerk of the Talbot County Courts. When he became Comptroller, Turner continued the trend to reduce the state debt and run the office in a more professional manner. He was heavily involved in continuing efforts to extricate the state from ill-fated investments in canals and railroads. He also focused on managing the state fleet against the criminal excesses of the oyster pirates. In his later career, Turner took an active interest in the commercial success of the Town of Easton.

Maryland's 23rd Comptroller, Emerson C. Harrington was painted with oil on canvas in the early 20th century by artist James Pearce Wharton (1893–1963).

## EMERSON COLUMBUS HARRINGTON (1864-1945)

Dorchester County, Teacher, Lawyer, Democrat Comptroller - 1912-1916

Harrington was a very successful student and tutor at St. John's College before serving as principal at Cambridge Academy and High School for more than a decade. He would later become Dorchester County State's Attorney for one term before serving as Comptroller and then as governor (1916–1920) during World War I. Governor Harrington organized the successful Council of Defense which effectively addressed wartime problems, built Fort Meade and sought a more efficient state government.

## Respect for Our Past

On January 26, 2015,
Comptroller Peter Franchot was
sworn-in by Governor Larry
Hogan for a third term; to the
Comptroller's right is his wife,
Anne Maher, their daughter,
Abigail Franchot Borok and
her husband, Daniel;
far right, is Maryland
Secretary of State,
John C. Wobensmith.

S MARYLAND'S COMPTROLLER, I feel a certain obligation to safeguard the history and significance of this historic office and to pay homage to the 31 men who have occupied it before me. From every corner of our state, this post has been distinguished by officeholders from all walks of life: farmers, teachers, lawyers, newspaper editors, bankers, doctors, merchants, miners and businessmen. All of them brought their collective wisdom to an office that seeks to serve Marylanders by carefully safeguarding their hard-earned tax dollars.

We honor these leaders and their legacies with a permanent exhibit of their portraits in the Goldstein Treasury Building. This year, we added newly restored oil portraits to the exhibit of three men who provided a steady hand during some of the most turbulent times in our history.

Dennis Claude, our fifth Comptroller, was instrumental in keeping Maryland in the Union in 1861. Unionist Governor Thomas Holliday Hicks installed him as Comptroller in an effort to prevent the General Assembly from installing their own Confederate-leaning Comptroller. So, for a period of time, Maryland had two competing Comptrollers — as the future of our state and our nation hung in the balance.

J. Frank Turner served as Register of Wills and Clerk of the Talbot County Courts before becoming the 13th Comptroller. During his two terms, Turner reduced the State's debt and as a Member of the Board of Public Works, exercised increasing responsibility in the management of state properties and in the hiring and management of state personnel.

Emerson Columbus Harrington was Maryland's 23rd Comptroller and later served as Governor during World War I. He is credited with building Fort Meade, making government efficiency a priority and establishing a ferry service between Annapolis and the Eastern Shore.

Much of our state's history is bound together with the service these great leaders performed for more than 160 years. I am proud to be a temporary caretaker of this distinguished office and will remain committed to rise to today's challenges and improve the lives of the people I serve—just as these great Maryland leaders who preceded me.

## Signature Accomplishments

Comptroller
Franchot tours
Suitland High
School with Prince
George's County
Executive Rushern
Baker.

NDER MY LEADERSHIP, the Comptroller's Office's signature accomplishments are in the core areas of taxpayer service, tax fairness and fiscal responsibility. We have worked diligently to make the tax filing process as easy and convenient as possible for the vast majority of Marylanders who fulfill their obligations and pay their taxes on time. When I took office in 2007, fewer than half of all Marylander filed their taxes electronically. Now more than 80 percent do so, saving the State administrative costs and ensuring that most taxpayers receive their refunds within three business days.

Tax fairness is not just a concept; for us in the Comptroller's Office it's a driving principle. Through new, innovative and aggressive strategies, my office has collected more than \$4 billion in delinquent taxes over the last nine years that are rightfully owed to the people of Maryland. This is money that is used to improve our schools, protect our neighborhoods, modernize our infrastructure, and clean up the Chesapeake Bay.

Our Field Enforcement Division has demonstrated national leadership in the fight against illegal cigarette smuggling that targets vulnerable children and puts local businesses at a competitive disadvantage. Since 2007, our agents have confiscated more than 1.1 million packs of untaxed cigarettes with a market value of approximately \$5.7 million.

As a member of the state's Board of Public Works, I am proud to have supported Maryland's historic investment of \$2.6 billion in state school construction funding over the last nine years. No investment has more significance to our long-term economic prosperity than those we make in our schools, our children and our teachers.

These successes would not be possible without the professionalism and dedication of our great team in the Comptroller's Office — or the support of Marylanders who do the right thing and pay their taxes on time.

## Moving Forward

Maryland Comptroller Peter Franchot at the Annapolis Regional Library discusses the College Savings Plan of Maryland.

S MARYLAND'S CHIEF FISCAL OFFICER, it is my duty to ensure our state is well-positioned for long-term success and prosperity. That begins with what I call, "fiscal responsibility with a purpose." Understanding that to

afford those programs we truly need, we have to forgo those well-intentioned programs we simply want. It's about setting priorities and making tough choices, like every Maryland family does.

As Comptroller, I've voted on more than 15,000 contracts worth \$80 billion on the Board of Public Works. I ask the tough questions and hold officials accountable for choices that affect taxpayers. Together with Governor Larry Hogan, I am demanding a greater degree of commitment to transparency, competition and attentive management.

I remain dedicated to making significant investments in our state's most important asset — our children — by making sure every student has a safe, comfortable and innovative place to learn. We are also working to ensure that every Maryland student receives a comprehensive financial education before graduation so they understand the basics of credit, debt, investing and saving critical to their future success and to the financial stability of our state.

Together as a state, we will work together to overcome obstacles and create opportunity for all. Our future is bright, thanks to the innovation, dedication and entrepreneurial spirit of the citizens of Maryland.

## INTRODUCTORY SECTION

OCEAN CITY, MARYLAND

December 15, 2015

Honorable Members of the General Assembly and the Governor, State of Maryland

The Comprehensive Annual Financial Report (CAFR) of the State of Maryland (State), for the Fiscal Year ended June 30, 2015, includes the financial statements of the State as well as information required by Title 2, Section 102 of the State Finance and Procurement Article of the Annotated Code of Maryland. Responsibility for both the accuracy of the presented data and the completeness and fairness of the presentation, including all disclosures, rests with the Office of the Comptroller.

The statutes of the State require an audit of every unit of the Executive and Judicial branches of government, including the Comptroller of Maryland's records, by the Legislative Auditor at least every three years. The Legislative Auditor is required to be and is a certified public accountant. The Legislative Auditor makes fiscal, compliance and performance audits of the various agencies and departments of the State and issues a separate report covering each of those audits. The primary purpose of the reports is to present the Legislative Auditor's findings relative to the fiscal management of those agencies and departments.

Additionally, my office requires an audit of the State's basic financial statements by a firm of independent auditors selected by an audit selection committee composed of members from the Comptroller's Office and other units of the Executive branch of State government. This requirement has been compiled with, and the opinion of SB & Company, LLC, has been included in the financial section of this report. SB & Company, LLC also performed an audit to meet the requirements of the Office of Management and Budget (OMB) Circular A-133, "Audits of States, Local Governments and Non-Profit Organizations," and such information is contained in another reporting package.

The State has issued guidelines to its agencies for establishing effective internal controls. As a recipient of Federal assistance, the State is responsible for ensuring compliance with laws and regulations related to such assistance. This compliance is accomplished through the internal control guidelines. Because the cost of internal control should not exceed anticipated benefits, the objective is to provide reasonable, rather than absolute, assurance that the financial statements are free of any material misstatements.

The accompanying financial statements include all funds of the State (primary government), as well as all component units. Component units are legally separate entities for which the primary government is financially accountable. The various colleges and universities and the College Savings Plans of Maryland are reported as major component units. The Maryland Environmental Service, the Maryland Industrial Development Financing Authority, the Maryland Food Center Authority, the Maryland Technology Development Corporation and the Maryland Stadium Authority are combined and presented as non-major component units.

Accounting principles generally accepted in the United States of America require that management provide a narrative introduction, overview and analysis to accompany the basic financial statements in the form of Management's Discussion and Analysis (MD&A). This letter of transmittal is designed to complement the MD&A and should be read in conjunction with it. The MD&A can be found immediately following the report of the independent public accountants.

#### **Background Information on the State:**

Maryland ratified the United States Constitution on April 28, 1788. Its capitol is Annapolis, where the principal activities of state government are centered. Its employment is based largely in services, trade and government. These sectors, along with finance, insurance and real estate are the largest contributors to the gross state product. The State has a bicameral legislature, the General Assembly, composed of the Senate with 47 members and the House of Delegates with 141 members. The General Assembly meets annually for a 90-day session beginning on the second Wednesday in January.

The Maryland Constitution requires the Governor to submit to the General Assembly a balanced budget for the following year. The General Assembly cannot increase the budget except in certain organizational units. The budget currently uses a legally mandated budgetary fund structure. Each State agency is provided appropriations at a program level, which is the level at which expenditures cannot legally exceed the appropriations. The State also utilizes an encumbrance system to serve as a tool for managing available appropriations. Maryland maintains its accounts to conform with the legally mandated budget and also to comply with generally accepted accounting principles. Financial control is generally exercised under the budgetary system.

There is a Spending Affordability Committee which consists of certain designated officers of the General Assembly and other members as may be appointed by the President of the Senate and the Speaker of the House of Delegates. Each year the Committee must submit a report to the General Assembly's Legislative Policy Committee and to the Governor recommending the level of State spending, the level of new debt authorization, the level of State personnel and the use of any anticipated surplus funds.

Also, the General Assembly created a Capital Debt Affordability Committee, the members of which are the Treasurer, the Comptroller, the Secretary of Budget and Management, the Secretary of Transportation, and one person appointed by the Governor. This Committee is required to submit to the Governor by October 1 of each year an estimate of the maximum amount of new general obligation debt that prudently may be authorized. The Committee's recent reports encompass all tax supported debt, in addition to the general obligation debt, bonds issued by the Department of Transportation, bonds issued by the Maryland Stadium Authority and capital lease transactions. Although the Committee's responsibilities are advisory only, the Governor is required to give due consideration to the Committee's finding in preparing a preliminary allocation of new general obligation debt authorizations for the next ensuing fiscal year.

#### **Information on the State's Economic Condition:**

The national recovery from the "Great Recession" remains muted. The fact that so many economists and pundits continue to refer to this point in time as "economic recovery," six years after the end of the recession, as opposed to an "economic expansion" is telling. Moreover, the fiscal drag from federal budget sequestration and general ongoing federal policy uncertainty continue to restrain growth in Maryland and the region. In other words, the economic picture has not changed much, as such our outlook remains subdued relative to normal periods of economic expansion.

Maryland's economic growth between 2011 and 2014 has been tepid at best, particularly relative to national growth. This, of course, coincides with federal budget sequestration. The private sector began to adjust payrolls immediately, even as the bill was being discussed within Congress. Actual austerity measures were not effective until 2013, at which point the private and public sectors took another hit.

More recently, the "reset" of sequester may be behind us; meaning we are at our new baseline for federal spending and the brunt of the losses may be behind us. That said, the sector will continue to be a drag. The sequester targets, even with the recent moderate increases, do not permit growth in discretionary spending until 2019; therefore an important sector of our economy will remain handicapped. As such, Maryland's economic trajectory will remain muted relative to the national rate until either sequester is lifted or the next recession.

This will also remain a possible positive risk to this forecast. Federal sequester did close to nothing to fix the federal fiscal quagmire. In fact, it may have had a negative effect; as the economic impact of the half measures reduced economic growth without solving longer term spending issues. The real issues for the federal fiscal outlook are entitlements (also related to demographics).

Should Congress address the real problem, and ameliorate or remove the sequester altogether, Maryland will grow at a higher trajectory.

Maryland's economy will expand in 2015 and growth in employment is expected to rise to 1.4% in 2015 from 0.9% in 2014. Further strong growth is expected in 2016 as the tail of the labor recovery completes before the growth rate slows (remaining positive) in 2017. Growth in the average wage for 2015 is expected to equal that of 2014, a somewhat disappointing factor, but related to the reasons that have been discussed throughout this summary. The rate of wage growth is expected to increase throughout the out years as the labor market tightens, but to be sure, that rate of wage growth is low relative to historical norms. Aggregate wage growth and personal income measures increase as employment improves.

Regarding all that has been discussed and the outlook for Maryland's largest general fund revenue source, the income tax, the outlook is relatively stronger. This is due to Maryland's strong concentration of wealthy taxpayers. As has been noted, income growth at the higher end has been substantial (volatile as well), buoying aggregate receipts to growth rates better than 5%.

As usual, risks abound, particularly in light of the recent ISIS attack in Paris. Another attack on western soil, particularly America, might trigger a correction to the stock market that reverberates into the "real" economy. Additionally, Federal Reserve actions to raise interest rates are imminent; there is a risk that the market reacts in a negative manner that gains traction or that the higher rates slow broader growth in such a way that the economy again falters. Oil prices have created a sort of consumer dividend and while low prices seem to have some traction for an extended period of time, higher prices would be a sharp drag to the average consumer.

Positive risks include the aforementioned reduction or abolition of federal sequester, but also expansion from the Port of Baltimore. The Panama Canal widening, which will allow so called "post-Panamax ships" to navigate the Canal, will permit large cargo ships to move from Asia to the East Coast. Currently that cargo is typically delivered to the West Coast and then transported by rail and road throughout the country. Baltimore is one of the few ports with the depth and infrastructure to handle these types of ships and will certainly see increased need for labor and capital. Should there be a meaningful surge in activity and jobs, there will also be indirect and induced impacts.

#### **Major Initiatives and Long Term Financial Planning:**

The fiscal year 2016 budget seeks to close an \$802 million budget gap caused by several factors. Continued weaker than anticipated revenue growth caused by slow employment and personal income growth has resulted in general fund spending growing faster than revenues. Contributors to the growth in spending include growth in Medicaid enrollment requiring additional funding and an increase in debt service contributions of \$134 million. Therefore, the fiscal year 2016 budget holds spending growth below the rate of growth in revenues - a 1.5% growth in general fund spending compared to 3.5% in revenues.

The 2016 budget does include continued funding for economic and workforce development programs, including \$20 million in programs to expand existing and attract new business to priority funding areas in Maryland. It also includes \$16 million to support small and disadvantaged businesses. Funding is provided to advance technology through \$46 million in business tax credits and investments and university research endowments. Funding of \$46 million is provided for Workplace Investment Areas and job centers to develop the workforce and \$33 million for the Work Opportunities Program to help transition recipients of public assistance to employment.

The education budget includes a \$45 million increase in State aid to public schools to \$6.1 billion. The 2016 capital budget provides \$280 million for the Public School Construction Program. The program for the employment and independence of individuals with disabilities is budgeted at \$109 million in fiscal year 2016, an increase of 6% over the prior year. The budget includes \$35 million in additional federal funds for school lunch and breakfast programs for a total school nutrition program budget of \$354 million in fiscal year 2016, an increase of 11%. Public colleges and universities receive increases in State funding ranging from 1% to 5.8% from the previous year. Local community colleges receive a 1.3% increase in direct aid. The capital budget includes \$347 million for modernizing and replacing aging facilities at State-operated campuses and \$58 million for community college projects.

The 2016 budget provides \$9.6 billion for Maryland's Medicaid program, which currently provides basic health coverage for more than 1.1 million income-eligible Marylanders. The Maryland Children's Health Insurance Program receives \$217 million in

fiscal year 2016 to provide access to health care for nearly 115,000 children. The fiscal year 2016 budget provides \$39 million for continued operation of the Maryland Health Benefit Exchange and \$36 million for the Exchange's information technology system. Funding of \$1.0 billion is provided for the developmentally disabled, an increase of 8%. The federal supplemental nutrition assistance program includes funding of \$1.2 billion, benefitting 405,000 households. Maryland's Department of Public Safety and Correctional Services budget for fiscal year 2016 totals \$1.3 billion, funding the State's correctional facilities, parole and probation programs, and drug treatment and rehabilitation programs. The 2016 budget supports efforts to restore the Chesapeake Bay, protect Maryland's natural resources and environment, assist farmers, and promote energy efficiency, including \$279 million in the capital budget for Chesapeake Bay restoration.

Maryland's fiscal year 2016 capital budget totals \$4.3 billion. In addition to public school construction, construction at public colleges and universities, and Chesapeake Bay restoration, \$2.9 billion is provided for transportation projects. Of this amount, \$928 million is expected to be received from federal funds. Highway projects constitute \$1.4 billion, including \$526 million in federal aid, the largest share of the fiscal year 2016 capital budget. Mass transit's capital budget totals \$773 million, with \$332 million coming from federal sources. Mass transit projects include \$312 million for the Purple Line project (pending review and reevaluation), a proposed 16-mile light rail line running between Montgomery and Prince George's Counties outside Washington, D.C. The Red Line, a proposed 14-mile light rail line between Baltimore City and Baltimore County, was canceled in June; the Maryland Department of Transportation has reached out to community stakeholders and leaders to identify the most important needs to improve transit in the Baltimore Region.

In addition, the Governor is recommending and implementing reforms to limit the size of the State's capital budget. The Capital Improvement Program results in lower debt service costs of \$32 million by fiscal year 2020.

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the State of Maryland for its Comprehensive Annual Financial Report for the Fiscal Year Ended June 30, 2014. The Certificate of Achievement is a prestigious national award recognizing conformance with the highest standards for preparation of state and local government financial reports.

In order to be awarded a Certificate of Achievement, a government unit must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. The State of Maryland has received a Certificate of Achievement for the last 35 consecutive years (Fiscal Years ended 1980 - 2014). We believe that our current comprehensive annual financial report continues to conform to the Certificate of Achievement Program requirements, and we are submitting it to the GFOA to determine its eligibility for another certificate.

The preparation of the Comprehensive Annual Financial Report on a timely basis could not have been accomplished without the efforts and dedication of the staff of the General Accounting Division with assistance from other personnel from the various departments and agencies of the State.

I will be pleased to furnish additional information on the State's finances upon request.

Sincerely,

Peter Franchot,

Comptroller of Maryland

Pern Franchof

## FINANCIAL SECTION

DOWNTOWN BETHESDA

#### REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS

The Honorable Peter Franchot Comptroller of Maryland

#### Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Maryland (the State), as of and for the year ended June 30, 2015, and the related notes to the financial statements, which collectively comprise the State's basic financial statements as listed in the table of contents.

#### Management's Responsibility for the Financial Statements

The State's management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of certain Economic Development Loan Programs; the Maryland Lottery and Gaming Control Agency; the Maryland Transportation Authority; the Economic Development Insurance Programs; certain foundations included in the higher education component units; the Maryland Technology Development Corporation; and the Investment Trust Fund. Those financial statements were audited by other auditors whose reports thereon have been furnished to us, and our opinion, insofar as it relates to the amounts included for the State, is based solely on the report of the other auditors. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

The financial statements that we did not audit which are listed above represent the percentages of the total assets, total net position, and total revenues of the accompanying financial statements as listed below.

|  | Pe           | rcentage of Opinion Uni | it                          |
|--|--------------|-------------------------|-----------------------------|
|  | Total Assets | Total Net<br>Position   | Total Operating<br>Revenues |

200 International Circle • Suite 5500 • Hunt Valley • Maryland 21030 • P 410-584-0060 • F 410-584-0061

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

#### **Opinions**

In our opinion, based on our audit and the reports of the other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State, as of June 30, 2015, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

#### **Other Matters**

Adoption of New Accounting Standard

As discussed in Note 1 to the financial statements, the State adopted the new accounting guidance from GASB Statement No. 68, Accounting and Financial Reporting for Pensions, an amendment to GASB Statement No. 27 and GASB Statement No. 71, Pension Transition for Contributions Made Subsequent to the Measurement Date – an amendment of GASB Statement No. 68. The beginning balance of the basic financial statements as of July 1, 2014 was restated due to the implementation of above GASB Statements. Our opinion is not modified with respect to this matter.

#### Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis; required supplemental schedules of employer contributions and schedule of employers' net pension liability for the Maryland State Retirement and Pension System and Maryland Transit Administration Pension Plan; required supplemental schedule of investment returns for Maryland State Transit Administration Pension Plan; required supplemental schedule of funding progress and schedule of employer contributions for Other Post-employment Benefits Plan and Maryland Transit Administration Retiree Healthcare Benefit; and the respective budgetary comparison for the budgetary general, special and Federal funds as listed in the table of contents to be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We and the other auditors have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

#### Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State's basic financial statements. The combining financial statements, schedules, introductory and statistical sections, and financial schedules required by law, as listed in the table of contents, are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining financial statements, schedules, introductory and statistical sections, and financial schedules required by law is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America by us and the other auditors. In our opinion and based on the reports of the other auditors The combining financial statements, schedules, introductory and statistical sections, and financial schedules are fairly stated in all material respects in relation to the basic financial statements as a whole.

The introductory and statistical sections and the financial schedules required by law as listed in table of contents have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and, accordingly, we do not express an opinion or provide any assurance on them.

S& + Company, If C

Hunt Valley, Maryland December 15, 2015

#### **Management's Discussion and Analysis**

Management of the State of Maryland provides this narrative overview and analysis of the financial activities of the State for the fiscal year ended June 30, 2015. Please read it in conjunction with the Comptroller's letter of transmittal, which can be found in the Introductory Section of this report, and the State's financial statements which follow this section.

#### Financial Highlights

#### Government-wide

- Maryland reported a deficit of \$3.2 billion in fiscal year 2015 and a net position of \$9.5 billion in fiscal year 2014.
- Of the deficit in fiscal year 2015, a deficit balance of \$23.2 billion was reported as total unrestricted net position, which includes a \$25.4 billion deficit balance in governmental activities and a \$2.2 billion balance in business-type activities.
- The State's total net position decreased by \$12.7 billion as a result of the restatement of beginning net position for the implementation of the new pension standard (\$13.2 billion decrease) and this year's operations (\$531 million increase). The net position for governmental activities decreased by \$12.9 billion. Net position of business-type activities increased by \$203 million.
- The State's governmental activities had total expenses of \$34.0 billion; total revenues of \$33.1 billion; net transfers from business-type activities of \$951 million; and a reduction in beginning net position of \$13.1 billion for pension-related adjustments for a net decrease of \$12.9 billion.
- Business-type activities had total expenditures of \$3.5 billion; program revenues of \$4.8 billion; general revenues of \$16 million; transfers out of \$951 million; and a reduction in beginning net position of \$191 million for pension-related adjustments for a net increase in net position of \$203 million.
- Total State revenues were \$38.0 billion, while total costs for all programs were \$37.5 billion.

#### Fund Level

- Governmental funds reported a combined fund balance of \$2.0 billion, an increase of \$70 million (3.7 %) from the prior year.
- The General Fund reported an unassigned fund balance deficit of \$766 million and a remaining fund balance (nonspendable, restricted, and committed) of \$2.1 billion, compared to an unassigned fund balance deficit of \$916 million and a remaining fund balance of \$2.1 billion last year. This represents a net increase of \$145 million in General Fund, fund balance. The total unassigned fund balance deficit in the governmental funds was \$1.3 billion, in both the current and prior years.
- Governmental funds reported a total nonspendable, restricted, and committed fund balance of \$3.3 billion in 2015, compared to \$3.2 billion in the prior year.

#### Long-term Debt

- Total bonds and obligations under long-term leases at year end were \$17.5 billion, a net increase of \$339 million in 2015 (2.0%) over the prior year.
- \$2.0 billion General Obligation Bonds of which \$1.0 billion were refunding bonds, and \$661 million Transportation Bonds of which \$260 million were refunding bonds were issued during the year.

#### Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the State of Maryland's basic financial statements. The State's basic financial statements comprise three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains additional required supplementary information and other supplementary information in addition to the basic financial statements.

#### Government-wide Financial Statements (Reporting the State as a Whole)

The government-wide financial statements provide a broad overview of the State's operations in a manner similar to a private-sector business. The statements provide both short-term and long-term information about the State's economic condition at the end of the fiscal year. The statements include all fiscal year revenues and expenses, regardless of whether cash has been received or paid. The government-wide financial statements include two statements.

The *Statement of Net Position* presents all of the State's assets, deferred outflows of resources, liabilities, and deferred inflows of resources with the difference reported as "net position". Over time, increases and decreases in the State's net position may serve as a useful indicator of whether the financial position of the State is improving or deteriorating.

The *Statement of Activities* presents information showing how the State's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will not result in cash flows until future fiscal periods (such as uncollected taxes and earned but unused vacation leave). This statement also presents a comparison between direct expenses and program revenues for each function of the State.

The above financial statements distinguish between the following three types of state programs or activities:

Governmental Activities – The activities in this section are typically supported by taxes and intergovernmental revenues, i.e., federal grants. Most services normally associated with the State government fall into this category, including the Legislature, Judiciary and the general operations of the Executive Department.

Business-Type Activities – These functions normally are intended to recover all or a significant portion of their costs through user fees and charges to external users of goods and services. These business-type activities of the State include insurance and loan programs for economic development, the Unemployment Insurance Program, the Maryland Lottery and Gaming Control Agency (MLGCA), the Maryland Transportation Authority and the Maryland Correctional Enterprises, a program which constructs office furnishings utilizing the prisons' inmate population.

Discretely Presented Component Units – The government-wide statements include operations for which the State has financial accountability, but are legally separate entities. Financial information for these component units is reported separately from the financial information presented for the primary government. The component unit activities include Higher Education, the College Savings Plans of Maryland and other non-major proprietary activities. All of these entities operate similarly to private sector business and to the business-type activities described above. The component unit Higher Education consists of the University System of Maryland, Morgan State University, St. Mary's College and Baltimore City Community College and certain affiliated foundations. The non-major component units include the Maryland Food Center Authority, Maryland Environmental Service, Maryland Industrial Development Financing Authority, Maryland Technology Development Corporation and Maryland Stadium Authority.

Complete financial statements of the individual component units can be obtained from the Comptroller of Maryland, LLG Treasury Building, Annapolis, Maryland 21404.

This report includes two schedules (pages 31 and 33) that reconcile the amounts reported on the governmental fund financial statements (modified accrual accounting) with governmental activities (accrual accounting) on the government-wide statements. The following summarizes the impact of transitioning from modified accrual to accrual accounting:

- Capital assets used in governmental activities are not reported on governmental fund statements.
- Certain tax revenues that are earned and other assets that are not available to pay for current period expenditures are deferred in governmental fund statements, but are recognized on the government-wide statements.
- Other amounts that otherwise meet the definition of a revenue or expense that relate to a future period are deferred only on the government-wide statements.
- Unless currently due and payable, long-term liabilities, such as capital lease obligations, compensated absences, litigation, and bonds and notes payable, only appear as liabilities in the government-wide statements.
- Capital outlays result in capital assets on the government-wide statements, but are reported as expenditures on the governmental fund statements.
- Bond and note proceeds result in liabilities on the government-wide statements, but are recorded as other financing sources on the governmental fund statements.
- Certain other transactions represent either increases or decreases in liabilities on the government-wide statements, but are reported as expenditures on the governmental fund statements.

The government-wide financial statements can be found on pages 26 - 29 of this report.

#### **Fund Financial Statements**

A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The State, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. The State's funds can be divided into three categories: governmental, enterprise, and fiduciary. Each of these categories uses a different accounting approach.

Governmental funds – Most of the basic services provided by the State are financed through governmental funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, the governmental fund financial statements focus on near-term inflows and outflows of spendable resources and on the balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating the State's near-term inflows and outflows of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating the State's near-term financing requirements. These statements provide a detailed short-term view of the State's finances that assists in determining whether there will be adequate financial resources available to meet the current needs of the State.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the State's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities. These reconciliations are presented on the pages immediately following the governmental funds financial statements.

The State maintains five governmental funds. Information is presented separately in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures and changes in fund balances for the General Fund and the Department of Transportation-special revenue fund, both of which are considered to be major funds. Data from the remaining three governmental funds are combined into a single, aggregated presentation. Data for the non-major governmental funds, namely, the debt service fund for general obligation bonds, the debt service fund for transportation revenue bonds and the capital projects fund, are provided in the form of combining statements elsewhere in this report. These funds are reported using modified accrual accounting, which measures cash and all other assets which can be readily converted to cash. The basic governmental funds financial statements can be found on pages 30 and 32 of this report.

Enterprise funds – Enterprise funds are used to show activities that operate similar to activities of commercial enterprises. These funds charge fees for services provided to outside customers including local governments. Enterprise funds provide the same type of information as the government-wide financial statements, only in more detail. There is no reconciliation needed between the government-wide business-type financial statements for business-type activities and the enterprise fund financial statements because they both utilize accrual accounting, the same method used for business in the private sector.

The State has six enterprise funds, four of which are considered to be major enterprise funds. These funds are: Economic Development – Loan Programs, the Unemployment Insurance Program, the Maryland Lottery and Gaming Control Agency and the Maryland Transportation Authority. Data for the non-major enterprise funds, Economic Development – Insurance Programs and Maryland Correctional Enterprises, are combined into a single aggregated presentation. Individual fund data for these non-major enterprise funds is provided in the form of combining statements elsewhere in this report.

The basic enterprise funds financial statements can be found on pages 36 - 40 of this report.

Fiduciary funds – Fiduciary funds are used to account for resources held for the benefit of parties outside the state government. Fiduciary funds are not reflected in the government-wide financial statements because the resources of these funds are restricted in purpose and are not available to support the State's own programs. Fiduciary funds use accrual accounting.

The State's fiduciary funds include the Pension and Other Employee Benefits Trust Funds (Pension Trust), the Investment Trust Fund, the Postretirement Health Benefits Trust Fund (OPEB Trust) and Agency Funds. The Pension and Other Employee Benefits Trust Funds consist of the Retirement and Pension System, the Maryland Transit Administration Pension Plan and the Deferred Compensation Plan. The Postretirement Health Benefits Trust Fund accumulates funds to assist with the costs of the State's postretirement health insurance subsidy. The Investment Trust Fund accounts for the transactions, assets, liabilities and net position of an external investment pool. Agency funds account for the assets held for distribution by the State as an agent for other governmental units, organizations or individuals. Individual fund detail for the fiduciary funds can be found in the combining financial statements.

The basic fiduciary funds financial statements can be found on pages 41 - 42 of this report.

Combining Financial Statements, Component Units – The government-wide financial statements present information for the component units in a single aggregated column in the Statement of Net Position and the Statement of Activities. Combining Statement of Net Position and Combining Statement of Activities have been provided for the Component Unit Proprietary Funds and provide detail for each major proprietary component unit, with a combining column for the non-major component units. Individual financial statement information for the non-major component units is provided elsewhere in this report.

The combining financial statements for the component units can be found on pages 44 - 46 of this report.

#### Notes to the Financial Statements

The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and the fund financial statements. The notes to the financial statements can be found on pages 48 - 113 of this report.

#### Required Supplementary Information

The required supplementary information includes budgetary comparison schedules for the budgetary general, special and federal funds, along with a reconciliation of the statutory and Accounting Principles Generally Accepted in the United States of America (GAAP) General and Special Revenue Fund, fund balances at fiscal year end. This report also presents certain required supplementary information concerning the State's progress in funding obligations to provide pension benefits and other post-employment benefits and includes a footnote concerning budgeting and budgetary control. Required supplementary information immediately follows the notes to the financial statements.

#### Other Supplementary Information

Combining Financial Statements

The combining financial statements referred to earlier in connection with non-major governmental, enterprise, and fiduciary funds and non-major component units are presented immediately following the required supplementary information.

#### Government-Wide Financial Analysis

The State's combined net position (governmental and business-type activities) totaled \$3.2 billion deficit at the end of 2015 and \$9.5 billion balance at the end of 2014.

#### Net Position as of June 30,

(Expressed in Millions)

The largest portion of the State's net position, \$17.8 billion, reflects investment in capital assets such as land, buildings, equipment and infrastructure, less any related debt to acquire those assets that is still outstanding, as adjusted by any deferred inflows or deferred outflows of resources. The State uses these capital assets to provide services to citizens. Consequentially, these assets are not available for future spending. Although the State's investment in capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

In addition, a portion of the State's net position, \$2.2 billion, represents resources that are subject to external restrictions or enabling legislation on how they may be used. The remaining balance for unrestricted net position, a deficit of \$23.2 billion, reflects the State's expenses over revenues.

The following condensed financial information was derived from the government-wide Statement of Activities and reflects how the State's net position changed during the fiscal year.

### **Changes in Net Position**

For the Year Ended June 30,

(Expressed in Millions)

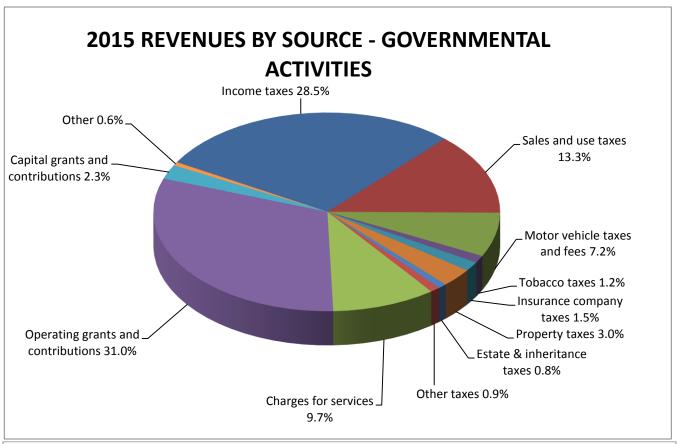

|  | Governmental Activities |          |    |         | Business-type Activities |       |    |       | Total |         |    |        |

#### **Governmental Activities**

- Liabilities and deferred inflows exceeded assets and deferred outflows by \$10.5 billion at the end of fiscal year 2015, resulting in a decrease in net position of \$12.9 billion from the previous year.
- Comprising the decrease in net position, capital assets increased by \$767 million and long-term liabilities increased by \$13.8 billion. The major capital asset events are discussed in the Capital Assets section of this analysis. Among the components of the increase in long-term liabilities were increases in bonds and notes payable (\$522 million); the State's net pension liability in the current year in excess of the net pension obligation in the prior year (\$12.9 billion); net other post-employment benefits obligation (OPEB) (\$203 million); and capital leases (\$14 million). The increase in bonds and notes payable is discussed in the Long-Term Debt section of this analysis. The increase for the net pension liability is the result of the implementation of a new accounting standard for reporting the pension liability and is not due to a significant change in the size or funding of the liability from the prior year; it is discussed in the Restatement of Current Year Balances section and in Note 15 to the financial statements. The increase in the net OPEB obligation resulted from the underfunding of the OPEB annual required contribution. The additions to capital leases were primarily for transportation related projects.

#### **Business-type Activities**

Business-type activities increased the State's net position by \$1.3 billion before transfer of \$951 million to governmental activities and a reduction in beginning net position of \$191 million for pension-related adjustments, for a net increase of \$203 million in net position. The increase compares to an increase of \$1.2 billion before transfers of \$884 million in the prior year. Key elements of this increase are as follows:

- Net position of the Maryland Transportation Authority increased by \$175 million compared to an increase of \$340 million in the prior year. Net operating income was \$442 million compared to \$435 million in the prior year. The decrease in beginning net position for pension-related adjustments in fiscal year 2015 was \$168 million.
- The Unemployment Insurance Program net position increased by \$41 million in 2015. Net position decreased by \$45 million in 2014. Operating activities resulted in a deficit of \$1 million compared to the prior year's operating deficit of \$266 million. Charges for services (unemployment taxes) increased by \$20 million (3.1%) and benefit payments were reduced by \$245 million (26.4%). Both the amount of taxes paid by Maryland employers and the amount of benefits received by the unemployed are products of the economic climate. Federal payments for extended benefits and other programs decreased by \$179 million (89.6%).
- Net assets for the Economic Development Loan Programs increased by \$3 million compared to an increase of \$30 million in the prior year. This resulted primarily from activity in the Maryland Water Quality Administration and Housing Loan Program funds. Net operating income of the Loan Programs decreased by \$58 million, primarily for an increase in Bay Restoration Fund grants by the Water Quality Administration of \$77 million. General fund transfers to support the operations of the Housing Loan Program increased by \$22 million.
- Lottery tickets sales were \$1.8 billion in 2015, an increase from \$1.7 billion in the prior year. In 2015, MLGCA oversaw the operation of five casinos, including one which opened in fiscal year 2015. As a result, gross video lottery terminal and table game revenue was \$1.0 billion in 2015, an increase of \$204 million (24.5%) over the prior year. Operating expenses increased by \$146 million (8.6%) in 2015. The major reason for the increase was related to increased commissions paid to casino operators. Transfers to governmental activities by MLGCA were \$1.0 billion in 2015, an increase of \$84 million (9.0%) over 2014.

#### Financial Analysis of the State's Funds

As of the end of the current fiscal year, the State's governmental funds reported a combined fund balance of \$2.0 billion, an increase of \$70 million from the prior year. The combined fund balance includes a deficit of \$1.3 billion in unassigned for governmental funds, including a deficit of \$766 million for the General Fund and a deficit of \$512 million for the other governmental funds. The remainder of the fund balance is nonspendable, restricted, or committed based on the constraints on the specific purposes for which amounts in that fund can be spent. The remainder of the fund balance is 1) unspendable because it is in the form of prepaid items, inventories and long-term loans and notes receivable (\$712 million); 2) restricted by outside parties or to pay debt service on general obligation bonds and transportation bonds from specific taxes (\$233 million); or 3) committed to legislated purposes or encumbered as committed fund balance based on the constraints and approval in place at year end or where appropriate when existing resources are not sufficient to liquidate encumbrances (\$2.3 billion). Included in committed fund balance is \$780 million in the "State Reserve Fund" which is set aside to meet future financial needs in circumstances that are not expected to occur routinely. By law, the Governor must appropriate to the State Reserve Fund, the General Fund surplus of the second preceding fiscal year that exceeds \$10,000,000.

#### General Fund

The General Fund is the major operating fund of the State. At the end of the current fiscal year, the unassigned fund balance deficit of the General Fund was \$766 million, while total fund balance was \$1.3 billion. The fund balance of the State's General Fund increased by \$145 million during 2015, compared to a decrease of \$220 million for 2014. Revenues increased by \$1.9 billion (7.3%) to \$28.4 billion while expenditures increased by \$1.4 billion (5.2%) to \$28.9 billion.

The increase in total revenue was primarily composed of \$1.2 billion from Federal revenue, a 13.4% increase from the prior year, primarily for a full year of new medical care provider reimbursement programs and increased enrollment due to health care changes under the Patient Protection and Affordable Care Act. Income taxes increased by \$675 million (7.7%) from 2014 as issues associated with the federal "fiscal cliff" were resolved and more income was recognized in the tax year 2014.

General Fund expenditures increased by \$1.4 billion. Expenditures for health and mental hygiene increased by \$848 million (7.6%), primarily for increased Medicaid enrollment as a result of the Affordable Care Act.

Transfers in to the General Fund were \$1.1 billion this year, the same amount as the prior year, consisting primarily of \$1.0 billion and \$942 million, respectively, transferred from MLGCA. Transfers out from the General Fund were \$440 million this year compared to \$402 million for the prior year. This increase was due primarily to an increase of \$57 million to supplement revenues of the general obligation debt service fund.

#### Special Revenue Fund

The Maryland Department of Transportation special revenue fund accounts for resources used for operation of the State's transportation activities, not including debt service and pension activities. The fund balance of the Department's special revenue fund was \$356 million as of June 30, 2015, an increase of \$1 million compared to an increase of \$51 million in the prior fiscal year. Revenues increased by \$173 million (4.7%), expenditures increased by \$296 million (7.6%), and other sources of financial resources increased by \$72 million. The increase in revenues was primarily from an increase in motor vehicle taxes and fees of \$187 million (8.5%) as a result of greater fuel usage resulting from lower average gasoline prices. The increase in expenditures was primarily from an increase in capital outlays. The increase in other sources of financial resources was substantially due to an increase in bond issues made during the year, including premiums received and net of amounts paid to refund previously issued debt (\$106 million).

#### **Budgetary Highlights**

Differences between the original budget and final amended budget, and the final budget and actual expenditures for the year are summarized for the General Fund as follows. The budgetary schedule may be found in the Required Supplementary Information Section.

Overall, the change between the original and final amended General Fund budget was a decrease of \$96 million, or .6%. The variance in Budget and Management, \$62 million, is primarily due to the reallocation of \$37 million for a 2% Cost of Living Adjustment effective January 1, 2015 and cost containment reductions of \$21 million.

The difference between the final budget, \$16.1 billion, and actual expenditures, \$15.9 billion, was \$156 million, or 1.0%. Of this amount, \$54 million was returned to the General Fund, and \$102 million was encumbered for future spending. The variance within the Department of Legislative Services (\$13 million) was primarily due to encumbrances for capital items for legislative buildings. For Financial and Revenue Administration, the variance included canceled appropriations of \$5 million for the Homeowner's Tax Credit Program and \$5 million for a bond payment to pay for Video Lottery Terminal (VLT) machines and a renegotiated VLT leasing contract which lowered the rate paid per machine. The variance for Business and Economic Development (\$14 million) was primarily attributable to encumbered funds for marketing, small business assistance, and grants, largely stem cell research grants. Juvenile Services actual spending decreased for a decrease in residential youth per diem payments and encumbrances for future spending for an IT system upgrade for case management and capital projects.

### Significant Differences between Original Budget, Final Budget, and Actual Amounts

#### Capital Assets and Debt Administration

\$16,169,374

#### Capital assets

Total expenditures and encumbrances

At June 30, 2015, the State had invested \$27.4 billion (net of accumulated depreciation) in a broad range of capital assets (see table below). Depreciation expense for the fiscal year totaled \$1.3 billion (\$1.2 billion for governmental activities and \$123 million for business-type activities). The increase in the State's investment in capital assets, net of depreciation expense, for the current fiscal year was \$1.1 billion (an increase of \$767 million for governmental activities and an increase of \$284 million for business-type activities).

Major capital asset events during the current fiscal year for governmental activities include continued widening and/or expansion of existing highways and bridges, and various transit, port and motor vehicle administration construction projects; the preservation of agricultural and open space land through the purchase of easements; veterans cemetery improvements; improvements to the statewide telecommunications network including One Maryland broadband wiring and high speed data network wiring; energy efficiency improvements in State buildings; software developments for Statewide personnel system and Department of Human Resources; construction of a new visitor center and improvements to recreation and park facilities under the Department of Natural Resources; construction of a new juvenile facility; renovations of the Military Department Armories; acquisition of helicopters for the State Police; and building improvements at correctional facilities and at the Department of Health and Mental Hygiene. Elements of the increase in capital assets of business-type activities include preservation of the Inter-County Connector (ICC/MD200) and expansion of the electronic toll lane (ETL) project on the JFK Memorial Highway (I-95), which resulted in an increase in infrastructure, and the restoration of existing facilities.

Additional information on the State's capital assets can be found in footnote 10 of this report.

#### Long-term debt

The State is empowered by law to authorize, issue and sell general obligation bonds, which are backed by the full faith and credit of the State. The State also issues dedicated revenue bonds for the Department of Transportation and various business-type activities. The payment of principal and interest on revenue bonds comes solely from revenues received from the respective activities. This dedicated revenue debt is not backed by the State's full faith and credit.

At June 30, 2015, the State had outstanding bonds totaling \$16.4 billion. Of this amount, \$8.7 billion were general obligation bonds, backed by the full faith and credit of the State. The remaining \$7.7 billion were secured solely by the specified revenue sources.

| Revenue bonds (backed by specific revenues)        |                |                |        | \$<br>5,721    | \$               | 5,940 | 5,721        |      | 5,940  |
| Total  | \$<br>10,697   | \$             | 10,175 | \$<br>5,721    | \$               | 5,940 | \$<br>16,418 | \$   | 16,115 |

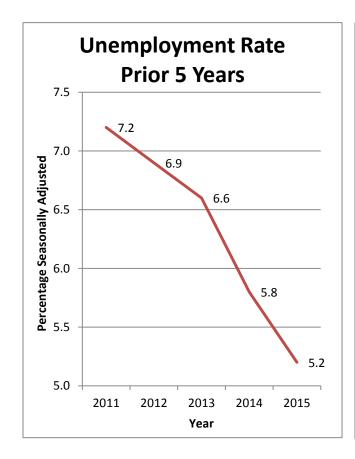

The total increase in bonded debt in the current fiscal year was \$303 million (\$315 million increase related to general obligation bonds, \$207 million increase related to transportation bonds, and \$219 million decrease related to revenue bonds). The State's general obligation bonds are rated Aaa by Moody's and AAA by Standard and Poors and Fitch. During fiscal year 2015, the State issued general obligation debt totaling \$2.0 billion at a premium of \$351 million. Of this amount, \$1.0 billion and related premium of \$204 million were for refunding bonds. On August 3, 2015 (fiscal year 2016), the State issued general obligation bonds aggregating \$500 million for capital improvements.

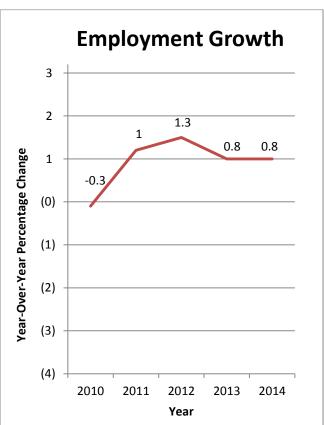

State law limits the amount of Consolidated Transportation Bonds, dedicated revenue debt that may be outstanding as of June 30 to the amount authorized in the budget, and this amount may not exceed \$4.5 billion. The aggregate principal amount of these bonds that was authorized to be outstanding as of June 30, 2015, was \$2.5 billion. The actual amount in Consolidated Transportation Bonds outstanding was \$2.0 billion.

Additional information on the State's long-term debt can be found in footnote 11 of this report.

#### Economic Factors and Next Year's Budget

The forecast of the Maryland economy by the Board of Revenue Estimates is the basis for Maryland's revenue outlook. Employment growth of 1.5% and 1.3% is expected in calendar years 2015 and 2016, respectively. The unemployment rate was 5.2% in June 2015 and has continued a downward trend since 2011. Historical employment growth and the unemployment rate for the past five years are depicted below.

Growth in personal income of 4.2% and 4.6% in calendar years 2015 and 2016, respectively, is expected. General fund revenues are estimated to increase by 3.5% in fiscal year 2016.

Maryland's budget in fiscal year 2016 is \$40.3 billion, a 1% increase over 2015. Key provisions of the budget include:

- Appropriations to the Reserve Fund and debt service fund from the general fund are \$135 million and \$134 million, respectively;
- State agency expenditures decline by 1% from the original fiscal year 2015 appropriation;
- Rates for most Medicaid providers are reduced to fiscal year 2014 levels;
- State employee salaries are rebased and frozen, and full-year savings from the fiscal year 2015 Voluntary Separation Program total \$30 million;
- Repealing repayment of a prior year transfer from Program Open Space by the general fund saves the general fund 50 million;
- General fund revenues of \$72 million are realized by redirecting transfer tax and Chesapeake Bay 2010 Trust Fund revenues and from implementing tax compliance and fraud initiatives.

#### Restatement of Current Year Balances for New Governmental Accounting Standards

In the current fiscal year, the State implemented Statement No. 68 of the Governmental Accounting Standards Board which requires changes to the State's pension accounting and reporting. Note 1 to the financial statements identifies these changes and adjustments to the beginning net position on the Governmentwide Statement of Activities.

#### Requests for Information

This financial report is designed to provide a general overview of the State's finances for all those with an interest in the State's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the General Accounting Division, Office of the Comptroller, P.O. Box 746, Annapolis, Maryland, 21404.

### COMPONENT UNIT FINANCIAL STATEMENTS

### **Major Component Units**

#### **Higher Education**

Higher education consists of the University System of Maryland, Morgan State University, St. Mary's College of Maryland, and Baltimore City Community College and certain of their foundations. Because the universities and colleges are similar in nature and function, they have been combined and presented as a single component unit. The financial information for certain foundations affiliated with the universities and colleges has not been included in this fund in accordance with GASB Statement No. 14 as amended by GASB Statement No. 39.

#### **Maryland Prepaid College Trust**

The Maryland Prepaid College Trust is a program of the College Savings Plans of Maryland and directed by the Board to provide a means for payment of the cost of tuition and mandatory fees in advance of enrollment at eligible institutions of higher education.

### **Non-Major Component Units**

### **Other Component Units**

Non-major component units are presented individually in the combining section following the footnotes.

#### **Notes to the Financial Statements**

For the Year Ended June 30, 2015

#### 1. Summary of Significant Accounting Policies:

#### A. Reporting Entity

The accompanying financial statements include the various departments, agencies, and other organizational units governed by the General Assembly and/or Constitutional Officers of the State of Maryland (State).

As required by accounting principles generally accepted in the United States of America (GAAP), these financial statements present the state government (primary government) and its component units (entities for which the State is considered to be financially accountable). The Governmental Accounting Standards Board (GASB) has set forth criteria to be considered in determining financial accountability. These criteria include the State appointing a voting majority of an organization's governing body and (1) the ability of the State to impose its will on that organization, or (2) the potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the State.

#### Discrete Component Units

The discretely presented component units are those entities which are legally separate from the State, but are financially accountable to the State, or whose relationships with the State are such that exclusion would cause the State's financial statements to be misleading or incomplete. The Component Units column of the government-wide financial statements includes the financial data of the following major component units. Individual statements are presented for each component unit.

Higher Education (Proprietary Fund Type) – Higher Education consists of the University System of Maryland, Morgan State University, St. Mary's College of Maryland and Baltimore City Community College and certain of their foundations. Each entity is governed by its own Board of Regents, or Board of Trustees, whose members are appointed by the Governor. The universities and colleges are funded through State appropriations, tuition, federal grants, and private donations and grants. Because the universities and colleges are similar in nature and function, they have been combined and presented as a single discretely presented component unit. Some of the financial information for foundations affiliated with the universities and colleges has not been included with the financial information of the universities and colleges in accordance with the requirements of GASB Statement No. 14, as amended by GASB Statements No. 39 and 61.

The Maryland Prepaid College Trust (Proprietary Fund Type) is a program of the College Savings Plans of Maryland and directed by its Board. The Board consists of five State officials and five members of the public appointed by the Governor. The Maryland Prepaid College Trust provides a means for payment of the cost of tuition and mandatory fees in advance of enrollment at eligible institutions of higher education. If the Trust's contract obligations exceed the market value of Trust assets, State appropriations may be provided.

The non-major component units are comprised of the following proprietary fund type entities:

Maryland Stadium Authority (Proprietary Fund Type) – The Maryland Stadium Authority (Authority) was created as a body corporate and politic and as an independent unit of the Executive Department of the State. The Authority's purpose is to acquire land and to construct, operate and/or manage various capital facilities in the State. The Authority's Board consists of seven members, of which, six are appointed by the Governor, with the advice and consent of the State Senate, and one whom is appointed by the Mayor of Baltimore City, with the advice and consent of the State Senate. The Maryland State Legislature and the Board of Public Works (consisting of the Governor, Comptroller and Treasurer) have approved all of the projects and bond issuances of the Authority.

The Maryland Food Center Authority (Authority) is a body corporate and politic, the governing board of which is composed of twelve members. Four members are State officials, and eight members are appointed by the Governor. The

Authority has statewide jurisdiction to promote the State's welfare by undertaking real estate development and management activities that facilitate the wholesale food industry activity in the public interest. It is subject to State regulations and approvals, and has received State subsidies.

The Maryland Environmental Service (Service) was created as a body corporate and politic and is governed by a nine-member Board of Directors. The Board of Directors and the officers of the Service are appointed and/or approved by the Governor. The Service helps private industry and local governments manage liquid, solid and hazardous wastes. In accordance with direction from the Governor, the Service plans and establishes major resource recovery facilities, solid waste management plans and hazardous waste management programs.

The Maryland Industrial Development Financing Authority (MIDFA) was established as a body corporate and politic and a public instrumentality of the State. MIDFA consists of nine members, the Secretary of the Department of Business and Economic Development, or his designee; the State Treasurer or the State Comptroller, as designated by the Governor; and seven members appointed by the Secretary of the Department of Business and Economic Development and approved by the Governor. MIDFA is subject to the authority of the Secretary and subject to State finance regulations. It provides financial assistance to enterprises seeking to locate or expand operations in Maryland.

The Maryland Technology Development Corporation (TEDCO) was established as a body corporate and politic and a public instrumentality of the State. TEDCO's Board of Directors consists of 15 individuals; the Secretary of the Department of Business and Economic Development and 14 members appointed by the Governor with the advice and consent of the Senate. Its budget is submitted to and approved by the State, and its major revenue source is State appropriations. TEDCO was created to assist in transferring to the private sector and commercializing the results and products of scientific research and development conducted by the colleges and universities, and to assist in the commercialization of technology developed in the private sector. TEDCO administers the Maryland Technology Incubator Program and the Maryland Stem Cell Research Fund.

Complete financial statements of the individual component units and the Maryland Local Government Investment Pool of the Investment Trust Fund may be requested from the Comptroller of Maryland, LLG Treasury Building, Annapolis, Maryland 21404.

#### Related Organizations

The Maryland Economic Development Corporation (MEDCO), Injured Worker's Insurance Fund and the Maryland Automobile Insurance Fund are related organizations of the State. The Governor appoints a majority of the Board of Directors, but the State does not have the ability to impose its will on the organizations, and there is no financial benefit/burden relationship. As of June 30, 2015, the Economic Development Loan Programs, major enterprise funds, had transactions with MEDCO that included loans, investments and grants totaling \$10,519,000.

#### B. Government-wide and Fund Financial Statements

The State's government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all non-fiduciary activities of the primary government and its component units. Inter-fund activity has been eliminated from these statements except for certain charges for services between activities that would distort the direct costs and program revenues reported for the applicable functions. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support. Likewise, the primary government is reported separately from certain legally separate component units for which the primary government is financially accountable.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment is offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Expenses reported for functional activities include allocated indirect expenses. Program revenues include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as general revenues.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements as those assets are not available to support government programs. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements.

#### C. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary fund and fiduciary fund (other than the agency funds) financial statements. The agency funds are reported using the accrual basis of accounting, but have no measurement focus. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the State considers all revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to retirement costs, other post-employment benefits, compensated absences, pollution remediation and claims and judgments, are recorded only when payment is due.

Property taxes, franchise taxes, licenses and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. All other revenue items are considered to be measurable and available only when cash is received by the government.

The State reports the following major governmental funds:

#### General Fund:

Transactions related to resources obtained and used for those services traditionally provided by a state government, which are not accounted for in other governmental funds, are accounted for in the general fund. These services include, among other items, general government, health and mental hygiene, education (other than higher education institutions), human resources, public safety, judicial, labor, licensing and regulation, natural resources and recreation, housing and community development, environment, agriculture, and business and economic development. Resources obtained from federal grants and used for general fund activities consistent with applicable legal requirements, are recorded in the general fund.

Special Revenue Fund, Maryland Department of Transportation:

Transactions related to resources obtained, the uses of which are committed for specific purposes, are accounted for in the special revenue fund. The Maryland Department of Transportation special revenue fund accounts for resources used for operations (other than debt service and pension activities) of the Maryland Department of Transportation, including construction or improvement of transportation facilities and mass transit operations. Revenue sources dedicated to transportation operations include the excise taxes on motor vehicle fuel and motor vehicle titles, a portion of the State's corporation income tax and the State's sales tax, wharfage and landing fees, fare box revenues, bond proceeds, federal grants for transportation purposes and other receipts of the Department's agencies.

#### Enterprise Funds:

Transactions related to commercial types of activities operated by the State are accounted for in the enterprise funds. The enterprise funds differ from governmental funds in that the focus is on the flow of economic resources, which, together with the maintenance of equity, is an important financial indicator.

The major enterprise funds are as follows:

- 1. The Economic Development Loan Programs include the direct loan programs of the Maryland Departments of Housing and Community Development, Business and Economic Development and Environment.
- The Unemployment Insurance Program reflects the transactions and account balances of the Unemployment Insurance
  Program and is used to account for the unemployment taxes collected from employers, federal revenue received and
  remittance of benefits to the unemployed.
- The Maryland Lottery and Gaming Control Agency operates the State Lottery and regulates the operation of video lottery terminal (VLT) and table game casinos.
- 4. The Maryland Transportation Authority is responsible for the operation and maintenance of toll roads, bridges and tunnels in the State.

Fiduciary Funds

- 1. The Pension and Other Employee Benefits Trust Fund (Pension Trust Fund) includes the Maryland State Retirement and Pension System, the Maryland Transit Administration Pension Plan, and the Deferred Compensation Plan. The Pension Trust Fund reflects the transactions and accounts balances of the plans administered by the State, and is accounted for using the flow of economic resources measurement focus. The Deferred Compensation Plan, which is reported as of and for its period ended December 31, accounts for participant earnings deferred in accordance with Internal Revenue Code Sections 457, 403(b), 401(a), and 401(k). Amounts deferred are invested and are not subject to Federal income taxes until paid to participants upon termination or retirement from employment, death or for an unforeseeable emergency.
- 2. The Investment Trust Fund reflects the transactions and account balances of the Maryland Local Government Investment Pool and is accounted for using the flow of economic resources measurement focus.
- 3. The Postretirement Health Benefits Trust Fund (OPEB Trust) accumulates funds to assist the State's Employee and Retiree Health and Welfare Benefits Program finance the State's postretirement health insurance subsidy. The OPEB Trust is administered by the Board of Trustees for the Maryland State Retirement and Pension System, and its transactions and account balances are accounted for using the flow of economic resources measurement focus. The assets of the Pension and OPEB Trust are not pooled for investment purposes, and each trust's assets may be used only for the payment of benefits to the trust's members in accordance with the terms of the trust.
- 4. The agency funds are custodial in nature, and do not present the results of operations or have a measurement focus. The State uses agency funds to account for the receipt and disbursement of litigants, patient and prisoner accounts, various taxes collected by the State for distribution to political subdivisions and amounts withheld from employee's payroll.
  - D. Change in Accounting Principles and Restatement of Beginning Balances

As of July 1, 2014, the State implemented GASB Statement No. 68, Accounting and Financial Reporting for Pensions – an amendment of GASB Statement No. 27. GASB Statement No. 71. Pension Transition for Contributions Made Subsequent to the Measurement Date – an amendment of GASB Statement No. 68, is applied simultaneously with the provisions of Statement No. 68.

The net pension liability (NPL), as established by actuarial valuations under methods and assumptions required by Statement No. 68, replaced the unfunded actuarial accrued liability previously disclosed for the State Retirement and Pension System and the Maryland Transit Administration Pension Plan. The NPL is a present value measure of benefits to be provided to current active and inactive employees that is attributed to those employees' past service, less the amount of the fiduciaries' net position. It is reported as a liability on the government-wide statement of net position. It replaces the net pension obligation, which is the cumulative difference between annual required contributions to the pension plan, as adjusted, to meet pension obligations as they come due, and actual contributions, on the statement of net position.

Cost-sharing employers, including the governmental activities, business-type activities, and component units, recognize a liability for their proportionate share of the NPL. In addition, a special funding situation exists when a non-employer entity is legally responsible for making contributions to a pension plan for the benefit of employees of another entity and results in the non-employer entity recording an NPL. In Maryland, the State makes contributions to amortize the actuarial present value of projected benefit payments attributable to past periods of service of local teachers and a diminishing percentage of current service costs. Accordingly, the State records the NPL for the local teachers' plan. See Note 15 for further discussion of retirement costs and obligations.

The State has restated beginning net position as follows (amounts expressed in thousands).

|   | Governmental<br>Activities | Business-Type<br>Activities | Component<br>Units |
|---|----------------------------|-----------------------------|--------------------|
| Beginning net position, as previously stated  | \$ 2,440,392               | \$7,063,179                 | \$7,968,778        |
|   | , , ,                      |                             | , , ,              |
| Less: Net pension liability – MSRPS   | (17,393,109)               | (215,183)                   | (891,892)          |
| Net Pension liability – MTA Pension Plan<br>Net Pension asset – MTA Pension Plan at | (630,048)                  |                             |                    |
| July 1, 2014  | (17,616)                   |                             |                    |
| Less: Deferred outflows for change of   |                            |                             |                    |
| assumptions   |                            |                             | (703)              |
| Deferred inflows for difference between   |                            |                             |                    |
| projected and actual earnings   |                            |                             | (138)              |
| Add: Net pension obligation – MSRPS   |                            |                             |                    |
| at July 1, 2014   | 3,530,441                  |                             |                    |
| Add: Deferred outflows for pension contributions                                    |                            |                             |                    |
| made subsequent to the measurement date of the                                      |                            |                             |                    |
| beginning NPL – MSRPS   | 1,460,133                  | 24,496                      | 105,541            |
| Beginning net position, as restated   | \$(10,609,807)             | \$6,872,492                 | \$7,181,586        |

In addition, balances of other liabilities have been restated in Note 11 for changes in long-term obligations for governmental activities and business-type activities as follows (amounts expressed in thousands).

|  | Governmental<br>Activities | Business-Type<br>Activities |
|--|----------------------------|-----------------------------|
| Beginning other liabilities, as previously stated    | \$ 9,766,380               | \$132,186                   |
| Add: Net pension liability – MSRPS                   | 17,393,109                 | 215,183                     |
| Net pension liability – MTA Pension Plan             | 630,048                    |                             |
| Less: Net pension obligation – MSRPS at July 1, 2014 | (3,530,441)                |                             |
| Beginning balance of other liabilities, as restated  | \$24,259,096               | \$347,369                   |

On July 1, 2014, TEDCO changed its method of recording unspent Maryland Innovation Initiative (MII) funds received from participating universities to unearned grant income. In fiscal years 2013 and 2014, the unspent funds were recorded as revenue. The new method of accounting for MII grants was adopted so that TEDCO could better track available funding for future disbursement of MII grants. As a result of the accounting change, beginning net position decreased by \$997,000, for an increase in unearned grant revenue.

During fiscal year 2015, the State changed its reporting for certain loan transactions on the Statement of Cash Flows for the Economic Development Loan Programs in accordance with generally accepted accounting principles. Loans made to local governments and other governmental entities and for rental projects, small businesses and industrial sites rather than directly to individuals, have been reclassified from cash flows from operating activities to cash flows from investing activities.

#### E. New Pronouncements

In February 2015, the GASB issued Statement No. 72, Fair Value Measurement and Application, effective for fiscal years beginning after June 15, 2015. GASB Statement No. 73, Accounting and Financial Reporting for Pensions and Related Assets That Are Not Within the Scope of GASB Statement 68, and Amendments to Certain Provisions of GASB Statements 67 and 68, was issued in June 2015, effective for fiscal years beginning after June 15, 2015. GASB Statement No. 74, Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans, issued in June 2015, is effective for fiscal years beginning after June 15, 2016, and Statement No. 75, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions, also issued in June 2015, is effective for fiscal years beginning after June 15, 2017. Also, in June 2015, Statement No. 76, The Hierarchy of Generally Accepted Accounting Principles for State and Local Governments, applicable to reporting periods beginning after June 15, 2015, was issued. The State will implement these statements as of their effective dates. While the State is still in the process of determining the effect of implementing these GASB statements, Statement No. 75 is expected to have a material effect on the financial position of the State.

## 2. Summary of Significant Accounting Policies- Assets, Deferred Outflows of Resources, Liabilities, Deferred Inflows of Resources and Net Position or Equity:

A. All Funds:

Deposits with Financial Institutions and Investments:

The State Treasurer's Office operates a centralized cash receipt, investment and disbursement function for the majority of the State's funds as required by statute. Certain enterprise activities, pension funds, agency funds and component units are specifically exempt from this function in the law. Individual fund equity in pooled invested cash is reported as an asset on the balance sheets of those funds participating in the centralized cash receipt and disbursement function. Investment earnings accrue to those funds reporting equity in pooled invested cash only if the law specifically provides for the fund's accrual of interest earnings.

The State Treasurer's Office invests short-term cash balances on a daily basis primarily in U.S. Government obligations and money market mutual funds. Under the State Finance and Procurement Article of the Annotated Code of Maryland, Title 6, Subtitle 2, the State Treasurer may only invest in the following:

- Any obligation for which the United States Government has pledged its faith and credit for the payment of principal and interest.
- Any obligation that a United States agency issues in accordance with an act of Congress.
- Repurchase agreements that any of the above obligations secure.

- Certificates of deposits of Maryland financial institutions.
- Banker's acceptances.
- Money market mutual funds.
- · Commercial paper.
- Maryland Local Government Investment Pool.
- Securities Lending Collateral.

In addition, bond sale proceeds may be invested in municipal securities. Collateral must be at least 102% of the book value of the repurchase agreements, and must be delivered to the State Treasurer's custodian for safekeeping. Investments are recorded at fair value, and changes in fair value are recognized as revenue. Fair values are based on quotations from national security exchanges and security pricing services, or by the respective fund managers for securities which are not actively traded. Money market mutual funds and the Maryland Local Government Investment Pool are operated in accordance with Rule 2a-7 of the Investment Company Act of 1940, as amended. Their fair values are based on a share price of \$1.00 per share. Investments maturing within 90 days of purchase are reported in the financial statements as cash and cash equivalents.

The Maryland State Retirement and Pension System (System), in accordance with State Personnel and Pension Article Section 21-123 of the Annotated Code of Maryland, is permitted to make investments subject to the terms, conditions, limitations and restrictions imposed by the Board of Trustees of the System. The law further provides that no more than 25% of the assets that are invested in common stocks may be invested in non-dividend paying common stocks. In addition, no investment in any one organization may constitute more than 5% of the total assets of the System. The System is authorized by Section 21-116 of the State Personnel and Pensions Article to establish and maintain the investment policy manual, which authorizes investing in all major sectors of the capital market in order to diversify and minimize total investment program risk. Such sectors would include, but are not limited to, common stock, preferred stock, convertible securities, warrants and similar rights of U.S. and non-U.S. companies; private equity – direct/partnership/funds; real estate investment trusts; commingled real estate funds; directly owned real estate; fixed income obligations of the U.S. government and its states and local subdivisions, non-U.S. governments and their states and local subdivisions, U.S. and non-U.S. companies, and supra-national organizations; futures and options; foreign exchange forward and future contracts and options; equity index futures; and equity options.

Investments of the System, the Postretirement Health Benefits Trust Fund (OPEB Trust) and the Maryland Transit Administration (MTA) Pension Plan are stated at fair value. The investments of the OPEB Trust and the MTA Pension Plan are held and invested on their behalf by the System and are limited to those allowed for the System. For fixed income securities, fair value is based on quoted market prices provided by independent pricing services. Securities traded on a national or international exchanged are valued at the last reported sales price at current exchange rates. Mortgages and mortgage-related securities are valued on a basis of future principal and interest payments and are discounted at prevailing interest rates for similar instruments. Fair value for real estate investments is based on estimated current values and independent appraisals. Fair value for private equity investments and mutual funds (other than those funds traded on a national or international exchange) is based on information provided by the applicable fund managers.

State employees are offered participation in deferred compensation plans created in accordance with the Internal Revenue Code, Sections 401(a), 401(k), 403(b) and 457. The Board of Trustees of the Maryland Teachers and State Employees Supplemental Retirement Plans (the Plans) is responsible for the implementation, maintenance and administration of the Plans. The Board has appointed a private company as the Plans' administrator. Assets of the Plans are valued at cost plus interest credited which approximates fair market value for fixed earnings investment contract pools and at fair value based on published quotations at each December 31, or net asset value as provided by the investment custodian, for variable earnings investments.

#### Retirement Costs:

Substantially all State employees participate in one of several State retirement systems (See Note 15). The State also provides retirement benefits to teachers and certain other employees of its political subdivisions. Retirement costs have been provided on

the accrual basis, based upon actuarial valuations, except that retirement expenditures for governmental funds represent amounts contributed by the State for the fiscal year.

#### Other Post-Employment Benefit Costs:

Substantially all State retirees may participate in the various health care plans offered by the State (See Note 16). Post-employment health care costs have been provided on the accrual basis, based upon actuarial valuations, except that other post-employment expenditures for governmental funds represent amounts contributed by the State for the fiscal year

#### Accrued Self-Insurance Costs:

The accrued self-insurance costs represent the State's liability for its various self-insurance programs. The State is self-insured for general liability, property and casualty, workers' compensation, environmental and anti-trust liabilities and certain employee health benefits. The State records self-insurance expenses in the proprietary funds and discretely presented component units on an accrual basis and the modified accrual basis for the governmental funds. The long-term accrued self-insurance costs of the governmental funds, which are not expected to be funded with current resources, are reported in the government-wide financial statements.

#### Annual Leave Costs:

Principally all full-time employees accrue annual leave based on the number of years employed up to a maximum of 25 days per calendar year. Earned annual leave may be accumulated up to a maximum of 75 days as of the end of each calendar year. Accumulated earned but unused annual leave for general government employees is accounted for in the government-wide financial statements. Liabilities for accumulated earned but unused annual leave applicable to proprietary funds and component units are reported in the respective funds.

#### Capital Assets:

Capital assets, which include property, plant, art and historical treasures, equipment, and infrastructure assets (e.g., roads, bridges, sidewalks, and similar items), are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Infrastructure acquired prior to June 30, 1980, is not reported. Capital assets are defined by the government as assets with an initial, individual cost of more than \$50,000 and an estimated useful life in excess of two years. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation. The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend the assets life are not capitalized. Major outlays for capital assets and improvements are capitalized as projects are constructed.

Capital assets of the primary government, as well as the component units, are depreciated using the straight line method over the following estimated useful lives:

| Assets                | Years |
|-----------------------|-------|
| Buildings             | 5-75  |
| Building improvements | 5-75  |
| Vehicles              | 3-25  |
| Office equipment      | 3-10  |
| Computer equipment    | 3-10  |
| Computer software     | 5-10  |
| Infrastructure        | 10-75 |

#### Deferred Outflows and Deferred Inflows of Resources:

Deferred outflows of resources are consumption of net position that applies to future reporting periods and so will not be recognized as an outflow of resources (expense/expenditure) until then. Deferred outflows of resources are presented separately after "Total Assets" in the State's financial statements.

Deferred inflows of resources are acquisition of net position that applies to future reporting periods and so will not be recognized as an inflow of resources (revenue) until that time. Deferred inflows of resources are presented separately after "Total Liabilities" in the State's financial statements.

#### Long-term Obligations:

In the government-wide financial statements, and for proprietary fund types in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type statement of net position. Bond premiums and discounts adjust the carrying value of the bonds and are amortized over the life of the bonds. Issuance costs are expensed as incurred.

In the fund financial statements, governmental fund types recognize bond premiums and discounts during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuances costs are reported as debt service expenditures.

#### Restricted Resources:

When both restricted and unrestricted resources are available for use, it is the State's policy to use restricted resources first, and then unrestricted resources as they are needed.

#### Debt Refinancing:

The gain or loss associated with debt refinanced is deferred and amortized to interest expense over the remaining life of the old debt or the life of the new debt, whichever is shorter.

#### Net Position:

Net position is divided into three categories. Net investment in capital assets is the capital assets less accumulated depreciation and outstanding principal of the related debt. Deferred outflows of resources and deferred inflows of resources that are attributable to the acquisition, construction, or improvement of capital assets or related debt also are included in this category. Restricted net position reflects restrictions on assets and deferred outflows imposed by parties outside the State or imposed by the State by constitutional provisions or enabling legislation. Unrestricted net position is total net position of the State less net investment in capital assets and restricted net position. Unrestricted net position is comprised mainly of cash, investments, loans and receivables.

#### B. Government Funds:

#### Inventories and Prepaid Items:

All inventories are valued at cost using the first-in/first-out (FIFO) method. Inventories of governmental funds are recorded as expenditures when consumed rather than when purchased.

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in the fund financial statements under the consumption method.

#### Grants:

Revenues from federal reimbursement type grants are recognized when the related expenditures are incurred and the revenues are both measurable and available. The State considers all grant revenues to be available if they are collected within 60 days of the current fiscal period. Distributions of food stamp benefits are recognized as revenues and expenditures when the benefits are distributed to individual recipients.

#### Income Taxes:

The State accrues the net income tax receivable or records unearned revenue based on estimated income tax revenues and refunds due relating to the fiscal year, that will not be collected or paid until after the fiscal year end. This accrual is computed based on projected calendar year net tax collections, tax laws in effect, future projections and historical experience.

#### Sales and Use Taxes:

The State accrues June sales taxes that are not remitted at year end as a receivable. These taxes are considered measurable and available since they represent June collections that are remitted to the State in July by merchants who collect the related sales tax.

#### Property Taxes:

The State levies an annual tax for the fiscal year beginning July 1 and ending June 30 on all real property subject to taxation, due and payable each July 1 and December 1 (lien dates), based on assessed values as of the previous January 1, established by the State Department of Assessments and Taxation at 100% of estimated market value. Each of the counties, Baltimore City and incorporated municipalities establish rates and levy their own tax on such assessed values. The State tax rate in fiscal year 2015 was 11.2¢ per \$100 of assessed value. Unpaid property taxes are considered in arrears on October 1 and January 1, respectively, and penalty and interest of 1% is assessed for each month or fraction of a month that the taxes remain unpaid. Property taxes are accrued to the extent they are collected within 60 days of year end.

#### Escheat Property:

Escheat property is property that reverts to the State's general fund in the absence of legal claimants or heirs. The escheat activity is reported in the general fund. An asset is recognized in the period when the legal claim to the assets arises or when the resources are received, whichever occurs first, and a liability is recognized for the estimated amount that ultimately will be reclaimed and paid.

#### Intergovernmental Expenditures:

General, special revenue and capital projects fund revenues paid to political subdivisions, and bond proceeds granted to political subdivisions, are recorded as intergovernmental expenditures if such payments do not require mandatory use for specific functions. Direct grants and other payments to, or on behalf of, political subdivisions are recorded as current expenditures.

#### Capital Assets:

Expenditures for capital assets are reported as capital outlays in the governmental funds.

## Compensated Absences:

It is the State's policy to permit employees to accumulate earned but unused vacation and sick pay benefits. There is no liability for unpaid accumulated sick leave since the State does not have a policy to pay any amounts when employees separate from service with the government. A liability for vacation pay amounts is reported in governmental funds only if they have matured, for example, as a result of employee resignations and retirements.

#### Fund Equity:

Fund balance for governmental funds is reported in categories and classifications that are presented in order of constraints on the specific purposes for which amounts in that fund can be spent. The non-spendable fund balance represents amounts that cannot be spent because they are either (a) not in spendable form or (b) legally or contractually required to be maintained intact. Otherwise, fund balance is classified as restricted, committed, assigned, or unassigned. Amounts are reported as restricted when spending constraints are (a) externally imposed or (b) imposed by the government by constitutional provisions or enabling legislation. The committed fund balance includes amounts committed for specific purposes by formal action of the government's highest level of decision-making authority. In Maryland, the uses of these funds are established in statute after appropriate action by the General Assembly and the Governor. The assigned fund balance is intended spending expressed by (a) the governing body or (b) a body or official to which the governing body has delegated the authority to assign amounts. The Governor is authorized to assign current year funds for appropriation in the subsequent year's budget pursuant to budgetary policies adopted by the General Assembly. The unassigned fund balance is the residual classification for the general fund.

Encumbrances are commitments related to unperformed contracts for goods or services. The State utilizes encumbrance accounting as part of the budgetary integration for the general, special revenue, and capital projects funds. As of June 30, 2015, certain amounts which were available for specific purposes have been encumbered as either restricted, committed or assigned fund balance depending on the constraints and approval in place at year end. In addition, where existing resources are not sufficient to liquidate encumbrances, the encumbrances are reported within committed or assigned fund balance, as appropriate. Encumbrances outstanding at year-end are reported as committed fund balance in the general, special revenue, and capital projects funds. Encumbrances are not displayed on the face of the financial statements but are disclosed in Note 17.

When expenditure is incurred for purposes for which both restricted and unrestricted fund balance is available, the State considers restricted resources to have been spent first. When an expenditure is incurred for purposes for which committed, assigned, or unassigned fund balance is available, the State considers committed, assigned, and unassigned amounts to have been spent in that order.

C. Enterprise Funds, Fiduciary Funds and Component Units:

Basis of Accounting:

The accounts of the enterprise funds, fiduciary funds and component units are maintained and reported using the accrual basis of accounting. Under this method, revenues are recorded when earned and expenses are recorded at the time liabilities are incurred.

Enterprise funds and component units distinguish operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. Operating expenses include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

Cash and Cash Equivalents:

The enterprise funds consider all highly liquid investments that mature within 90 days of purchase to be cash and cash equivalents for reporting on the statement of cash flows.

Grants:

Revenues from federal reimbursement type-grants are recorded when the related expenses are incurred.

Capital Assets:

Capital assets are stated at cost. Depreciation of the cost of capital assets is provided on the straight-line basis over estimated useful lives of 5 to 75 years for depreciable real property and building improvements, and 3 to 20 years for equipment. Construction period interest is capitalized. Repairs and maintenance are charged to operations in the period incurred. Replacements, additions and betterments are capitalized.

#### MLGCA Revenues, Prizes and Related Transfers:

Revenues and prizes of the Maryland Lottery and Gaming Control Agency (MLGCA) are primarily recognized when drawings are held. Certain prizes are payable in deferred installments. Such liabilities are recorded at the present value of amounts payable in the future. State law requires the MLGCA to transfer to the State revenues in excess of amounts allocated to prize awards, operating expenses and capital expenditures. The excess revenues from certain select games are transferred to the State's general fund, which then transfers the amounts to the Maryland Stadium Authority for operations and to cover the State's capital lease payments to the Maryland Stadium Authority.

Video lottery terminals (VLTs) are a self-activated video version of lottery games. The MLGCA recognizes VLT revenue as gross terminal revenue equivalent to all wagers, net of related prizes. The casino operators' share is recorded as commissions and bonuses. The five casino operators receive between 39% and 50% of the gross terminal revenue to operate their casinos. After deducting operating costs, State law requires the MLGCA to transfer the remainder of the gross terminal revenue to various general fund agencies, which are responsible for making further distributions.

The casinos also operate table games. Table games include blackjack, roulette, craps and various poker games, among others. Table game revenue is equivalent to all wagers, net of related prizes. Casino operators receive 80% of the table game revenue to operate their casinos. These costs are recorded as commissions and bonuses. The remainder is remitted to the MLGCA which transfers it to the general fund in accordance with the enabling legislation.

#### Provisions for Insurance and Loan Losses:

Current provisions are made for estimated losses resulting from insuring loans and uncollectible loans. Loss provisions are based on the current status of insured and direct loans, including delinquencies, economic conditions, loss experience, estimated value of collateral and other factors which may affect their realization.

#### Inventories:

Inventories are stated at the lower of cost or market, using the first-in, first-out method.

# 3. Deposits with Financial Institutions and the U.S. Treasury, Equity in Pooled Invested Cash and Investments:

Cash and cash equivalents, equity in pooled invested cash and investments as shown on the basic financial statements as of June 30, 2015, reconcile to cash deposit and investment disclosures as follows (amounts expressed in thousands).

| Government-wide statement of net position:  |                  |
|---|------------------|
| Cash  | \$<br>469,830    |
| Equity in pooled invested cash  | 3,914,022        |
| Investments   | 3,542,776        |
| Collateral for lent securities.   | 139,951          |
| Restricted cash   | 1,750,246        |

| Total cash and investments per Note 3.  | \$<br>65,293,476 |

| Cash deposit:                       |                  |
|-------------------------------------|------------------|
| Governmental funds                  | \$<br>218,988    |
| Enterprise funds                    | 1,111,918        |
| Fiduciary funds                     | 237,058          |
| Component units                     | 122,020          |
| Investments:                        |                  |
| Governmental funds                  | 5,766,305        |
| Enterprise funds                    | 2,200,182        |
| Fiduciary funds                     | 54,364,640       |
| Component units                     | 1,272,365        |
| Total cash deposits and investments | \$<br>65,293,476 |

Cash and equity in pooled invested cash for financial statement presentation includes short-term investments maturing within 90 days of purchase. Investments for financial statement presentation include certificates of deposit maturing 90 days or more from date of purchase.

## Cash Deposits:

As of June 30, 2015, the carrying value for the bank deposits of the governmental funds, enterprise funds, fiduciary funds and component units were \$218,988,000, \$1,111,918,000, \$237,058,000, and \$122,020,000, respectively. The bank balances were \$218,988,000, \$1,105,113,000, \$237,058,000, and \$120,111,000, respectively.

Custodial Risk. Custodial credit risk is the risk that, in the event of a bank failure, the government's deposits may not be returned. Deposits are exposed to custodial credit risk if they are not covered by depository insurance and the deposits are (a) uncollateralized, (b) collateralized with securities held by the pledging financial institution, or (c) collateralized with securities held by the pledging financial institution's trust department or agent but not in the government's name. State law permits the Treasurer to deposit in a financial institution in the State, unexpended or surplus money in which the Treasurer has custody if (a) the deposit is interest-bearing; (b) the financial institution provides collateral that has a market value that exceeds the amount by which a deposit exceeds the deposit insurance; and (c) a custodian holds the collateral.

The Economic Development Loan Programs and higher education component unit do not have a deposit policy for custodial credit risk. As of June 30, 2015, \$21,105,000, and \$6,816,000, respectively, of their bank balances were exposed to custodial credit risk as uninsured and uncollateralized.

#### Investments:

The State discloses investment risks as follows:

Interest Rate Risk. Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment.

Credit Risk. Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations.

Concentration of Credit Risk. Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer.

Custodial Credit Risk. Custodial credit risk is the risk that, in the event of the failure of the counterparty, the government will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the government and are held by either (a) the counterparty or (b) the counterparty's trust department or agent but not in the government's name.

Foreign Currency Risk. Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment.

#### 1. Investments-Governmental Funds:

The State Treasurer's Office is authorized to make investments as stated in Note 2.A.

Investments are stated at fair value that is based on quoted market prices. The investments and maturities as of June 30, 2015, for the governmental funds of the primary government were as follows (amounts expressed in thousands):

|                                  |    | <del>_</del> | Inve          | stment Maturities (in | n Year | s)          |
|----------------------------------|----|--------------|---------------|-----------------------|--------|-------------|
|                                  |    | Fair         | Less          |                       |        | More        |
| Investment Type                  |    | Value        | than 1        | 1-3                   |        | than 3      |
| U.S. Agencies (a)                | \$ | 5,059,845    | \$<br>26,298  | \$ 4,393,407 (b)      | \$     | 640,140 (c) |
| Repurchase Agreements            |    | 415,637      | 389,565       |                       |        | 26,072      |
| Local Government Investment Pool | _  | 150,872      | <br>150,872   |                       |        |             |
| Total Investments                |    | 5,626,354    | 566,735       | 4,393,407             |        | 666,212     |
| Collateral for Lent Securities   |    | 139,952      | <br>139,952   |                       |        |             |
| Total Investments and            |    |              |               |                       |        |             |
| Collateral for Lent Securities   | \$ | 5,766,306    | \$<br>706,687 | \$ 4,393,407          | \$     | 666,212     |

- (a) Investments held by broker dealers under securities lending program are \$118,530,000.
- (b) Bonds in the amount of \$4,283,197,000, mature July 2017 to June 2018, but are callable July 2015 to January 2016.
- (c) Bonds in the amount of \$589,537,000, mature December 2019 to June 2020, but are callable July 2015 to June 2016.

Interest Rate Risk. The State Treasurer's Office's investment policy states that to the extent possible, it will attempt to match its investments with anticipated cash flow requirements. Unless matched to a specific cash flow, the Treasurer's Office will not directly invest in securities maturing more than five years from the date of purchase. Sinking fund investments with guaranteed earnings to redeem term bonds beginning in fiscal year 2016 were \$42,772,000.

Credit Risk. State law requires that the governmental funds' repurchase agreements be collateralized by U.S. Treasury and agency obligations. In addition, investments are made directly in U.S. agency obligations. Obligations of the Federal National Mortgage Association, Federal Farm Credit Bank, Federal Home Loan Mortgage Corporation and Tennessee Valley Authority are rated Aaa by Moody's, AA by Standard & Poor's, and AAA by Fitch. Obligations of the Federal Home Loan Bank are rated Aaa by Moody's and AA by Standard & Poor's. Obligations of the Federal Agricultural Mortgage Corporation are not rated. The Local Government Investment Pool is rated AAAm by Standard & Poor's.

Concentration of Credit Risk. The State Treasurer's Office's investment policy limits the amount of repurchase agreements to be invested with a particular institution to 30% of the portfolio. There is no other limit on the amount that may be invested in any one issuer. More than 5 % of the governmental funds' investments are in the Federal Home Loan Mortgage Corporation, Federal National Mortgage Association, and Federal Home Loan Bank. These investments are 44.6%, 33.6%, and 12.9% of the governmental funds' total investments, respectively.

## 2. Investments – Enterprise Funds:

The enterprise funds' bond indentures and investment policies, with the exception of the Economic Development Loan Programs, authorize the investment of assets related to the indentures and other funds in obligations in which the State Treasurer may invest. The Economic Development Loan Programs are authorized to invest in obligations of the U.S. Treasury, U.S. government agencies, obligations of U.S. political subdivisions, bankers' acceptances, commercial paper, repurchase

agreements, guaranteed investment contracts, corporate debt securities and mutual funds in accordance with bond indentures, and in direct equity investments in accordance with the statute establishing the program.

Investments of the enterprise funds are stated at fair value, which is based on quoted market prices.

The investments and maturities as of June 30, 2015, for the enterprise funds of the primary government were as follows (amounts expressed in thousands):

|                                   |                 | Investment Maturities (in Years) |         |    |         |    |        |    |        |    |         |
|-----------------------------------|-----------------|----------------------------------|---------|----|---------|----|--------|----|--------|----|---------|
|                                   | Fair            |                                  | Less    |    |         |    |        |    |        |    | More    |
| Investment Type                   | Value           | t                                | han 1   |    | 1-5     |    | 6-10   | 1  | 1-15   | t  | han 15  |
| U.S. Treasury obligations         | \$<br>418,143   | \$                               | 7,799   | \$ | 5,102   | \$ | 5,272  | \$ | 7,646  | \$ | 392,324 |
| U.S government agency obligations | 896,607         |                                  | 126,000 |    | 743,110 |    |        |    | 4,072  |    | 23,425  |
| Repurchase agreements             | 2,408           |                                  |         |    |         |    |        |    | 1,232  |    | 1,176   |
| Commercial paper                  | 19,993          |                                  | 19,993  |    |         |    |        |    |        |    |         |
| Guaranteed investment contracts   | 7,997           |                                  | 4,028   |    | 3,969   |    |        |    |        |    |         |
| Money market mutual funds         | 640,677         |                                  | 640,677 |    |         |    |        |    |        |    |         |
| Municipal bonds                   | 98,958          |                                  | 9,711   |    | 71,087  |    | 18,160 |    |        |    |         |
| Total                             | \$<br>2,084,783 | \$                               | 808,208 | \$ | 823,268 | \$ | 23,432 | \$ | 12,950 | \$ | 416,925 |

In addition to the investments scheduled above, as of June 30, 2015, the enterprise funds' investments also include the fair value of direct equity investments, \$78,096,000.

The MLGCA, a major enterprise fund, invests in U.S. Treasury obligations and annuity contracts that provide for guaranteed payouts to jackpot prize winners, and therefore have no interest rate risk to the MLGCA. As of June 30, 2015, the fair value of these investments was \$37,163,000, and \$140,000, respectively. Of these investments, U.S. Treasury obligations held by broker dealers under the securities lending program were \$18,847,000.

Interest Rate Risk. The enterprise funds' policy for managing their exposure to fair value loss arising from increasing interest rates is to manage investment maturities so that they precede or coincide with the expected need for funds.

Credit Risk. The investment policies of the enterprise funds require that repurchase agreements are collateralized by U.S. Treasury and agency obligations. The policies also require that money market mutual funds contain only U.S. Treasuries or agencies or repurchase agreements secured by these, or that they receive the highest possible rating from at least one nationally recognized securities rating organization and that commercial paper be rated A-1, P-1. According to the indenture and investment policy of the Economic Development Loan Programs, investments must be rated no lower than the rating on the Loan Programs' bonds or F1/P1 for the issuer's short-term accounts or securities. The ratings on the Loan Programs' bonds as of June 30, 2015, were Aa by Moody's and AA by Fitch, or higher.

As of June 30, 2015, the enterprise funds had the following investments and quality ratings (amounts expressed in thousands):

| •                                  | <br>            |          |              | Percentage  |
|------------------------------------|-----------------|----------|--------------|-------------|
|                                    | Fair            | Quality  | Rating       | of Total    |
| Investment Type                    | Value           | Rating   | Organization | Investments |
| U.S. government agency obligations | \$<br>136,954   | Aaa      | Moody's      | 6.22 %      |
| U.S. government agency obligations | 759,653         | AA       | S&P          | 34.53       |
| Money market mutual funds          | 639,070         | AAAm/Aaa | S&P/Moody's  | 29.05       |
| Money market mutual funds          | 1,607           | Unrated  |              | 0.07        |
| Commercial paper                   | 19,993          | A-1/P-1  | S&P/Moody's  | 0.91        |
| Guaranteed investment contracts    | 7,997           | Aaa      | Moody's      | 0.36        |
| Municipal bonds.                   | <br>98,958      | AAA      | S&P          | 4.50        |
| Total                              | \$<br>1,664,232 |          |              | 75.64 %     |

Concentration of Credit Risk. The enterprise funds place no limit on the amount they may invest in any one issuer of U.S. government agency obligations. More than 5% of the enterprise funds' investments are in obligations of the Federal Home Loan Bank, Federal Home Loan Mortgage Corporation, and Federal National Mortgage Association. These investments are 16.2%, 9.2%, and 9.0% of the enterprise funds' total investments, respectively.

#### 3. Investments – Fiduciary Funds:

The Pension Trust Funds and Postretirement Health Benefits Trust Fund are authorized to make investments as stated in Note 2.A.

The Maryland Local Government Investment Pool is authorized by Article 95, Section 22G, of the Annotated Code of Maryland to invest in any instrument in which the State Treasurer may invest. Investments of the Pool are stated at fair value. Securities are valued daily on an amortized cost basis which approximates market value. Money market funds are valued at the closing net asset value per share on the day of valuation.

The investments and maturities as of June 30, 2015, for the fiduciary funds of the primary government were as follows (amounts expressed in thousands):

| ·                                   |               | Investment Maturities (in Years) |              |              |              |  |  |
|-------------------------------------|---------------|----------------------------------|--------------|--------------|--------------|--|--|

<sup>(</sup>a) These investments are stated at contract value as of December 31, 2014. The fair value as of December 31, 2014, was \$787,283,000 and the wrapper value was \$12,194,000.

In addition to the investments scheduled above, as of June 30, 2015, the fiduciary funds' investments also include the fair value of corporate equity securities of \$16,482,196,000, commingled investments of \$8,997,083,000, private equity of \$3,656,731,000, real estate of \$2,724,178,000, stock mutual funds of \$2,358,881,000, annuity contracts of \$85,938,000, and insurance contracts of \$3,241,000.

*Interest Rate Risk.* As of June 30, 2015, the System had \$1.3 billion invested in mortgage pass-through securities. These investments are moderately sensitive to changes in interest rates because they are backed by mortgage loans in which the borrowers have the option of prepaying.

The Deferred Compensation Plans (Plans) invest in annuity contracts and insurance contracts that provide for guaranteed payouts to participants, and therefore have no interest rate risk to the Plans. As of June 30, 2015, the fair value of these investments was \$85,938,000, and \$3,241,000, respectively.

The State Treasurer's Office manages the Local Government Investment Pool. The State Treasurer's investment policies state that no direct investment by the Pool may have a maturity date of more than 13 months after its acquisition.

Credit Risk. The investment policy of the System regarding credit risk is determined by each investment manager's mandate. The Local Government Investment Pool may invest in banker's acceptances and commercial paper subject to certain credit rating guarantee and/or collateral requirements. As of June 30, 2015, the fiduciary funds' investments were rated by Standard and Poor's and/or an equivalent national rating organization, and the ratings are presented below using the Standard and Poor's rating scale (amounts expressed in thousands):

## Derivatives:

Each System investment manager's guidelines determine the extent to which derivatives are permissible. Futures and other derivatives are permitted to the extent that they are used in a manner that does not materially increase total portfolio volatility or relate to speculative activities. Unleveraged derivatives are permitted for the purpose of hedging investment risk, to replicate an investment that would otherwise be made directly in the cash market or to modify asset exposure in tactical portfolio shifts. Use of derivatives is not permitted to materially alter the characteristics, including the investment risk, of each manager's account. The investment managers are to have in place, and use, procedures that subject derivative based strategies to rigorous scenario and volatility analysis. Futures and short option positions must be hedged with cash, cash equivalents or current portfolio security holdings.

<sup>\*</sup>Notional may be a dollar amount or size of underlying for futures and options, negative values refer to short positions.

*Credit Risk.* The System is exposed to credit risk on derivative instruments that are in asset positions. To minimize its exposure to losses related to credit risk, the investment managers use counterparty collateral in their non-exchange-traded derivative instruments. Netting arrangements are also used when entering into more than one derivative instrument transaction with a counterparty. At the present time, the System does not have a formal policy relating to counterparty collateral or netting arrangements.

The aggregate fair value of derivative instruments in asset positions as of June 30, 2015, was \$513,665,000. This represents the maximum loss that would be recognized at the reporting date if all counterparties failed to perform. The maximum loss would, however, be reduced by the counterparty collateral and the liabilities included in netting arrangements with counterparties.

The following tables list the fair value of credit exposure per ratings of Standard & Poor's (S&P), Moody's and Fitch for the counterparties (amounts expressed in thousands):

|            | S&P    |            | Moody's |            | Fitch  |

#### 4. *Investments – Component Units:*

Investment accounts established by higher education institutions relate principally to endowments and trust accounts required by debt instruments and are invested in accordance with the investment policies adopted by the Board of Trustees. In general, endowment resources can be invested in debt and equity securities, and trust accounts can be invested only in debt securities. These investments include U.S. Treasury and agency obligations, corporate debt and equity securities, asset-backed securities and mutual funds that invest in government securities. The investments of the higher education foundations are not included in the GASB Statement No. 40 disclosures below because the foundations are not required to and do not follow statements of GASB.

One of the institutions, the University System of Maryland, transferred title to its endowment investments to its foundation in exchange for an equivalent proportionate interest in the long-term investment portfolio managed by the foundation. In June 2011, the institution entered into a new agreement with the foundation. The agreement is for a term of five years, with renewable two-year extensions at the option of the institution, unless notice of intent to terminate the arrangement is provided prior to the expiration of the term. If the agreement is terminated, funds invested with individual investment managers that have commitments from the foundation to maintain investments for certain minimum time periods may not be returned to the institution until those constraints have been satisfied. For reporting purposes, the foundation's investments have been reduced by the amount of the institution's investments with the foundation.

The Maryland Prepaid College Trust's Statement of Investment Policy (Investment Policy), adopted by the Board as required by the enabling legislation, allows the Trust to purchase investments including domestic, international and private equities; domestic, foreign and high yield bonds; global real estate equities; private real estate; commodities and other governmental agency instruments, as well as money market deposits based on the Investment Policy's specified portfolio allocation.

Investments of the component units are stated at fair value, which is based on quoted market prices.

The investments and maturities as of June 30, 2015, for the component units were as follows (amounts expressed in thousands):

|                                    |               | Investment Maturities (in Years) |    |        |    |        |    |        |            |     |

| Total\$                            | 830,813       | \$ 706,575                       | \$ | 60,363 | \$ | 49,069 | \$ | 14,287 | \$         | 519 |

In addition to the investments scheduled above, as of June 30, 2015, the component units' investments include the fair value of stock mutual funds of \$28,000, corporate equity securities of \$172,880,000, real estate of \$9,660,000, and the share of assets invested with the foundation of \$258,984,000.

Interest Rate Risk. The policy of the higher education institutions for managing their exposure to fair value loss arising from increasing interest rates is to comply with their investment policy, which sets maximum maturities for various fixed income securities. It is the practice of the Maryland Prepaid College Trust to have no investments with maturities longer than required to fund tuition obligations based on actuarial projections.

*Credit Risk*. The policy of the higher education institutions for reducing their exposure to credit risk is to require minimum quality ratings for fixed income securities. The Investment Policy of the Maryland Prepaid College Trust details the minimum quality standards for the Trust's bond portfolios.

As of June 30, 2015, the component units had the following investments and quality ratings (amounts expressed in thousands):

| -                                   | -          | Quality   | Rating        | Percentage<br>of Total |
|-------------------------------------|------------|-----------|---------------|------------------------|
| Investment Type                     | Fair Value | Rating    | Organization  | Investments            |
| U.S. agencies                       | \$ 10,826  | AAA/Aaa   | S&P & Moody's | 0.85 %                 |
| U.S. agencies                       | 7,837      | AA/Aaa    | S&P & Moody's | 0.62                   |
| U.S. agencies.                      | 6,405      | Not rated |               | 0.50                   |
| Money market mutual funds           | 67,076     | Aaa       | Moody's       | 5.27                   |
| Money market mutual funds           | 3,114      | BBB       | S&P           | 0.24                   |
| Bond mutual funds                   | 6,405      | BBB       | S&P           | 0.50                   |

| Corporate debt securities           | 143        | Not rated |               | 0.01                   |
| Municipal bonds                     | 4,000      | AAA       | S&P           | 0.31                   |
| Collateralized mortgage obligations | 33,203     | AAA       | S&P           | 2.61                   |
| Collateralized mortgage obligations | 11,027     | A         | S&P           | 0.87                   |
| Asset-backed securities             | 14,367     | A         | S&P           | 1.13                   |
| Asset-backed securities             | 5,318      | BBB       | S&P           | 0.42                   |
| Total                               | \$ 830,165 |           |               | 65.25 %                |

Concentration of Credit Risk. The higher education component units place no limit on the amount they may invest in U.S. government issuers. The Prepaid College Trust's guidelines limit a single investment to 5% of each bond portfolio's market value, except U.S. Treasury notes and bonds.

In addition to the Maryland Prepaid College Trust, the College Savings Plans of Maryland consists of the Maryland College Investment Plan, a fiduciary component unit. As of June 30, 2015, the Plan has \$4,241,241,000, of investments held in trust for individuals and organizations.

#### C. Securities Lending Transactions:

## 1. Governmental and Enterprise Fund Types:

Under Section 2-603 of the State's Finance and Procurement Article, the State lends U.S. government securities to broker-dealers and other entities (borrowers). The State Treasurer's Office controls the program and authorizes all transactions. These transactions may involve certain investments held in the State treasury for the benefit of State agencies. The State's custodial bank manages the securities lending program by contracting with a lending agent who receives cash as collateral. The lending agent may use or invest cash collateral in accordance with the reinvestment guidelines approved by the State Treasurer's Office. Additionally, under the terms of the lending agreement, the lending agent indemnifies the State against any credit loss arising from investment of the collateral. The collateral will be returned for the same securities in the future. Cash collateral is initially pledged at greater than the market value of the securities lent, and additional cash collateral has to be provided by the next business day if the aggregate value of the collateral falls to less than 100 % of the market value of the securities lent.

Securities on loan at year-end are owned by the general fund and the Maryland Lottery and Gaming Control Agency and are included in the preceding Investments Note 3.B. As of year-end, the State has no credit risk exposure to borrowers because the amounts the State owes the borrowers exceed the amounts the borrowers owe the State. As of June 30, 2015, the fair value of the loaned securities and the related collateral were as follows (amounts expressed in thousands):

|                         | Fair `     |            |                |
|-------------------------|------------|------------|----------------|
| -                       | Lent       | Collateral | Percent        |
|                         | Securities | Received   | Collateralized |
| Securities-General fund | \$118,530  | \$120,769  | 101.89%        |
| Securities-MLGCA        | 18,847     | 19,183     | 101.79%        |
| Total                   | \$137,377  | \$139,952  | 101.87%        |

Either the State or the borrower may terminate the lending agreements on demand. Lending agreements are usually short in duration. The duration of lending agreements is matched with the term to maturity of the investment of the cash collateral by investing only in repurchase agreements. Such matching existed at year-end. Investments made with cash received as collateral are included in the preceding Investments-Governmental Funds Schedule in Note 3.B.1.

The State's custodial bank is obligated to indemnify the State against liability for any suits, actions or claims of any character arising from or relating to the performance of the bank under the contract, except for liability caused by acts or omissions of the State.

The State did not experience any losses on their securities lending transactions for the year ended June 30, 2015.

### 2. Fiduciary Funds:

The Pension Trust Funds (Funds) participate in a securities lending program as permitted by the investment policies as approved by the Board of Trustees. The Fund's custodian lends specified securities to independent brokers in return for collateral of greater value. The preceding Investments-Fiduciary Funds Schedule in Note 3.B.3 includes securities lent at year-end for cash collateral and collateral received from lent securities.

Borrowing brokers must transfer in the form of cash or other securities, collateral valued at a minimum of 102% of the fair value of domestic securities and international fixed income securities, or 105% of the fair value of international equity securities on loan. Collateral is marked to market daily. If the fair value of the pledged collateral falls below the specified levels, additional collateral is required to be pledged by the close of the next business day. In the event of default by a borrowing broker, the Funds' custodial bank is obligated to indemnify the Funds if, and to the extent that, the fair value of collateral is insufficient to replace the lent securities. The Funds have not experienced any loss due to credit or interest rate risk on securities lending activity since inception of the program. As of June 30, 2015, the Funds had no credit risk exposure to borrowers because the fair value of collateral held for securities lent exceeded the fair value of the related securities, as follows (amounts expressed in thousands).

|   | Fair V       | /alue       |                |
|---|--------------|-------------|----------------|
|   | Lent         | Collateral  | Percent        |
|   | Securities   | Received    | Collateralized |
| Lent for cash collateral:                 |              |             |                |
| U.S. government and agency securities     | \$ 291,151   | \$ 296,958  | 102.0 %        |
| U.S. corporate bond and equity securities | 597,231      | 608,539     | 101.9          |
| International fixed income securities     | 13,561       | 13,885      | 102.4          |
| International equities                    | 188,550      | 200,749     | 106.5          |
| Lent for noncash collateral:              |              |             |                |
| U.S. government and agency securities     | 54,867       | 56,022      | 102.1          |
| U.S. corporate bond and equity securities | 158,501      | 162,157     | 102.3          |
| International equities                    | 4,901        | 5,178       | <u>105.7</u>   |
| Total securities lent                     | \$ 1,308,762 | \$1,343,488 | 102.7 %        |

During fiscal year 2015, the Funds maintained the right to terminate securities lending transactions upon notice. Cash collateral is invested in one of the lending agent's short-term investment pools, which as of June 30, 2015, had an average duration of 34 days and an average final maturity of 103 days. Because the relationship between the maturities of the investment pools and the Fund's security loans is affected by the maturities of the loans made by other entities that use the agent's pools, the Funds cannot match maturities. The Funds have received cash or securities that can be sold or pledged without a borrower default.

## 4. Receivables:

Taxes receivable, as of June 30, 2015, consisted of the following (amounts expressed in thousands).

|   | Major Gove<br>Fund    |                    |                                    |                                |
|---|-----------------------|--------------------|------------------------------------|--------------------------------|
|   | General               | Special<br>Revenue | Non-Major<br>Governmental<br>Funds | Total<br>Governmental<br>Funds |
| Income taxes  | \$ 810,465<br>452,998 |                    |                                    | \$ 810,465<br>452,998          |
| Transportation taxes, primarily motor vehicle fuel and excise  Other taxes, principally alcohol, tobacco and property Less: Allowance for uncollectible | 47,367<br>9,013       | \$140,711          | \$ 24,159                          | 140,711<br>71,526<br>9,013     |
| Taxes receivable, net   | \$ 1,301,817          | \$140,711          | \$ 24,159                          | \$ 1,466,687                   |

Tax revenues are reported net of uncollectible amounts. Total uncollectible amounts related to tax revenues of the current period were \$1,502,000.

Other accounts receivable in the governmental funds of \$813,586,000, including \$94,027,000, due in excess of one year, consisted of various miscellaneous receivables for transportation costs, collection of bills owed to the State's collection unit, Medicaid reimbursements, child support and public assistance overpayments and the tobacco settlement.

Other accounts receivable for the enterprise funds of \$379,150,000, primarily consisted of \$185,138,000, due to the Unemployment Insurance Program from employers and for benefit overpayments, \$89,212,000, due to the Community Development Administration from accrued interest and claims receivable on foreclosed and other loans and \$33,422,000, due to the Maryland Lottery and Gaming Control Agency from lottery retailers for ticket sale proceeds and from casino operators for gross terminal revenue and table game revenue.

## 5. Deferred Outflows of Resources and Deferred Inflows of Resources:

Deferred outflows of resources and deferred inflows of resources are reported when a given item that otherwise meets the definition of a revenue or expenditure/expense relates to a future period. These deferred amounts apply to governmental activities, business-type activities, proprietary funds, and fiduciary funds, except that deferred inflows apply to governmental funds for revenues that are not considered to be available to liquidate liabilities of the current period.

As of June 30, 2015, the State's deferred outflows of resources and deferred inflows of resources consist of the following components (amounts expressed in thousands).

|  | Governme        | ntal Funds                 |                            |                                 |                    |
|--|-----------------|----------------------------|----------------------------|---------------------------------|--------------------|
|  | General<br>Fund | Special<br>Revenue<br>Fund | Governmental<br>Activities | Business-<br>Type<br>Activities | Component<br>Units |
| Deferred Outflows of Resources:  |                 |                            |                            |                                 |                    |
| Loss on Refunding of Debt – Refunding of some previously outstanding general obligation bonds and revenue bonds resulted in losses   |                 |                            | \$ 331,117                 | \$8,794                         | \$ 21,160          |
| Interest Rate Exchange Agreements (Swaps) - CDA has entered into pay-fixed, receive- variable interest rate swap agreements in connection with certain variable rate bond series |                 |                            |                            | 13,172                          |                    |
| Pension-related deferred outflows (see Note 15)  |                 |                            | 1,822,627                  | 27,988                          | 135,046            |
| Total for Deferred Outflows of Resources   |                 |                            | \$ 2,153,744               | \$ 49,954                       | \$ 156,206         |
| Deferred Inflows of Resources:   |                 |                            |                            |                                 |                    |
| Governmental fund receivables for revenues that are not considered to be available to liquidate liabilities of the current period  | \$ 521,284      | \$ 138,261                 |                            |                                 |                    |
| Gain on Refunding of Debt – Refunding of some previously outstanding residential revenue bonds - deferred bond premiums  |                 |                            |                            | \$ 121                          |                    |
| Service Concession Arrangement receipts of the:  Maryland Department of Transportation  Maryland Transportation Authority  |                 |                            | \$ 50,945                  | 54,991                          |                    |
| University System of Maryland  |                 |                            |                            |                                 | \$ 344,000         |
| Pension-related deferred inflows (see Note 15)   |                 |                            | 1,746,754                  | 21,363                          | 88,869             |
| Total for Deferred Inflows of Resources  | \$ 521,284      | \$ 138,261                 | \$ 1,797,699               | \$ 76,475                       | \$ 432,869         |

## 6. Loans and Notes Receivable and Investment in Direct Financing Leases:

#### A. Loans and Notes Receivable:

Loans and notes receivable, as of June 30, 2015, consisted of the following (amounts expressed in thousands).

|  |         | Primary Governm           | Compone      | nt Units     |       |
|--|---------|---------------------------|--------------|--------------|-------|
|  |         | Non-major<br>Governmental |              | Higher       |       |
|  | General | Funds                     | Enterprise   | Education    | Other |
| Notes receivable:                        |         |                           |              |              |       |

| Loans and notes receivable, net          | 17,566  | 1,579                     | 3,246,681    | 67,424       | 5,319 |
| Due within one year                      | 2,189   | 87                        | 153,094      | 9,650        | 782   |
| Due in more than one year\$              | 15,377  | \$ 1,492                  | \$ 3,093,587 | \$ 57,774 \$ | 4,537 |

Certain notes receivable for advances of general obligation bond proceeds bear interest at rates ranging from 3.3% to 8.8% and mature within 18 years.

Water quality project loans consist of loans to various local governments and other governmental entities in the State for wastewater and drinking water projects under the United States Environmental Protection Agency's (EPA) Capitalization Grants for State Revolving Funds' Federal assistance program.

The permanent mortgage loans consist of financing for single and multi-family projects, rental projects, small businesses, industrial sites and various other purposes. Substantially all of the loans are secured by first liens on the related property and are insured or credit enhanced by the Federal Housing Administration mortgage insurance programs, the Veterans Administration and USDA/RD guarantee programs, Federal Home Loan Mortgage Corporation (Freddie Mac), FNMA, GNMA, Maryland Housing Fund or by private mortgage insurance policies.

Student and health profession loans are made pursuant to student loan programs funded through the U.S. Government.

#### B. Investment in Direct Financing Leases:

## Enterprise Funds:

As of June 30, 2015, the Maryland Transportation Authority (Authority) has direct financing leases with the State's Department of Transportation, the Washington Metropolitan Area Transit Authority (WMATA), and the general fund. The present value of direct financing leases as of June 30, 2015, was \$443,294,000. As of June 30, 2015, the Authority held \$117,275,000, to be spent to complete assets under these direct financing leases. Lease payments receivable, including unearned interest for each of the five succeeding fiscal years and thereafter, including repayment of amounts to be spent, consist of the following (amounts expressed in thousands).

| 2016   | \$ | 27,844  |
|--|----|---------|
| 2017   |    | 27,464  |
| 2018   |    | 28,264  |
| 2019   |    | 29,434  |
| 2020   |    | 30,750  |
| 2021-2025  |    | 163,300 |
| 2026-2030  |    | 145,180 |
| 2031-2035  |    | 64,790  |
| Total  | _  | 517,026 |
| Unearned interest income.  |    | 43,543  |
| Total lease payments   | _  | 560,569 |
| Less: Restricted investments related to unexpended bond proceeds |    | 117,275 |
| Net investment in direct financing leases                        | \$ | 443,294 |

### Component Units:

As of June 30, 2015, the Maryland Stadium Authority (Authority) has direct financing leases with the State. The present value of the direct financing leases as of June 30, 2015, is \$140,559,000. As of June 30, 2015, the Authority held \$871,000, to be spent to complete assets under these direct financing leases. Lease payments receivable, including unearned interest for each of the five succeeding fiscal years and thereafter, including repayment of amounts to be spent, consist of the following (amounts expressed in thousands).

| 2016   | \$<br>25,403  |
|--|---------------|
| 2017   | 24,043        |
| 2018   | 23,965        |
| 2019   | 23,954        |
| 2020   | 23,854        |
| 2021-2025  | 45,647        |
| 2026-2030  | 6,432         |
| Total  | <br>173,298   |
| Less: unearned interest income                                   | 31,868        |
| Net lease payments   | 141,430       |
| Less: Restricted investments related to unexpended bond proceeds | 871           |
| Net investment in direct financing leases.                       | \$<br>140,559 |

## 7. Restricted Assets:

Certain assets of the governmental activities, business-type activities and component units are classified as restricted assets on the Statement of Net Position. The purpose and amount of restricted assets as of June 30, 2015, are as follows (amounts expressed in thousands).

| Amount                   | Purpose   |
|--------------------------|---|
| Governmental Activities: |   |
| \$ 12,808                | Represents money restricted for construction retainages related to highway and airport projects   |
| 216,916                  | Represents State property taxes restricted to pay debt service on general obligation debt   |
| 10,057                   | Represents certificates of deposit linked to funds loaned under the State's housing loan program (\$2,096) and certificates of deposit restricted for Agricultural Land Preservation easement purchases (\$7,961) |
| \$ 239,781               |   |

| Business-type Activities: |  |
|---------------------------|--|
| \$ 2,848,124              | Assets of the Community Development Administration and State Funded Loan programs are restricted for   |
|                           | various mortgage loans for low-income housing and loans for local governments' public facilities   |
| 365,378                   | The purpose of the restricted assets is to secure the revenue bonds of the Maryland Water Quality  |
|                           | Administration made for waste-water treatment systems and bay restoration  |
| 1,190,273                 | Restricted assets represent deposits with the U.S. Treasury and amounts due from employers to pay unemployment compensation benefits in accordance with Federal statute  |
| 42,451                    | Restricted assets in the Maryland Lottery and Gaming Control Agency include cash held in separate annuity contracts and coupon bonds for winning lottery ticket payouts; escrow deposits from lottery agents, casino operator license applicants and other gaming license applicants prior to being recognized as revenue. |
| 364,226                   | Cash and investments have been restricted in accordance with revenue bond debt covenants of the Maryland Transportation Authority for completion of capital projects and debt service  |
| 83,334                    | Assets have been restricted by the Maryland Housing Fund to pay possible future claims under insurance for losses on mortgage loans  |
| \$ 4,893,786              |  |
| Component Units:          |  |
| \$ 58,454                 | Restricted assets of higher education include funds held by the trustee for future construction projects and to pay debt service and cash restricted for endowment purposes  |
| 2,270                     | Restricted assets of Maryland Stadium Authority include cash and investments that relate to revenue bond indentures  |
| 2,424                     | Restricted assets include cash and investments that relate to revenue bond indentures and to restricted project funds for the provision of water supply and waste-water treatment by the Maryland Environmental Service  |
| \$ 63,148                 |  |

## 8. Interfund Receivables and Payables:

Interfund balances, as of June 30, 2015, consisted of the following (amounts expressed in thousands).

| Receivable Fund                    | Payable Fund                               | Amount    |     |
|------------------------------------|--|-----------|-----|
| General Fund                       | Special Revenue Fund                       | \$ 3,565  | (a) |
|                                    | Non-Major Governmental Funds               | 60,628    | (b) |
|                                    | Enterprise Funds –                         |           |     |
|                                    | Economic Development Loan Programs         | 2,531     | (c) |
|                                    | Maryland Lottery and Gaming Control Agency | 174,346   | (d) |
|                                    |  | \$241,070 |     |
| Special Revenue Fund               | General Fund                               | \$ 46,050 | (e) |
|                                    | Enterprise Funds -                         |           |     |
|                                    | Maryland Transportation Authority          | 84,366    | (f) |
|                                    |  | \$130,416 |     |
| Enterprise Funds -                 |  |           |     |
| Economic Development Loan Programs | General Fund                               | \$27,430  | (g) |
|                                    | Non-major governmental funds               | 38,747    | (h) |
| Unemployment Insurance Program     | General Fund                               | 2,291     | (g) |
| Maryland Transportation Authority  | Special Revenue Fund                       | 4,444     | (i) |
|                                    |  | \$ 72,912 |     |
| Agency Fund -                      |  |           |     |
| Local Income Taxes                 | General Fund                               | \$650,000 | (j) |

The receivable and payable transactions between the governmental funds and the enterprise funds are reported as due from and due to other funds. The receivable and payable transactions between the agency fund and the general fund are reported as accounts receivable from State treasury by the agency fund and due to other funds by the general fund.

The receivable and payable transactions between the Primary Government and Component Units, as of June 30, 2015, consist of the following (amounts expressed in thousands).

| Receivable Fund                       | Payable Fund                               | Amount    |
|---------------------------------------|--|-----------|
| General Fund Higher Education Fund    |  | \$ 690    |
|                                       |  | \$ 690    |
| Component Units –                     | Agency Fund –                              |           |
| Maryland Stadium Authority            | Local Transportation Funds and Other Taxes | \$ 5,909  |
| Maryland Technology Development Corp. | General Fund                               | 10,217    |
|                                       |  | \$ 16,126 |

The receivable and payable transactions between the general fund and component unit are reported as due from/due to component units and due to/due from primary government. The receivable and payable transactions between the component unit and agency fund are reported as due from primary government by the component unit and accounts payable and accrued liabilities by the agency fund.

- (a) The amount represents Transportation Trust Fund revenues transferred to the general fund in July and August, 2015.
- (b) This amount represents an overdraft in the non-major governmental funds' share of pooled invested cash.
- (c) This amount represents payable balances for economic development loan program transfers.
- (d) This amount represents monies collected by the Maryland Lottery and Gaming Control Agency in June, 2015, and paid to the general fund in July, 2015.
- (e) The amount represents income and sales tax subsidies and return of health insurance costs from the general fund.
- (f) The Maryland Transportation Authority collects fees for the special revenue fund. The money will be used to build and maintain special revenue fund infrastructure, structures and other improvements.
- (g) These amounts represent receivable balances from general fund subsidies.
- (h) Bond funds collected by the capital projects fund on behalf of the economic development loan programs.
- (i) The Maryland Transportation Authority receives rent, interest income and fees for services from the special revenue
- (j) The loans were made in accordance with Section 2-606 of Tax-General Article of the Annotated Code of Maryland from the reserve of unallocated tax revenue that the Comptroller estimates will be claimed and refunded to taxpayers within 3 years of the date that the income tax return was filed. The money will be used to provide funding for public elementary and secondary education and the Maryland Medicaid Program among other uses.

All Interfund balances except for (j) above, are expected to be repaid by June 30, 2016. For (j) above, the General Fund is required to pay to the agency fund \$33,333,000, a year in each of fiscal years 2021 through 2026 and \$10,000,000, a year in each of fiscal years 2016 through 2025. The remaining balance is due to pay local income taxes at unspecified dates in the future.

## 9. Interfund Transfers:

Interfund transfers, for the year ended June 30, 2015, consisted of the following (amounts expressed in thousands).

| Transfers In                 | Transfers Out                              | Amount       |
|------------------------------|--|--------------|
| General Fund                 | Special Revenue Fund                       | \$ 72,777    |
|                              | Non-major Governmental Funds               | 11,715       |
|                              | Enterprise Funds –                         |              |
|                              | Maryland Lottery and Gaming Control Agency | 1,026,204    |
|                              | Economic Development Loan Programs         | 6,122        |
|                              | Non-major Enterprise Funds                 | 1,000        |
|                              |  | \$ 1,117,818 |
| Special Revenue Fund         | General Fund                               | \$ 223,936   |
| Non-major Governmental Funds | General Fund                               | \$ 176,387   |
|                              | Special Revenue Fund                       | 248,348      |
|                              |  | \$ 424,735   |
| Enterprise Funds -           |  |              |
| Loan Programs                | General Fund                               | \$ 39,584    |
|                              | Non-major Governmental Funds               | 42,911       |
|                              | Non-major Enterprise Funds                 | 879          |
|                              |  | \$ 83,374    |

Transfers are primarily used to 1) transfer revenues from the fund required by statute or budget to collect the revenue to the fund required by statute or budget to expend them, 2) transfer receipts restricted to debt service from the funds collecting the receipts to the non-major governmental funds as debt service payments become due, and 3) provide unrestricted revenues collected in the general fund to finance various programs accounted for in other funds in accordance with budgetary authorizations. In addition, the non-major governmental funds transferred \$8,656,000, of Program Open Space funds, \$784,000, of interest earned on bonds, \$995,000, for expenses for bond sales and \$1,280,000, for project rescissions to the general fund.

The Maryland Lottery and Gaming Control Agency transferred revenue in excess of funds allocated to prize awards, casino operators, operating expenses and capital expenditure payments in the amount of \$1,026,204,000, to the general fund. The general fund transferred \$39,584,000, to support the operations of Enterprise Funds – Loan Programs, and the Enterprise Funds – Loan Programs transferred \$6,122,000, of unused funds to the general fund. Expenditures for capital projects of \$42,911,000, were transferred to Enterprise Funds – Loan Programs.

During the year, the general fund and other governmental funds had expenditures of \$1,346,139.000, and \$282,411,000, respectively, that were for funds provided to supplement revenues and construction costs, respectively, of the higher education component units. The general fund also had net expenditures of \$20,034,000, that were for funds provided to supplement revenues of the Maryland Stadium Authority. The general fund transferred \$20,769,000, to the non-major component unit, the Maryland Technology Development Corporation, for Maryland Stem Cell Research and other operating grants.

## 10. Capital Assets:

## A. Capital Assets, Primary Government:

Capital assets activity by asset classification net of accumulated depreciation, for the year ended June 30, 2015, was as follows (amounts expressed in thousands).

Governmental activities:

| Classification                          | Balance<br>July 1, 2014 | Additions     | Deletions    | Transfers in (out) | Balance<br>June 30, 2015 |
|---|-------------------------|---------------|--------------|--------------------|--------------------------|
| Capital assets, not depreciated,        |                         |               |              |                    |                          |

#### General Obligation Bonds -

General obligation bonds are authorized and issued primarily to provide funds for State owned capital improvements, facilities for institutions of higher education and the construction of public schools in political subdivisions. Bonds have also been issued for local government improvements, including grants and loans for water quality improvement projects and correctional facilities, and to provide funds for loans or outright grants to private, not-for-profit cultural or educational institutions. Under constitutional requirements and practice, the Maryland General Assembly, by a separate enabling act, authorizes loans for particular objects or purposes. Thereafter, the Board of Public Works, a constitutional body comprised of the Governor, the Comptroller and the State Treasurer, by resolution, authorizes the issuance of bonds in specified amounts. Bonds are issued and accounted for on a "cash flow" basis rather than a "project" basis and are not sold to specifically fund an enabling act. General obligation bonds are subject to arbitrage regulations. However, there are no major outstanding liabilities in connection with these regulations as of June 30, 2015. Bonds are subject to redemption provisions at the option of the State.

General obligation bonds, which are paid from the general obligation debt service fund, are backed by the full faith and credit of the State and, pursuant to the State Constitution, must be fully paid within 15 years from the date of issue. Property taxes, bond premiums, interest subsidy payments from the Federal government, debt service fund loan repayments and general fund and capital projects fund appropriations provide the resources for repayment of general obligation bonds. During fiscal year 2015, the State issued \$2,037,700,000, of general obligations at a premium of \$350,766,000, with related issuance costs of \$7,098,000.

Included in bond issuances were \$1,015,075,000, to refund certain outstanding general obligation bonds issued between 2007 and 2014. From the refunding bonds and related premium of \$204,099,000, \$1,215,801,000, was transferred to an escrow account and used to purchase U.S. Government securities. These securities will be used to secure the principal and interest related to the refunded bonds. The interest rates on the refunded bonds range from 4.0% to 5.0%. The purpose of the refunding was to realize savings on debt service costs. The aggregate difference in debt service between the refunded debt and the refunding debt is \$98,160,000. The economic gain on the transaction, that is, the difference between the present value of the debt service streams for the refunding debt and refunded debt, is \$80,125,000.

Refunded bonds of \$2,269,000,000, maturing in fiscal years 2016-2027 and callable in fiscal years 2016-2022 were considered defeased as of June 30, 2015. Accordingly, the trust account assets and the liability for the defeased bonds are not included in these financial statements.

| Total                 | \$        | 8,677,214 | \$<br>2,226,730 |

Subsequent to June 30, 2015, on August 3, 2015, general obligation bonds aggregating \$500,000,000, were issued for capital improvements. The general obligation bonds have interest rates ranging from 1.2% to 5.0% and mature through 2031.

Transportation Bonds -

Transportation bonds outstanding as of June 30, 2015, were as follows (amount expressed in thousands).

|  | Outstanding |
|--|-------------|
| Consolidated Transportation Bonds – 2.0% to 5.5%, due serially through 2030 for  |             |
| State transportation activity  | \$1,622,645 |
| Consolidated Transportation Bonds, Refunding – 5%, due serially through 2023 for |             |
| State transportation activity  | 397,605     |
| Total  | \$2,020,250 |

Consolidated Transportation Bonds are limited obligations issued by the Maryland Department of Transportation (Department) for highway, port, airport, rail, or mass transit facilities, or any combination of such facilities. The principal must be paid within 15 years from the date of issue.

As provided by law, the General Assembly shall establish in the budget for any fiscal year a maximum outstanding aggregate amount of these Consolidated Transportation Bonds as of June 30 of the respective fiscal year that does not exceed \$4,500,000,000, through June 30, 2015, and thereafter. The aggregate principal amount of those bonds that was allowed to be outstanding as of June 30, 2015, was \$2,530,255,000. The aggregate principal amount of Consolidated Transportation Bonds outstanding as of June 30, 2015, was \$2,020,250,000. Consolidated Transportation Bonds are payable from the proceeds of certain excise taxes levied by statute, a portion of the corporate income tax and a portion of the State sales tax credited to the Department. These amounts are available to the extent necessary for that exclusive purpose before being available for other uses

by the Department. If those tax proceeds become insufficient to meet debt service requirements, other receipts of the Department are available for that purpose. The holders of such bonds are not entitled to look to other State resources for payments.

Under the terms of the authorizing bond resolutions, additional Consolidated Transportation Bonds may be issued, provided, among other conditions, that (1) total receipts (excluding Federal funds for capital projects, bond and note proceeds, and other receipts not available for debt service), less administration, operation and maintenance expenses for the preceding fiscal year, equal at least two times the maximum annual debt service on all Consolidated Transportation Bonds outstanding and to be issued, and that (2) total proceeds from pledged taxes equal at least two times the maximum annual debt service on all Consolidated Transportation Bonds outstanding and to be issued.

The 2014 session of the General Assembly established a maximum outstanding principal amount of \$726,600,000, as of June 30, 2015, for all nontraditional debt of the Department. Nontraditional debt outstanding is defined as any debt instrument that is not a Consolidated Transportation Bond or GARVEE bond (tax-exempt debt backed by annual federal appropriations for federal-aid transportation projects). This debt includes certificates of participation, debt backed by customer facility charges, passenger facility charges, or other revenues, and debt issued by the Maryland Economic Development Corporation or any other third party on behalf of the Department. As of June 30, 2015, the Department's nontraditional debt outstanding was \$748,328,000, and was reported as obligations under capital leases and includes funds held by the bond trustee under these agreements.

Arbitrage regulations are applicable to the transportation bonds payable. The Department estimates there are no material liabilities for arbitrage rebates as of June 30, 2015.

During the year, the Department issued Consolidated Transportation Bonds in the amount of \$401,535,000, with net premiums of \$49,453,000, with maturities ranging from February 2018 to June 2030, and with interest rates ranging from 2.8% to 5.0%.

The Department also issued Consolidated Transportation Refunding Bonds in the amount of \$259,715,000, with a net premium of \$42,105,000, during the year to advance refund certain maturities of outstanding Consolidated Transportation Bonds. The refunding bonds have maturities ranging from February 2016 to February 2023, at an interest rate of 5%. The net proceeds of issuance were used to purchase open market securities and were deposited in an irrevocable trust with an escrow agent to provide for all future debt service payments on the refunded bonds. As a result, the previously outstanding refunded bonds are considered to be defeased and liabilities for these bonds have been extinguished. The aggregate difference in debt service between the refunded debt and refunding debt is \$28,815,000. The economic gain on the transaction is \$21,119,000. As of June 30, 2015, the Department has \$301,255,000, of defeased debt outstanding.

As of June 30, 2015, Department bond debt service requirements for principal and interest in future years were as follows (amounts expressed in thousands).

|                       | Consolidated Transp | ed Transportation Bonds |  |  |
|-----------------------|---------------------|-------------------------|--|--|
| Years Ending June 30, | Principal           | Interest                |  |  |
| 2016                  | \$ 174,165          | \$ 83,829               |  |  |
| 2017                  | 207,185             | 80,577                  |  |  |
| 2018                  | 221,710             | 70,617                  |  |  |

| 2020                  | 152,340             | 51,883                  |  |  |
| 2021-2025             | 715,920             | 151,901                 |  |  |
| 2026-2030             | 366,555             | 35,198                  |  |  |
| Total                 | \$ 2,020,250        | \$ 534,518              |  |  |

County Transportation Bonds are issued by the Department and the proceeds are used by participating counties and Baltimore City to fund local road construction, reconstruction and other transportation projects and facilities and to provide local

participating funds for Federally-aided highway projects. Debt service on these bonds is payable from the participating counties' and Baltimore City's share of highway user revenues. County transportation debt is the obligation of the participating counties rather than the Department. Unexpended bond proceeds in the amount of \$3,679,000, and certain debt service sinking fund amounts aggregating \$12,233,000, were invested in money market accounts as of June 30, 2015. These funds are restricted for project funds and county bond debt service, respectively, and are reported as cash and cash equivalents in the agency funds. At year end, \$87,860,000, in County Transportation Revenue Bonds were outstanding.

#### Obligations Under Capital Leases -

Obligations under capital leases as of June 30, 2015, bore interest at annual rates ranging from 0.1% to 6.7%. Capital lease obligations with third parties in fiscal year 2015 increased by \$43,676,000, for master equipment leases entered into by the general fund and transportation related projects in the amount of \$40,000,000, entered into by the Maryland Department of Transportation. The capital leases with component units include the general fund's capital leases with the Maryland Stadium Authority, which are being paid with the net proceeds transferred from certain lottery games. Following is a schedule of annual future minimum payments under these obligations, along with the present value of the related net minimum payments as of June 30, 2015 (amounts expressed in thousands).

|                                       | Capital Lease Obligations with |                 |  |
|---------------------------------------|--------------------------------|-----------------|--|
| Years Ending June 30,                 | Third Parties                  | Component Units |  |
| 2016                                  | \$ 104,429                     | \$ 25,403       |  |
| 2017                                  | 101,358                        | 24,043          |  |
| 2018                                  | 97,900                         | 23,965          |  |
| 2019                                  | 96,610                         | 23,954          |  |
| 2020                                  | 95,595                         | 23,854          |  |
| 2021-2025                             | 433,945                        | 45,647          |  |
| 2026-2030                             | 313,075                        | 6,432           |  |
| 2031-2035                             | 81,681                         |                 |  |
| Total future minimum payments         | 1,324,593                      | 173,298         |  |
| Less: Amount representing interest    | 325,427                        | 31,868          |  |
| Less: Restricted cash and investments | 69,487                         | 871             |  |
| Present value of net minimum payments | \$ 929,679                     | \$ 140,559      |  |

The reduction shown for restricted cash and investments in the amounts of \$69,487,000, and \$871,000, is monies held by the bond trustee to be used primarily for construction expenditures.

The assets acquired through capital leases were as follows (amounts expressed in thousands).

|                                | Third Parties |
|--------------------------------|---------------|
| Asset                          | Amount        |
| Construction in progress.      | \$ 338,074    |
| Land and improvements.         | 19,406        |
| Buildings and improvements     | 1,320,810     |
| Machinery and equipment        | 235,362       |
| Infrastructure                 | 330,943       |
| Total acquired assets          | 2,244,595     |
| Less: Accumulated depreciation | 810,125       |
| Total capital assets - net.    | \$1,434,470   |

#### Pollution Remediation Obligations -

The State has recognized a pollution remediation obligation on the statement of net position for governmental activities. A pollution remediation obligation is a liability which addresses the current or potential detrimental effects of existing pollution

and may include pre-cleanup activities (site assessment, feasibility study), cleanup activities (neutralization, containment, removal and disposal, site restoration), oversight and enforcement and post remediation monitoring.

Obligating events initiate the recognition of a pollution remediation liability. These events include any of the following.

- (a) There is an imminent danger to the public.
- (b) The State is in violation of a related permit or license.
- (c) The State is identified as a responsible party or potentially responsible party (PRP) by a regulator.
- (d) The State is named or has evidence that it will be named in a lawsuit.
- (e) The State commences, or legally obligates itself to commence, pollution remediation activities.

The pollution remediation obligation is an estimate and subject to changes resulting from price increases or reductions, technology, or changes in applicable laws or regulations. The liability is recognized as it becomes estimable. In some cases, this may be at inception. In other cases, components of a liability (for example, legal services, site investigation or required post remediation monitoring) are recognized as they become reasonably estimable. At a minimum, the liability is reviewed for sufficiency when various benchmarks occur, such as receipt of an administrative order, participation as a responsible party or PRP in a site assessment, completion of a corrective measures feasibility study, issuance of an authorization to proceed, and as remediation is implemented and monitored.

Measurement of the liability is based on the current value of outlays expected to be incurred using the expected cash flow technique. This technique measures the liability as the sum of probability-weighted amounts in a range of possible estimated amounts – the estimated mean or average. Expected recoveries reduce the pollution remediation expense.

The pollution remediation estimated liability is \$169,257,000, with no estimated recoveries from third parties to reduce the liability. Included in this liability are cost estimates for site monitoring and repair, excavation of road and infrastructure and replacement of buildings as a result of site contaminations by hazardous materials under Federal and State law in the amount of \$160,657,000. In these cases, either the State has been named in a lawsuit by a State regulator or the State legally obligated itself under the Environmental Article, Section 7-201, of the Annotated Code of Maryland.

The estimated liability also includes \$8,600,000, for the clean-up of an illegal tire dump for which the State is legally obligated under the Environmental Article, Section 9-2 of the Annotated Code of Maryland.

The cost estimates and assumptions for the pollution remediation due to site contamination from hazardous materials are based on engineering design estimates. The cost estimates and assumptions for the tire dump clean-up are based on estimated unit cost of \$830/ton based on historical data, fuel costs, specific site factors and oversight costs.

Agricultural Land Preservation Installment Purchase Obligation-

Under the Maryland Agricultural Land Preservation Program, the State purchases agricultural preservation easements restricting development on prime farmland and woodland.

Landowners have the option to choose a lump-sum payment option or installment payment option. The installment payment option is available by taking payments in equal amounts over two to ten years. The landowner may elect to take a certain amount in cash at the time of settlement and divide the remainder of the offer amount equally to be paid annually over the subsequent years. For the installment payments, the funds are invested by the State Treasurer in certificates of deposit at the interest rate in effect on the day of deposit in order to mature in accordance with the schedule of installments indicated by the landowners. Interest rates currently range from 0.1% to 3.4%. Each installment includes interest minus one-quarter of one percent of the interest earned. All installments are paid either April 1 or October 1 beginning the calendar year after the year settlement has occurred. Installment obligations mature through April 2024.

A summary of long-term debt outstanding for the agricultural land preservation installment purchase obligation at June 30, 2015 is as follows (amounts expressed in thousands):

| Years Ending June 30, | Principal | Interest |
|-----------------------|-----------|----------|
| 2016                  | \$2,391   | \$107    |
| 2017                  | 1,886     | 65       |
| 2018                  | 1,300     | 34       |
| 2019                  | 871       | 21       |
| 2020                  | 720       | 15       |
| 2021-2025             | 793       | 14       |
| Total                 | \$7,961   | \$256    |

For the governmental activities, compensated absences, self insurance, net pension liability, net other post-employment benefits obligations, obligations under capital leases, pollution remediation obligations, and Agricultural Land Preservation Installment Purchase obligations are generally liquidated by the general or special revenue fund as applicable.

## B. Long Term Obligations – Business-type Activities:

Changes in long-term obligations for business-type activities as of June 30, 2015, were as follows (amounts expressed in thousands).

|  | Balance<br>July 1, 2014,<br>as restated | Additions | Reductions | Balance<br>June 30, 2015 | Amounts Due<br>Within One<br>Year |
|--|---|-----------|------------|--------------------------|-----------------------------------|

#### Community Development Administration (Administration) – Revenue Bonds

The Administration, an agency of the Department of Housing and Community Development, has issued revenue bonds, proceeds of which were used for various mortgage loan programs. Assets aggregating approximately \$2,847,756,000, and revenues of each mortgage loan program are pledged as collateral for the revenue bonds. Interest rates range from 0.2% to 6.8%, with the bonds maturing serially through 2057. The principal amount outstanding as of June 30, 2015, was \$2,307,890,000. Substantially all bonds are subject to redemption provisions at the option of the Administration. Redemptions are permitted at par through the use of unexpended bond proceeds and excess funds accumulated primarily through prepayment of mortgage loans. During fiscal year 2015, the Administration issued \$220,208,000, of revenue bonds with interest rates ranging from 0.2% to 4.6% and maturing serially through 2057.

Included in bond issuances were \$150,050,000 of Residential Revenue Bonds 2014 Series C, D, E and F bonds issued on September 25, 2014, which refunded \$81,185,000 of 2004 Series A, B, G, H and I, and 2005 Series A, B, D and E bonds, in full on October 27, 2014. This economic refunding reduced CDA's exposure to variable rate debt, maintained tax yield compliance and resulted in savings of approximately \$3.8 million. The difference between the reacquisition price and the net carrying amount of the old debt is reported as a deferred inflow of resources at its unamortized balance is \$121,000 as of June 30, 2015.

Subsequent to June 30, 2015, the Administration issued a total of \$18,865,000, and redeemed a total of \$66,985,000, revenue bonds.

#### Interest Rate Swaps:

Objective of the interest rate swap. As a means to lower its borrowing costs, when compared against fixed-rate bonds at the time of issuance, the Administration entered into interest rate swaps in connection with the variable rate revenue bonds totaling \$218,130,000. The intention of the swaps was to effectively change the Administration's variable interest rate on the bonds to fixed rates.

*Terms*. The bonds and the related swap agreements mature from September 1, 2025 through September 1, 2043, and the swaps' notional amount of \$218,130,000, matches the amount of the variable rate bonds. Under the swap agreements, the Administration pays the counterparty a fixed payment of from 3.7% to 4.8% and receives a variable payment computed as either 64% of the London Interbank Offered Rate (LIBOR) plus .2% or .3%. Conversely, the bonds' variable rate is based on the Securities Industry and Financial Markets Association Rate.

Credit risk. The fair value of the swaps represents the Administration's credit exposure to each counterparty as of June 30, 2015. The fair value of two swaps with one counterparty is (\$2,344,000), the fair value of two swaps with a second counterparty is (\$2,566,000), and the fair value of three swaps with a third counterparty is (\$8,262,000). Therefore, the Administration is not exposed to credit risk as of June 30, 2015, because the swaps have a negative fair value. However, should the valuation of the swap change and the fair value turn positive, the Administration would be exposed to credit risk in the amount of the swap's fair value. The first counterparty is rated A by Standard & Poor's and Aa by Moody's; the second counterparty is rated Aa by Moody's and AA by Fitch; and the third counterparty is rated Aa by Moody's and A by Standard & Poor's. To mitigate the potential for credit risk, if the counterparties' credit quality falls below to A or below, the fair value of the swaps will be fully collateralized by the counterparties.

*Basis risk*. The swaps would expose the Administration to basis risk should the relationship between LIBOR and the Security Industry and Financial Markets Association Rate converge. If a change occurs that results in the rates moving to convergence, the expected cost savings may not be realized.

Termination risk. The Administration or the counterparty may terminate the swap if the other party fails to perform under the terms of the contract. The counterparty can terminate the contract if the ratings on the related bonds fall below the credit rating thresholds. If a swap is terminated, the underlying variable rate bonds may be exposed to rising interest rates. If at the time of such termination a swap has a negative fair value, the Administration would be liable to the counterparty for a payment equal to the swap's fair value along with any accrued interest.

Swap payments and associated debt. Using rates as of June 30, 2015, debt service requirements of the variable rate debt and net swap payments, assuming current interest rates remain the same for their term, are as follows (amounts expressed in thousands). As rates vary, variable rate bond interest payments and net swap payments will vary.

|                     |    | Hedged Variable Rate Bonds |    |          | Interest Rate   |            |         |  |
|---------------------|----|----------------------------|----|----------|-----------------|------------|---------|--|
| Year Ended June 30, |    | Principal                  |    | Interest | rest Swaps, Net |            | Total   |  |
| 2016                | \$ | 4,110                      | \$ | 154      | \$              | 8,449 \$   | 12,713  |  |

*Fair value*. Because interest rates have generally decreased since execution of the swaps, the swaps have a fair value of (\$13,172,000) as of June 30, 2015. The swaps' fair value may be countered by a decrease in total interest payments required under the variable rate bonds, creating a lower synthetic interest rate. Because the coupons on the Administration's variable rate bonds adjust to changing interest rates, the bonds do not have a corresponding fair value decrease.

The table below summarizes the total fair values for the Administration's interest rate swaps as of June 30, 2014 and 2015, and the changes in fair values for the year ended June 30, 2015 (amounts expressed in thousands).

|                      | Total<br>Fair Value at<br>June 30, 2014 | Total<br>Fair Value at<br>June 30, 2015 | Change<br>in Fair Value<br>For the Period |
|----------------------|---|---|---|
| Interest rate swaps: |   |   |   |
| Cash flow hedges     | \$ (20,569)                             | \$ (13,172)                             | \$ 7,397                                  |

The fair value balances of derivative instruments (interest rate swaps) outstanding as of June 30, 2015, classified by type, and the changes in fair value as presented on the financial statements for the year ended June 30, 2015, are as follows (amounts expressed in thousands).

|                    | Change in Fair Value |          | Fair Value at J | une 30, 2015 | Outstanding Notional |  |
|--------------------|----------------------|----------|-----------------|--------------|----------------------|--|
|                    | Classification       | Amount   | Classification  | Amount       | Amounts              |  |
| Cash flow hedges:  |                      |          |                 |              |                      |  |
| Pay fixed interest | Deferred             |          |                 |              |                      |  |
| rate swaps         | outflow              | \$ 7,397 | Debt            | \$ (13,172)  | \$ 218,130           |  |

The fair value of the swaps is based on market value and is affirmed by an independent advisor whose valuation method and assumptions are in accordance with accounting guidance issued by GASB. The fair values of the interest rate swaps were estimated using the zero-coupon method. This method calculates the future net settlement payments required by the swap, assuming that the current forward rates implied by the yield curve correctly anticipate future spot interest rates. These payments are then discounted using the spot rates implied by the current yield curve for hypothetical zero-coupon bonds due on each future net settlement on the swaps.

As of June 30, 2015, all of the Administration's swaps meet the criteria for effectiveness and the swap fair values are classified as deferred outflow.

Maryland Water Quality Financing Administration (Administration) – Revenue Bonds

The Administration, an agency of the Department of Environment, has issued revenue bonds for providing loans and grants. Interest rates range from 2.6% to 4.1%, payable semiannually, with annual installments from \$1,235,000, to \$10,095,000, to March 1, 2029. The principal amount outstanding as of June 30, 2015, was \$176,614,000. These bonds are payable solely from the revenue, money or property of the Administration.

Maryland Transportation Authority Bonds:

Bonds outstanding as of June 30, 2015, are as follows (amounts expressed in thousands).

| Series 1992 Capital Appreciation Revenue Bonds for the Authority's Transportation Facilities Projects maturing   |          |
|--|----------|
| in the final installment of original principal of \$721 on July 1, 2015, with approximate yield to maturity  |          |
| of 6.4% and an accreted amount.  | \$ 3,000 |
| BWI Consolidated Car Rental Facility Revenue Bonds, Series 2002, maturing in annual installments ranging from \$2,885 to   |          |
| \$8,505 from July 1, 2015, to July 1, 2032, with interest rates ranging from 2.7% to 6.7%, payable semiannually  | 93,785   |
| BWI Airport Parking Revenue Refunding Bonds, Series 2012A and 2012B, maturing in annual installments ranging from \$11,320 to \$16,455 from March 1, 2016, to March 1, 2027, with interest rates ranging from 4.0% to 5.0% payable semiannually. | 159,860  |
| Calvert Street Parking Project Revenue Bonds, Series 2005, maturing in annual installments ranging from \$740 to \$1,415   | 139,800  |
| from July 1, 2015, to July 1, 2032, with interest rates ranging from 3.3% to 4.4% payable semiannually   | 18,585   |
| Grant and Revenue Anticipation Bonds, Series 2007 (GARVEE bonds), maturing in annual installments ranging from   | 10,303   |
| \$29,730 to \$34,390 from March 1, 2016, to March 1, 2019, with an interest rate of 4.0% payable semiannually to finance   |          |
| •  | 128,095  |
| the Intercounty Connector Highway Project  | 120,093  |
| annual installments of \$1,175 to \$12,685 from July 1, 2015, to July 1, 2041, with interest rates ranging from 4.0% to 5.0%   |          |
| payable semiannually   | 296,780  |
| Series 2008 Revenue Bonds, for construction and improvement of Authority's Transportation Facilities projects, maturing in   | 270,780  |
| annual installments of \$9,995 to \$31,070 from July 1, 2015, to July 1, 2041, with interest rates ranging from  |          |
| 4.8% to 5.1% payable semiannually  | 545,560  |
| Series 2008 A Revolving loan under the Transportation Infrastructure Finance and Innovation Act (TIFIA), for the   | 545,500  |
| Intercounty Connector Project maturing to July 1, 2047 with a fixed interest rate at 2.6% and an accreted amount   | 529,519  |
| Series 2009 Revenue Bonds, for construction and improvements of Authority's Transportation Facilities projects, maturing   | 327,317  |
| from July 1, 2016 to July 1, 2043, with interest rates ranging from 3.0% to 5.9% payable semiannually  | 549,385  |
| Series 2010 Revenue Bonds, for construction and improvements of the Authority's Transportation Facilities projects,  | 317,303  |
| maturing from July 1, 2015 to July 1, 2041, with interest rates ranging from 3.0% to 5.8% payable semiannually   | 326,435  |
| Grant and Revenue Anticipation Bonds, Series 2008 (GARVEE bonds), maturing in annual installments ranging from   | 520, .55 |
| \$39,930 to \$48,865 from March 1, 2016, to March 1, 2020, with an interest rate of 4.3% payable semiannually to finance   |          |
| the Intercounty Connector Highway Project.   | 221,345  |
| Passenger Facility Charge Revenue Bonds, Series 2012A, maturing in annual installments of \$1,905 to \$3,780 from June 1,  |          |
| 2016 to June 1, 2032, with interest rates ranging from 0.7% to 4.3% payable semiannually   | 45,405   |
| Series 2012 Revenue Refunding Bonds maturing in annual installments of \$3,615 to \$6,225, from July 1, 2016 to July 1,  | - ,      |
| 2029, with interest rates ranging from 3.0% to 5.0% payable semiannually   | 67,610   |
| Passenger Facility Charge Revenue Bonds, Series 2012B, maturing in annual installments of \$5,680 to \$7,765 from June 1,  | ,        |
| 2016 to June 1, 2027, with interest rates ranging from 0.6% to 2.7% payable semiannually   | 81,040   |

| Variable Passenger Facility Charge Revenue Bonds, Series 2012C, via sinking fund payments of \$43,400 through June 1,  |              |
|--|--------------|
| 2032, with a current variable rate of .07%   | 43,400       |
| Passenger Facility Charge Revenue Bonds BWI Thurgood Marshall Airport, Series 2014, maturing in annual installments of |              |
| \$620 to \$2,535 from June 1, 2016 to June 1, 2034, with interest rates ranging from 0.4% to 3.8% payable semiannually | 39,380       |
| Lease Revenue Refunding Bonds Metrorail Parking Projects, Series 2014, maturing in annual installments ranging from    |              |
| \$1,535 to \$2,395 from July 1, 2015, to July 1, 2028, with interest rates ranging from 2.0% to 5.0%, payable          |              |
| semiannually   | 27,200       |
| Unamortized premium.   | 55,953       |
| Total  | \$ 3,232,337 |

Revenue bonds are payable solely from the revenues of the transportation facilities projects. Capital assets constructed from BWI facilities, WMATA Metrorail and the Calvert Street Parking Project are not capital assets of the Authority. Capital appreciation bonds payable and TIFIA bonds included accreted amounts of \$2,279,000, and \$13,519,000, respectively, as of June 30, 2015.

Grant and Revenue Anticipation Bonds (GARVEE Bonds) are payable from a portion of Maryland's future Federal highway aid and other pledged monies. These bonds are not general obligations of the Authority or legal obligations of the Maryland Department of Transportation or the State.

During the year ended June 30, 2015, the Authority issued \$40,000,000 of Passenger Facility Charge Revenue Bonds BWI Thurgood Marshall Airport, Series 2014, with interest rates ranging from .4% to 3.8% maturing serially through June, 2034, to finance a portion of the costs of certain projects (Airport Facilities Projects) located at BWI Thurgood Marshall Airport. The Authority also issued \$27,200,000 of Lease Revenue Refunding Bonds Metrorail Parking Projects, Series 2014, with interest rates ranging from 2.0% to 5.0% maturing serially through July, 2028, to refinance the outstanding MDTA Lease Revenue Bonds Metrorail Parking Projects, Series 2004 which financed three parking garages for the Washington Metropolitan Area Transit Authority.

As of June 30, 2015, the Authority has made the final draw of \$132,204,000 on the \$516,000,000 Series 2008 A revolving loan under the Transportation Infrastructure Finance and Innovation Act (TIFIA) program for the Intercounty Connector Project. The loan has a fixed interest rate of 2.56% and matures on July 1, 2047.

Obligations Under Capital Leases -

Obligations of business-type activities under capital leases as of June 30, 2015, were as follows (amounts expressed in thousands).

| Years Ending June 30,                       | Maryland Lottery and Gaming<br>Control Agency (MLGCA) |
|---|---|
| 2016  | \$ 13,250   |
| 2017  | 13,250  |
| 2018  | 13,250  |
| 2019  | 13,250  |
| 2020  | 9,920   |
| Total minimum lease payments                | 62,920  |
| Less: Imputed interest                      | 2,205   |
| Present value of net minimum lease payments | \$ 60,715   |

The MLGCA has entered into lease agreements for certain on-line gaming system equipment and a computer system. As of June 30, 2015, assets acquired under leases and the related accumulated amortization totaled \$91,984,000, and \$31,254,000, respectively, and were included in capital assets in the Statement of Net Position, Business-type Activities.

Department of Housing and Community Development (DHCD) State Funded Loan Programs - Note Payable

In April 2010, the DHCD obtained a loan from the John D. and Catherine T. MacArthur Foundation to preserve affordable housing for low-income persons and families near military bases in counties in Maryland impacted by the Base Realignment and Closure initiative (BRAC). In fiscal year 2012, several Maryland counties committed matching funds for participation in the BRAC. As of June 30, 2015, total notes payable for BRAC are \$4,522,000. This balance includes the loans received from the MacArthur Foundation as well as several Maryland counties. The loans bear interest at the rate of 2.0%, and are committed for no less than 10 years.

### C. Notes and Revenue Bonds Payable - Component Units

Higher Education -

Certain State higher education institutions have issued revenue bonds for the acquisition, renovation, and construction of student housing and other facilities. Student fees and other user revenues collateralize the revenue bonds. Interest rates range from 2.0% - 6.1% on the revenue bonds.

Debt service requirements to maturity were as follows (amounts expressed in thousands).

|   | Notes Payable and    |           |    |          |               |           |    |          |
|---|----------------------|-----------|----|----------|---------------|-----------|----|----------|
|   | Other Long-Term Debt |           |    | Rever    | Revenue Bonds |           |    |          |
| Year Ending June 30,                                  |                      | Principal |    | Interest |               | Principal |    | Interest |
| 2016  | \$                   | 6,641     | \$ | 1,037    | \$            | 88,789    | \$ | 49,508   |
| 2017  |                      | 5,536     |    | 923      |               | 88,669    |    | 45,194   |

| 2031-2035   |                      |           |    |          |               | 71,010    |    | 5,729    |
| 2036-2040   |                      |           |    |          |               | 725       |    | 51       |
| Total   |                      | 69,701    |    | 9,234    |               | 1,128,750 |    | 374,749  |
| Accumulated accreted interest, premiums and discounts |                      |           |    |          |               | 72,651    |    |          |
| Total   | \$                   | 69,701    | \$ | 9,234    | \$            | 1,201,401 | \$ | 374,749  |

The bonds issued are the debt and obligation of the issuing higher education institutions and are not a debt and obligation of, or pledge of, the faith and credit of the State.

As of June 30, 2015, higher education institutions have defeased debt outstanding of \$91,810,000, resulting from the refunding of previously issued debt. Accordingly, the trust account assets and the liability for the defeased bonds were not included in these financial statements.

As of June 30, 2015, cash and investments were held by the trustees for the higher education institutions in the amount of \$53,588,000, for the University System of Maryland (System), \$119,000, for St. Mary's College of Maryland, and \$4,701,000, for Morgan State University.

On March 4, 2015, University System of Maryland issued \$93,690,000, of 2015 Refunding Series A Bonds at interest rates ranging from 3.0% to 5.0% maturing from 2016 to 2028 for refinancing previously issued bonds for construction and university facilities renewal. The reduction in future debt service was \$10,359,000. The economic gain on the transaction was \$9,564,000.

On September 24, 2014, St. Mary's College of Maryland issued \$4,000,000, of 2014 Series A Subordinate Revenue Bonds, at a variable interest rate maturing on September 24, 2025, for construction of facilities.

Obligations under capital leases of \$12,239,000, existed as of June 30, 2015, and bore interest at annual rates ranging from 1.0% to 6.8%.

*Maryland Stadium Authority (Authority) – Revenue Bonds:* 

Debt service requirements to maturity for Maryland Stadium Authority revenue bonds and notes payable were as follows (amounts expressed in thousands).

| Years Ending June 30,                           | Principal | Interest  |
|---|-----------|-----------|
| 2016  | \$ 22,230 | \$ 7,337  |
| 2017  | 21,764    | 6,439     |
| 2018  | 22,627    | 5,496     |
| 2019  | 23,166    | 4,501     |
| 2020  | 24,107    | 3,461     |
| 2021-2025                                       | 49,148    | 8,595     |
| 2026  | 6,080     | 352       |
| Total   | 169,122   | 36,181    |
| Unamortized premium net of unamortized discount | 6,203     |           |
| Total   | \$175,325 | \$ 36,181 |

The Authority has issued various lease revenue bonds and notes to finance the construction of the baseball and football stadiums, convention center expansions in the Town of Ocean City and certain other facilities. The outstanding debt is to be repaid through capital lease payments from the State, as the State has entered into capital lease arrangements for the use of the facilities financed with the debt proceeds.

As of June 30, 2015, the Authority had outstanding revenue bonds for the construction, renovation and expansion of certain facilities as follows (amounts expressed in thousands).

| Facility                            | Outstanding<br>Amount | Interest<br>Rates | Maturity<br>Date  |
|-------------------------------------|-----------------------|-------------------|-------------------|

## 12. Insurance:

The self-insurance liabilities represent the State's liability for its various self-insurance programs. The State is self-insured for general liability, property and casualty, worker's compensation, environmental and anti-trust liabilities and certain employee health benefits. Commercial insurance coverage is purchased for specialized exposures such as aviation hull and liability, steam boiler coverage and certain transportation risks. There were no significant reductions or changes in the commercial insurance coverage from the prior year, and the amount of settlements have not exceeded insurance coverage for any of the past three fiscal years.

All funds, agencies and authorities of the State participate in the self-insurance program (Program). The Program, which is accounted for in the general fund, allocates the cost of providing claims servicing and claims payment by charging a "premium" to each fund, agency or public authority, based on a percentage of each organization's estimated current-year payroll or based on

an average loss experienced by each organization. This charge considers recent trends in actual claims experience of the State as a whole and makes provision for catastrophic losses.

The Program's liabilities are reported when it is probable that a loss has occurred and the amount of that loss can be reasonably estimated. Liabilities include an amount for claims that have been incurred but not reported. Because actual claims liabilities depend on such complex factors as inflation, changes in legal doctrines, and damage awards, actual claims paid could differ from these estimates. Claims liabilities are reevaluated periodically to take into consideration recently settled claims, the frequency of claims and other economic and social factors. Non-incremental claims adjustment expenses have been included as part of the liability for claims and adjustments for the general liability, property and casualty, workers' compensation, environmental and anti-trust liabilities. Liabilities for incurred workers' compensation losses to be settled by fixed or reasonably determinable payments over a long period of time are reported at their present value using a 4% discount rate. The worker's compensation and property and casualty costs are based upon separately determined actuarial valuations for the following fiscal years ending. The employee health benefits liability is calculated based on claims subsequently reported and claims trends.

Changes in the self-insurance liabilities during the fiscal year 2015 were as follows (amounts expressed in thousands).

|  | Beginning of  | Claims and      |                 | End of        | Amounts       |
|--|---------------|-----------------|-----------------|---------------|---------------|
|  | Fiscal Year   | Changes in      | Claim           | Fiscal Year   | Due Within    |
|  | Liability     | Estimates       | Payments        | Liability     | One Year      |
| Property, casualty and general liability       | \$<br>16,686  | \$<br>8,772     | \$<br>8,811     | \$<br>16,647  | \$<br>8,907   |

As of June 30, 2014, the Program held \$296,409,000, in cash and investments designated for payments of these claims.

## 13. Fund Equity:

The unrestricted deficit for governmental activities on the government-wide statement of net position is \$25,444,098,000. A portion of the deficit results from the State incurring a debt for the purposes of capital acquisition and construction on behalf of local governments and private organizations. Since the incurrence of this debt does not result in capital assets of the State, the debt is not reflected in the net position category, net investment in capital assets, but rather in the unrestricted net position category. As of June 30, 2015, the State had reported outstanding general obligation bonds and capital leases applicable to these

non-State projects of \$5,691,476,000. Without State financing for these capital assets, the State would have reported an unrestricted deficit for governmental activities in the amount of \$19,752,622,000.

The statement of net position for the primary government reported \$2,214,719,000 of restricted net position, including \$216,916,000, restricted by enabling legislation.

Detail of the fund balance categories and classification shown in the aggregate on the governmental funds balance sheet is as follows (amounts in thousands).

|   |                 | Special Revenue  Maryland  Department of | Other<br>Governmental                   |      | Total<br>Governmental |

| Total fund balances                       | \$<br>1,283,953 | \$<br>356,265                            | \$<br>346,695                           | - \$ | 1,986,913             |

A portion of the general fund's committed fund balance, in the amount of \$779,879,000, as of June 30, 2015, includes the State Reserve Fund, which consists primarily of the Revenue Stabilization Account with a balance of \$773,463,000. The Revenue Stabilization Account is authorized in Section 7-311 of the State Finance and Procurement Article, Annotated Code of Maryland. Appropriations are required to the Revenue Stabilization Account when the unappropriated general fund surplus of the second preceding fiscal year exceeds \$10,000,000. Appropriations are also required in years when the account balance is less than 7.5% of estimated general fund revenues. If the account balance is at least 3% but less than 7.5%, an appropriation of

\$50,000,000, or whatever lesser amount is necessary to bring the account balance to 7.5% of estimated general fund revenues is required; if the account balance is less than 3%, the required appropriation is \$100,000,000.

Transfer of funds from the Revenue Stabilization Account may occur only to support the operation of State government on a temporary basis and only in amounts that are not otherwise offset by reductions made by the General Assembly in the general fund appropriations. These circumstances are not expected to occur routinely.

Transfer of funds from the account that does not result in a balance below 5% of estimated general fund revenues must be authorized by (1) an act of the General Assembly or (2) a specific provision of the State budget bill as enacted. Transfers resulting in a balance below 5% must be authorized by an act of the General Assembly other than the budget bill. The use of a budget amendment for fund transfer is prohibited.

The unrestricted deficit in net position in other enterprise funds of \$11,215,000, for the Economic Development Insurance Programs occurred because of restrictions for insuring mortgages.

## 14. Segment Information:

The State's Economic Development Loan Program contains two separately identifiable activities that have separately issued revenue bonds outstanding; housing loans of the Community Development Administration and water quality loans and grants of the Maryland Water Quality Administration.

The Community Development Administration (CDA) has issued revenue bonds, the proceeds of which were used for various mortgage loan programs. The assets of the loan program and revenues of each mortgage loan program are pledged as collateral for the revenue bonds. The bond indentures require the CDA to separately account for the identifiable activity's revenues, expenses, gains and losses, assets and liabilities.

The Maryland Water Quality Administration has issued revenue bonds to encourage capital investment for wastewater treatment systems and bay restoration. These bonds are payable solely from, and secured by, the revenue, money or property of the Maryland Water Quality Administration. The bond indentures require separate accounting for the identifiable activity's revenues, expenses, gains and losses, assets and liabilities.

Summary financial information for the two loan programs is presented below:

## 15. Retirement Benefits:

Maryland State Retirement and Pension System (System):

The State is an employer in the cost-sharing multiple-employer public employee retirement system established by the State to provide pension benefits for State employees (other than employees covered by the Maryland Transit Administration Pension Plan described below) and employees of 144 participating political subdivision or other entities within the State.

The State Retirement Agency (the "Agency") is the administrator of the Maryland State Retirement and Pension System (the "System"). The System was established by the State Personnel and Pensions Article of the Annotated Code of Maryland to provide retirement allowances and other benefits to State employees, teachers, police, judges, legislators, and employees of participating governmental units. Responsibility for the System's administration and operation is vested in a 15-member Board of Trustees. The System is made up of two cost-sharing employer pools: the "State Pool" and the "Municipal Pool". The "State Pool" consists of the State agencies, boards of education, community colleges, and libraries. The "Municipal Pool" consists of the participating governmental units that elected to join the System. Neither pool shares in each other's actuarial liabilities, thus participating governmental units that elect to join the System (the "Municipal Pool") share in the liabilities of the Municipal Pool only.

The State of Maryland is the statutory guarantor for the payment of all pensions, annuities, retirement allowances, refunds, reserves, and other benefits of the System. The State is obligated to annually pay into the accumulation fund of each State system at least an amount that, when combined with the System's accumulation funds, is sufficient to provide benefits payable under each plan during that fiscal year. The System is accounted for as one defined benefit plan as defined in Governmental Accounting Standards Board (GASB) Statement No. 67, *Financial Reporting for Pension Plans*. Additionally, the System is fiscally dependent on the State by virtue of the legislative and executive controls exercised with respect to its operations, policies, and administrative budget. Accordingly, the System is included in the State's reporting entity and disclosed in its financial statements as a pension trust fund.

The System prepares a separately audited Comprehensive Annual Financial Report, which can be obtained from the Maryland State Retirement and Pension System, 120 E. Baltimore Street, Suite 1600, Baltimore, Maryland 21202-1600 or located at http://www.sra.state.md.us/Agency/Downloads/CAFR/.

Plan Description:

The System is administered in accordance with the State Personnel and Pensions Article of the Annotated Code of Maryland and consists of several plans which are managed by the System's Board of Trustees. All State employees and employees of participating entities are covered by the plans.

"Retirement System" – retirement programs for substantially all State employees, teachers, State Police and judges who are not members of the State Pension System.

"Pension System" – retirement programs for employees and teachers hired after January 1, 1980, and prior employees who elected to transfer from the Retirement System.

The System provides retirement, death and disability benefits in accordance with State statutes. For participants enrolled prior to July 1, 2011, vesting occurs after five years of service. A member terminating employment before attaining retirement age, but after completing five years of service becomes eligible for a vested retirement allowance provided the member does not withdraw his or her accumulated contributions. Members of the Retirement System may retire with full benefits after attaining the age of 60, or completing 30 years of service credit, regardless of age. Members of the Pension Systems may retire with full benefits after attaining the age of 62 with five years of service, or after completing 30 years of service credit, regardless of age. State Police members enrolled prior to July 1, 2011, may retire with full benefits after attaining age 50, or completing 22 years of service credit, regardless of age. Members of the Law Enforcement Officers System may retire with full benefits at age 50, or completing 25 years of service credit, regardless of age.

The annual benefit for Retirement System members is equal to 1/55 (1.8%) of the member's highest three-year average final salary multiplied by the number of years of service credit. A member may retire with reduced benefits after completing 25 years of service, regardless of age. A member of the Pension System enrolled prior to July 1, 2011, will generally receive, upon retirement, an annual service retirement allowance equal to 1.2% of the member's highest three-consecutive year average final salary multiplied by the number of years of service credit on or before June 30, 1998, plus 1.8% of the highest three-consecutive year average final salary multiplied by the number of years of service credit after June 30, 1998. The annual benefit for a Pension System member who is employed by a participating governmental unit that does not provide enhanced pension benefits is equal to 0.8% of the member's highest three-consecutive year average final salary multiplied by the number of years of service credit, with a provision for additional benefits for compensation earned in excess of the Social Security Integration Level base. A member of either type of pension system enrolled prior to July 1, 2011, may retire with reduced benefits after attaining age 55 and completing 15 years of service.

For new Pension System members hired on or after July 1, 2011, benefit reforms enacted during the 2011 Legislative Session establish the pension benefit multiplier at 1.5% rather than 1.8%, calculate average final compensation based on the five highest consecutive years of service rather than the three highest, and allow vesting after ten years of eligible service rather than five years.

The annual retirement allowance for a State Police member is equal to 2.55% of the member's highest three-year average final salary multiplied by each year of service and may not exceed 71.4% of member's three years average final compensation. The annual retirement allowance for a member of the Law Enforcement Officers Pension System (LEOPS) is 2.0% of the member's highest three-consecutive year average final salary (AFC) multiplied by each year of service up to a maximum of 30 years plus 1.0% AFC of accumulated credible service in excess of 30 years. Neither the State Police Retirement System nor Law Enforcement Officers Pension System provide for an early retirement. Other reforms similar to those enacted for System employees and teachers were enacted for other systems in the State Pool.

#### Funding Policy:

In accordance with the State Personnel and Pensions Article of the Annotated Code of Maryland, employer contribution rates are established by annual actuarial valuations using the entry age normal cost method and other actuarial assumptions adopted by the Board of Trustees. In accordance with the law governing the Systems, all benefits of the System are funded in advance. The entry age normal cost method is the actuarial cost method used to determine the employers' contribution rates, member of the Retirement system are required to contribute to the System a fixed percentage of their regular salaries and wages, 7% or 5%, depending on the retirement plan selected. Under the 2011 Pension Reforms, members of the Pension System are required to contribute to the System 7% of their regular salaries and wages. Members of the Pension System who are employed by a participating government that does not provide enhanced pension benefits are required to contribute to the System 5% of the regular salaries and wages that exceed the Social Security wage base. State Police members are required to contribute 8% of their regular salaries and wages to the System. Members of the Law Enforcement Officers Pension System are required to contribute 7% of earnable compensation. All contributions are deducted from each member's salary, and the resulting payments are remitted to the System on a regular and periodic basis.

The contribution requirements of the System members, as well as the State and participating governmental employers, are established and may be amended by the General Assembly of the State of Maryland. Effective July 1, 2002, State law provides that the contribution rates may be more or less than the actuarially determined rates for the Employees' Retirement and Pension Systems and the Teachers' Retirement and Pension Systems. Contributions to these Systems are based on the Modified Corridor Funding Method which establishes a budgetary contribution rate. As initially established, this method effectively maintained the contribution rate in effect for the Teacher's and Employees' combined systems during the preceding fiscal year (as adjusted for any legislative changes in benefit structure) as long as such systems remained between 90 percent and 110 percent funded. If either system fell below 90 percent funded (i.e. below the corridor), then the contribution rate in effect for the subsequent fiscal year would be the rate in effect for the preceding fiscal year plus 20 percent of the difference between the current fiscal year full funding rate and the prior fiscal year contribution rate. Conversely, if either system exceeds 110 percent funded (i.e., above the corridor), then the contribution rate in effect for the subsequent fiscal year will be the rate in effect for the preceding fiscal year minus 20 percent of the difference between the current fiscal year full funding rate and the prior fiscal year contribution rate. The methodology for computing the State's employer contribution rates for the Law Enforcement Officers' Pension System,

State Police Retirement System and the Judges' Retirement System remains unchanged. For each of these three systems, the employer contribution rate is equal to the sum of the normal contribution and the accrued liability contribution rates.

During fiscal year 2015, for the State Pool, the State paid \$1,734,624,000, of the required contribution totaling \$1,983,742,000, which was 15.7% of covered payroll and 87.4% of the required payment. The State makes non-employer contributions to the System for local school system teachers. The covered payroll amount includes amounts for employees for whom the State pays retirement benefits, but does not pay the payroll. As of June 30, 2015, the State's membership includes 168,034, active members, 45,923, vested former members, and 130,961, retirees and beneficiaries.

In the First Special Session of 2012, the General Assembly enacted legislation that requires local school boards to pay a portion of the actuarially determined normal cost of local teachers' retirement phased in beginning in fiscal year 2013 until fiscal year 2017 when the local school boards will pay 100% of normal cost.

#### Assumptions and Other Inputs:

The significant actuarial assumptions and other inputs listed below were used to measure the total pension liability as of the measurement date of June 30, 2015.

| Valuation method                | Individual Entry Age Normal Cost Method                |
|---------------------------------|--|
| Salary increases                | 3.30% to 9.20% including inflation                     |
| Inflation                       | 2.70% general, 3.20% wage                              |
| Rate of return on investments   | 7.55%  |
| Discount rate                   | 7.55%  |
| Postretirement benefit increase | 2.29% - 3.20% for service prior to July 1, 2011        |
|                                 | 1.49% for service after June 30, 2011                  |
|                                 | (depending on system and provisions)                   |
| Mortality                       | RP-2014 Healthy Annuitant Mortality Tables with        |
|                                 | Generational Projection Using Scale MP-2014 for        |
|                                 | healthy retirees. RP-2014 Disabled Annuitant Mortality |
|                                 | Tables with no projection for disabled retirees. RP-   |

|                                 | retirement   |

#### System's Fiduciary Net Position:

The System's fiduciary net position has been determined on the same basis used by the system. The System's financial statements are prepared on the accrual basis of accounting. Accordingly, investment purchases and sales are recorded as of their respective trade dates. Employer and member contributions are recognized in the period when due, pursuant to statutory or contractual requirements. Benefits and refunds are recognized when due and payable in accordance with the terms of the Plans. Investments are reported at fair value.

#### Long-term contributions receivable:

In addition to actuarially determined contributions, certain withdrawn employers also make annual installment payments, including interest at the actuarially assumed rate of return in effect at the time of withdrawal (7% or 7.5% per year), for liabilities associated with employees that have elected to stay in the System when their employer elected to withdraw. As of June 30, 2015, the outstanding balance was \$31,254,000. These payments are due over various time periods, based on the date of the employer's withdrawal.

#### Discount rate:

A single discount rate of 7.55% was used to measure the total pension liability. This single discount rate was based on the expected rate of return on pension plan investments of 7.55%. The projection of cash flows used to determine this single discount rate assumed that plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Pension Liabilities, Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions:

At June 30, 2015, the State reported a liability of \$16,783,064,000, (\$15,775,994,000, for Governmental Activities, \$195,176,000, for Business-Type Activities and \$811,894,000, for Component Units) for its proportionate share of the net pension liability (NPL). The NPL was measured as of June 30, 2014, and the total pension liability (TPL) used to calculate the NPL was determined by an actuarial valuation as of that date. The State's proportion of the NPL was based on adjusted contributions to the System in fiscal year 2014 relative to adjusted contributions of the State and all participating local governments, actuarially determined. At June 30, 2014, the State's proportion was 95%.

During the year ended June 30, 2012, the State passed legislation that required local school boards of education to fund the current service cost for teachers included in the Teachers Retirement and Pension System (TRS) which is included in the State of Maryland Retirement and Pension System. The intent of the legislation was for the State to be responsible for past service costs, actuarial gains and losses, and the unfunded liability. As a result, the State has determined that the NPL of TRS qualifies as a special funding situation, and as such, the entire liability associated with TRS and the related deferred outflows and inflows, is included in the State's financial statements.

The State recognized pension expense of (\$120,403,000) applicable to the TRS and (\$86,581,000) applicable to the other State systems for the year ended June 30, 2015. At that date, the State reported deferred outflows and deferred inflows of resources related to the following systems as a result of its requirement to contribute to each system (amounts expressed in thousands).

|                               | Deferred Outflows of Resources | Deferred Inflows of Resources |
|-------------------------------|--------------------------------|-------------------------------|
| TRS                           | \$1,033,557                    | \$1,004,471                   |
| Other governmental activities | 743,230                        | 722,314                       |
| Business-type activities.     | 27,988                         | 21,363                        |
| Components units              | 135,046                        | 88,869                        |
| Total                         | \$1,939,821                    | \$1,837,017                   |

|   | Year ended June | Deferred Outflows | Deferred Inflows |
|---|-----------------|-------------------|------------------|
|   | 30,             | of Resources      | of Resources     |
| The amounts reported as deferred outflows and inflows | 2016            | \$ 60,695         | \$ 459,254       |
| of resources related to pensions (non-contributions)  | 2017            | 60,695            | 459,254          |

| right (amounts expresssed in thousands).              | 2019            | 60,695            | 459,255          |
|   | Total           | \$ 242,780        | \$1,837,017      |

#### Contributions:

Deferred outflows of resources related to MSRPS of \$1,697,041,000, resulting from State contributions subsequent to the measurement date, will be recognized as a reduction of the NPL in the year ended June 30, 2016.

Sensitivity of the net pension liability to changes in the discount rate:

Regarding the sensitivity of the net pension liability to changes in the single discount rate, the following presents the plan's net pension liability, calculated using a single discount rate of 7.55%, as well as what the plan's net pension liability would be if it were using a single discount rate that is 1-percentage-point lower or 1-percentage-point higher (amounts expressed in thousands).

|  | 1% Decrease 6.55% | Discount Rate 7.55% | 1% Increase<br>8.55% |
|--|-------------------|---------------------|----------------------|
| State's proportionate share of the NPL | \$22,735,192      | \$16,783,064        | \$ 9,946,785         |

*Information included in the MSRPS financial statements:* 

Actuarial assumptions, long-term expected rate of return on pension plan investments, discount rate, and pension plan fiduciary net position are available at http://www.sra.state.md.us/Agency/Downloads/CAFR/.

Maryland Transit Administration Pension Plan (Plan):

The Plan is a single employer non-contributory plan, which covers all Maryland Transit Administration (Administration) employees covered by a collective bargaining agreement and all those management employees who were employed by the Baltimore Transit Company. In addition, employees who enter the management group as a result of a transfer from a position covered by a collective bargaining agreement maintain their participation. The Maryland Transit Administration was given authority to establish and maintain the Plan under Transportation Article, Section 7-206(b)2(ii), of the Annotated Code of Maryland. The Plan is administered and funded in compliance with the collective bargaining agreements. The Plan prepares separately audited financial statements, which can be obtained from the Maryland Transit Administration Pension Plan, William Donald Schaefer Tower, 8 Saint Paul Street, Baltimore, Maryland 21202 or located at http://www.mdot.maryland.gov/office\_of\_finance/index.html.

#### Plan Description:

The Plan provides retirement, normal and early, death and disability benefits. Members may retire with full benefits at age 65 with five years of credited service or age 52 with 30 years of credited service. The annual normal retirement benefit is 1.4% - 1.6% (1.3% prior to September 8, 2002) of final average compensation multiplied by credited service, with minimum and maximum benefit limitations. Participants are fully vested after five years of credited service (seven years for participants hired after May 18, 2013).

As of June 30, 2015, membership in the Plan includes 2,649 active members, 486 vested former members, and 1,730 retirees and beneficiaries. There were no investments in, loans to, or leases with parties related to the Plan. There were no Plan investments representing 5 percent or more of total Plan assets. For the year ended June 30, 2015, the Administration's covered and total payroll was \$137,680,000.

#### Funding Policy:

The Administration's required contributions are based on actuarial valuations. The entry age normal cost method is the actuarial cost method used to determine the employer's contribution rates and the total pension liability. All administrative costs of the Plan are paid by the Plan.

During fiscal year 2015, the administration paid \$38,361,000, of the required contribution totaling \$40,807,000, which was 27.9% of covered payroll and 94.0% of the required payment.

#### Assumptions and other inputs:

The significant actuarial assumptions and other inputs listed below were used to measure the total pension liability as of the measurement date of June 30, 2015.

| Method of funding                | Entry Age Normal Actuarial Cost Method                  |
|----------------------------------|---|
| Discount rate                    | 4.75%   |
| Postretirement benefit increase. | 2.5% COLAs and 2% Benefit Cap per year                  |
| Salary increase.                 | 3.50-9.50% compounded annually                          |
| Inflation                        | 3.50%   |
| Investment rate of return        | 8.25%, net of pension plan investment expense,          |
|                                  | including inflation for funded benefits. Unfunded       |
|                                  | benefits are discounted at 3.80% from the Bond Buyer    |
|                                  | Go 20-Year Bond Municipal Bond Index                    |
|                                  | The effective blended discount rate is 4.75%            |
| Mortality                        | RP-2000 tables for males (two-year setback) and         |
|                                  | females. The RP-2000 Disabled Retiree table is used for |
|                                  | disabled members, with a five-year setback for females. |
| Cost of living adjustments       | 2.5% per year   |

#### Plan Fiduciary Net Position:

The Plan's fiduciary net position has been determined on the same basis used by the pension plan. The Plan's financial statements are prepared on the accrual basis of accounting. Accordingly, investment purchases and sales are recorded as of their respective trade dates and all contributions and benefits including refunds of employee contributions are recorded in the period when they become due. Investments are reported at fair value.

Net Pension Liability of the Plan Required by GASB 67:

The total pension liability of the Plans was determined by an actuarial valuation as of July 1, 2014 rolled forward to June 30, 2015 and the adjustment to the roll-forward liabilities was made to reflect the following assumptions changes in the 2015 valuation:

- 1. Investment return assumption changed from 7.65% to 8.25% and a reduction of the effective blended discount rate from 5.24% to 4.75%.
- 2. The mortality table was changed to the RP-2000 tables for males (two-year setback) and females.
- The mortality table was changed to the RP-2000 Disabled Retiree table for disabled members, with a five-year setback for females.

The components of the net pension liability as of June 30, 2015, are as follows (amounts expressed in thousands).

| Total pension liability  | \$ 908,528 |
|--|------------|
| Plan fiduciary net position.   | (237,845)  |
| Employer net pension liability.  | \$ 670,683 |
| Plan fiduciary net position as a percentage of the total pension liability | 26.2%      |

#### Investments:

The long-term expected rate of return on pension plan investments was determined using a building —block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of geometric real rates of return were adopted by the Board after considering input from the Plan's investment consultant(s) and actuary(s). For each major asset class that is included in the Plan's target asset allocation as of June 30, 2015, these best estimates are summarized in the following table:

|                    | Torgot     | Long-Term      |
|--------------------|------------|----------------|
|                    | Target     | Expected Real  |
| Asset Class        | Allocation | Rate of Return |
| Public equity      | 35%        | 4.70%          |
| Fixed income       | 10%        | 2.00%          |
| Credit opportunity | 10%        | 3.00%          |
| Real return        | 14%        | 2.80%          |
| Absolute return    | 10%        | 5.00%          |
| Private equity     | 10%        | 6.30%          |
| Real estate        | 10%        | 4.50%          |
| Cash               | 1%         | 1.40%          |
| Total              | 100%       |                |

The above was the Board of Trustees adopted asset allocation policy and best estimate of geometric real rates of return for each major asset class as of June 30, 2015.

For the year ended June 30, 2015, the annual money-weighted rate of return on pension plan investments, net of the pension plan investment expense, was 3.7%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

#### Discount rate:

A single discount rate of 4.75% was used to measure the total pension liability. The projection of cash flows used to determine this single discount rate assumed that employer contributions will be made at the actuarially determined contribution rate. Since the actuarially determined contributions do not reflect any assumed future increases of benefits for pensioners and beneficiaries (COLAs) or the benefit cap, the Plan's fiduciary net position is not expected to be available to make all future benefit payments of current plan members.

Sensitivity of the net pension liability to changes in the discount rate:

The net pension liability of the MTA calculated using the discount rate of 4.75% as well as what the MTA's net pension liability would be if it were calculated using a discount rate that is 1% lower (3.75%) or 1% higher (5.75%) than the current rate, is as follows(amount express in thousands).

|   | 1% Decrease 3.75% | Discount Rate<br>4.75% | 1% Increase 5.75% |
|---|-------------------|------------------------|-------------------|
| Employer's total pension liability        | \$1,030,459       | \$ 908,528             | \$ 806,471        |
| Plan fiduciary net position               | 237,845           | 237,845                | 237,845           |
| Net pension liability                     | \$ 792,614        | \$ 670,683             | \$ 568,626        |
| Plan fiduciary net position as a          |                   |                        |                   |
| percentage of the total pension liability | 23.1%             | 26.2%                  | 29.5%             |

Pension expense, deferred outflows of resources and deferred inflows of resources and changes in net pension liability:

The components of the pension expense for the Plan at June 30, 2015, are as follows (amounts expressed in thousands).

|   | Amount    |
|---|-----------|
| Service cost  | \$ 24,718 |
| Interest on the total pension liability                           | 39,236    |
| Projected investment earnings                                     | (10,106)  |
| Contribution s  |           |
| Administrative expenses and other                                 | 1,851     |
| Subtotal  | 55,699    |
| Changes of Assumptions  | 7,640     |
| Amortization – actual investment earnings different than assumed  | (788)     |
| Amortization – differences between actual and expected experience | (2,803)   |
| Subtotal  | 4,049     |
| Total components recorded as pension expense                      | \$ 59,748 |

For the year ended June 30, 2015, the MTA recognized pension expense \$59,748,000. At June 30, 2015, the MTA reported deferred outflows of resources and deferred inflows of resources related to pension from the following sources (amounts expressed in thousands):

|  | Deferred Outflows of<br>Resources |        | Deferred Inflows of<br>Resources |        |
|--|-----------------------------------|--------|----------------------------------|--------|
| Differences between actual and expected experience   |                                   |        | \$                               | 16,818 |
| Changes of assumptions                               | \$                                | 45,840 |                                  |        |
| Net difference between projected and actual earnings |                                   |        |                                  |        |
| on pension plan investments                          |                                   |        |                                  | 3,151  |
| Total  | \$                                | 45,840 | \$                               | 19,969 |

|   | Year ended June 30: |              |
|---|---------------------|--------------|
| The net amount reported as deferred outflows of resources | 2016                | \$<br>4,049  |
| related to pensions will be recognized in pension expense | 2017                | 4,049        |
| as shown to the right (amounts expressed in thousands).   | 2018                | 4,049        |
|   | 2019                | 4,049        |
|   | 2020                | 4,837        |
|   | Thereafter          | 4,837        |
|   | Total               | \$<br>25,870 |

The changes in employer's net pension liability at June 30, 2015 are as follows (amounts expressed in thousands).

| Total pension liability                                     |               |
|---|---------------|
| Service cost  | \$<br>24,718  |

#### Deferred Compensation Plan (Plan):

The State offers its employees a deferred compensation plan (Plan) created in accordance with Internal Revenue Code Sections 457, 403(b), 401(a) and 401(k). The Plan, available to eligible State employees, permits participants to defer a portion of their salary until future years. Participation in the Plan is optional. The deferred compensation is not available to employees until termination, retirement, death or unforeseeable emergency. State law provides that the Governor appoint the nine member Board of Trustees of the State's Supplemental Retirement Systems. The Board is responsible for the implementation, maintenance and administration of the Plan.

The State of Maryland Match Plan and Trust was established by the State on July 1, 1999. The plan is designed to be a tax-qualified 401(a) defined contribution matching plan under Internal Revenue Code section 401(a). Under plan provision, the State contributes to each participant's account an amount equal to each participant's contributions to the State's Supplemental Retirement Plan during the same plan year. By statute, the maximum amount contributed to this plan for each participant is \$600 for each State fiscal year. An employee's interest in his/her account is fully vested at all times. The match program continues to be established and funded in statue. During the year ended December 31, 2014, the State suspended the match contribution. For the plan year ended December 31, 2014, the State contributed \$28,000, to the 401(a) plan and participants contributed \$60,837,000, \$2,761,000, and \$89,860,000, to the 457, 403(b), and 401(k) plans, respectively.

## 16. Other Postemployment Benefits, Health Benefits (OPEB):

State Employee and Retiree Health and Welfare Benefits Program:

Plan Description:

The State Employee and Retiree Health and Welfare Benefits Program (Plan) is a single-employer defined benefit healthcare plan established by State Personnel and Pensions Article, Sections 2-501 – 2-516, of the Annotated Code of Maryland. The Plan is self-insured to provide medical, hospitalization, prescription drug and dental insurance benefits to eligible state employees, retirees and their dependents. State law grants authority to establish and amend benefit provisions to the Secretary of the Department of Budget and Management (DBM). In addition, the Secretary shall specify by regulation the types or categories of State employees who are eligible to enroll, with or without State subsidies, or who are not eligible to enroll.

The Postretirement Health Benefits Trust Fund (OPEB Trust) is established as an irrevocable trust under Section 34-101 of the State Personnel and Pensions Article to receive appropriated funds and contributions which will be used to assist the Plan in financing the State's postretirement health insurance subsidy. The OPEB Trust is administered by the Board of Trustees for the State Retirement and Pension System. A separate audited GAAP-basis postemployment benefit plan report is not available for the defined benefit healthcare plan.

#### Funding Policy:

The contribution requirements of Plan members and the State are established by the Secretary. Each year the Secretary recommends to the Governor the State's share of the costs of the Plan. Funds may be separately appropriated in the State's budget for transfer to the OPEB Trust. Applicable administrative expenses are payable from the OPEB Trust, but may not exceed \$100,000 annually.

Generally, a retiree may enroll and participate in the health benefit options if the retiree retired directly from State service with at least five years of creditable service, ended State service with at least ten years of creditable service and within five years before the age at which a vested retirement allowance normally would begin, or ended State service with at least 16 years of creditable service. For members hired on or after July 1, 2011, they are required to have completed at least 25 years of creditable service, retired directly from State service with at least ten years of creditable service, or ended State service with at least ten years of creditable service and within five years before the age at which a vested retirement allowance normally would begin. As of July 1, 2015, the State's Plan membership includes 78,767, active employees, 3,329, vested former employees, and 68,000, retirees and beneficiaries. Based on current practice, the State subsidizes approximately 50% to 85% of retiree premiums to cover medical, dental, prescription and hospitalization costs, depending on the type of insurance plan. The Plan assesses a charge to retirees for post-employment health care benefits, which is based on health care insurance charges for active employees. For the fiscal year ended June 30, 2015, retiree plan members contributed \$78,426,000, or approximately 14.8% of total retiree premiums, and the State contributed \$449,750,000. During fiscal year 2015, the State did not appropriate funds to the OPEB Trust to prefund future OPEB costs.

#### Annual OPEB Cost and Net OPEB Obligation:

The State's annual OPEB cost (expense) is calculated based on the annual required contribution (ARC) of the employer, an amount actuarially determined in accordance with the parameters of GASB Statement No. 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities over a period not to exceed 30 years. The following table shows the components of the State's annual OPEB cost, the amount actually contributed to the Plan and the State's net OPEB obligation as of June 30, 2015 (amounts expressed in thousands).

| Annual required contribution (ARC)                | \$ 574,359  |
|---|-------------|
| ARC Adjustment                                    | (154,880)   |
| Interest on net OPEB obligation beginning of year | 188,322     |
| Total Annual OPEB Cost (AOC)                      | 607,801     |
| Less: Contributions made                          | 449,750     |
| Increase in net OPEB obligation.                  | 158,051     |
| Net OPEB obligation - beginning of year           | 3,964,678   |
| Net OPEB obligation - end of year                 | \$4,122,729 |
| Percentage of annual OPEB cost contributed        | 74.0%       |

Three year historical trend information for the Plan is as follows (amounts expressed in thousands).

|                     |           | Percentage of AOC | Net OPEB    |
|---------------------|-----------|-------------------|-------------|
| Fiscal Years Ended, | AOC       | Contributed       | Obligation  |
| 6/30/2015           | \$607,801 | 74.0%             | \$4,122,729 |
| 6/30/2014           | 580,472   | 69.4%             | 3,964,678   |
| 6/30/2013           | 648,556   | 60.6%             | 3,787,000   |

#### Funded Status:

As of June 30, 2015, the most recent actuarial valuation date, the OPEB Trust was 2.9% funded. The actuarial accrued liability for benefits was \$9,643,607,000, and the actuarial value of assets was \$275,329,000, resulting in an unfunded actuarial accrued liability (UAAL) of \$9,368,278,000. The ratio of the actuarial value of assets to the actuarial accrued liability was 2.9%. The covered payroll (annual payroll of active employees covered under the Plan) was \$4,929,100,000, and the ratio of the UAAL to the covered payroll was (190.1%).

#### Actuarial Methods and Assumptions:

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and healthcare cost trends. Actuarially determined amounts are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and the plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

The accompanying schedules of funding progress and employer contributions following the footnotes present information about the actuarial value of plan assets relative to the actuarial accrued liability for benefits and amounts contributed to the plan.

The actuarial method and significant assumptions listed below were used in the actuarial valuation as of June 30, 2015.

| Actuarial cost method            | Entry Age Normal (percent of earnings)                  |  |
|----------------------------------|---|--|
| Asset valuation method           | Five-year smoothed market                               |  |
| Rate of return on investments    | 4.50%   |  |
| Inflation rate                   | 3.50%   |  |
| Aggregate salary growth          | 3.50%   |  |
| Method to determine blended rate | 4.50% represents an unblended pay-go rate               |  |
| Healthcare cost trend rate       | Medical: Under 65 – 7.00% graded to 4.50% over 10 years |  |
|                                  | Over $65 - 6.75\%$ graded to $4.50\%$ over 9 years      |  |
|                                  | Prescription drug: 11.00% graded to 5.00% over 24 years |  |
|                                  | Dental: 3.50%   |  |
| Amortization method              | Level percentage of projected payroll                   |  |
| Amortization period              | 30 years (open)   |  |

#### Maryland Transit Administration Retiree Healthcare Benefit:

The Maryland Transit Administration Retiree Healthcare Benefit (MTA OPEB) provides retiree health care benefits under a collective bargaining agreement to all employees who are members of the MTA pension plan, except transfers from union to management positions who are required to enroll in the State Employee and Retiree Health and Welfare Benefits Program. The MTA currently funds retirees' health care on a pay-as-you-go basis. The MTA does not currently have a separate fund set aside to pay health care costs.

#### Plan Description:

The MTA OPEB provides medical, hospitalization, prescription drug, dental and vision insurance benefits to eligible MTA employees, retirees and their dependents. Members are eligible at age 65 with five years of service or age 52 with 30 years of service provided the member is enrolled in an MTA health plan at normal retirement. Members are also eligible at age 55 if the sum of the participant's age plus years of actual credited service equals at least 85 and the participant is enrolled in an MTA health plan at early retirement, disability with 5 years of service and surviving spouses. A separate audited GAAP-basis postemployment benefit plan report is not available for the healthcare plan.

As of June 30, 2015, 2,321, active employees and 1,296, retirees and beneficiaries were covered by healthcare insurance provided by MTA.

#### Funding Policy:

Based on current practice, MTA subsidizes approximately 50% to 100% of retiree healthcare premiums depending on the type of insurance plan and whether the retiree receives Medicare. Retirees make the same contribution as active employees, however Medicare is handled separately.

#### Annual OPEB Cost and Net OPEB Obligation:

MTA's annual OPEB cost is calculated based on the annual required contribution of the employer, an amount actuarially determined in accordance with GASB Statement No. 45. The following table shows the components of MTA's annual OPEB cost, the amount actually contributed and MTA's net OPEB obligation as of June 30, 2015 (amounts expressed in thousands).

| Annual required contribution (ARC)                | \$ 67,496 |
|---|-----------|
| ARC Adjustment                                    | (20,089)  |
| Interest on net OPEB obligation beginning of year | 11,350    |
| Total Annual OPEB Cost (AOC)                      | 58,757    |
| Less: Contributions made                          | 13,905    |
| Increase in net OPEB obligation.                  | 44,852    |
| Net OPEB obligation – beginning of year           | 267,064   |
| Net OPEB obligation – end of year                 | \$311,916 |
| Percentage of annual OPEB cost contributed        | 23.7%     |

Three year historical trend information for the MTA OPEB is as follows (amounts expressed in thousands).

| Fiscal Years Ended, | AOC      | Percentage of AOC Contributed | Net OPEB<br>Obligation |
|---------------------|----------|-------------------------------|------------------------|
| 6/30/2015           | \$58,757 | 23.7%                         | \$311,916              |
| 6/30/2014           | 64,446   | 28.5%                         | 267,064                |
| 6/30/2013           | 65,863   | 21.5%                         | 221,001                |

#### Funded Status:

MTA OPEB is unfunded. As of June 30, 2015, the most recent actuarial valuation date, the actuarial accrued liability (AAL) for benefits was \$640,496,000. The covered payroll (annual payroll of active employees participating in MTA health plans) was \$137,427,000, and the ratio of the AAL to the covered payroll was (466.1%).

#### Actuarial Methods and Assumptions:

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and healthcare cost trends. Actuarially determined amounts are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and the plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of calculations.

The accompanying schedules of funding progress and employer contributions following the footnotes present information about the actuarial value of plan assets relative to the actuarial accrued liability for benefits and amounts contributed to the plan.

The actuarial method and significant assumptions listed below were used in the actuarial valuation as of June 30, 2015.

| Actuarial cost method         | Entry Age Normal, Level Dollar                                |
|-------------------------------|---|
| Rate of return on investments | 4.25%   |
| Inflation rate                | 3.50%   |
| Aggregate salary growth       | 3.50%   |
| Healthcare cost trend rate    | Medical: 7.70% in 2015 decreasing to 4.50% over 11 years      |
|                               | Prescription: 8.70% in 2015 decreasing to 4.50% over 11 years |
|                               | Dental and Vision: 4.50% per annum                            |
| Amortization method           | Level Dollar Closed   |
| Amortization period.          | 19 years as of July 1, 2015                                   |

## 17. Commitments:

As noted in Note 2, encumbrance accounting is used to account for outstanding commitments for open purchase orders and unfulfilled contracts in some governmental funds. Amounts related to encumbrances are reported in the general fund, \$260,184,000, the special revenue fund, \$27,930,000, and the capital projects fund, \$641,740,000, as of June 30, 2015.

The State's governmental funds lease office space under various agreements that are accounted for as operating leases. Many of the agreements contain rent escalation clauses and renewal options. These leases contain termination for convenience clauses providing for cancellation after a certain number of days' notice to lessors. In addition, these leases contain appropriation clauses indicating that continuation of the lease is subject to appropriation by the legislature. Rent expenditures for the year ended June 30, 2015, were approximately \$68,173,000.

As of June 30, 2015, the governmental funds, other than the Department of Transportation, had commitments of approximately \$185,521,000, for service contracts.

As of June 30, 2015, the Department of Transportation and Maryland Transportation Authority had commitments of approximately \$3.8 billion and \$761,717,000, respectively, for construction of highway and mass transit facilities.

Approximately 29.7% of future expenditures related to the Department of Transportation commitments are expected to be reimbursed from proceeds of approved Federal grants when the actual costs are incurred. The remaining portion will be funded by other financial resources of the Department of Transportation.

The Department of Transportation, as lessor, leases space at various marine terminals, airport facilities and office space pursuant to various noncancelable operating leases with scheduled rent increases. Minimum future rental revenues are as follows (amounts expressed in thousands).

| Years Ending June 30, | Amounts   |
|-----------------------|-----------|
| 2016                  | \$132,540 |
| 2017                  | 125,711   |
| 2018                  | 121,162   |
| 2019                  | 118,825   |
| 2020                  | 30,588    |
| 2021-2025             | 89,666    |
| 2026-2030             | 6,083     |
| Total                 | \$624,575 |

The cost and accumulated depreciation of the assets as of June 30, 2015, were \$1,262,106,000, and \$707,440,000, respectively.

Total minimum future rental revenues do not include contingent rentals that may be received under certain concession leases on the basis of a percentage of the concessionaire's gross revenue in excess of stipulated minimums. Rental revenue was approximately \$170,067,000, for the year ended June 30, 2015.

Prior to March 2015, MLGCA had significant contracts relating principally to the operation of the gaming program. After that date, State law required some casinos to own their video lottery terminals (VLTs) and associated equipment and software. As a result, MLGCA sold 1,425 of its VLTs for \$7,259,000 to the casinos, and auctioned off the remainder for \$800,000.

As of June 30, 2015, the enterprise fund loan programs had committed to lend a total of \$451,149,000, in additional loans and had committed \$2,920,000 for service contracts. The Community Development Administration, also an enterprise fund loan program, had \$420,920,000, of revenue bonds outstanding that are not included in the financial statements of the Administration because the bonds are not guaranteed by the State or any other program of the State or any political subdivision. The revenue bonds are secured solely by the individual multi-family project properties, related revenues, applicable credit enhancements or investments equal to the debt outstanding.

As of June 30, 2015, the higher education fund had commitments of approximately \$712,550,000, for the completion of projects under construction.

In May 2015, the United States Supreme Court ruled that a component of Maryland's personal income tax structure violated the interstate Commerce Clause of the U.S. Constitution because it resulted in double taxation of income earned outside of Maryland. Maryland's personal income tax is composed of a state rate and a local rate. For individuals who earn income in other states and are taxed by those states, Maryland allows the residents a credit for the other state's income tax, but only against the Maryland state portion of the tax. The result is that the individuals pay tax on the non-Maryland income at the Maryland local rate as well as paying tax in the state in which the income was generated.

At this time, the amount to be paid is estimated by the State Comptroller's Office to be approximately \$180 million. A statute of limitations will limit refund claims to three tax years. Returns are being processed with a target completion date of December 2015. Refunds will be processed as amended returns are reviewed and approved. No State funds will be used. The refunded tax and interest will be paid from the Local Income Tax Agency Fund. Jurisdictions have the option to reimburse the Fund or have nine future local income tax distributions reduced starting in fiscal year 2017.

## 18. Contingencies:

The State is party to legal proceedings that normally occur in governmental operations. The legal proceedings are not, in the opinion of the Attorney General, likely to have a material, adverse impact on the financial position of the State as a whole.

As of June 30, 2015, economic development loan programs were contingently liable to financial institutions for \$2,712,000, for the repayment of loans for small businesses. Non-major enterprise funds were contingently liable as insurers of \$180,633,000, of \$275,763,000, mortgage loans made by public and private lenders.

Non-major component units were contingently liable as insurers of \$19,362,000, of \$76,370,000, economic development and growth bonds issued by financial institutions. As of June 30, 2015, there were approved economic development bonds pending settlement which were insured by non-major component units for \$659,000.

The State receives significant financial assistance from the U.S. Government. Entitlement to the resources is generally conditioned upon compliance with terms and conditions of the grant agreements and applicable Federal regulations, including the expenditure of the resources for eligible purposes. Substantially all grants are subject to financial and compliance audits by the grantors. Any disallowances as a result of these audits become a liability of the fund which received the grant. As of June 30, 2015, the State has recognized a liability of \$34,156,000, in the general fund for Medicaid claims to the federal government related to disallowed reimbursements for certain payments for services provided under the developmental disabilities program. The State estimates that no additional material liabilities will result from such audits.

## 19. Tobacco Settlement:

Legislation enacted by the 1999 General Assembly established the Cigarette Restitution Fund for all revenues received from any judgment against or settlement with the tobacco industry. Expenditures from the fund are made by an appropriation in the annual State budget. The law provides that at least 50% of the appropriations shall be made for tobacco or health related purposes and the remaining appropriations may be for any public purpose. During the 2002 legislative session, legislation was enacted providing that for each of fiscal years 2003 through 2006, at least 25% of the appropriations shall be made for the Maryland Medical Assistance Program (Medicaid); the 2005 legislative session increased that percentage to 30% for each year for which appropriations are made. During the 2003 legislative session, legislation was enacted requiring that .15% of the fund be appropriated for enforcing the escrow requirements for nonparticipating tobacco product manufacturers. Transfers of \$143,058,000, were made from the proceeds in the Cigarette Restitution Fund for fiscal year 2015 expenditure of appropriations.

As part of the Master Settlement Agreement between the states and the tobacco companies, Maryland's share during fiscal year 2015 was \$134,949,000, including the award from the arbitration panel for attorney fees. This amount does not include \$17,507,000, the tobacco companies paid to the disputed account pending the outcome of litigation. During fiscal year 2015 Maryland did not recover \$40 million due to an anticipated successful appeal of a portion of an arbitration decision regarding the improper enforcement of tobacco laws. The fiscal year 2017 forecast assumes that the State will recover the \$40 million, but the timing of the recovery is unclear.

It is estimated that the payments made to the State pursuant to the Master Settlement through fiscal year 2020 will total \$3.21 billion of which \$149,873,000, was paid to outside counsel. The actual amount paid each year, however, will reflect adjustments for inflation and cigarette shipment volume. In addition, the State expects to receive \$108,157,000, during that same period pursuant to an award for attorney fees by the national arbitration panel.

#### 20. Landfill Closure:

State and Federal laws require the Maryland Environmental Service (the Service) to cover and to perform certain maintenance and monitoring functions at Midshore Regional Landfill I, Easton Landfill, Midshore II and Hobbs Road Landfill sites. Although closure and postclosure care costs will be paid near or after the date the landfills stop accepting waste, the Service reports a portion of these closure and postclosure care costs as a liability based upon the estimated useful life of the landfills. Midshore I's current cells are approximately 93% filled as of June 30, 2015. The landfill stopped accepting waste on December 31, 2010. Total closure and postclosure care costs for the landfill are currently estimated to be \$9,662,000, as determined through engineering studies, and \$7,674,000, has been recognized as a liability on the June 30, 2015, Combining Statement of Net Position, Non-Major Component Units.

A flyover is performed annually in July to assist in the calculation of the landfill's remaining capacity based upon the volume of cubic yard capacity. Midshore II's current cells, which are expected to close in 2053, are approximately 12% filled as of June 30, 2015. Total closure and postclosure care costs for the landfill are currently estimated to be \$17,472,000, as determined through engineering studies, and \$1,698,000, has been recognized as a liability as of June 30, 2015. Actual costs may be subject to change due to inflation, deflation, technology, and changes in applicable laws and regulations.

A receivable from project participants corresponding to the accrued liability has also been recorded.

Under Federal regulations, the Service has satisfied its financial assurance requirements based upon the local government financial ratio tests of the project participants as of June 30, 2014. The Service expects to satisfy these requirements as of June 30, 2015, using the same criteria.

## 21. Service Concession Arrangements:

In fiscal year 2013, the Maryland Department of Transportation entered into a long-term lease with Ports America Corporation (PAC) to manage, operate and maintain the Dundalk Marine terminal. This agreement satisfies the criteria established to be considered a service concession arrangement.

Under the terms of the ground lease, the Department transfers rights to PAC for a term of 50 years. After 50 years ownership of the Dundalk Marine Terminal will revert to the Department. PAC charges and collects fees from the user for container lifts, short tons of roll on-roll off, break-bulk and bulk cargo and pays the operating costs, management fee and debt service associated with the project. The Department has the ability to approve what services the operator is required to provide.

As of June 30, 2015, the capital assets, net of accumulated depreciation, and deferred service concession arrangement receipts were \$50,945,000.

In fiscal year 2013, Maryland Transportation Authority and Areas USA entered a 35-year Service Concession Arrangement (SCA) agreement to redevelop and operate two travel plazas along the John F. Kennedy Memorial Highway (I-95). The structure of the agreement between the Authority and Areas USA is a long term lease and concession. The Authority retains ownership of the property and assets. All property and improvements, with the exception of the fueling systems, are returned to the Authority at the end of the 35 year lease. Under the agreement, the Authority should realize reduced future operating and capital expenses; debt capacity will be reserved for core business activities; and revenue is guaranteed over the life of the agreement. Areas USA invested \$55,890,000, which required no public subsidy or debt, to redesign and rebuild both the 48-year-old Maryland House and the 36-year-old Chesapeake House travel plazas. Areas USA will operate and maintain the travel plazas through the year 2047. The redeveloped Maryland House travel plaza opened in January 2014, and the new Chesapeake House travel plaza opened in August 2014. The unamortized balance as of June 30, 2015 is \$54,991,000, which is reported in the deferred inflow of resources on the Statement of Net Position.

The University System of Maryland has entered into a long-term lease of university-owned land and other SCA agreements with a quasi-governmental issuer of debt and a developer to build, and an operator to manage, student housing projects at seven of the System's institutions.

Under the terms of the ground lease, the System transfers rights to university-owned property for a term of 40 years to the quasi-governmental issuer of debt (the project 'owner'). The project owner contracts with a developer to build student housing on the property, as well as an operator that manages the facility on behalf of the owner. Each student housing project is financed using tax-exempt debt that limits the use of the project to uses that support the institution. The owner of the project charges and collects rent from the students, and pays the operating costs and debt service associated with the project. The residual cash flow from the project, after paying all operating costs and management fees, is paid to the university as the ground lease payment. The institution has the ability to approve what services the operator is required to provide and the rates that can be charged.

Upon final payment of the outstanding debt associated with the project, or upon termination of the ground lease, whichever is sooner, the building's ownership transfers to the university and the owner's rights to use land revert to the university.

As of June 30, 2015, the Statement of Net Position reflects net capital assets of \$361,860,000, and deferred service concession arrangement receipts of \$344,000,000, from this transaction.

## 22. Voluntary Separation Program

The State offered a Voluntary Separation Program (VSP) during fiscal year 2015, pursuant to the Governor of Maryland's Executive Order .01.01.2015.10. The VSP was established to reduce the number of state employees and to control costs for the State during fiscal years 2015 and 2016.

The VSP was voluntary and was offered to eligible employees. An eligible employee had to be employed in the Executive Branch of the State, currently employed in a full time permanent position; not employed in a contractual, seasonal, temporary or emergency appointment; and had to have at least twenty-four months of current, continuous service in a permanent position. Only a limited number of determined positions, in certain state agencies were eligible for the VSP.

State employees accepted into the VSP voluntarily ended their employment with the State on April 28, 2015 and their positions were eliminated. The separation was made through resignation or retirement.

The severance pay for each participant was a lump sum payment of \$15,000 and an additional \$200 for each year of State service. In addition, the participants received severance benefits of three (3) months of continued medical, dental and prescription drug benefits, paid by the State; upon election 18 months of continued medical coverage under COBRA (paid for by the former employee); payment of accrued, unused annual leave; and payment for unused compensatory leave. Also as a condition of accepting the VSP, the participant could not seek or accept employment with the State for eighteen (18) months after severance or the employee was required to repay the full amount of the severance payment and the cost of the subsidized health benefits received.

There were four hundred and sixty-eight (468) State employees that accepted the VSP. Severance payments totaled \$9, 645,000 of which \$7,020,000 was lump sum and \$2,625,000 was for years of service. The payments were made on or about May 20, 2015. Unused and accrued annual leave and unused compensatory leave totaled \$3,595,000 and was paid on or about May 20, 2015 or June 3, 2015. The estimated cost for the continuation of health beneftits for participants was \$1,000,000. The State also paid FICA of \$738,000 and Unemployment Insurance of \$27,000 for the lump sum and years of service severance payments. The VSP costs were either paid or accrued in fiscal year 2015.

<sup>\*</sup> Schedule is intended to show information for 10 years. Additional years will be displayed as they become available.

<sup>(</sup>a) Employer contributions include pre-funding and pay-as-you-go contributions (net of retiree premiums).

<sup>(</sup>b) Other contributing entities consist of the Federal medicare drug subsidy contributed to the OPEB Trust.

## Notes to Required Supplementary Information For the Year Ended June 30, 2015

#### 1. Budgeting and Budgetary Control:

The Maryland Constitution requires the Governor to submit to the General Assembly an annual balanced budget for the following fiscal year. This budget is prepared and adopted for the General Fund, which includes all transactions of the State, unless otherwise directed to be included in another fund and the Special Fund, which includes the transportation activities of the State, fishery and wildlife funds, shared taxes and payments of debt service on general obligation bonds. In contrast, the GAAP special revenue fund includes the operations (other than debt service and pension activities) of the Maryland Department of Transportation. The budgetary Federal fund revenue and expenditures are included in the GAAP General and Special Funds as federal revenues and expenditures by function. An annual budget is also prepared for the Federal Fund, which accounts for substantially all grants from the Federal government, and the current unrestricted and restricted funds of the Universities and Colleges. In addition to the annual budget, the General Assembly adopts authorizations for the issuance of general obligation bonds. The expenditures of the resources obtained thereby are accounted for in the capital projects fund.

All State budgetary expenditures for the general, special and federal funds are made pursuant to appropriations in the annual budget, as amended from time to time, by budget amendments. The legal level of budgetary control is at the program level of the general, special and federal funds. State governmental departments and independent agencies may, with the Governor's approval, amend the appropriations by program within the budgetary general fund, provided they do not exceed their total general fund appropriations as contained within the annual budget. Increases in total general fund appropriations must be approved by the General Assembly. For the fiscal year ended June 30, 2015, the General Assembly approved a net increase in General Fund appropriations of \$187,812,000. Appropriations for programs funded by, in whole or in part, from the special or federal funds, may permit expenditures in excess of original special or federal fund appropriations to the extent that actual revenues exceed original budget estimates and such additional expenditures are approved by the Governor. Unexpended appropriations from the general fund may be carried over to succeeding years to the extent of encumbrances, with all other appropriations lapsing as of the end of the fiscal year. Unexpended appropriations from special and federal funds may be carried over to the extent of (a) available resources, and (b) encumbrances. The State's accounting system is maintained by the Comptroller in compliance with State Law and in accordance with the State's Budgetary Funds. It controls expenditures at the program level to ensure legal compliance. The "Agency Appropriation Unencumbered Balance Report," which is available for public inspection at the Office of the Comptroller, provides a more comprehensive accounting of activity on the basis of budgeting at the legal level of budgetary control.

The original and amended budget adopted by the General Assembly for the general, special and federal funds is presented in the Schedule of Revenues, Expenditures and Encumbrances, and Changes in Fund Balances, Budget and Actual for the year ended June 30, 2015. The State's budgetary fund structure and the basis of budgeting, which is the modified accrual basis with certain exceptions, differ from that utilized to present financial statements in conformity with generally accepted accounting principles. The budgetary system's principal departures from the modified accrual basis are the classification of the State's budgetary funds and the timing of recognition of certain revenues and expenditures. A summary of the effects of the fund structure differences and exceptions to the modified accrual basis of accounting, as of June 30, 2015, is provided in the "Reconciliation of the Budgetary General and Special Fund, Fund Balances to the GAAP General and Special Revenue Fund Balances" immediately following the budgetary schedule.

# COMBINING FINANCIAL STATEMENTS

RECONSTRUCTION OF ORIGINAL 1676 STATEHOUSE
ST. MARY'S CITY

# **Non-major Governental Funds**

## **Debt Service Funds**

General Obligation Bonds, Debt Service Fund: Transactions related to resources obtained and used for the payment of interest and principal on general long-term debt obligations are accounted for in the general obligation bonds debt service fund.

Transportation Bonds, Debt Service Fund: Transactions related to resources obtained and used for the payment of interest and principal on transportation long-term debt obligations are accounted for in the transportation bonds debt service fund.

## **Capital Projects Funds**

Transactions related to resources obtained and used for the acquisition, construction or improvement of certain capital facilities, including those provided to political subdivisions and other public organizations are accounted for in the capital projects fund. Such resources are derived principally from proceeds of general obligation bond issues, federal grants and operating transfers from the State's general fund. The State enters into long-term contracts for construction of major capital projects and records the related commitments as encumbrances.

# **Non-major Enterprise Funds**

Transactions related to commercial types of activities operated by the State are accounted for in the enterprise funds. The non-major enterprise funds consist of the economic development insurance programs of the Department of Housing and Community Development and Maryland Correctional Enterprises, which utilizes inmate labor from State correctional institutions to manufacture goods, wares and merchandise to be sold to State and federal agencies, political subdivisions and charitable, civic, educational, fraternal or religious associations or institutions.

# **Fiduciary Funds**

The Pension and Other Employee Benefits Trust Funds include the Maryland State Retirement and Pension System, the Maryland Transit Administration Pension Plan, and the Deferred Compensation Plan. The Trust Funds reflect the transactions, assets, liabilities and net position of the plans administered by the State and the Maryland Transit Administration and are accounted for using the flow of economic resources measurement focus. The Deferred Compensation Plan, which is included with a year end of December 31, accounts for participant earnings deferred in accordance with Internal Revenue Code Sections 457, 403(b), 401(a) and 401(k). Amounts deferred are invested and are not subject to Federal income taxes until paid to participants upon termination or retirement from employment, death or for an unforeseeable emergency.

The agency funds are custodial in nature and do not present the results of operations or have a measurement focus. The State uses agency funds to account for the receipt and disbursement of patient and prisoner accounts, various taxes collected by the State for distribution to the Federal government and political subdivisions and amounts withheld from employee's payroll.

# **Non-major Component Unit Financial Statements**

## **Non-major Component Units**

Non-major component units are comprised of the following proprietary fund type entities.

#### **Maryland Environmental Service**

The Maryland Environmental Service was created as a body corporate and politic. The Service helps private industry and local governments manage liquid, solid and hazardous wastes. In accordance with direction from the Governor, the Service plans and establishes major resource recovery facilities, solid waste management plans and hazardous waste management programs.

#### **Maryland Industrial Development Financing Authority**

The Maryland Industrial Development Financing Authority was established as a body corporate and politic and a public instrumentality of the State to provide financial assistance to enterprises seeking to locate or expand operations in Maryland.

# **Maryland Food Center Authority**

The Maryland Food Center Authority is a body corporate and politic which was created to establish and operate a consolidated wholesale food center within the Greater Baltimore Region and is subject to State regulations.

# Maryland Technology Development Corporation

The Maryland Technology Development Corporation was established as a body corporate and politic and a public instrumentality of the State to assist in the commercialization of technology developed in the universities and the private sector. The corporation administers the Maryland Technology Incubator program and the Maryland Stem Cell Research Fund.

# **Maryland Stadium Authority**

The Maryland Stadium Authority was created as a body corporate and politic and as an independent unit of the Executive Department of the State of Maryland. The Authority's purpose is to acquire land and to construct, operate and/or manage various capital facilities in the State.

<sup>(1)</sup> See the Expenses by Function, Primary Government and Revenues, Primary Government schedules for detail information on expenses and revenues.

<sup>(2)</sup> Beginning net position balances were restated for fiscal year 2009 to recognize pollution remediation obligations for governmental activities and a prior period adjustment for capital assets of the Maryland Transportation Authority in the business-type activities. Beginning net position was restated for fiscal year 2010 due to implementation of GASB Statement No. 53. Beginning net position was restated for fiscal year 2014 due to implementation of GASB Statement No. 65 and for fiscal year 2015 due to implementation of GASB Statement No. 68.

<sup>(1)</sup> The unreserved and unassigned fund balance deficit of the capital projects fund will be funded by future bond proceeds and capital appropriations of the general fund.

<sup>(2)</sup> Beginning in fiscal year 2010, fund balances were restated due to implementation of GASB Statement No. 54.

Total net debt applicable to limit

as a percentage of debt limit.....

(1) For general obligation bonds, the debt limit is based on separate enabling acts for particular objects or purposes that are enacted during each legislative session. There is no separately mandated maximum amount for the issuance of general obligation bonds. For transportation bonds, the General Assembly each year establishes a maximum aggregate outstanding amount that does not exceed \$2,000,000,000 up to June 30, 2007, \$2,600,000,000 through June 30, 2009, and \$4,500,000,000 thereafter.

76.18%

(2) The 2014 session of the General Assembly established a maximum outstanding principal amount of \$726,600,000 as of June 30, 2015, for all nontraditional debt of the Department.

Nontraditional debt outstanding is defined as any debt instrument that is not a Consolidated Transportation Bond or GARVEE bond. This debt includes certificates of participation, debt backed by customer facility charges, passenger facility charges, or other revenues, and debt issued by the Maryland Economic Development Corporation or any other third party on behalf of the Department.

Source: The Maryland Department of Transportation, The Secretary's Office, Office of Finance.

<sup>(1) 2007</sup> was the last year for the transfer of \$43,000,000 from Maryland Transportation Authority to the Transportation Trust Fund.

<sup>(2)</sup> The State's sales tax and the Vehicle Excise Tax (Titling tax) was increased from 5% to 6%, effective January 1, 2008. In addition, effective July 1, 2008, the percentage of titling tax retained by the Department was increased incrementally to fiscal year 2014 from 76% to 93.6%.

<sup>(3)</sup> The Department was allocated 6.5% of the State's sales tax effective July 1, 2008. The distribution was reduced to 5.3% in fiscal years 2010 and 2011 and ended July 1, 2011.

<sup>(4)</sup> The Transportation Trust Fund transferred \$40,000,000 of the Department's share of Highway User Revenues to the Revenue Stabilization Account in fiscal year 2012.

<sup>(5)</sup> The allocation of the corporate income tax to the Department was changed from 24% to 17.2% in fiscal year 2012, 9.5% in fiscal year 2013, and 19.5% through fiscal year 2016.

<sup>(6)</sup> The motor fuel tax rate was increased based on growth of the Consumer Price Index and applies a sales and use tax equivalent to the price of motor fuel beginning in fiscal year 2014.

<sup>(1)</sup> These amounts are estimates.

<sup>(2)</sup> Maryland's portion of the National Highway System was recently expanded beginning in 2013 due to Federal Highway Legislation.

<sup>(3)</sup> Restructuring of training programs in 2009 has led to reduced funding for the Partnership for Workforce Quality Program (PWQ).

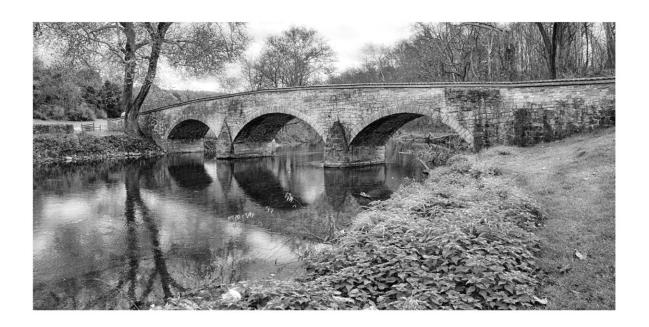

<sup>(4)</sup> CDA relies completely on the reporting of two different Master Servicers on the underlying loans that comprise the Mortgage-backed securities held by CDA at fiscal year end.

<sup>(5)</sup> Large reduction of faculty count is due to exclusion of faculty at Clinical Medicine at UMB, faculty at extension services, and continuing education faculty beginning in 2013.

<sup>(6)</sup> Legislative scholarships are not included due to a change in awarding practices begun in FY 2012.

# FINANCIAL SCHEDULES REQUIRED BY LAW

These schedules are required to be submitted by the Comptroler by Title 2, Section 102 of the State Finance and Procurement Article of the Annotated Code of Maryland

BURNSIDE BRIDGE ANTIETAM NATIONAL BATTLEFIELD

# Schedule of Estimated and Actual Revenues By Source, Budgetary Basis, for the Year Ended June 30, 2015 (Expressed in Thousands)
