AS ONE OF THE THIRTEEN ORIGINAL COLONIES,

Maryland led the fledgling nation in planting the economic seeds that took root to create thriving communities. Centered around the Chesapeake Bay, colonists labored tirelessly to cultivate the land and establish vast trade networks to supply the slew

of growing settlements. At the close of the 18th century, the population eclipsed 300,000

IT IS PRECISELY MAIN STREET BUSINESSES LIKE THESE THAT KINDLE THE ECONOMIC FIRE, MAKING MARYLAND ONE OF THE GREATEST STATES IN THE NATION FOR ENTREPRENEURS.

and the towns that dotted the landscape witnessed an increase in the number of local proprietors along the main thoroughfares.

By the dawn of the 19th century, small manufacturers began to flourish in the brand-new, independent nation, with Maryland at the forefront. Seizing upon the technological advances coming out of the Industrial Revolution, the Old-Line State pioneered industry — home to the first public street lamp and gas lighting company in 1817, illuminating

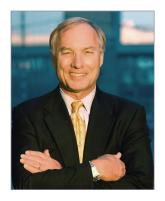

the vendors and shops along Market Street in Baltimore. Ten years later, the Baltimore & Ohio Railroad became the first U.S. railway, transforming the nation's landscape and the economy.

Since that time, Maryland has seen incredible growth and innovation that has spurred employment,

fueled local economies, and built strong neighborhoods centered around these industries.

Today, Maryland is home to nearly 600,000 small businesses, one third of which are minority owned. Main Street enterprises employ over one million Marylanders, more than half of the state's workforce, making them essential to the evolution and prosperity of the Free State.

Small employers from Salisbury to Oakland are engaged, active participants in their communities — investing locally and giving back to the neighborhoods they call home.

A MESSAGE FROM COMPTROLLER PETER FRANCHOT

Dear Marylanders,

I have had the honor of serving as your Comptroller since 2007. As the state's fiscal watchdog, I have a strong track

record of holding government accountable and making certain that taxpayer monies are spent wisely. Maryland's long-term fiscal health impacts your fiscal health and that is why I remain committed to responsible economic policies.

Today, most Maryland taxpayers file their returns electronically. The majority of those refunds are disbursed by my agency in less than three business days. This first-class customer service provided by our dedicated team is just one of the reasons we have earned the reputation as the most effective and efficient comptroller's office in the nation. Our team is also at the forefront of combatting tax fraud and identity theft by using advanced technologies and increased statutory powers to investigate and prosecute these unscrupulous felons.

I have long been an avid supporter of "Main Street" enterprises. Small businesses comprise more than 99% of all Maryland companies and are the backbone of our economy. I am committed to advancing reforms that reduce the prohibitive regulatory burdens placed upon Maryland businesses. Companies across the state ally with communities to build strong relationships toward economic prosperity by hiring locally, spending locally and investing locally. This is good for Maryland and something I will always champion.

I look forward to continuing to build upon this legacy of responsible fiscal policies that chart the lighted path forward to a brighter, more prosperous economic future.

Sincerely,

MARYLAND COMPTROLLER, PETER FRANCHOT

MAIN STREET SHOP OWNERS THROUGHOUT

Maryland have one thing in common — service with a smile. There is a universal understanding that excellent customer service keeps patrons coming back time and again, particularly when it is backed by a quality product. Proprietors from Frederick to Bel Air are much more than

smiling faces, they take pride in the products they manufacture and sell and they can't wait to share them with customers.

Whether it is metro or retro, antique or modern, you can find it in Maryland with a warm welcome and a genuine smile.

LOCAL TREASURES

AMIDST THE PHOTOGRAPHIC SCENERY

and eye-catching architecture, myriad shops adorn Main Streets in Maryland offering visitors a taste of the local flavors. The Smith Island Cake, Maryland's historic state desert with its luscious layers, full flavor and decadent frosting will leave any customer coming back for more.

Whether it's the fresh Choptank oysters in Cambridge, the stuffed ham in St. Mary's, the vintage vinyl shops in Annapolis, or the fresh cider straight from the orchard in Mountain Maryland, a true local gem is tucked away, just waiting to be discovered.

Union Craft Brewing, Baltimore, Maryland.

PHOTO: MAXIMILIAN FRANZ

MANUFACTURERS ARE THE OFT unheralded men and women that keep the lights on in Maryland. These entrepreneurs are as diverse as the neighborhoods where they live. Their contributions are not only breweries, packaging, technology companies and more — these entreprenuers are also raising communities. They employ locally, spend locally, and invest locally. This investment spurs revitalization efforts in some of the most underserved areas of the state, creating opportunity along with an enticement that draws even more entrepreneurs perpetually feeding the economic cycle. Breweries, distilleries and wineries in every corner of the state can't wait to serve up their tasty concoctions created from locally sourced ingredients provided by area farmers. The purchase of just one pint of a local brew

causes an economic ripple effect in communities across the state, from the farmer to the maltster, the glass maker to the artist that created the logo, sparking growth in the chain of companies that contributed — even in the smallest way to those glorious 16 ounces of liquid gold.

In Maryland, the impact of local manufacturers stretches beyond the bottom line, going beyond investment to involvement — most concertedly in philanthropic activities that give back to the neighbors that welcomed them.

Most importantly these proprietors truly care about the impact they have on their community. They cultivate an environment that is welcoming, supportive and gathers residents together toward a common purpose.

The Boardwalk, Ocean City, Maryland.

PHOTO: OCEAN CITY TOURISM

THE OLD-LINE STATE IS HOME TO

3,190 miles of coastline just waiting to be explored. The sandy beaches and bustling boardwalk of Ocean City provide an enticing family getaway, while the Chesapeake Bay and its tributaries offer scenic waterways and vast refuges for nature lovers. Visitors flock to the Free State for the divergent

climes and cultures, experiencing what they can't find anywhere else. The world-famous art galleries and restaurants are as much a destination as farm country where agro-tourism has blossomed, helping farmers find new ways to diversify by offering fun, educational experiences.

LIGHTING UP MAIN STREET

New Digz, Upper Marlboro, Maryland.

Liberty Shop, Downtown Westminster, Maryland.

Mixx112 Boutique, Cumberland, Maryland.

ANY SHOPPER WILL FIND SOMETHING to suit their fancy on Maryland's Main Streets. The eclectic mix of stores and products tantalize visitors to step beyond the catchy window displays and vibrant signage. Locally roasted coffees, hand sewn scarves or Baltimore's famous Otterbein's cookies prove irresistible to consumers, ensuring that if it is the first — it certainly won't be the last purchase they

make. From Port Deposit to Potomac and every town in between, Free State businesses spark the economy, revive disadvantaged neighborhoods, and help localities to thrive. They assist one another by carrying locally-sourced products and work together for the betterment of the community. They truly are the foundation of Maryland's economy.

COMPREHENSIVE ANNUAL FINANCIAL REPORT, STATE OF MARYLAND

Peter Franchot Comptroller

December 16, 2019

Honorable Members of the General Assembly and the Governor, State of Maryland

The Comprehensive Annual Financial Report (CAFR) of the State of Maryland (State), for the Fiscal Year ended June 30, 2019, includes the financial statements of the State as well as information required by Title 2, Section 102 of the State Finance and Procurement Article of the Annotated Code of Maryland. Responsibility for both the accuracy of the presented data and the completeness and fairness of the presentation, including all disclosures, rests with the Office of the Comptroller.

The statutes of the State require an audit of every unit of the Executive and Judicial branches of government, including the Comptroller of Maryland's records, by the Legislative Auditor at least every four years. The Legislative Auditor is required to be and is a certified public accountant. The Legislative Auditor makes fiscal, compliance and performance audits of the various agencies and departments of the State and issues a separate report covering each of those audits. The primary purpose of the reports is to present the Legislative Auditor's findings relative to the fiscal management of those agencies and departments.

Additionally, my office requires an audit of the State's basic financial statements by a firm of independent auditors selected by an audit selection committee composed of members from the Comptroller's Office and other units of the Executive branch of State government. This requirement has been compiled with, and the opinion of SB & Company, LLC, has been included in the financial section of this report. SB & Company, LLC also performed an audit to meet the requirements of the Office of Management and Budget (OMB) 2 CFR 200, "Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards," and such information is contained in another reporting package.

The State has issued guidelines to its agencies for establishing effective internal controls. As a recipient of Federal assistance, the State is responsible for ensuring compliance with laws and regulations related to such assistance. This compliance is accomplished through the internal control guidelines. Because the cost of internal control should not exceed anticipated benefits, the objective is to provide reasonable, rather than absolute, assurance that the financial statements are free of any material misstatements.

The accompanying financial statements include all funds of the State (primary government), as well as all component units. Component units are legally separate entities for which the primary government is financially accountable. The various colleges and universities, the Maryland Prepaid College Trust of the Maryland 529 Plans, and the Maryland Stadium Authority are reported as major component units. The Maryland Environmental Service, the Maryland Industrial Development Financing Authority, the Maryland Food Center Authority, and the Maryland Technology Development Corporation are combined and presented as non-major component units.

Accounting principles generally accepted in the United States of America require that management provide a narrative introduction, overview and analysis to accompany the basic financial statements in the form of Management's Discussion and Analysis (MD&A). This letter of transmittal is designed to complement the MD&A and should be read in conjunction with it. The MD&A can be found immediately following the report of the independent public accountants.

Background Information on the State:

Maryland ratified the United States Constitution on April 28, 1788. Its capitol is Annapolis, where the principal activities of state government are centered. Its employment is based largely in services, trade and government. These sectors, along with finance, insurance and real estate are the largest contributors to the gross state product. The State has a bicameral legislature, the General Assembly, composed of the Senate with 47 members and the House of Delegates with 141 members. The General Assembly meets annually for a 90-day session beginning on the second Wednesday in January.

The Maryland Constitution requires the Governor to submit to the General Assembly a balanced budget for the following year. The General Assembly cannot increase the budget except in certain organizational units. The budget currently uses a legally mandated budgetary fund structure. Each State agency is provided appropriations at a program level, which is the level at which expenditures cannot legally exceed the appropriations. The State also utilizes an encumbrance system to serve as a tool for managing available appropriations. Maryland maintains its accounts to conform with the legally mandated budget and also to comply with generally accepted accounting principles. Financial control is generally exercised under the budgetary system.

There is a Spending Affordability Committee which consists of certain designated officers of the General Assembly and other members as may be appointed by the President of the Senate and the Speaker of the House of Delegates. Each year the Committee must submit a report to the General Assembly's Legislative Policy Committee and to the Governor recommending the level of State spending, the level of new debt authorization, the level of State personnel and the use of any anticipated surplus funds.

Also, the General Assembly created a Capital Debt Affordability Committee, the members of which are the Treasurer, the Comptroller, the Secretary of Budget and Management, the Secretary of Transportation, and one person appointed by the Governor. This Committee is required to submit to the Governor by October 1 of each year an estimate of the maximum amount of new general obligation debt that

prudently may be authorized. The Committee's recent reports encompass all tax supported debt, in addition to the general obligation debt, bonds issued by the Department of Transportation, bonds issued by the Maryland Stadium Authority and capital lease transactions. Although the Committee's responsibilities are advisory only, the Governor is required to give due consideration to the Committee's finding in preparing a preliminary allocation of new general obligation debt authorizations for the next ensuing fiscal year.

Information on the State's Economic Condition:

Maryland's economy is expected to continue expanding in line with recent trends. Growth in employment is expected to be 0.8% in 2019, down from 1.1% in 2018. Employment growth in 2020 is expected to decline to 0.6% and 0.5% in the out-years due to slower working age population growth. Growth in the average wage for 2019 is expected to be 2.9%. The rate of wage growth is expected to remain low relative to historical norms. Aggregate wage growth and personal income measures increase as employment and the average wage grow.

Growth in the traditional working age population (defined here as 25-64 years old) has been declining nationwide. In Maryland, the working age population recently began to shrink. Slowing growth in the number of workers, ceteris paribus, translates to proportionally slower growth in output. In reality, this has been partially ameliorated by increased labor participation of those 65 and older.

In the short run however, economic growth can deviate significantly from what economists expect to be the potential, or sustainable, rate of growth. In 2018, the federal government embarked on a large debt-financed stimulus in the midst of a mature economic expansion. The result was an uptick in both real GDP growth and inflation – which together equal nominal GDP – that is already dissipating. The duration and escalation of trade barriers is also restraining growth.

In light of these issues, we view the risk of a recession in Maryland's forecast horizon as elevated. However, we do not forecast a recession, in part because no one has been able to accurately predict recessions – a result consistent with economic theory. Furthermore, time since the last recession is not a reliable indicator of when the next recession will occur. Australia, for example, last had a recession in 1991. Rather we warn of heightened risk. This expansion is mature, but we cannot reliably answer the important questions of timing or magnitude of the next recession.

The national labor market continues to perform well in terms of low unemployment and steady job creation, particularly considering slowing growth in the working age population. In both the nation as a whole and Maryland in particular, job growth has outperformed population growth. In October 2019, the unemployment rates for both the nation and Maryland were 3.6%. After growing 1.1% in 2018, the number of non-farm payroll jobs in Maryland has grown 0.6% through October of this year according to the Current Employment Statistics (CES) payroll survey. The less timely but typically more accurate Quarterly Census of Employment and Wages (QCEW) has recorded marginally stronger employment growth for the past two years. Through June of this year, the QCEW reports job growth of 0.8%. Because of this we believe employment will grow 0.8% in 2019.

Growth in the number of jobs in Maryland has been below that of the nation for almost the entire expansion, and this divergence has recently worsened. However, it should be noted that the nation is experiencing higher population growth and would therefore be expected to experience faster job growth all else equal. Despite significant declines in unemployment, wage growth has remained subdued. The average wage, defined as total wages divided by the number of jobs, increase 2.7% in 2018 and is up 3.1% through the first two quarters of 2019.

The Federal Government's economic policy during this expansion has been characterized by uncertainty and contradiction. Relatively early in the recovery, the federal government implemented a policy of austerity in the form of tax increases and spending caps that restrained spending growth. Maryland's economy stagnated during this time. More recently, federal spending and deficits have substantially increased. Although the federal government is buying more from the private sector, direct federal employment in Maryland and D.C. began to decline in mid-2017. More recently, federal employment in Maryland appears to have bottomed out. During this time, income tax withholding from federal contractors, who are private sector employers, grew. The overall impact on federal government related employment is therefore ambiguous.

Federal budget sequestration is set to expire at the end of federal fiscal year 2021 (September 2021). There could be near-term benefits for Maryland if the private sector begins to invest in anticipation of greater federal outlays. Then, once the budget caps are removed, direct federal expenditures would likely increase to the benefit of the State's out-year forecast as well.

As usual, risks abound. One risk for Maryland, as ever, is oil prices. An increase in oil prices would be a drag on average consumer spending in Maryland. But while oil price changes still impact the economy, the rise of domestic shale oil producers and their ability to respond quickly means the US economy as a whole is less affected by swings in the international oil market. Increasing fuel and energy efficiency has similarly reduced the impact of oil price swings on the economy. However, whereas falling oil prices were once unambiguously beneficial to the US economy, domestic shale oil production falls when oil prices fall, causing regional declines in industrial production.

The evolution of trade policy is another international risk. There is considerable uncertainty as to the imposition, extent, and duration of tariffs and other barriers. Uncertainty itself can depress economic growth, and tariffs act as a tax on US consumption of such goods.

Continuing with trade policy, the Port of Baltimore is a significant east coast port. It is among a few that have the berth depths and infrastructure to handle "Post Panamax" ships – those that can pass through the expanded Panama Canal. As such, the port is liable to feel the impacts of increasing trade barriers. However, the Port benefits from trade regardless of which direction goods move. While trade barriers will make some goods more expensive to import, the overall trade balance is determined by the savings rates of the trading partners involved. Indeed the trade deficit has grown despite tariffs. The Port conceivably benefits from that increased demand for imports. More recently, interested parties in expanding the Howard Street tunnel may have reached agreement over funding, though nothing is final. This would

increase the Port of Baltimore's cargo handling capacity and might therefore boost near-term investment in the Port, apart from the tunnel expansion.

Major Initiatives and Long Term Financial Planning:

The fiscal year 2020 budget makes use of what is likely a one-time surplus to save for the future and to invest in the state's infrastructure. There is full funding of \$125 million for year one of the constitutional amendment guaranteeing that Education Trust Fund dollars from casino revenues supplement public education. The Building Opportunity Fund is established to assist in providing \$3.5 billion in school construction funding over the next five years. Investment in Opportunity Zones throughout the state is encouraged by providing \$56.5 million in new incentives and through the More Opportunities for Marylanders Act of 2019. More than \$1.3 billion will be set aside to prepare for a potential future downturn in the economy, including a Rainy Day Fund balance equal to 6.5% of annual revenues, more than \$276 million above the 5% required by state law.

The state closed FY 2018 with a surplus of \$589 million – nearly \$400 million larger than estimated. The budget surplus was primarily the result of higher than estimated revenues, and secondarily because state agencies returned more funds back to the Treasury than estimated for the fourth consecutive year. However, understanding that the economy has experienced the longest sustained period of growth since the 1990's and that much of the additional revenue is attributable to volatile revenue sources, saving and prudent spending characterize the FY2020 budget.

The state's budget complies with all major recommendations made by the General Assembly's Spending Affordability Committee. When the additional balance in the Rainy Day Fund is combined with the FY 2020 surplus of \$105 million, the state will have approximately \$1.32 billion in reserve, equal to slightly more than 7% of revenues. The FY 2020 budget also includes a total of \$1.71 billion in pension funding, which is \$125 million more than actuarially required. The budget continues to reserve \$200 million to help fund future costs associated with the recommendations of the Kirwan Commission on public school funding.

The FY 2020 capital budget totals \$5.16 billion. In addition to public school construction, it includes higher education capital funding of \$325 million. It also includes \$3.3 billion in spending on the transportation network, including \$1.7 billion for state highways, \$221 million for the Purple Line Transitway and \$167 million for the Washington Metropolitan Area Transit Authority.

In FY 2020 local governments will receive an increase of \$24 million, or 10%, in aid for transportation primarily from highway user taxes. The budget contains \$250 million for substance use disorder services, an increase of 20%. Resident undergraduate tuition at all Maryland's public four-year institutions is held to 2% for the fourth consecutive year. A 3% cost-of-living adjustment is included for state employees.

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the State of Maryland for its Comprehensive Annual Financial Report for the Fiscal Year Ended June 30, 2018. The Certificate of Achievement is a prestigious national award recognizing conformance with the highest standards for preparation of state and local government financial reports.

In order to be awarded a Certificate of Achievement, a government unit must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. The State of Maryland has received a Certificate of Achievement for the last 39 consecutive years (Fiscal Years ended 1980 – 2018). We believe that our current comprehensive annual financial report continues to conform to the Certificate of Achievement Program requirements, and we are submitting it to the GFOA to determine its eligibility for another certificate.

The preparation of the Comprehensive Annual Financial Report on a timely basis could not have been accomplished without the efforts and dedication of the staff of the General Accounting Division with assistance from other personnel from the various departments and agencies of the State.

I will be pleased to furnish additional information on the State's finances upon request.

Sincerely,

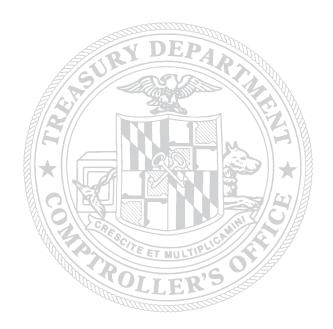

Peter Franchot

Comptroller of Maryland

RAN Franchof

Financial Section

COMPREHENSIVE ANNUAL FINANCIAL REPORT, STATE OF MARYLAND

REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS

The Honorable Peter Franchot Comptroller of Maryland

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Maryland (the State), as of and for the year ended June 30, 2019, and the related notes to the financial statements, which collectively comprise the State's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

The State's management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal controls relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of certain Economic Development Loan Programs; the Maryland Lottery and Gaming Control Agency; certain Economic Development Insurance Programs; certain foundations included in the higher education component units; the Maryland Technology Development Corporation; Maryland Environmental Service and the Investment Trust Fund. Those financial statements were audited by other auditors whose reports thereon have been furnished to us, and our opinion, insofar as it relates to the amounts included for the State, is based solely on the report of the other auditors. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

The financial statements that we did not audit, which are listed above represent the percentages of the total assets, total net position, and total revenues of the accompanying financial statements as listed below.

	Perce	entage of Opinion Uni	t
	Total Assets	Total Net Position	Total Operating Revenues

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal controls relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal controls. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, based on our audit and the reports of the other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State, as of June 30, 2019, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis; and other required supplementary information (collectively required supplementary information) as listed in the table of contents be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We and the other auditors have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State's basic financial statements. The combining financial statements, introductory and statistical sections, and financial schedules required by law, as listed in the table of contents, are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining financial statements are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other

additional procedures in accordance with auditing standards generally accepted in the United States of America by us and the other auditors. In our opinion and based on the reports of the other auditors, the combining financial statements, are fairly stated in all material respects in relation to the basic financial statements as a whole.

The introductory, statistical sections, and financial schedules required by law as listed in table of contents have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and, accordingly, we do not express an opinion or provide any assurance on them.

Owings Mills, Maryland December 16, 2019 SB & Company, If C

STATE OF MARYLAND

Management's Discussion and Analysis

Management of the State of Maryland provides this narrative overview and analysis of the financial activities of the State for the fiscal year ended June 30, 2019. Please read it in conjunction with the Comptroller's letter of transmittal, which can be found in the Introductory Section of this report, and the State's financial statements which follow this section.

Financial Highlights

Government-wide

- Maryland reported a deficit of \$10.2 billion in fiscal year 2019 and a deficit of \$8.9 billion in fiscal year 2018.
- Of the deficit in fiscal year 2019, a deficit balance of \$33.8 billion was reported as total unrestricted net position, which includes a \$36.1 billion deficit balance in governmental activities and a \$2.3 billion balance in business-type activities.
- The State's total net position decreased by a total of \$1.3 billion as a result of this year's operations.. The net position for governmental activities decreased by \$1.9 billion. Net position of business-type activities increased by \$576 million.
- The State's governmental activities had total expenses of \$41.6 billion; total revenues of \$38.4 billion; net transfers from business-type activities of \$1.2 billion for a net decrease of \$1.9 billion.
- Business-type activities had total expenses of \$4.1 billion; program revenues of \$5.8 billion; general revenues of \$28 million; and transfers out of \$1.2 billion for a net increase in net position of \$576 million.
- Total State revenues were \$44.3 billion, while total costs for all programs were \$45.6 billion.

Fund Level

- Governmental funds reported a combined fund balance of \$3.5 billion, an increase of \$1.2 billion (52.0%) from the prior year.
- The general fund reported an unassigned fund balance deficit of \$19 million and a remaining fund balance (nonspendable, restricted, and committed) of \$2.7 billion, compared to an unassigned fund balance deficit of \$507 million and a remaining fund balance of \$2.2 billion last year. This represents a net increase of \$960 million in general fund, fund balance. The total unassigned fund balance deficit in the governmental funds was \$263 million in the current year and \$977 million in the prior year.
- Governmental funds reported a total nonspendable, restricted, and committed fund balance of \$3.8 billion in 2019, compared to \$3.3 billion in the prior year.

Long-term Debt

- Total bonds and obligations under long-term leases at year end were \$20.2 billion, net of related premiums, discounts and adjustments, a net increase of \$828 million in 2019 (4.3%) from the prior year.
- \$1.0 billion General Obligation Bonds and \$631 million Transportation Bonds were issued during the year.

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the State of Maryland's basic financial statements. The State's basic financial statements comprise three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains additional required supplementary information and other supplementary information in addition to the basic financial statements.

Government-wide Financial Statements (Reporting the State as a Whole)

The government-wide financial statements provide a broad overview of the State's operations in a manner similar to a private-sector business. The statements provide both short-term and long-term information about the State's economic condition at the end of the fiscal year. The statements include all fiscal year revenues and expenses, regardless of whether cash has been received or paid. The government-wide financial statements include two statements.

The Statement of Net Position presents all of the State's assets, deferred outflows of resources, liabilities, and deferred inflows of resources with the difference reported as "net position". Over time, increases and decreases in the State's net position may serve as a useful indicator of whether the financial position of the State is improving or deteriorating.

The Statement of Activities presents information showing how the State's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will not result in cash flows until future fiscal periods (such as uncollected taxes and earned but unused vacation leave). This statement also presents a comparison between direct expenses and program revenues for each function of the State.

The above financial statements distinguish between the following three types of state programs or activities:

Governmental Activities – The activities in this section are typically supported by taxes and intergovernmental revenues, i.e., federal grants. Most services normally associated with the State government fall into this category, including the Legislature, Judiciary and the general operations of the Executive Department.

Business-Type Activities – These functions normally are intended to recover all or a significant portion of their costs through user fees and charges to external users of goods and services. These business-type activities of the State include insurance and loan programs for economic development, the Unemployment Insurance Program, the Maryland Lottery and Gaming Control Agency (MLGCA), the Maryland Transportation Authority and the Maryland Correctional Enterprises, a program which constructs office furnishings utilizing the prisons' inmate population.

Discretely Presented Component Units – The government-wide statements include operations for which the State has financial accountability, but are legally separate entities. Financial information for these component units is reported separately from the financial information presented for the primary government. The component unit activities include Higher Education, the Maryland Prepaid College Trust, the Maryland Stadium Authority and other non-major proprietary activities. All of these entities operate similarly to private sector business and to the business-type activities described above. The component unit Higher Education consists of the University System of Maryland, Morgan State University, St. Mary's College and Baltimore City Community College and certain affiliated foundations. The non-major component units include the Maryland Food Center Authority, Maryland Environmental Service, Maryland Industrial Development Financing Authority, and Maryland Technology Development Corporation.

Complete financial statements of the individual component units can be obtained from the Comptroller of Maryland, LLG Treasury Building, Annapolis, Maryland 21404.

This report includes two schedules (pages 29 and 31) that reconcile the amounts reported on the governmental fund financial statements (modified accrual accounting) with governmental activities (accrual accounting) on the government-wide statements. The following summarizes the impact of transitioning from modified accrual to accrual accounting:

- Capital assets used in governmental activities are not reported on governmental fund statements.
- Certain tax revenues that are earned and other assets that are not available to pay for current period expenditures are deferred in governmental fund statements, but are recognized on the government-wide statements.
- Other amounts that otherwise meet the definition of a revenue or expense that relate to a future period are deferred only on the government-wide statements.
- Unless currently due and payable, long-term liabilities, such as capital lease obligations, compensated absences, litigation, and bonds
 and notes payable, only appear as liabilities in the government-wide statements.
- Capital outlays result in capital assets on the government-wide statements, but are reported as expenditures on the governmental fund statements.
- Bond and note proceeds result in liabilities on the government-wide statements, but are recorded as other financing sources on the governmental fund statements.
- Certain other transactions represent either increases or decreases in liabilities on the government-wide statements, but are reported as expenditures on the governmental fund statements.

The government-wide financial statements can be found on pages 24 -27 of this report.

Fund Financial Statements

A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The State, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. The State's funds can be divided into three categories: governmental, enterprise, and fiduciary. Each of these categories uses a different accounting approach.

Governmental funds – Most of the basic services provided by the State are financed through governmental funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, the governmental fund financial statements focus on near-term inflows and outflows of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating the State's near-term financing requirements. These statements provide a detailed short-term view of the State's finances that assists in determining whether there will be adequate financial resources available to meet the current needs of the State.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the State's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities. These reconciliations are presented on the pages immediately following the governmental funds financial statements.

The State maintains five governmental funds. Information is presented separately in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures and changes in fund balances for the General Fund and the Department of Transportation-special revenue fund, both of which are considered to be major funds. Data from the remaining three governmental funds are combined into a single, aggregated presentation. Data for the non-major governmental funds, namely, the debt service fund for general obligation bonds, the debt service fund for transportation revenue bonds and the capital projects fund, are provided in the form of combining statements elsewhere in this report. These funds are reported using modified accrual accounting, which measures cash and all other assets which can be readily converted to cash. The basic governmental funds financial statements can be found on pages 28 and 30 of this report.

Enterprise funds – Enterprise funds are used to show activities that operate similar to activities of commercial enterprises. These funds charge fees for services provided to outside customers including local governments. Enterprise funds provide the same type of information as the government-wide financial statements, only in more detail. There is no reconciliation needed between the government-wide business-type financial statements for business-type activities and the enterprise fund financial statements because they both utilize accrual accounting, the same method used for business in the private sector.

The State has six enterprise funds, four of which are considered to be major enterprise funds. These funds are: Economic Development – Loan Programs, the Unemployment Insurance Program, the Maryland Lottery and Gaming Control Agency and the Maryland Transportation Authority. Data for the non-major enterprise funds, Economic Development – Insurance Programs and Maryland Correctional Enterprises, are combined into a single aggregated presentation. Individual fund data for these non-major enterprise funds is provided in the form of combining statements elsewhere in this report.

The basic enterprise funds financial statements can be found on pages 34 - 38 of this report.

Fiduciary funds – Fiduciary funds are used to account for resources held for the benefit of parties outside the state government. Fiduciary funds are not reflected in the government-wide financial statements because the resources of these funds are restricted in purpose and are not available to support the State's own programs. Fiduciary funds use accrual accounting.

The State's fiduciary funds include the Pension and Other Employee Benefits Trust Funds, the Investment Trust Fund and Agency Funds. The Pension and Other Employee Benefits Trust Funds consist of the Retirement and Pension System, the Maryland Transit Administration Pension Plan, the Postretirement Health Benefits Trust Fund and the Deferred Compensation Plan. The Investment Trust Fund accounts for the transactions, assets, liabilities and net position of an external investment pool. Agency funds account for the assets held for distribution by the State as an agent for other governmental units, organizations or individuals. Individual fund detail for the fiduciary funds can be found in the combining financial statements.

The basic fiduciary funds financial statements can be found on pages 39 -40 of this report.

Combining Financial Statements, Component Units – The government-wide financial statements present information for the component units in a single aggregated column in the Statement of Net Position and the Statement of Activities. Combining Statement of Net Position and Combining Statement of Activities have been provided for the Component Unit Proprietary Funds and provide detail for each major proprietary component unit, with a combining column for the non-major component units. Individual financial statement information for the non-major component units is provided elsewhere in this report.

The combining financial statements for the component units can be found on pages 42 -44 of this report.

Notes to the Financial Statements

The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and the fund financial statements. The notes to the financial statements can be found on pages 46 - 100 of this report.

Required Supplementary Information

The required supplementary information includes budgetary comparison schedules for the budgetary general, special and federal funds, along with a reconciliation of the statutory and Accounting Principles Generally Accepted in the United States of America (GAAP) General and Special Revenue Fund, fund balances at fiscal year end and related notes. This report also presents certain required supplementary information concerning the State's contributions and liabilities for its pension plans and post-employment healthcare benefits and related notes. Required supplementary information immediately follows the notes to the financial statements.

Other Supplementary Information

Combining Financial Statements

The combining financial statements referred to earlier in connection with non-major governmental, enterprise, and fiduciary funds and non-major component units are presented immediately following the required supplementary information.

Government-Wide Financial Analysis

The State's combined net position (governmental and business-type activities) totaled \$10.2 billion deficit at the end of 2019 and \$8.9 billion deficit at the end of 2018.

Net Position as of June 30. (Expressed in Millions) Governmental Business-type Activities Total Activities 2019 2018 2019 2018 2019 2018 7,756 Current and other assets \$ \$ 8,371 6,515 8,519 \$ 16,890 \$ 14,271 Capital assets 25,236 24,949 6,287 6,099 31,523 31,050 Total assets 33,607 31,464 14,807 13,855 48,413 45,320 Total deferred outflows of resources 5,710 3,985 5,639 98 71 4,082 Long-term liabilities 45,572 4,935 4,548 53,598 50,120 48,663 Other liabilities 5,602 4,958 777 759 6,379 5,717 Total liabilities_____ 5,307 54,265 50,530 5,712 59,977 55,839 Total deferred inflows of resources 2,683 4,019 80 83 2,763 4,102 Net position: Net invested in capital assets 16,522 16,703 4,683 4,360 21,204 21,063 Restricted 224 255 2,168 2,187 2,392 2,443 Unrestricted (36,102) (34,404)1,989 (33,840) 2,262 (32,415)Total net position (19,356)(17,446)9,112 8,536 (10,244)(8,910)

The largest portion of the State's net position, \$21.2 billion, reflects investment in capital assets such as land, buildings, equipment and infrastructure, less any related debt to acquire those assets that is still outstanding, as adjusted by any deferred inflows or deferred outflows of resources. The State uses these capital assets to provide services to citizens. Consequently, these assets are not available for future spending. Although the State's investment in capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

In addition, a portion of the State's net position, \$2.4 billion, represents resources that are subject to external restrictions or enabling legislation on how they may be used. The remaining balance for unrestricted net position, a deficit of \$33.8 billion, reflects the State's expenses over revenues.

The following condensed financial information was derived from the government-wide Statement of Activities and reflects how the State's net position changed during the fiscal year.

2019 REVENUES BY SOURCE - GOVERNMENTAL ACTIVITIES

2019 EXPENSES BY FUNCTION - GOVERNMENTAL ACTIVITIES

2019 EXPENSES AND PROGRAM REVENUES - BUSINESS-TYPE ACTIVITIES (Expressed in Millions)

Governmental Activities

- Liabilities and deferred inflows exceeded assets and deferred outflows by \$19.4 billion at the end of fiscal year 2019. For the current year, there was a decrease in net position of \$1.9 billion from the previous year.
- Included in the decrease in net position, capital assets decreased by \$181 million, deferred outflows, net of deferred inflows, decreased by \$318 million, and long-term liabilities increased by \$3.1 billion. The major capital asset events are discussed in the Capital Assets section of this analysis. Among the components of the increase in long-term liabilities were increases in bonds and notes payable (\$552 million); a decrease in the State's net pension liability (NPL) (\$1.0 billion); and the State's net OPEB liability in the current year in excess of the net OPEB liability in the prior year (\$3.6 billion). The increase in bonds and notes payable is discussed in the Long-Term Debt section of this analysis. The decrease in the NPL of \$1.0 billion is offset by the net increase in deferred inflows over deferred outflows related to pensions of \$1.0 billion. The net increase in deferred inflows for pensions will be recognized in the NPL in future years. The NPL and deferred outflows and deferred inflows related to pensions are discussed in Note 15 to the financial statements. The increase for the net OPEB liability is primarily due to an increase of \$2.5 billion for changes related to drug coverage for Medicare eligible retirees. It is discussed further in Note 16 to the financial statements.

Business-type Activities

Business-type activities increased the State's net position by \$1.8 billion before transfer of \$1.2 billion to governmental activities, for a net increase of \$576 million in net position. The increase compares to an increase of \$1.6 billion before transfers of \$1.2 billion, for a net increase of \$445 million in net position, in the prior year. Key elements of this increase are as follows:

- Net position of the Maryland Transportation Authority increased by \$321 million compared to an increase of \$310 million in the prior year. Net operating income was \$374 million compared to \$423 million in the prior year.
- The Unemployment Insurance Program net position increased by \$75 million in 2019. Net position increased by \$37 million in 2018. Net operating income was \$36 million compared to the prior year's \$2 million. Charges for services (unemployment taxes) decreased by \$36 million (6.9%) and benefit payments were reduced by \$70 million (13.6%). Both the amount of taxes paid by Maryland employers and the amount of benefits received by the unemployed are products of the economic climate. Federal payments for extended benefits and other programs increased by \$.8 million (8.4%).
- Net position for the Economic Development Loan Programs increased by \$170 million compared to an increase of \$100 million in the prior year. This resulted primarily from activity in the Maryland Water Quality Administration and Housing's State Funded Loan Programs. Net income of the Administration increased by \$97 million compared to an increase of \$76 million in the prior year due primarily to a decrease of \$28 million in bay restoration capital grant disbursements. Net income of the State Funded Loan Programs increased by \$31 million compared to an increase of \$29 million in the prior year for programs related to financing housing opportunities.
- Lottery ticket sales were \$2.2 billion in 2019, an increase of \$154 million or 7.5% from the prior year. In 2019 in Maryland's six casinos, gross video lottery terminal (VLT) and table game revenue was \$1.8 billion, an increase of \$82 million (4.8%) over the prior year. Operating expenses, including cost of sales, increased by \$166 million, or 6.6%, over 2018 largely for an increase of \$109 million in prizes awarded to lottery winners. Transfers to governmental activities by MLGCA were \$1.3 billion in 2019 and 2018.

Financial Analysis of the State's Funds

As of the end of the current fiscal year, the State's governmental funds reported a combined fund balance of \$3.5 billion, an increase of \$1.2 billion from the prior year. The combined fund balance includes a deficit of \$263 million in unassigned for governmental funds, including a deficit of \$19 million for the General Fund, a deficit of \$17 million for the special revenue fund, and a deficit of \$227 million for the other governmental funds. The remainder of the fund balance is nonspendable, restricted, or committed based on the constraints on the specific purposes for which amounts in that fund can be spent. The remainder of the fund balance is 1) unspendable because it is in the form of prepaid items, inventories and long-term loans and notes receivable (\$867 million); 2) restricted by outside parties or to pay debt service on general obligation bonds and transportation bonds from specific taxes (\$224 million); or 3) committed to legislated purposes or encumbered as committed fund balance based on the constraints and approval in place at year end or where appropriate when existing resources are not sufficient to liquidate encumbrances (\$2.7 billion). Included in committed fund balance is \$891 million in the "State Reserve Fund" which is set aside to meet future financial needs in circumstances that are not expected to occur routinely. It is the goal of the State that 10% of estimated General Fund revenues in each fiscal year be retained in the Revenue Stabilization Account of the State Reserve Fund.

General Fund

The General Fund is the major operating fund of the State. At the end of the current fiscal year, the unassigned fund balance deficit of the General Fund was \$19 million, while total fund balance was \$2.7 billion. The fund balance of the State's General Fund increased by \$960 million during 2019, compared to an increase of \$375 million for 2018. Revenues increased by \$2.2 billion (7.3%) to \$32.8 billion while expenditures increased by \$1.5 billion (4.7%) to \$32.4 billion. The increase in total revenue was primarily due to an increase of \$735 million from income taxes, a 6.8% increase from the prior year, resulting largely from an increase in personal income tax collections. The General Fund expenditure increase was primarily for expenditures for health and mental hygiene, which increased by \$812 million (6.0%).

Transfers in to the General Fund were \$1.4 billion in 2019 and 2018. Transfers consisted primarily of \$1.3 billion transferred from MLGCA in 2019. Transfers out from the general fund were \$824 million this year compared to \$640 million for the prior year. This increase was primarily due to increases in transfers to the capital projects fund for Program Open Space and the special revenue fund for its share of income and sales taxes.

Special Revenue Fund

The Maryland Department of Transportation special revenue fund accounts for resources used for operation of the State's transportation activities, not including debt service and pension activities. The fund balance of the Department's special revenue fund was \$249 million as of June 30, 2019, an increase of \$230 million compared to a decrease of \$184 million in the prior fiscal year. Revenues increased by \$292 million (6.9%), expenditures increased by \$30 million (.6%), and other sources of financial resources increased by \$152 million. The increase in revenues was from increases in motor vehicle taxes and federal revenue. The increase in other sources of financial resources was substantially due to an increase in net transfers from the general fund (\$103 million).

Budgetary Highlights

Differences between the original budget and final amended budget, and the final budget and actual expenditures for the year are summarized for the General Fund as follows. The budgetary schedule may be found in the Required Supplementary Information Section.

Overall, the change between the original and final amended general fund budget was an increase of \$3 million, or .0%.

The difference between the final budget, \$18.1 billion, and actual expenditures, \$17.7 billion, was \$366 million, or 2.0%. Of this amount, \$44 million was returned to the general fund, and \$322 million was encumbered for future spending. The variance for the General Assembly (22.1%) is attributable to encumbrances of \$25 million that were retained for building interior maintenance and improvements, critical telecommunications and information technology equipment, and wireless communications on the floor of the Senate and House Chambers. Encumbrances of \$22 million, primarily from Neighborhood Revitalization and Rental Housing Programs, resulted in the variance (49.9%) in the Department of Housing and Community Development. The difference in the Department of Commerce (21.8%) is due to \$23 million in encumbrances for grants and loans. The General Fund variance of \$45 million (15.0%) in Executive and Administrative Control is mainly attributable to encumbrances of \$29 million for University of Maryland Capital Region Medical Center and better than anticipated federal fund participation, specifically from Medicaid.

Significant Differences between Original Budget, Final Budget, and Actual Amounts for the year ended June 30, 2019 (Expressed in Thousands) General Fund

Capital Assets and Debt Administration

Capital assets

As of June 30, 2019, the State had invested \$31.5 billion (net of accumulated depreciation) in a broad range of capital assets (see table below): Depreciation expense for the fiscal year totaled \$1.5 billion (\$1.4 billion for governmental activities and \$163 million for business-type activities). The increase in the State's investment in capital assets, net of depreciation expense, for the current fiscal year was \$474 million (an increase of \$286 million for governmental activities and an increase of \$188 million for business-type activities).

Major capital asset events during the current fiscal year for governmental activities include:

- Continued widening and/or expansion of existing highways and bridges, and various transit, port and motor vehicle administration construction projects
- Preservation of agricultural and open space land through the purchase of easements
- Veterans cemetery improvements
- Improvements to the statewide telecommunications network including One Maryland broadband wiring and high speed data network wiring
- Energy efficiency improvements in State buildings
- Software developments and upgrades for Department of Human Services for the Children Electronic Social Services Information Exchange (CHESSIE) and Client Automated Resources Eligibility System (CARES) projects
- Software development and upgrades for Department of Information Technology for a new enterprise budgeting system
- Construction of a new visitor center, new property acquisitions, and construction and improvements to recreation and park facilities under the Department of Natural Resources
- Building improvements for the Maryland Judiciary and construction of a new District Court facility
- Construction of a new juvenile facility
- Construction and renovations of the Military Department Armories
- Building renovation projects and acquisition of helicopters for the State Police
- Renovation of police and correctional training facilities
- Building improvements at correctional facilities and at the Department of Health
- Continued construction on the Purple Line Transitway light rail project in Montgomery and Prince George's counties

Elements of increases in capital assets of business-type activities include system preservation and restoration of existing transportation facilities managed by the Maryland Transportation Authority and the expansion of the Authority's electronic toll lane project on the JFK Memorial Highway (I-95).

Additional information on the State's capital assets can be found in footnote 10 of this report.

Long-term debt

The State is empowered by law to authorize, issue and sell general obligation bonds, which are backed by the full faith and credit of the State. The State also issues dedicated revenue bonds for the Department of Transportation and various business-type activities. The payment of principal and interest on revenue bonds comes solely from revenues received from the respective activities. This dedicated revenue debt is not backed by the State's full faith and credit.

At June 30, 2019, the State had outstanding bonds, net of related premiums, discounts and adjustments, totaling \$19.4 billion. Of this amount, \$11.0 billion were general obligation bonds, backed by the full faith and credit of the State. The remaining \$8.4 billion were secured solely by the specified revenue sources.

Outstanding Bond Debt as of June 30,												
		(Express	sed i	in Millions)								
Governmental Business-type												
		Activ	ities	S		Activ	ities	3		To	tal	
		2019		2018		2019		2018		2019		2018
General Obligation Bonds (backed by the State)	\$	10,961	\$	10,849					\$	10,961	\$	10,849
Transportation Bonds (backed by specific revenues)		3,681		3,241						3,681		3,241
Revenue bonds (backed by specific revenues)					\$	4,773	\$	4,451		4,773		4,451
Total	\$	14,642	\$	14,090	\$	4,773	\$	4,451	\$	19,416	\$	18,541

The total increase in bonded debt in the current fiscal year was \$875 million (\$112 million increase related to general obligation bonds, \$440 million increase related to transportation bonds, and \$323 million increase related to revenue bonds). The State's general obligation bonds are rated Aaa by Moody's and AAA by Standard and Poors and Fitch. During fiscal year 2019, the State issued general obligation debt totaling \$1.0 billion at a premium of \$175 million.

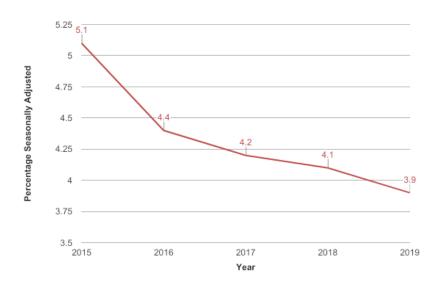

State law limits the amount of Consolidated Transportation Bonds, dedicated revenue debt that may be outstanding as of June 30 to the amount authorized in the budget, and this amount may not exceed \$4.5 billion. The aggregate principal amount of these bonds that was authorized to be outstanding as of June 30, 2019, was \$3.4 billion. The actual par amount in Consolidated Transportation Bonds outstanding was \$3.3 billion.

Additional information on the State's long-term debt can be found in footnote 11 of this report.

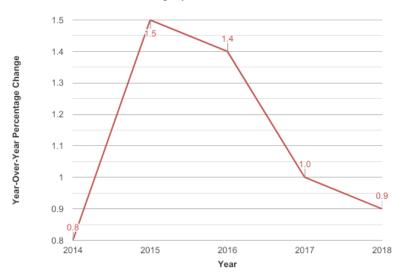

Economic Factors and Next Year's Budget

The forecast of the Maryland economy by the Board of Revenue Estimates is the basis for Maryland's revenue outlook. Employment growth of 0.8% is expected in calendar year 2019 and 0.6% in calendar year 2020. The unemployment rate was 3.8% in June 2019 and has continued a downward trend since 2012. Historical employment growth and the unemployment rate for the past five years are depicted below:

Unemployment Rate Prior 5 Years

Growth in personal income of 3.8% and 3.5% in calendar years 2019 and 2020, respectively, is expected. General fund revenues are estimated to increase by 2.7% in fiscal year 2020.

Maryland's budget in fiscal year 2020 is \$46.6 billion, a 3.9% increase over 2019. The fiscal year 2020 budget conforms to the legislature's Spending Affordability Committee's guidelines. The general fund budget is \$19.4 billion, an 8.4% increase over 2019, and include a projected \$95 million fiscal year 2020 surplus. Reserves are projected to total \$1.3 billion at June 30, 2020.

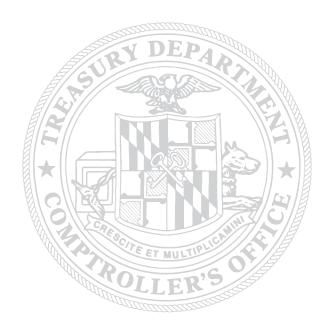

Requests for Information

This financial report is designed to provide a general overview of the State's finances for all those with an interest in the State's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the General Accounting Division, Office of the Comptroller, P.O. Box 746, Annapolis, Maryland, 21404.

Reconciliation of the Statement of Revenues, Expenditures, and Changes in Fund **Balances of Governmental Funds to the Statement of Activities** For the Year Ended June 30, 2019

(Expressed in Thousands) Amounts reported for governmental activities in the Statement of Net Activities (pages 26-27) are different from the amounts reported in the Statement of Revenues, Expenditures, and Changes in Fund Balances, Governmental Funds because of the following: Net change in fund balances - total governmental funds (page 30)

Governmental funds report capital outlays as expenditures. However in the Statement of \$ 1,214,978 Activities, the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which capital outlays exceed depreciation in the current period. Capital outlays \$ 1,850,459 Depreciation expense

The net effect of various miscellaneous transactions involving capital assets (1,365,860)484,599 (i.e., sales, trade-ins, and donations) is to decrease net position. Net loss on disposals and trade-ins (198, 265)Revenues, pension/OPEB related activities, or service concession activities in the Statement of Activities that do not provide or use current financial resources are not reported as revenues or expenditures in the governmental funds. Deferred inflows of resources for taxes are recognized net of revenue already recognized in the prior year 54,016 Deferred inflows of resources for pension/OPEB activities, service concession activities or other revenues are recognized, net of activity already recognized in the prior year 1,336,394 Revenues from deferred outflows of resouces for pension/OPEB activities or service concession activities are recognized, net of activity already recognized in the prior year ______ (1,654,104)(263,694)The issuance of long term debt (e.g. bonds, leases) provides current financial resources to governmental funds, while the repayment of the principal of long term debt consumes current financial resources of governmental funds. Neither transaction, however, has any effect on net position. Also, the governmental funds report the effect of premiums, discounts and similar items when debt is first issued, whereas these amounts are deferred and amortized in the Statement of Activities. This amount is the net effect of these differences in the treatment of long term debt and related items. Debt issued, General Obligation Bonds (1,000,000)Debt issued, Transportation Bonds (630,680)Capital lease financing
Premiums, discounts and deferred outflows of resources on refundings (14,416)6,949 Principal repayments: General Obligation Bonds 872,498 Transportation Bonds 199,410 Capital leases
Some expenses reported in the Statement of Activities (net of expenses already recognized 60,519 (505,720)in the prior year) do not require the use of current financial resources and, therefore, are not reported as expenditures in the governmental funds: Accrued interest (8,586)Compensated absences (25,648)Self-insurance (5,618)Net pension liability 1,002,556 Other post-employment benefits liability (3,614,283)

The accompanying notes to the financial statements are an integral part of this financial statement.

ENTERPRISE FUND FINANCIAL STATEMENTS

Major Funds

Economic Development Loan Programs

This fund includes the direct loan programs of the Maryland Departments of Housing and Community Development, Commerce and Environment.

Unemployment Insurance Program

This fund reflects the transactions, assets, liabilities and net position of the Unemployment Insurance Program and is used to account for the unemployment assessments collected from employers, Federal revenue received and remittance of benefits to the unemployed.

Maryland Lottery and Gaming Control Agency

This fund accounts for the operation of the State Lottery and the regulation of the operation of the Video Lottery Terminal and table game casinos.

Maryland Transportation Authority

This fund accounts for the activity of the Maryland Transportation Authority, which is responsible for the operation and maintenance of toll roads, bridges and tunnels in the State.

Non-Major Funds

Other Enterprise Funds

Individual non-major enterprise funds, namely, the economic development insurance programs of the Department of Housing and Community Development and Maryland Correctional Enterprises, are presented in the combining section following the footnotes.

COMPONENT UNIT FINANCIAL STATEMENTS

Major Component Units

Higher Education

Higher education consists of the University System of Maryland, Morgan State University, St. Mary's College of Maryland, Baltimore City Community College and certain of their foundations. Because the universities and colleges are similar in nature and function, they have been combined and presented as a single component unit. The financial information for certain foundations affiliated with the universities and colleges has not been included in this fund in accordance with GASB Statement No. 14 as amended by GASB Statement No. 39.

Maryland Prepaid College Trust

The Maryland Prepaid College Trust is a program of the Maryland 529 and directed by the Board to provide a means for payment of the cost of tuition and mandatory fees in advance of enrollment at eligible institutions of higher education.

Maryland Stadium Authority

The Maryland Stadium Authority was created as a body corporate and politic and as an independent unit of the Executive Department of the State of Maryland. The Authority's purpose is to acquire land and to construct, operate and/or manage various capital facilities in the State.

Non-Major Component Units

Other Component Units

Non-major component units, namely, the Maryland Environmental Service, Maryland Industrial Development Financing Authority, Maryland Food Center Authority, and Maryland Technology Development Corporation, are presented individually in the combining section following the footnotes.

Notes to the Financial Statements For the Year Ended June 30, 2019

1. Summary of Significant Accounting Policies:

A. Reporting Entity:

The accompanying financial statements include the various departments, agencies, and other organizational units governed by the General Assembly and/or Constitutional Officers of the State of Maryland (State).

As required by accounting principles generally accepted in the United States of America (GAAP), these financial statements present the state government (primary government) and its component units (entities for which the State is considered to be financially accountable). The Governmental Accounting Standards Board (GASB) has set forth criteria to be considered in determining financial accountability to determine the State's reporting entity. These criteria include the State appointing a voting majority of an organization's governing body and (1) the ability of the State to impose its will on that organization, or (2) the potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the State.

Discrete Component Units:

The discretely presented component units are those entities which are legally separate from the State, but are financially accountable to the State, or whose relationships with the State are such that exclusion would cause the State's financial statements to be misleading or incomplete. The Component Units column of the government-wide financial statements includes the financial data of the following major component units. Individual statements are presented for each component unit.

Higher Education (Proprietary Fund Type) – Higher Education consists of the University System of Maryland, Morgan State University, St. Mary's College of Maryland and Baltimore City Community College and their related foundations. Each entity is governed by its own Board of Regents, or Board of Trustees, whose members are appointed by the Governor. The universities and colleges are funded through State appropriations, tuition, federal grants, and private donations and grants. Because the universities and colleges are similar in nature and function, they have been combined and presented as a single discretely presented component unit. Some of the financial information for foundations affiliated with the universities and colleges has not been included with the financial information of the universities and colleges in accordance with the requirements of generally accepted accounting principles.

The Maryland Prepaid College Trust (Proprietary Fund Type) is a program of the Maryland 529 Plans and directed by its Board. The Board consists of five State officials and five members of the public appointed by the Governor. The Maryland Prepaid College Trust provides a means for payment of the cost of tuition and mandatory fees in advance of enrollment at eligible institutions of higher education. If the Trust's contract obligations exceed the market value of Trust assets, State appropriations may be provided.

Maryland Stadium Authority (Proprietary Fund Type) – The Maryland Stadium Authority (Authority) was created as a body corporate and politic, and as an independent unit of the Executive Department of the State. The Authority's purpose is to acquire land and to construct, operate and/or manage various capital facilities in the State. The Authority's Board consists of seven members, of which, six are appointed by the Governor, with the advice and consent of the State Senate, and one whom is appointed by the Mayor of Baltimore City, with the advice and consent of the State Senate. The Maryland State Legislature and the Board of Public Works (consisting of the Governor, Comptroller and Treasurer) have approved all of the projects and bond issuances of the Authority.

The non-major component units are comprised of the following proprietary fund type entities:

The Maryland Food Center Authority (Authority) is a body corporate and politic, the governing board of which is composed of twelve members. Four members are State officials, and eight members are appointed by the Governor. The Authority has statewide jurisdiction to promote the State's welfare by undertaking real estate development and management activities that facilitate the wholesale food industry activity in the public interest. It is subject to State regulations and approvals, and has received State subsidies.

The Maryland Environmental Service (Service) was created as a body corporate and politic, and is governed by a nine-member Board of Directors. The Board of Directors and the officers of the Service are appointed and/or approved by the Governor. The Service helps private industry and local governments manage liquid, solid and hazardous wastes. In accordance with direction from the Governor, the Service plans and establishes major resource recovery facilities, solid waste management plans and hazardous waste management programs.

The Maryland Industrial Development Financing Authority (MIDFA) was established as a body corporate and politic, and is an instrumentality of the State. MIDFA consists of nine members, the Secretary of the Department of Commerce, or his designee; the State Treasurer or the State Comptroller, as designated by the Governor; and seven members appointed by the Governor and confirmed by the Senate. MIDFA is subject to the authority of the Secretary and subject to State finance regulations. It provides financial assistance to enterprises seeking to locate or expand operations in Maryland.

The Maryland Technology Development Corporation (TEDCO) was established as a body corporate and politic, and a public instrumentality of the State. TEDCO's Board of Directors consists of 15 individuals; the Secretary of the Department of Commerce and 14 members appointed by the Governor with the advice and consent of the Senate. Its budget is submitted to and approved by the State, and its major revenue source is State appropriations. TEDCO was created to assist in transferring to the private sector and commercializing the results and products of scientific research and development conducted by the colleges and universities, and to assist in the commercialization of technology developed in the private sector. TEDCO administers the Maryland Technology Incubator Program, the Maryland Stem Cell Research Fund and the Maryland Venture Fund.

Complete financial statements of the individual component units and the Maryland Local Government Investment Pool of the Investment Trust Fund may be requested from the Comptroller of Maryland, LLG Treasury Building, Annapolis, Maryland 21404.

Related Organizations:

The Maryland Economic Development Corporation (MEDCO), Injured Workers' Insurance Fund and the Maryland Automobile Insurance Fund are related organizations of the State. The Governor appoints a majority of the Board of Directors, but the State does not have the ability to impose its will on the organizations, and there is no financial benefit/burden relationship. As of June 30, 2019, the Economic Development Loan Programs, major enterprise funds, had transactions with MEDCO that included loans, investments and grants totaling \$5,533,000.

B. Government-wide and Fund Financial Statements:

The State's government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all non-fiduciary activities of the primary government and its component units. Inter-fund activity has been eliminated from these statements except for certain charges for services between activities that would distort the direct costs and program revenues reported for the applicable functions. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support. Likewise, the primary government is reported separately from certain legally separate component units for which the primary government is financially accountable.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment is offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Expenses reported for functional activities include allocated indirect expenses. Program revenues include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as general revenues.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements as those assets are not available to support government programs. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements.

C. Measurement Focus, Basis of Accounting, and Financial Statement Presentation:

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary fund and fiduciary fund (other than the agency funds) financial statements. The agency funds are reported using the accrual basis of accounting, but have no measurement focus. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the State considers all revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to retirement costs, other post-employment benefits, compensated absences, pollution remediation and claims and judgments, are recorded only when payment is due.

Property taxes, franchise taxes, licenses and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. All other revenue items are considered to be measurable and available only when cash is received by the government.

The State reports the following major governmental funds:

General Fund:

Transactions related to resources obtained and used for those services traditionally provided by a state government, which are not accounted for in other governmental funds, are accounted for in the general fund. These services include, among other items, general government, health and mental hygiene, education (other than higher education institutions), human resources, public safety, judicial, labor, licensing and regulation, natural resources and recreation, housing and community development, environment, agriculture, and commerce. Resources obtained from federal grants and used for general fund activities consistent with applicable legal requirements, are recorded in the general fund.

Special Revenue Fund, Maryland Department of Transportation:

Transactions related to resources obtained, the uses of which are committed for specific purposes, are accounted for in the special revenue fund. The Maryland Department of Transportation special revenue fund accounts for resources used for operations (other than debt service and pension activities) of the Maryland Department of Transportation, including construction or improvement of transportation facilities and mass transit operations. Revenue sources dedicated to transportation operations include the excise taxes on motor vehicle fuel and motor vehicle titles, a portion of the State's corporation income tax and the State's sales tax, wharfage and landing fees, fare box revenues, bond proceeds, federal grants for transportation purposes and other receipts of the Department's agencies.

Enterprise Funds:

Transactions related to commercial types of activities operated by the State are accounted for in the enterprise funds. The enterprise funds differ from governmental funds in that the focus is on the flow of economic resources, which, together with the maintenance of equity, is an important financial indicator.

The major enterprise funds are as follows:

- 1) The Economic Development Loan Programs include the direct loan programs of the Maryland Departments of Housing and Community Development, Commerce and Environment.
- 2) The Unemployment Insurance Program reflects the transactions and account balances of the Unemployment Insurance Program and is used to account for the unemployment taxes collected from employers, federal revenue received and remittance of benefits to the unemployed.
- 3) The Maryland Lottery and Gaming Control Agency operates the State Lottery and regulates the operation of video lottery terminal (VLT) and table game casinos.
- 4) The Maryland Transportation Authority is responsible for the operation and maintenance of toll roads, bridges and tunnels in the State.

Fiduciary Funds:

- 1) The Pension and Other Post-Employment Benefits Trust Funds (Pension and OPEB Trust Funds) include the Maryland State Retirement and Pension System, Maryland Transit Administration Pension Plan, Deferred Compensation Plan and Post-Employment Health Benefits Trust Fund. The Pension Trust Funds reflect the transactions and account balances of the plans administered by the State, and are accounted for using the flow of economic resources measurement focus. The Deferred Compensation Plan, which is reported as of and for its year ended December 31, accounts for participant earnings deferred in accordance with Internal Revenue Code Sections 457, 403(b), 401(a), and 401(k). Amounts deferred are invested and are not subject to Federal income taxes until paid to participants upon termination or retirement from employment, death or for an unforeseeable emergency. The Other Post-Employment Health Benefits Trust Fund (OPEB Trust) accumulates funds to assist the State's Employee and Retiree Health and Welfare Benefits Program finance the State's postretirement health insurance subsidy. The OPEB Trust is administered by the Board of Trustees for the Maryland State Retirement and Pension System, and its transactions and account balances are accounted for using the flow of economic resources measurement focus. The assets of the Pension and OPEB Trusts are not pooled for investment purposes, and each trust's assets may be used only for the payment of benefits to the trust's members in accordance with the terms of the trust.
- 2) The Investment Trust Fund reflects the transactions and account balances of the Maryland Local Government Investment Pool and is accounted for using the flow of economic resources measurement focus.
- 3) The agency funds are custodial in nature, and do not present the results of operations or have a measurement focus. The State uses agency funds to account for the receipt and disbursement of litigants, patient and prisoner accounts, various taxes collected by the State for distribution to political subdivisions and amounts withheld from employee's payroll.

D. New Pronouncements:

GASB statements which have been issued and which affect future periods are the following:

- Statement No. 84, Fiduciary Activities, issued in January 2017, is effective for fiscal years beginning after December 15, 2018.
- Statement No. 87, Leases, issued in June 2017, is effective for fiscal years beginning after December 15, 2019.
- Statement No. 89, Accounting for Interest Cost Incurred before the End of a Construction Period, issued in June 2018, is effective
 for fiscal years beginning after December 15, 2019.
- Statement No. 90, Majority Equity Interests--an amendment of GASB Statements No. 14 and No. 61, issued in August 2018, is effective for fiscal years beginning after December 15, 2018.
- Statement No. 91, Conduit Debt Obligations, issued in May 2019, is effective for fiscal years beginning after December 15, 2020.

The State will implement these statements as of their effective dates. While the State is still in the process of determining the effect of implementing these GASB statements, Statement No. 87 is expected to have a material effect on the financial position of the State.

2. Summary of Significant Accounting Policies- Assets, Deferred Outflows of Resources, Liabilities, Deferred Inflows of Resources and Net Position or Equity:

A. All Funds:

Deposits with Financial Institutions and Investments:

The State Treasurer's Office operates a centralized cash receipt, investment and disbursement function for the majority of the State's funds as required by statute. Certain enterprise activities, pension funds, agency funds and component units are specifically exempt from this function by law. Individual fund equity in pooled invested cash is reported as an asset on the balance sheets of those funds participating in the centralized cash receipt and disbursement function. Investment earnings accrue to those funds reporting equity in pooled invested cash only if the law specifically provides for the fund's accrual of interest earnings.

The State Treasurer's Office invests short-term cash balances on a daily basis primarily in U.S. Government obligations and money market mutual funds. Under the State Finance and Procurement Article of the Annotated Code of Maryland, Title 6, Subtitle 2, the State Treasurer may only invest in the following:

- Any obligation for which the United States Government has pledged its faith and credit for the payment of principal and interest.
- Any obligation that a United States agency issues in accordance with an act of Congress.
- Any obligation unconditionally guaranteed by an eligible supranational issuer.
- Repurchase agreements that any of the above obligations secure.
- Certificates of deposits of Maryland financial institutions.
- Bankers acceptances.
- Money market mutual funds.
- Commercial paper.
- Maryland Local Government Investment Pool.
- Securities Lending Collateral.

In addition, bond sale proceeds may be invested in municipal securities. Collateral must be at least 102% of the book value of the repurchase agreements, and must be delivered to the State Treasurer's custodian for safekeeping. The Maryland Local Government Investment Pool is authorized by Article 95 Section 22G, of the Annotated Code of Maryland to invest in any instrument in which the State Treasurer may invest. Investments are recorded at fair value, except for the following:

- Investments held by the Maryland Local Government Investment Pool, a qualifying investment pool, are measured at amortized cost, which approximates fair value.
- Synthetic guaranteed investment contracts that are fully benefit-responsive are measured at contract value.
- Investments in qualifying external investment pools are measured at amortized cost.

The State categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets. Level 2 inputs are significant other observable inputs. Level 3 inputs are significant unobservable inputs.

Changes in fair value are recognized as revenue. Investments maturing within 90 days of purchase are reported in the financial statements as cash and cash equivalents.

The Maryland State Retirement and Pension System (System), in accordance with State Personnel and Pension Article Section 21-123 of the Annotated Code of Maryland, is permitted to make investments subject to the terms, conditions, limitations and restrictions imposed by the Board of Trustees of the System. The law further provides that no more than 25% of the assets that are invested in common stocks may be invested in non-dividend paying common stocks. In addition, no investment in any one organization may constitute more than 5% of the total assets of the System. The System is authorized by Section 21-116 of the State Personnel and Pensions Article to establish and maintain the investment policy manual, which authorizes investing in all major sectors of the capital market in order to diversify and minimize total investment program risk. Such sectors would include, but are not limited to, common stock, preferred stock, convertible securities, warrants and similar rights of U.S. and non-U.S. companies; private equity – direct/partnership/funds; real estate investment trusts; commingled real estate funds; directly owned real estate; fixed income obligations of the U.S. government and its states and local subdivisions, non-U.S. companies, and supra-national organizations; futures and options; foreign exchange forward and future contracts and options; equity index futures; and equity options.

Investments of the System, the Post-Employment Health Benefits Trust Fund (OPEB Trust) and the Maryland Transit Administration (MTA) Pension Plan are stated at fair value, except that investments in 2a7-like external investment pools are measured at the net asset value per share determined by the pool. The investments of the OPEB Trust and the MTA Pension Plan are held and invested on their behalf by the System and are limited to those allowed for the System. In addition, State employees are offered participation in deferred compensation plans created in accordance with the Internal Revenue Code, Sections 401(a), 401(k), 403(b) and 457. The Board of Trustees of the Maryland Teachers and State Employees Supplemental Retirement Plans (the Plans) is responsible for the implementation, maintenance and administration of the Plans. The Board has appointed a private company as the Plans' administrator. Assets of the Plans are valued at fair value, except for the following:

- Investments in synthetic guaranteed investment contracts that are fully benefit-responsive are measured at contract value.
- Investments in life insurance contracts are measurement at cash surrender value.
- Investments in qualifying external investment pools are measured at amortized cost.

Retirement Costs:

Substantially all State employees participate in one of several State retirement systems (See Note 15). The State also provides retirement benefits to teachers and certain other employees of its political subdivisions. Retirement costs have been provided on the accrual basis, based upon actuarial valuations, except that retirement expenditures for governmental funds represent amounts contributed by the State for the fiscal year.

Other Post-Employment Benefit Costs:

Substantially all State retirees may participate in the various health care plans offered by the State (See Note 16). Post-employment health care costs have been provided on the accrual basis, based upon actuarial valuations, except that other post-employment expenditures for governmental funds represent amounts contributed by the State for the fiscal year.

Accrued Self-Insurance Costs:

The accrued self-insurance costs represent the State's liability for its various self-insurance programs. The State is self-insured for general liability, property and casualty, workers' compensation, environmental and anti-trust liabilities and certain employee health benefits. The State records self-insurance expenses in the proprietary funds and discretely presented component units on an accrual basis and the modified accrual basis for the governmental funds. The long-term accrued self-insurance costs of the governmental funds, which are not expected to be funded with current resources, are reported in the government-wide financial statements.

Annual Leave Costs:

Principally all full-time employees accrue annual leave based on the number of years employed up to a maximum of 25 days per calendar year. Earned annual leave may be accumulated up to a maximum of 75 days as of the end of each calendar year. Accumulated earned but unused annual leave for general government employees is accounted for in the government-wide financial statements. Liabilities for accumulated earned but unused annual leave applicable to proprietary funds and component units are reported in the respective funds.

Capital Assets:

Capital assets, which include property, plant, art and historical treasures, equipment, and infrastructure assets (e.g., roads, bridges, sidewalks, and similar items), are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Infrastructure acquired prior to June 30, 1980, is not reported. Capital assets are defined by the government as assets with an initial, individual cost of more than \$50,000 and an estimated useful life in excess of two years. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets, donated works of art; historical treasures, and similar assets; and capital assets received in a service concession arrangement are recorded at acquisition value. Acquisition value is the price that would be paid to acquire an asset with equivalent service potential in an orderly market transaction at the acquisition date. The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend the assets life are not capitalized. Major outlays for capital assets and improvements are capitalized as projects are constructed.

Capital assets of the primary government, as well as the component units, are depreciated using the straight line method over the following estimated useful lives:

Assets	Years	
Buildings	5-75	
Building improvements	5-75	
Vehicles	3-25	
Office equipment	2-10	
Computer equipment	2-10	
Other machinery and equipment	3-20	
Computer software	5-10	
Infrastructure	10-75	

Deferred Outflows and Deferred Inflows of Resources:

Deferred outflows of resources are consumption of net position that applies to future reporting periods and so will not be recognized as an outflow of resources (expense/expenditure) until then. Deferred outflows of resources are presented separately after "Total Assets" in the State's financial statements.

Deferred inflows of resources are acquisition of net position that applies to future reporting periods and so will not be recognized as an inflow of resources (revenue) until that time. Deferred inflows of resources are presented separately after "Total Liabilities" in the State's financial statements.

Long-term Obligations:

In the government-wide financial statements, and for proprietary fund types in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type statement of net position. Bond premiums and discounts adjust the carrying value of the bonds and are amortized over the life of the bonds. Issuance costs are expensed as incurred.

In the fund financial statements, governmental fund types recognize bond premiums and discounts during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuances costs are reported as debt service expenditures.

Restricted Resources:

When both restricted and unrestricted resources are available for use, it is the State's policy to use restricted resources first, and then unrestricted resources as they are needed.

Debt Refinancing:

The gain or loss associated with debt refinanced is deferred and amortized as interest expense over the shorter of the remaining life of the old debt or the life of the new debt.

Net Position:

Net position is divided into three categories. Net investment in capital assets is the capital assets less accumulated depreciation and outstanding principal of the related debt on the assets. Deferred outflows of resources and deferred inflows of resources that are attributable to the acquisition, construction, or improvement of capital assets or related debt also are included in this category. Restricted net position reflects restrictions on assets and deferred outflows imposed by parties outside the State or imposed by the State by constitutional provisions or enabling legislation, net of related liabilities and deferred inflows. Unrestricted net position is total net position of the State less net investment in capital assets and restricted net position. Unrestricted net position is comprised mainly of cash, investments, loans and receivables.

B. Government Funds:

Inventories and Prepaid Items:

All inventories are valued at cost using the first-in/first-out (FIFO) method. Inventories of governmental funds are recorded as expenditures when consumed rather than when purchased.

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in the fund financial statements under the consumption method.

Grants:

Revenues from federal reimbursement type grants are recognized when the related expenditures are incurred and the revenues are both measurable and available. The State considers all grant revenues to be available if they are collected within 60 days of the current fiscal period. Distributions of food stamp benefits are recognized as revenues and expenditures when the benefits are distributed to individual recipients.

Income Taxes:

The State accrues the net income tax receivable or records unearned revenue based on estimated income tax revenues and refunds due relating to the fiscal year, that will not be collected or paid until after the fiscal year end. This accrual is computed based on projected calendar year net tax collections, tax laws in effect, future projections and historical experience.

Sales and Use Taxes:

The State accrues June sales taxes that are not remitted at year end as a receivable. These taxes are considered measurable and available since they represent June collections that are remitted to the State in July by merchants who collect the related sales tax.

Property Taxes:

The State levies an annual tax for the fiscal year beginning July 1 and ending June 30 on all real property subject to taxation, due and payable each July 1 and December 1 (lien dates), based on assessed values as of the previous January 1, established by the State Department of Assessments and Taxation at 100% of estimated market value. Each of the counties, Baltimore City and incorporated municipalities establish rates and levy their own tax on such assessed values. The State tax rate in fiscal year 2019 was 11.2¢ per \$100 of assessed value. Unpaid property taxes are considered in arrears on October 1 and January 1, respectively, and penalty and interest of 1% is assessed for each month or fraction of a month that the taxes remain unpaid. Property taxes are accrued to the extent they are collected within 60 days of year end.

Escheat Property:

Escheat property is property that reverts to the State's general fund in the absence of legal claimants or heirs. The escheat activity is reported in the general fund. An asset is recognized in the period when the legal claim to the assets arises or when the resources are received, whichever occurs first, and a liability is recognized for the estimated amount that ultimately will be reclaimed and paid.

Intergovernmental Expenditures:

General, special revenue and capital projects fund revenues paid to political subdivisions, and bond proceeds granted to political subdivisions, are recorded as intergovernmental expenditures if such payments do not require mandatory use for specific functions. Direct grants and other payments to, or on behalf of, political subdivisions are recorded as current expenditures.

Capital Assets:

Expenditures for capital assets are reported as capital outlays in the governmental funds.

Compensated Absences:

It is the State's policy to permit employees to accumulate earned but unused vacation and sick pay benefits. There is no liability for unpaid accumulated sick leave since the State does not have a policy to pay any amounts when employees separate from service with the government. A liability for vacation pay amounts is reported in governmental funds only if they have matured, for example, as a result of employee resignations and retirements.

Fund Equity:

Fund balance for governmental funds is reported in categories and classifications that are presented in order of constraints on the specific purposes for which amounts in that fund can be spent. The non-spendable fund balance represents amounts that cannot be spent because they are either (a) not in spendable form or (b) legally or contractually required to be maintained intact. Otherwise, fund balance is classified as restricted, committed, assigned, or unassigned. Amounts are reported as restricted when spending constraints are (a) externally imposed or (b) imposed by the government by constitutional provisions or enabling legislation. The committed fund balance includes amounts committed for specific purposes by formal action of the government's highest level of decision-making authority. In Maryland, the uses of these funds are established in statute after appropriate action by the General Assembly and the Governor. The assigned fund balance is intended spending expressed by (a) the governing body or (b) a body or official to which the governing body has delegated the authority to assign amounts. The Governor is authorized to assign current year funds for appropriation in the subsequent year's budget pursuant to budgetary policies adopted by the General Assembly. The unassigned fund balance is the residual classification for the general fund.

Encumbrances are commitments related to unperformed contracts for goods or services. The State utilizes encumbrance accounting as part of the budgetary integration for the general, special revenue, and capital projects funds. Certain amounts which were available for specific purposes have been encumbered as either restricted, committed or assigned fund balance depending on the constraints and approval in place at year end. In addition, where existing resources are not sufficient to liquidate encumbrances, the encumbrances are reported within committed or assigned fund balance, as appropriate. Encumbrances outstanding at year-end are reported as committed fund balance in the general, special revenue, and capital projects funds. Encumbrances are not displayed on the face of the financial statements but are disclosed in Note 17.

When an expenditure is incurred for purposes for which both restricted and unrestricted fund balance is available, the State considers restricted resources to have been spent first. When an expenditure is incurred for purposes for which committed, assigned, or unassigned fund balance is available, the State considers committed, assigned, and unassigned amounts to have been spent in that order.

C. Enterprise Funds, Fiduciary Funds and Component Units:

Basis of Accounting:

The accounts of the enterprise funds, fiduciary funds and component units are maintained and reported using the accrual basis of accounting. Under this method, revenues are recorded when earned and expenses are recorded at the time liabilities are incurred.

Enterprise funds and component units distinguish operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. Operating expenses include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

Cash and Cash Equivalents:

The enterprise funds consider all highly liquid investments that mature within 90 days of purchase to be cash and cash equivalents for reporting on the statement of cash flows.

Grants:

Revenues from federal reimbursement type-grants are recorded when the related expenses are incurred.

Capital Assets:

Capital assets are stated at cost. Depreciation of the cost of capital assets is provided on the straight-line basis over estimated useful lives of 5 to 75 years for depreciable real property and building improvements, and 2 to 20 years for equipment. Construction period interest is capitalized. Repairs and maintenance are charged to operations in the period incurred. Replacements, additions and betterments are capitalized.

MLGCA Revenues, Prizes and Related Transfers:

Revenues and prizes of the Maryland Lottery and Gaming Control Agency (MLGCA) are primarily recognized when drawings are held. Certain prizes are payable in deferred installments. Such liabilities are recorded at the present value of amounts payable in the future. State law requires the MLGCA to transfer to the State revenues in excess of amounts allocated to prize awards, operating expenses and capital expenditures. The excess revenues from certain select games are transferred to the State's general fund, which then transfers the amounts to the Maryland Stadium Authority for operations and to cover the State's capital lease payments to the Maryland Stadium Authority.

Video lottery terminals (VLTs) are a self-activated video version of lottery games. The MLGCA recognizes VLT revenue as gross terminal revenue equivalent to all wagers, net of related prizes. The casino operators' share is recorded as commissions and bonuses. The six casino operators receive between 39% and 60% of the gross terminal revenue to operate their casinos. After deducting operating costs, State law requires the MLGCA to transfer the remainder of the gross terminal revenue to various general fund agencies, which are responsible for making further distributions.

The casinos also operate table games. Table games include blackjack, roulette, craps and various poker games, among others. Table game revenue is equivalent to all wagers, net of related prizes. Casino operators receive 80% of the table game revenue to operate their casinos and these costs are recorded as commissions. The remainder is remitted to the MLGCA which transfers 15% to public education programs in the general fund and 5% to local jurisdictions in accordance with the enabling legislation.

Provisions for Insurance and Loan Losses:

Current provisions are made for estimated losses resulting from insuring loans and uncollectible loans. Loss provisions are based on the current status of insured and direct loans, including delinquencies, economic conditions, loss experience, estimated value of collateral and other factors which may affect their realization.

Inventories:

Inventories of supplies are stated at cost.

3. Deposits with Financial Institutions and the U.S. Treasury, Equity in Pooled Invested Cash and Investments:

Cash and cash equivalents, equity in pooled invested cash and investments as shown on the basic financial statements as of June 30, 2019, reconcile to cash deposit and investment disclosures as follows (amounts expressed in thousands):

Government-wide statement of net position:	_
Cash	\$ 820,870
Equity in pooled invested cash	6,060,599
Investments	3,796,778
Restricted cash	2,426,504
Restricted equity in pooled invested cash	198,132
Restricted investments	1,416,454
Statement of fiduciary net position:	
Cash	1,771,152
Equity in pooled invested cash	1,359,662
Investments	62,383,455
Collateral for lent securities	4,483,334
Total cash and investments per basic financial statements Less: Cash and investments of higher education foundations not subject to disclosure	84,716,938
Less: Cash and investments of higher education foundations not subject to disclosure	1,642,581
Total cash and investments per Note 3	\$ 83,074,357
Cash deposit:	
Governmental funds	\$ 455,366
Enterprise funds	1,382,000
Fiduciary funds	224,440
Component units	109,204
Investments:	
Governmental funds	7,943,298
Enterprise funds	2,348,129
Fiduciary funds	68,413,501
Component units	2,198,419
Total cash deposits and investments	\$ 83,074,357

Cash and equity in pooled invested cash for financial statement presentation includes short-term investments maturing within 90 days of purchase. Investments for financial statement presentation include certificates of deposit maturing 90 days or more from date of purchase.

A. Cash Deposits:

As of June 30, 2019, the carrying value for the bank deposits of the governmental funds, enterprise funds, fiduciary funds and component units were \$455,366,000, \$1,382,000,000, \$224,440,000, and \$109,204,000, respectively. The bank balances were \$455,366,000, \$1,389,635,000, \$224,440,000, and \$111,492,000, respectively.

Custodial Risk. Custodial credit risk is the risk that, in the event of a bank failure, the government's deposits may not be returned. Deposits are exposed to custodial credit risk if they are not covered by depository insurance and the deposits are (a) uncollateralized, (b) collateralized with securities held by the pledging financial institution, or (c) collateralized with securities held by the pledging financial institution's trust department or agent but not in the government's name. State law permits the Treasurer to deposit in a financial institution in the State, unexpended or surplus money in which the Treasurer has custody if (a) the deposit is interest-bearing; (b) the financial institution provides collateral that has a market value that exceeds the amount by which a deposit exceeds the deposit insurance; and (c) a custodian holds the collateral.

The Economic Development Loan Programs and higher education component unit do not have a deposit policy for custodial credit risk. As of June 30, 2019, \$1,268,000, and \$27,984,000, respectively, of their bank balances were exposed to custodial credit risk as uninsured and uncollateralized.

B. Investments:

The State discloses investment risks as follows:

Interest Rate Risk. Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment.

Credit Risk. Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations.

Concentration of Credit Risk. Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer.

Custodial Credit Risk. Custodial credit risk is the risk that, in the event of the failure of the counterparty, the government will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the government and are held by either (a) the counterparty or (b) the counterparty's trust department or agent but not in the government's name.

Foreign Currency Risk. Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment.

1. Investments-Governmental Funds:

The State Treasurer's Office is authorized to make investments as stated in Note 2.A.

The governmental funds investments' fair value measurements and the valuation techniques used to categorize the investments in the hierarchy level as of June 30, 2019, are as follows:

- U.S. agency securities (\$4,252,447,000) are comprised of agency issued debt. Agency issued debt securities are valued at the closing price reported in the active market in which the individual security is traded as Level 1 securities.
- Supranationals (\$1,288,172,000) are comprised of international development institutions that provide financing for economic development. Supranational issued debt securities are valued by consensus of international financial institutions based on observable inputs as Level 2 securities.
- Repurchase agreements (\$1,765,957,000) are valued based on a model that incorporates market observable pricing information and are categorized as Level 2.
- Treasury Notes (\$24,936,000) are valued at the closing price reported in the active market in which the individual security is traded as Level 1 securities.
- Investment in the Local Government Investment Pool (\$561,471,000) and money market mutual funds (\$50,314,000) are valued at amortized cost.

The investments and maturities as of June 30, 2019, for the governmental funds of the primary government were as follows (amounts expressed in thousands):

				Invest	ment Maturities (in Years)							
Investment Type	F	Fair Value		ess than 1		1-3		re than 3				
U.S. Agencies (a)	\$	4,252,447	\$	314,947	\$	3,884,454 ^(a)	\$	53,046 ^(b)				
Supranationals		1,288,172		49,838		1,188,282 (c)		50,052 ^(d)				
Repurchase Agreements		1,765,957		1,719,122		8,687		38,148				
Treasury Notes		24,936		24,936								
Money Market Mutual Funds		50,314		50,314								
Local Government Investment Pool		561,471		561,471								
Total Investments	\$	7,943,297	\$	2,720,628	\$	5,081,423	\$	141,246				

- (a) Bonds in the amount of \$3,462,619,000, mature August 2020 to June 2022, but are callable July 2019 to June 2020.
- (b) Bonds in the amount of \$50,031,000, mature April 2023, but are callable April 2020.
- (c) Bonds in the amount of \$567,252,000, mature November 2020 to November 2021, but are callable September 2019 to November 2019.
- (d) Bonds in the amount of \$50,052,000, mature February 2023, but are callable February 2020.

Interest Rate Risk. The State Treasurer's Office's investment policy states that to the extent possible, it will attempt to match its investments with anticipated cash flow requirements. Unless matched to a specific cash flow, the Treasurer's Office will not directly invest in securities maturing more than five years from the date of purchase. Sinking fund investments with guaranteed earnings to redeem term bonds beginning in fiscal year 2020 were \$46,835,000.

Credit Risk. State law requires that the governmental funds' repurchase agreements be collateralized by U.S. Treasury and agency obligations. In addition, investments are made directly in U.S. agency obligations. Obligations of the Federal National Mortgage Association, Federal Farm Credit Bank, Federal Home Loan Mortgage Corporation and Tennessee Valley Authority are rated Aaa by Moody's, AA by Standard & Poor's, and AAA by Fitch. Obligations of the Federal Home Loan Bank are rated Aaa by Moody's and AA by Standard & Poor's. Obligations of the Federal Agricultural Mortgage Corporation and Overseas Private Investment Corporation are not rated.

Supranational obligations are required to be rated in the highest credit rating category by a nationally recognized statistical rating organization. World Bank bonds and African Development Bank bonds are rated Aaa by Moody's and AAA by Standard & Poor's and Fitch. Asian Development Bank bonds are Aaa by Moody's and AAA by Standard & Poor's.

The Local Government Investment Pool is rated AAAm by Standard & Poor's. Money market mutual funds are not rated.

Concentration of Credit Risk. The State Treasurer's Office's investment policy limits the amount of repurchase agreements to be invested with a particular institution to 30% of the portfolio. There is no other limit on the amount that may be invested in any one issuer. More than 5% of the governmental funds' investments are in the Federal Home Loan Mortgage Corporation, Federal National Mortgage Association, International Bank for Reconstruction and Development, and Federal Home Loan Bank. These investments are 37.3%, 18.2%, 9.4% and 7.5% of the governmental funds' total investments, respectively.

2. Investments – Enterprise Funds:

The enterprise funds' bond indentures and investment policies, with the exception of the Economic Development Loan Programs, authorize the investment of assets related to the indentures and other funds in obligations in which the State Treasurer may invest. The Economic Development Loan Programs are authorized to invest in obligations of the U.S. Treasury, U.S. government agencies, obligations of U.S. political subdivisions, bankers acceptances, commercial paper, repurchase agreements, guaranteed investment contracts, corporate debt securities and mutual funds in accordance with bond indentures, and in direct equity investments in accordance with the statute establishing the program.

The investments and maturities as of June 30, 2019, for the enterprise funds of the primary government were as follows (amounts expressed in thousands):

			Investment Maturities (in Years)										
Investment Type	Fair V	alue	Le	ess than 1		1-5		6-10		11-15	Moı	re than 15	
U.S. Treasury obligations	\$ 5	40,716	\$	41,572	\$	30,912	\$	9,486			\$	458,746	
U.S. Government agency obligations	5	78,136		102,950		215,579			\$	6,876		252,731	
Repurchase agreements		2,408								2,408			
Guaranteed investment contracts		2,980						2,980					
Money market mutual funds	1,0	19,234		1,019,234									
Municipal bonds		61,175		16,568		44,607							
Supranationals		85,433		14,942		70,491							
Total	\$ 2,2	90,082	\$	1,195,266	\$	361,589	\$	12,466	\$	9,284	\$	711,477	

In addition to the investments scheduled above, as of June 30, 2019, the enterprise funds' investments also include the fair value of direct equity investments, \$20,081,000.

The MLGCA, a major enterprise fund, invests in U.S. Treasury obligations and annuity contracts that provide for guaranteed payouts to jackpot prize winners, and therefore have no interest rate risk to the MLGCA. As of June 30, 2019, the fair value of these investments was \$37,916,000, and \$50,000, respectively.

The enterprise funds have the following fair value measurements as of June 30, 2019 (amounts expressed in thousands):

				Fair Va	alue	Measurements	Usi	ng
			_	Quoted Prices				
				in Active		Significant		
				Markets for		Other		Significant
				Identical		Observable	J	Inobservable
				Assets		Inputs		Inputs
Investments by Fair Value Level		Total		(Level 1)		(Level 2)		(Level 3)
<u>Debt securities</u>								
U.S. Treasury Obligations	\$	578,632	\$	241,152	\$	337,480		
U.S. Government agency obligations		578,136		486,690		91,446		
Guaranteed investment contracts		2,980				2,980		
Municipal bonds		61,175		61,175				
Supranationals		85,433		85,433				
Total debt securities		1,306,356		874,450		431,906		
Equity securities								
Direct equity investments		20,081					\$	20,081
Total equity securities		20,081						20,081
Total investments by fair value level		1,326,437	_\$	874,450	\$	431,906	\$	20,081
Investments measured at contract value								
Annuity contracts	_	50						
Investment agreements		2,408						
Investments measured at amortized cost	_							
Money market mutual funds		1,019,234	_					
Total investments	\$	2,348,129	=					

- Level 1 investments are valued at the closing price reported in the active market in which the individual security is traded. Supranational issued debt securities (\$85,433,000) are valued by consensus of international financial institutions based on observable inputs.
- Level 2 investments are valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. GNMA direct U.S. Government obligations (\$337,480,000) and FNMA U.S. Government agency obligations (\$91,446,000) are valued using the matrix pricing technique.
- Direct equity investments classified as Level 3 are assessed by management for impairment based on financial condition, operating results and other factors on an annual basis.

Investments measured at net asset value per share (or its equivalent) are not material for reporting redemption frequency and notice period.

Interest Rate Risk. The enterprise funds' policy for managing their exposure to fair value loss arising from increasing interest rates is to manage investment maturities so that they precede or coincide with the expected need for funds.

Credit Risk. The investment policies of the enterprise funds require that repurchase agreements are collateralized by U.S. Treasury and agency obligations. The policies also require that money market mutual funds contain only U.S. Treasuries or agencies or repurchase agreements secured by these, or that they receive the highest possible rating from at least one nationally recognized securities rating organization and that commercial paper be rated A-1, P-1. According to the indenture and investment policy of the Economic Development Loan Programs, investments must be rated no lower than the rating on the Loan Programs' bonds or F1/P1 for the issuer's short-term accounts or securities. The ratings on the Loan Programs' bonds as of June 30, 2019, were Aa by Moody's and AA by Fitch, or higher.

As of June 30, 2019, the enterprise funds had the following investments and quality ratings (amounts expressed in thousands):

					Percentage
				Rating	of Total
Investment Type	I	Fair Value	Quality Rating	Organization	Investments
U.S. government agency obligations	\$	326,095	Aaa	Moody's	13.89%
U.S. government agency obligation		228,410	AA	S&P	9.73
Money market mutual funds		1,019,234	AAAm/Aaa	S&P/Moody's	43.41
Money market mutual funds			Unrated		0.00
Guaranteed investment contracts		2,980	Aaa	Moody's	0.13
Municipal bonds		61,175	AAA	S&P	2.61
Supranationals		85,433	AAA	S&P	3.64
Total	\$	1,723,327			73.39%

Concentration of Credit Risk. The enterprise funds place no limit on the amount they may invest in any one issuer of U.S. government agency obligations. More than 5% of the enterprise funds' investments are in obligations of the Federal Home Loan Bank and Federal National Mortgage Association. These investments are 7.2% and 6.5%, of the enterprise funds' total investments, respectively.

3. Investments – Fiduciary Funds:

The Pension Trust Funds, Post-Employment Health Benefits Trust Fund, and Maryland Local Government Investment Pool are authorized to make investments as stated in Note 2.A.

The investments and maturities as of June 30, 2019, for the fiduciary funds of the primary government were as follows (amounts expressed in thousands):

		Investment Maturities (in Years)					
Investment Type	Fair Value	Less Than 1	1-5	6-10	More than 10		
U.S. Treasury notes and bonds	\$ 6,951,995	\$ 758,998	\$ 1,033,015	\$ 1,349,930	\$ 3,810,052

Debt and equity securities classified in Level 1 of the fair value hierarchy are valued using prices quoted in active markets for those securities.

Level 2 investments include the following:

- Debt securities valued using a combination of prevailing market prices and interest payments that are discounted at prevailing interest rates for similar instruments.
- Mortgage-backed securities issued as U.S. agency securities categorized as mortgage pass-through. Mortgage pass-through includes to-be-announced (TBA) securities and mortgage pass-through certificates. TBA securities and mortgage pass-through is generally valued on the basis of their fortune principal and interest payments discounted at prevailing interest rates for similar investments.
- Collateral for lent securities invested in the lending agent's short term investment pool operating as an open-end money market mutual fund, together with the related obligation.
- Commingled investments whose valuation methodology and valuation frequency of the pooled investment vehicles may not be able to appraise whether the net asset value represents the exit value of the fund.

Level 3 investments include the following:

Commercial and residential mortgage-backed securities valued using discounted cash flow techniques.

Real estate valued on the basis of a discounted cash flow approach, which includes the future rental receipts, expenses, and residual values as the highest and best use of the real estate from a market participant view as rental property.

The valuation method for investments measured at net asset value per share (or its equivalent) is presented on the following table (in millions):

June 30	, 2019			
	Unfunded		Redemption	Redemption
	Fair Value	Commitments	Frequency	Notice Period

Interest Rate Risk. As of June 30, 2019, the System had \$1.2 billion invested in mortgage pass-through securities. These investments are moderately sensitive to changes in interest rates because they are backed by mortgage loans in which the borrowers have the option of prepaying.

The Deferred Compensation Plans (Plans) invest in annuity contracts and insurance contracts that provide for guaranteed payouts to participants, and therefore have no interest rate risk to the Plans. As of June 30, 2019, the carrying value of these investments was \$67,705,000, and \$2,926,000, respectively.

The State Treasurer's Office manages the Local Government Investment Pool. The State Treasurer's investment policies state that no direct investment by the Pool may have a maturity date of more than 13 months after its acquisition.

Credit Risk. The investment policy of the System regarding credit risk is determined by each investment manager's mandate. The Local Government Investment Pool may invest in bankers acceptances and commercial paper subject to certain credit rating guarantee and/or collateral requirements. As of June 30, 2019, the fiduciary funds' investments were rated by Standard and Poor's and/or an equivalent national rating organization, and the ratings are presented below using the Standard and Poor's rating scale (amounts expressed in thousands):

Investment Type	Fair Value		of Total

⁽¹⁾ This line includes American Depository Receipts and international obligations valued in U.S. dollars; however, they are considered to have exposure to multiple foreign currencies.

Derivatives:

Each System investment manager's guidelines determine the extent to which derivatives are permissible. Futures and other derivatives are permitted to the extent that they are used in a manner that does not materially increase total portfolio volatility or relate to speculative activities. Unleveraged derivatives are permitted for the purpose of hedging investment risk, to replicate an investment that would otherwise be made directly in the cash market or to modify asset exposure in tactical portfolio shifts. Use of derivatives is not permitted to materially alter the characteristics, including the investment risk, of each manager's account. The investment managers are to have in place, and use, procedures that subject derivative based strategies to rigorous scenario and volatility analysis. Futures and short option positions must be hedged with cash, cash equivalents or current portfolio security holdings.

^{*}Notional may be a dollar amount or size of underlying for futures and options, negative values refer to short positions.

Credit Risk.

The System is exposed to credit risk on derivative instruments that are in asset positions. To minimize its exposure to losses related to credit risk, the investment managers use counterparty collateral in their non-exchange-traded derivative instruments. Netting arrangements are also used when entering into more than one derivative instrument transaction with a counterparty. At the present time, the System does not have a formal policy relating to counterparty collateral or netting arrangements.

The aggregate fair value of derivative instruments in asset positions as of June 30, 2019, was \$174,850,000. This represents the maximum loss that would be recognized at the reporting date if all counterparties failed to perform. The maximum loss would, however, be reduced by the counterparty collateral and the liabilities included in netting arrangements with counterparties.

The following tables list the fair value of credit exposure per ratings of Standard & Poor's (S&P), Moody's and Fitch for the counterparties (amounts expressed in thousands):

Fair Value	S&P Rating	Fair Value Moody's Rating		1	Fair Value	Fitch Rating
\$ 55,082	AA	\$ 61,956	Aa	\$	118,295	AA

4. Investments – Component Units:

Investment accounts established by higher education institutions relate principally to endowments and trust accounts required by debt instruments and are invested in accordance with the investment policies adopted by the Board of Trustees. In general, endowment resources can be invested in debt and equity securities, and trust accounts can be invested only in debt securities. These investments include U.S. Treasury and agency obligations, corporate debt and equity securities, asset-backed securities and mutual funds that invest in government securities. The investments of the higher education foundations are not included in the disclosures below because the foundations are not required to and do not follow statements of GASB.

One of the institutions, the University System of Maryland, transferred title to its endowment investments to its foundation in exchange for an equivalent proportionate interest in the long-term investment portfolio managed by the foundation. In June 2011, the institution entered into a new agreement with the foundation. The agreement is for a term of five years, with renewable two-year extensions at the option of the institution, unless notice of intent to terminate the arrangement is provided prior to the expiration of the term. If the agreement is terminated, funds invested with individual investment managers that have commitments from the foundation to maintain investments for certain minimum time periods may not be returned to the institution until those constraints have been satisfied. For reporting purposes, the foundation's investments have been reduced by the amount of the institution's investments with the foundation.

The Maryland Prepaid College Trust's Statement of Investment Policy (Investment Policy), adopted by the Board as required by the enabling legislation, allows the Trust to purchase investments including domestic, international and private equities; domestic, foreign and high yield bonds; global real estate equities; private real estate; commodities and other governmental agency instruments, as well as money market deposits based on the Investment Policy's specified portfolio allocation.

The investments and maturities as of June 30, 2019, for the component units were as follows (amounts expressed in thousands):

		Investment Maturities (in Years)										
											M	ore than
Investment Type	F	air Value	L	ess than 1		1-5		6-10		11-15		15

Investments measured at net asset value					
Corporate debt securities	56,331				
Real estate	110,212	_			
Total investments measured at NAV	166,543	_			
Total investments	\$ 2,198,419	_			

Debt and equity securities classified in Level 1 of the fair value hierarchy are valued using prices quoted in active markets for those securities.

Corporate bonds are categorized as Level 2 investments based on yields currently available on comparable securities of issuers with similar credit ratings. The share of the University System of Maryland's (USM) investment in the open-end mutual fund investment of the USM Foundation, Inc is considered a common trust fund whose valuation methodology and valuation frequency of the pooled investment vehicles may not be able to appraise whether the net asset value represents the exit value of the fund and is classified as Level 2.

Level 3 investments include the investments in not publicly traded, privately-held companies and venture capital partnerships which are valued by management after consideration of, among other factors, the financial condition, operating results, significant recent events, and other security offerings of the investors. Also, interest in private real estate is valued based on discounted cash flows, including future rental receipts, expenses, and residual values as the highest and best use of the real estate from a market participant view as rental property as a Level 3 investment.

Investments measured at net asset value per share (or its equivalent) are not material for reporting redemption frequency and notice period.

Interest Rate Risk. The policy of the higher education institutions for managing their exposure to fair value loss arising from increasing interest rates is to comply with their investment policy, which sets maximum maturities for various fixed income securities. It is the practice of the Maryland Prepaid College Trust to have no investments with maturities longer than required to fund tuition obligations based on actuarial projections.

Credit Risk. The policy of the higher education institutions for reducing their exposure to credit risk is to require minimum quality ratings for fixed income securities. The Investment Policy of the Maryland Prepaid College Trust details the minimum quality standards for the Trust's bond portfolios.

As of June 30, 2019, the component units had the following investments and quality ratings (amounts expressed in thousands):

			Rating	Percentage of
Investment Type	Fair Value	Quality Rating	Organization	Total Investments
U.S. agencies	\$ 6,990	AAA/Aaa	S&P & Moody's	0.32%
U.S. agencies	176	AA/Aaa	S&P & Moody's	0.01
U.S. agencies	5,347	Not rated		0.24
Money market mutual funds	613,805	Aaa	Moody's	27.92
Corporate debt securities	66,984	AAA	S&P	3.05
Corporate debt securities	2,995	AA	S&P	0.14
Corporate debt securities	22,330	A	S&P	1.02
Corporate debt securities	11,920	BBB	S&P	0.54
Corporate debt securities	7	Not rated		0.00
Total	\$ 730,554			32.92%

Concentration of Credit Risk. The higher education component units place no limit on the amount they may invest in U.S. government issuers. The Prepaid College Trust's guidelines limit a single investment to 5% of each bond portfolio's market value, except U.S. Treasury notes and bonds.

In addition to the Maryland Prepaid College Trust, the Maryland 529 Plans consist of the Maryland Senator Edward J. Kasemeyer College Investment Plan, a fiduciary component unit. As of June 30, 2019, the Plan has \$6,324,555,000 of investments held in trust for individuals and organizations.

C. Securities Lending Transactions:

Fiduciary Funds:

The Pension Trust Funds (Funds) participate in a securities lending program as permitted by the investment policies as approved by the Board of Trustees. The Fund's custodian lends specified securities to independent brokers in return for collateral of greater value. The preceding Investments-Fiduciary Funds Schedule in Note 3.B.3 includes securities lent at year-end for cash collateral and collateral received from lent securities.

Borrowing brokers must transfer in the form of cash or other securities, collateral valued at a minimum of 102% of the fair value of domestic securities and international fixed income securities, or 105% of the fair value of international equity securities on loan. Collateral is marked to market daily. If the fair value of the pledged collateral falls below the specified levels, additional collateral is required to be pledged by the close of the next business day. In the event of default by a borrowing broker, the Funds' custodial bank is obligated to indemnify the Funds if, and to the extent that, the fair value of collateral is insufficient to replace the lent securities. The Funds have not experienced any loss due to credit or interest rate risk on securities lending activity since inception of the program. As of June 30, 2019, the Funds had no credit risk exposure to borrowers because the fair value of collateral held for securities lent exceeded the fair value of the related securities, as follows (amounts expressed in thousands):

		Fair V		
		Lent	Collateral	Percent
	5	Securities	Received	Collateralized
Lent for cash collateral:				_
U.S. government and agency securities	\$	1,826,567	\$ 1,857,314	101.68%
U.S. corporate bond and equity securities		1,370,770	1,399,332	102.08
International fixed income securities		5,026	5,124	101.95
International equities		79,468	73,940	93.04
Lent for noncash collateral:				
U.S. corporate bond and equity securities		1,097,432	1,120,050	102.06
International equities		26,260	27,574	105.00
Total securities lent	\$	4,405,523	\$ 4,483,334	101.77%

During fiscal year 2019, the Funds maintained the right to terminate securities lending transactions upon notice. Cash collateral is invested in one of the lending agent's short-term investment pools, which as of June 30, 2019, had an average duration of 4.06 days. Because the relationship between the maturities of the investment pools and the Fund's security loans is affected by the maturities of the loans made by other entities that use the agent's pools, the Funds cannot match maturities. The Funds have received cash or securities that can be sold or pledged without a borrower default.

4. Receivables:

Taxes receivable, as of June 30, 2019, consisted of the following (amounts expressed in thousands):

	Major Govern	ment	tal Funds				
					Non-Major		Total
			Special	(Governmental	(Governmental
	General		Revenue	Funds			Funds
Income taxes	\$ 915,060					\$	915,060

motor vehicle fuel and excise		\$	189,149				189,149
Other taxes, principally alcohol, tobacco and property	33,077			\$	26,744		59,821
Less: Allowance for uncollectibles	 41,871						41,871
Taxes receivable, net	\$ 1,410,198	\$	189,149	\$	26,744	\$	1,626,092

Tax revenues are reported net of uncollectible amounts. Total uncollectible amounts related to tax revenues of the current period were \$5,526,000.

Other accounts receivable in the governmental funds of \$721,636,000, including \$108,701,000, due in excess of one year, consisted of various miscellaneous receivables for transportation costs, collection of bills owed to the State's collection unit, Medicaid reimbursements, child support and public assistance overpayments and the tobacco settlement.

Other accounts receivable for the enterprise funds of \$295,474,000, primarily consisted of \$134,824,000, due to the Unemployment Insurance Program from employers and for benefit overpayments, \$36,169,000, due to the Community Development Administration from accrued interest and claims receivable on foreclosed and other loans and \$67,902,000, due to the Maryland Lottery and Gaming Control Agency from lottery retailers for ticket sale proceeds and from casino operators for gross terminal revenue and table game revenue.

5. Deferred Outflows of Resources and Deferred Inflows of Resources:

Deferred outflows of resources and deferred inflows of resources are reported when a given item that otherwise meets the definition of a revenue or expenditure/expense relates to a future period. These deferred amounts apply to governmental activities, business-type activities, proprietary funds, and fiduciary funds, except that deferred inflows apply to governmental funds for revenues that are not considered to be available to liquidate liabilities of the current period.

As of June 30, 2019, the State's deferred outflows of resources and deferred inflows of resources consist of the following components (amounts expressed in thousands):

	Governme	ntal F	unds						
	General		Special	Go	vernmental	I	Business-	(Component
	Fund	Rev	enue Fund	1	Activities	Typ	e Activities		Units
Deferred Outflows of Resources:									
Loss on refunding of debt – Refunding									
of some previously outstanding general obligation									
bonds									
and revenue bonds resulted in losses				\$	250,042	\$	893	\$	15,916
Pension-related deferred outflows (see Note 15)					2,708,036		96,647		591,723
Other post-employment benefit-related deferred outflows									
(see Note 16)					1,026,825				266
Asset retirement obligations									12,405
Total for Deferred Outflows of Resources	\$ -	\$	-	\$	3,984,903	\$	97,540	\$	620,310
Deferred Inflows of Resources:									
Governmental fund receivables for revenues									
that are not considered to be available to liquidate									
liabilities of the current period	\$ 681,415	\$	233,881

6. Loans and Notes Receivable and Investment in Direct Financing Leases:

A. Loans and Notes Receivable:

Loans and notes receivable, as of June 30, 2019, consisted of the following (amounts expressed in thousands):

	P	rima	ry Governmer	ıt				Coı	mponent Units	
		N	lon - major						Maryland	
		Go	overnmental				Higher		Stadium	
	General		Funds		Enterprise]	Education		Authority	Other
Notes receivable:										
Political subdivisions:										
Water quality projects		\$	1,252	\$	1,393,231					
Public school construction										
Other					179,909					
Volunteer fire & rescue companies	\$ 21,106									
Permanent mortgage loans					2,160,667					
Student and health profession loans						\$	50,215			
Shore erosion loans	6,685									
Other	83						6,177	\$	1,482	\$ 22,634
Total	27,873		1,252		3,733,807		56,392		1,482	22,634
Less: Allowance for possible loan losses					364,540		19,420			12,338
Loans and notes receivable, net	27,873		1,252		3,369,267		36,972		1,482	10,296
Due within one year	2,857		70		165,126		5,404		456	808
Due in more than one year	\$ 25,016	\$	1,182	\$	3,204,141	\$	31,568	\$	1,026	\$ 9,488

Certain notes receivable for advances of general obligation bond proceeds bear interest at rates ranging from 4.5% to 6.6% and mature within 14 years.

Water quality project loans consist of loans to various local governments and other governmental entities in the State for wastewater and drinking water projects under the United States Environmental Protection Agency's (EPA) Capitalization Grants for State Revolving Funds' Federal assistance program.

The permanent mortgage loans consist of financing for single and multi-family projects, rental projects, small businesses, industrial sites and various other purposes. Substantially all of the loans are secured by first liens on the related property and are insured or credit enhanced by the Federal Housing Administration mortgage insurance programs, the Veterans Administration and USDA/RD guarantee programs, Federal Home Loan Mortgage Corporation (Freddie Mac), FNMA, GNMA, Maryland Housing Fund or by private mortgage insurance policies.

Student and health profession loans are made pursuant to student loan programs funded through the U.S. Government.

B. Investment in Direct Financing Leases:

Enterprise Funds:

As of June 30, 2019, the Maryland Transportation Authority (Authority) has direct financing leases with the State's Department of Transportation, the Washington Metropolitan Area Transit Authority (WMATA), and the general fund. The present value of direct financing leases as of June 30, 2019, was \$354,074,000. As of June 30, 2019, the Authority held \$193,044,000, to be spent to complete assets under these direct financing leases. Lease payments receivable, including unearned interest for each of the five succeeding fiscal years and thereafter, including repayment of amounts to be spent, consist of the following (amounts expressed in thousands):

2020	\$ 29,286
2021	34,325
2022	35,323
2023	36,504
2024	38,185
2025-2029	182,738
2030-2034	118,129
2035-2039	37,845
Total	512,335
Unearned interest income	34,783
Total lease payments	547,118
Restricted investments related to unexpended bond proceeds	 193,044
Net investment in direct financing leases	\$ 354,074

Component Units:

As of June 30, 2019, the Maryland Stadium Authority (Authority) has direct financing leases with the State. The present value of the direct financing leases as of June 30, 2019, is \$68,403,000. As of June 30, 2019, the Authority held \$51,358,000, to be spent to complete assets under these direct financing leases. Lease payments receivable, including unearned interest for each of the five succeeding fiscal years and thereafter, including repayment of amounts to be spent, consist of the following (amounts expressed in thousands):

2020	\$ 27,499
2021	15,181
2022	15,194
2023	13,620
2024	13,628
2025-2029	33,641
2030-2034	16,785
2035-2039	16,777
Total	152,325
Less: unearned interest income	32,564
Net lease payments	119,761
Less: restricted investments related to unexpended bond proceeds	51,358
Net investment in direct financing leases	\$ 68,403

7. Restricted Assets:

Certain assets of the governmental activities, business-type activities and component units are classified as restricted assets on the Statement of Net Position. The purpose and amount of restricted assets as of June 30, 2019, are as follows (amounts expressed in thousands):

Amo	ount	Purpose
Government	al Activities:	
\$	215,796	Represents State property taxes restricted to pay debt service on general obligation debt
	1,530	Represents certificates of deposit linked to funds loaned under the State's housing loan program (\$16) and certificates of deposit restricted for Agricultural Land Preservation easement purchases (\$1,514)
\$	217,326	
Business-typ	be Activities:	
\$	2 012 004	Assets of the Community Development Administration and State Funded Loan programs are restricted for various mortgage loans for low-income housing and loans for local governments' public facilities
Φ	2,912,094	The purpose of the restricted assets is to secure the revenue bonds of the Maryland Water Quality Administration made for
	182,534	waste-water treatment systems and bay restoration
		Restricted assets represent deposits with the U.S. Treasury and amounts due from employers to pay unemployment
	1,456,241	compensation benefits in accordance with Federal statute
		Restricted assets in the Maryland Lottery and Gaming Control Agency include cash held in separate annuity contracts and
	20.02.5	coupon bonds for winning lottery ticket payouts; escrow deposits from lottery agents, casino operator license applicants and
	39,925	other gaming license applicants prior to being recognized as revenue; and prize fund reserves for multi-state lotteries. Cash and investments have been restricted in accordance with revenue bond debt covenants of the Maryland Transportation
	293 026	Authority for completion of capital projects and debt service
	2,5,020	Assets have been restricted by the Maryland Housing Fund to pay possible future claims under insurance for losses on
	83,908	mortgage loans
\$	4,967,728	
Component	Units:	
		Restricted assets of higher education include funds held by the trustee for future construction projects and to pay debt
\$		service and cash restricted for endowment purposes
	443,766	Restricted assets of Maryland Stadium Authority include cash and investments that relate to revenue bond indentures
	7 252	Restricted assets include cash and investments that relate to revenue bond indentures and to restricted project funds for the
	1,352	provision of water supply, waste-water treatment and solid waste management by the Maryland Environmental Service Cash has been restricted to fulfill funding commitments of certain investments of Maryland Technology Development
	3.238	Cash has been restricted to fulfill funding commitments of certain investments of Maryland Technology Development Corporation
\$	616,943	Corporation

8. Interfund Receivables and Payables:

Interfund balances, as of June 30, 2019 consisted of the following (amounts expressed in thousands):

Receivable Fund	Payable Fund	Amount
General Fund	Special Revenue Fund Enterprise Funds –	\$ 135,056 ^(a)
	Economic Development Loan Programs	3,558 ^(b)
	Maryland Lottery and Gaming Control Agency	160,445 ^(c)
		\$ 299,059
Special Revenue Fund	General Fund Enterprise Funds -	\$ 54,942 ^(d)
	Maryland Transportation Authority	\$ 39,754 (e) 94,696
Enterprise Funds -		
Economic Development Loan Programs	General Fund	\$ 66,066 ^(f)
1	Non-major governmental funds	25,493 ^(g)
Unemployment Insurance Program	General Fund	1,341 ^(f)
Maryland Transportation Authority	Special Revenue Fund	31,084 ^(h)
	•	\$ 123,984
Agency Fund -		
Local Income Taxes	General Fund	\$ 883,698 ⁽ⁱ⁾

The receivable and payable transactions between the governmental funds and the enterprise funds are reported as due from and due to other funds. The receivable and payable transactions between the agency fund and the general fund are reported as accounts receivable from State treasury by the agency fund and due to other funds by the general fund.

The receivable and payable transactions between the Primary Government and Component Units, as of June 30, 2019, consist of the following (amounts expressed in thousands):

Receivable Fund	Payable Fund	Amount
General Fund	Higher Education Fund	\$ 1,191
	Non-major component units	 4,759
		\$ 5,950
Component Units –	Agency Fund –	
Maryland Stadium Authority	Local Transportation Funds and Other Taxes	\$ 3,951
Maryland Prepaid College Trust	General Fund	 410
		\$ 4,361

The receivable and payable transactions between the general fund and component unit are reported as due from/due to component units and due to/due from primary government. The receivable and payable transactions between the component unit and agency fund are reported as due from primary government by the component unit and accounts payable and accrued liabilities by the agency fund.

- (a) The amount represents Transportation Trust Fund revenues transferred back to the general fund in July and August, 2019.
- (b) This amount represents payable balances for economic development loan program transfers.
- (c) This amount represents monies collected by the Maryland Lottery and Gaming Control Agency in June, 2019, and paid to the general fund in July, 2019.
- (d) The amount represents income and sales tax subsidies and return of health insurance costs from the general fund.
- (e) The Maryland Transportation Authority collects fees for the special revenue fund. The money will be used to build and maintain special revenue fund infrastructure, structures and other improvements.
- (f) These amounts represent receivable balances from general fund subsidies.
- (g) Bond funds collected by the capital projects fund on behalf of the economic development loan programs.
- (h) The Maryland Transportation Authority receives rent, interest income and fees for services from the special revenue fund.
- (i) The loans were made in accordance with Section 2-606 of Tax-General Article of the Annotated Code of Maryland from the reserve of unallocated tax revenue that the Comptroller estimates will be claimed and refunded to taxpayers within 3 years of the date that the income tax return was filed. The money will be used to provide funding for public elementary and secondary education and the Maryland Medicaid Program among other uses.

All Interfund balances except for (i) above, are expected to be repaid by June 30, 2020. For (i) above, the General Fund is required to pay to the agency fund \$33,333,000, a year in each of fiscal years 2021 through 2026 and \$10,000,000, a year in each of fiscal years 2020 through 2025. The remaining balance is due to pay local income taxes at unspecified dates in the future.

9. Interfund Transfers:

Interfund transfers, for the year ended June 30, 2019, consisted of the following (amounts expressed in thousands):

Transfers In	Transfers Out	Amount
General Fund	Non-major Governmental Funds	\$ 45,025
	Enterprise Funds –	
	Maryland Lottery and Gaming Control Agency	1,314,037
		\$ 1,359,062
Special Revenue Fund	General Fund	\$ 224,350
Non-major Governmental Funds	General Fund	\$ 521,431
	Special Revenue Fund	337,566
		\$ 858,997
Enterprise Funds -		
Loan Programs	General Fund	\$ 78,701
	Non-major Governmental Funds	 45,145
		\$ 123,846

Transfers are primarily used to 1) transfer revenues from the fund required by statute or budget to collect the revenue to the fund required by statute or budget to expend them, 2) transfer receipts restricted to debt service from the funds collecting the receipts to the non-major governmental funds as debt service payments become due, and 3) provide unrestricted revenues collected in the general fund to finance various programs accounted for in other funds in accordance with budgetary authorizations. In addition, the non-major governmental funds transferred \$36,725,000, of Program Open Space funds, \$7,697,000, of interest earned on bonds and \$603,000, for expenses for bond sales to the general fund.

The Maryland Lottery and Gaming Control Agency transferred revenue in excess of funds allocated to prize awards, casino operators, operating expenses and capital expenditure payments in the amount of \$1,314,037,000, to the general fund. The general fund transferred \$78,701,000, to support the operations of Enterprise Funds – Loan Programs. Expenditures for capital projects of \$45,145,000, were transferred to Enterprise Funds – Loan Programs.

During the year, the general fund and other governmental funds had expenditures of \$1,561,674,000, and \$301,710,000, respectively, that were for funds provided to supplement revenues and construction costs, respectively, of the higher education component units. The general fund also had net expenditures of \$40,000,000, that were for funds provided to supplement revenues of the Maryland Stadium Authority. The general fund transferred \$19,629,000, to the non-major component unit, the Maryland Technology Development Corporation, TEDCO, for Maryland Stem Cell Research and other operating grants. TEDCO transferred to the general fund \$4,759,000, as distributions/returns from Venture Capital Limited Partnerships.

10. Capital Assets:

General Obligation Bonds -

General obligation bonds are authorized and issued primarily to provide funds for State owned capital improvements, facilities for institutions of higher education and the construction of public schools in political subdivisions. Bonds have also been issued for local government improvements, including grants and loans for water quality improvement projects and correctional facilities, and to provide funds for loans or outright grants to private, not-for-profit cultural or educational institutions. Under constitutional requirements and practice, the Maryland General Assembly, by a separate enabling act, authorizes loans for particular objects or purposes. Thereafter, the Board of Public Works, a constitutional body comprised of the Governor, the Comptroller and the State Treasurer, by resolution, authorizes the issuance of bonds in specified amounts. Bonds are issued and accounted for on a "cash flow" basis rather than a "project" basis and are not sold to specifically fund an enabling act. General obligation bonds are subject to arbitrage regulations. However, there are no major outstanding liabilities in connection with these regulations as of June 30, 2019. Bonds are subject to redemption provisions at the option of the State.

General obligation bonds, which are paid from the general obligation debt service fund, are backed by the full faith and credit of the State and, pursuant to the State Constitution, must be fully paid within 15 years from the date of issue. Property taxes, bond premiums, interest subsidy payments from the Federal government, debt service fund loan repayments and general fund and capital projects fund appropriations provide the resources for repayment of general obligation bonds. During fiscal year 2019, the State issued \$1,000,000,000, of general obligations at a premium of \$174,724,000, with related issuance costs of \$2,747,000.

Refunded bonds of \$1,804,350,000, maturing in fiscal years 2020-2028 and callable in fiscal years 2020-2024 were considered defeased as of June 30, 2019. Accordingly, the trust account assets and the liability for the defeased bonds are not included in these financial statements.

General obligation bonds issued and outstanding, as of June 30, 2019, were as follows (amounts expressed in thousands):

		Interest		Annual Pri	incipal		Principal		Principal

⁽e) Taxable bond sale

^(f) Institutional bond sale

⁽g) Negotiated bond sale

⁽h) Competitive bond sale

⁽i) Qualified Energy Construction bond sale

Consolidated Transportation Bonds are limited obligations issued by the Maryland Department of Transportation (Department) for highway, port, airport, rail, or mass transit facilities, or any combination of such facilities. The principal must be paid within 15 years from the date of issue.

As provided by law, the General Assembly shall establish in the budget for any fiscal year a maximum outstanding aggregate amount of these Consolidated Transportation Bonds as of June 30 of the respective fiscal year that does not exceed \$4,500,000,000, through June 30, 2019, and thereafter. The aggregate principal amount of those bonds that was allowed to be outstanding as of June 30, 2019, was \$3,422,265,000. The aggregate principal amount of Consolidated Transportation Bonds outstanding as of June 30, 2019, was \$3,342,945,000. Consolidated Transportation Bonds are payable from the proceeds of certain excise taxes levied by statute, a portion of the corporate income tax and a portion of the State sales tax credited to the Department. These amounts are available to the extent necessary for that exclusive purpose before being available for other uses by the Department. If those tax proceeds become insufficient to meet debt service requirements, other receipts of the Department are available for that purpose. The holders of such bonds are not entitled to look to other State resources for payments.

Under the terms of the authorizing bond resolutions, additional Consolidated Transportation Bonds may be issued, provided, among other conditions, that (1) total receipts (excluding Federal funds for capital projects, bond and note proceeds, and other receipts not available for debt service), less administration, operation and maintenance expenses for the preceding fiscal year, equal at least two times the maximum annual debt service on all Consolidated Transportation Bonds outstanding and to be issued, and that (2) total proceeds from pledged taxes equal at least two times the maximum annual debt service on all Consolidated Transportation Bonds outstanding and to be issued.

The 2018 session of the General Assembly established a maximum outstanding principal amount of \$874,700,000, as of June 30, 2019, for all nontraditional debt of the Department. Nontraditional debt outstanding is defined as any debt instrument that is not a Consolidated Transportation Bond or GARVEE bond (tax-exempt debt backed by annual federal appropriations for federal-aid transportation projects). This debt includes certificates of participation, debt backed by customer facility charges, passenger facility charges, or other revenues, and debt issued by the Maryland Economic Development Corporation or any other third party on behalf of the Department. As of June 30, 2019, the Department's nontraditional debt outstanding was \$690,938,000, and was reported as obligations under capital leases and includes funds held by the bond trustee under these agreements.

Arbitrage regulations are applicable to the transportation bonds payable. The Department estimates there are no material liabilities for arbitrage rebates as of June 30, 2019.

During the year, the Department issued Consolidated Transportation Bonds in the amount of \$630,680,000, with net premiums of \$58,531,000, with maturities ranging from October 2021 to October 2033, and with interest rates ranging from 3.4% to 5.0%. As of June 30, 2019, the Department has \$112,440,000, of defeased debt outstanding.

As of June 30, 2019, Department bond debt service requirements for principal and interest in future years were as follows (amounts expressed in thousands):

	 Consolidated Transportation Bond							
Years Ending June 30,	Principal	Interest						
2020	\$ 205,755	\$ 142,426						
2021	254,860	131,770						
2022	296,750	118,495						
2023	304,905	105,295						
2024	 252,445	90,458						
2025-2029	1,253,930	282,884						
2030-2034	774,300	54,655						
Total	\$ 3,342,945	\$ 925,983						

County Transportation Bonds are issued by the Department and the proceeds are used by participating counties and Baltimore City to fund local road construction, reconstruction and other transportation projects and facilities and to provide local participating funds for Federally-aided highway projects. Debt service on these bonds is payable from the participating counties' and Baltimore City's share of highway user revenues. County transportation debt is the obligation of the participating counties rather than the Department. Unexpended bond proceeds in the amount of \$32,123,000, and certain debt service sinking fund amounts aggregating \$22,160,000, were invested in money market accounts as of June 30, 2019. These funds are restricted for project funds and county bond debt service, respectively, and are reported as cash and cash equivalents in the agency funds. As of year end, \$128,275,000, in County Transportation Revenue Bonds were outstanding.

Subsequent to June 30, 2019, on October 2, 2019, the Department issued \$490,000,000 of Consolidated Transportation Bonds to fund transportation projects.

Obligations Under Capital Leases -

Obligations under capital leases as of June 30, 2019, bore interest at annual rates ranging from 0.1% to 6.7%. Capital lease obligations with third parties in fiscal year 2019 increased by \$14,416,000, for master equipment leases entered into by the general fund and \$132,195,000, for transportation-related projects entered into by the Maryland Department of Transportation. The capital leases with component units include the general fund's capital leases with the Maryland Stadium Authority, which are being paid with the net proceeds transferred from certain lottery games. Following is a schedule of annual future minimum payments under these obligations, along with the present value of the related net minimum payments as of June 30, 2019 (amounts expressed in thousands):

	Capital Lease Obligations with					
Years Ending June 30,		Third Parties	(Component Units		
2020	\$	103,204	\$	27,499		
2021		111,183		15,181		
2022		109,017		15,194		
2023		102,209		13,620		
2024		98,564		13,628		
2025-2029		408,274		33,641		
2030-2034		196,977		16,785		
2035-2039		42,350		16,777		
Total future minimum payments		1,171,778		152,325		
Less: Amount representing interest		261,104		32,564		
Less: Restricted cash and investments		153,946		51,358		
Present value of net minimum payments	\$	756,728	\$	68,403		

The reduction shown for restricted cash and investments in the amounts of \$153,946,000, and \$51,358,000, is monies held by the bond trustee to be used primarily for construction expenditures.

The assets acquired through capital leases were as follows (amounts expressed in thousands):

Asset		Third Parties		
		Amount		
Construction in progress	\$	98,067		
Land and improvements		19,040		
Buildings and improvements		1,453,857		
Machinery and equipment		280,258		
Infrastructure		335,141		
Total acquired assets		2,186,363		
Less: Accumulated depreciation		1,006,007		
Total capital assets - net	\$	1,180,356		

Pollution Remediation Obligations -

The State has recognized a pollution remediation obligation on the statement of net position for governmental activities. A pollution remediation obligation is a liability which addresses the current or potential detrimental effects of existing pollution and may include pre-cleanup activities (site assessment, feasibility study), cleanup activities (neutralization, containment, removal and disposal, site restoration), oversight and enforcement and post remediation monitoring.

Obligating events initiate the recognition of a pollution remediation liability. These events include any of the following:

- (a) There is an imminent danger to the public.
- (b) The State is in violation of a related permit or license.
- (c) The State is identified as a responsible party or potentially responsible party (PRP) by a regulator.
- (d) The State is named or has evidence that it will be named in a lawsuit.
- (e) The State commences, or legally obligates itself to commence, pollution remediation activities.

The pollution remediation obligation is an estimate and subject to changes resulting from price increases or reductions, technology, or changes in applicable laws or regulations. The liability is recognized as it becomes estimable. In some cases, this may be at inception. In other cases, components of a liability (for example, legal services, site investigation or required post remediation monitoring) are recognized as they become reasonably estimable. At a minimum, the liability is reviewed for sufficiency when various benchmarks occur, such as receipt of an administrative order, participation as a responsible party or PRP in a site assessment, completion of a corrective measures feasibility study, issuance of an authorization to proceed, and as remediation is implemented and monitored.

Measurement of the liability is based on the current value of outlays expected to be incurred using the expected cash flow technique. This technique measures the liability as the sum of probability-weighted amounts in a range of possible estimated amounts – the estimated mean or average. Expected recoveries reduce the pollution remediation expense.

The pollution remediation estimated liability is \$160,967,000, with no estimated recoveries from third parties to reduce the liability. Included in this liability are cost estimates for site monitoring and repair, excavation of road and infrastructure and replacement of buildings as a result of site contamination by hazardous materials under Federal and State law in the amount of \$157,527,000. In these cases, either the State has been named in a lawsuit by a State regulator or the State legally obligated itself under the Environmental Article, Section 7-201, of the Annotated Code of Maryland.

The estimated liability also includes \$3,440,000, for the clean-up of illegal tire dumps for which the State is legally obligated under the Environmental Article, Section 9-2 of the Annotated Code of Maryland.

The cost estimates and assumptions for the pollution remediation due to site contamination from hazardous materials are based on engineering design estimates. The cost estimates and assumptions for the tire dump clean-up are based on estimated unit cost of \$830/ton based on historical data, fuel costs, specific site factors and oversight costs.

Agricultural Land Preservation Installment Purchase Obligation-

Under the Maryland Agricultural Land Preservation Program, the State purchases agricultural preservation easements restricting development on prime farmland and woodland.

Landowners have the option to choose a lump-sum payment option or installment payment option. The installment payment option is available by taking payments in equal amounts over two to ten years. The landowner may elect to take a certain amount in cash at the time of settlement and divide the remainder of the offer amount equally to be paid annually over the subsequent years. For the installment payments, the funds are invested by the State Treasurer in certificates of deposit at the interest rate in effect on the day of deposit in order to mature in accordance with the schedule of installments indicated by the landowners. Interest rates currently range from 0.15% to 1.24%. Each installment includes interest minus one-quarter of one percent of the interest earned. All installments are paid either April 1 or October 1 beginning the calendar year after the year settlement has occurred. Installment obligations mature through April 2024.

A summary of long-term debt outstanding for the agricultural land preservation installment purchase obligation as of June 30, 2019 is as follows (amounts expressed in thousands):

Years Ending June 30,	P	rincipal	Interest
2020	\$	720	15
2021		376	9
2022		285	5
2023		67	
2024		67	
Total	\$	1,515	\$ 29

For the governmental activities, compensated absences, self insurance, net pension liability, net other post-employment benefits liability, obligations under capital leases, pollution remediation obligations, claims and judgments, and agricultural land preservation installment purchase obligations are generally liquidated by the general or special revenue fund as applicable.

B. Long Term Obligations – Business-type Activities:

Community Development Administration (Administration) – Revenue Bonds

The Administration, an agency of the Department of Housing and Community Development, has issued revenue bonds, proceeds of which were used for various mortgage loan programs. Assets aggregating approximately \$2,911,702,000, and revenues of each mortgage loan program are pledged as collateral for the revenue bonds. Interest rates range from 0.8% to 6.8%, with the bonds maturing serially through 2060. The principal amount outstanding as of June 30, 2019, was \$2,338,675,000. Substantially all bonds are subject to redemption provisions at the option of the Administration. Redemptions are permitted at par through the use of unexpended bond proceeds and excess funds accumulated primarily through prepayment of mortgage loans. During fiscal year 2019, the Administration issued \$698,844,000, of revenue bonds with interest rates ranging from 1.5% to 5.0% and maturing serially through 2060.

Included in this amount were \$151,345,000 of Series 2018 AB bonds, which refunded all of Series 2007 M, 2009 A, B and C and 2008 D bonds on November 9, 2018. The purpose of the refunding was to realize savings on debt service costs. The aggregate difference in debt service between the refunded debt and the refunding debt was \$8,486,000. This refunding resulted in an economic gain for debt service savings of \$6,305,000. The difference between the reacquisition price and the net carrying amount of the old debt is reported as a deferred inflow of resources at its unamortized balance of \$756,000 as of June 30, 2019.

Subsequent to June 30, 2019, the Administration issued a total of \$30,440,000, and redeemed a total of \$11,275,000, revenue bonds.

Maryland Water Quality Financing Administration (Administration) – Revenue Bonds

The Administration, an agency of the Department of Environment, has issued revenue bonds for providing loans and grants. Interest rates range from 1.5% to 4.1%, payable semiannually, with annual installments from \$2,635,000, to \$24,640,000, to March 1, 2030. The principal amount outstanding as of June 30, 2019, was \$285,757,000. These bonds are payable solely from the revenue, money or property of the Administration.

Maryland Transportation Authority Bonds:

Bonds outstanding as of June 30, 2019, are as follows (amounts expressed in thousands):

BWI Consolidated Car Rental Facility Revenue Bonds, Series 2002, maturing in annual installments.

BWI Consolidated Car Rental Facility Revenue Bonds, Series 2002, maturing in annual installments ranging from \$3,705 to	
\$8,505 from July 1, 2019, to July 1, 2032, with interest rates ranging from 2.7% to 6.7%, payable semiannually	\$ 81,080
BWI Airport Parking Revenue Refunding Bonds, Series 2012A and 2012B, maturing in annual installments ranging from	
\$12,485 to \$16,455 from March 1, 2020, to March 1, 2027, with interest rates ranging from 4.0% to 5.0% payable	
semiannually	113,620
Lease Revenue Refunding Bonds, Series 2015, maturing in annual installments ranging from \$1,061 to \$1,422	
from July 1, 2019, to July 1, 2032, with an interest rate of 2.6% payable semiannually	16,750
Series 2017 Revenue Refunding Bonds maturing in annual installments of \$4,570 to \$11,030, from July 1, 2019 to July 1,	
2040, with interest rates ranging from 3.0% to 5.0% payable semiannually	165,820
Series 2008 A Revolving loan under the Transportation Infrastructure Finance and Innovation Act (TIFIA), for the	
Intercounty Connector Project maturing to July 1, 2047 with a fixed interest rate at 2.6%	506,433
Series 2009 Revenue Bonds, for construction and improvements of Authority's Transportation Facilities projects, maturing	
from July 1, 2019 to July 1, 2043, with interest rates ranging from 5.8% to 5.9% payable semiannually	450,515
Series 2010 Revenue Bonds, for construction and improvements of the Authority's Transportation Facilities projects,	
maturing from July 1, 2019 to July 1, 2041, with interest rates ranging from 5.0% to 5.8% payable semiannually	307,415
Grant and Revenue Anticipation Bonds, Series 2008 (GARVEE bonds), maturing	
March 1, 2020, with an interest rate of 4.3% payable semiannually to finance	
the Intercounty Connector Highway Project	48,865

Passenger Facility Charge Revenue Bonds, Series 2012A, maturing in annual installments of \$2,165 to \$3,780 from June 1, 2020 to June 1, 2032, with interest rates ranging from 0.7% to 4.3% payable semiannually.	37,425
Series 2012 Revenue Refunding Bonds maturing in annual installments of \$4,065 to \$6,225, from July 1, 2019 to July 1,	,
2029, with interest rates ranging from 3.0% to 5.0% payable semiannually	56,400
Passenger Facility Charge Revenue Bonds, Series 2012B, maturing in annual installments of \$6,515 to \$7,765 from June 1,	
2020 to June 1, 2027, with interest rates ranging from 0.6% to 2.7% payable semiannually	57,220
Variable Passenger Facility Charge Revenue Bonds, Series 2012C, via sinking fund payments of \$43,400 through June 1,	
2032, with a current variable rate of 2.0%	43,400
Passenger Facility Charge Revenue Bonds BWI Thurgood Marshall Airport, Series 2014, maturing in annual installments of	
\$1,660 to \$2,535 from June 1, 2020 to June 1, 2034, with interest rates ranging from 0.4% to 3.8% payable semiannually	33,450
Lease Revenue Refunding Bonds Metrorail Parking Projects, Series 2014, maturing in annual installments ranging from	
\$1,695 to \$2,395 from July 1, 2019, to July 1, 2028, with interest rates ranging from 2.0% to 5.0%, payable semiannually Series 2019 Revenue Refunding Bonds maturing in annual installments of \$11,475 to \$13,375, from July 1, 2020 to July 1,	20,685
2023, with an interest rate of 5.0% payable semiannually	49,715
Passenger Facility Charge Revenue Bonds, Series 2019, maturing in annual installments of \$3,620 to \$8,145 from June 1,	400 =0=
2021 to June 1, 2039, with interest rates ranging from 1.5% to 2.8% payable semiannually	108,705
Unamortized premium	48,847
<u>Total</u>	\$ 2,146,345

Revenue bonds are payable solely from the revenues of the transportation facilities projects. Capital assets constructed for BWI facilities, WMATA Metrorail and the Calvert Street Parking Project are not capital assets of the Authority.

Grant and Revenue Anticipation Bonds (GARVEE Bonds) are payable from a portion of Maryland's future Federal highway aid and other pledged monies. These bonds are not general obligations of the Authority or legal obligations of the Maryland Department of Transportation or the State.

Department of Housing and Community Development (DHCD) State Funded Loan Programs - Note Payable

In April 2010, the DHCD obtained a loan from the John D. and Catherine T. MacArthur Foundation to preserve affordable housing for low-income persons and families near military bases in counties in Maryland impacted by the Base Realignment and Closure initiative (BRAC). In fiscal year 2012, several Maryland counties committed matching funds for participation in the BRAC. As of June 30, 2019, total notes payable for BRAC are \$2,585,000. This balance includes the loans received from the MacArthur Foundation as well as several Maryland counties. The loans bear interest at the rate of 2.0%, and are committed for no less than 10 years.

C. Notes and Revenue Bonds Payable - Component Units

Higher Education -

Certain State higher education institutions have issued revenue bonds for the acquisition, renovation, and construction of student housing and other facilities. Student fees and other user revenues collateralize the revenue bonds. Interest rates range from 2.0% to 6.1% on the revenue bonds.

Debt service requirements to maturity were as follows (amounts expressed in thousands):

	Notes Pay	yabl	e and			
	Other Long-	-Ter	m Debt	Revenue	е Во	nds
Year Ending June 30,	Principal		Interest	Principal		Interest
2020	\$ 4,598	\$	406	\$ 102,335	\$	52,902

Total	\$ 24,298	\$	3,128	\$ 1,336,946	\$	387,949

The bonds issued are the debt and obligation of the issuing higher education institutions and are not a debt and obligation of, or pledge of, the faith and credit of the State.

As of June 30, 2019, higher education institutions have defeased debt outstanding of \$47,510,000, resulting from the refunding of previously issued debt. Accordingly, the trust account assets and the liability for the defeased bonds were not included in these financial statements.

As of June 30, 2019, cash and investments were held by the trustees for the higher education institutions in the amount of \$157,086,000, for the University System of Maryland (System), \$106,000, for St. Mary's College of Maryland, and \$5,356,000, for Morgan State University.

On February 20, 2019, University System of Maryland issued \$115,000,000, of 2019 Series A Bonds at interest rates ranging from 3.0% to 5.0% maturing from 2020 to 2039. On February 20, 2019, the System also issued \$38,080,000, of 2019 Refunding Series B Bonds at an interest rate of 5.0% maturing from 2020 to 2029 for refinancing \$44,290,000, of previously issued bonds for construction and university facilities renewal. The reduction in future debt service between the refunding debt and the refunded debt was \$12,277,000. The economic gain on the transaction was \$10,630,000.

On July 28, 2018, St. Mary's College issued \$16,630,000, of 2018 Series A bonds to refinance the Series 2005A, 2006A, 2014A, and partially refinance Series 2012A bonds. The difference between the cash flows required to service the old debt and the new debt and complete the refunding was \$2,103,000. The reacquisition price exceeded the net carrying value of the old debt by \$1,076,000, This amount is deferred and being amortized to interest expense over the remaining life of the debt. The unamortized balance of \$1,026,000, as of June 30, 2019, is reported as a deferred outflow of resources.

Obligations under capital leases of \$18,664,000, existed as of June 30, 2019, and bore interest at annual rates ranging from 1.0% to 6.8%.

Maryland Stadium Authority (Authority) – Revenue Bonds:

Debt service requirements to maturity for Maryland Stadium Authority revenue bonds and notes payable were as follows (amounts expressed in thousands):

Years Ending June 30,	Principal	Interest
2020	\$37,865	\$40,940
2021	26,471	40,017

Total	850,918	664,422
Unamortized premium net of unamortized discount	117,833	
Total	\$968,751	\$664,422

The Authority has issued various lease revenue bonds and notes to finance the construction of the baseball and football stadiums, Baltimore City Public Schools (BCPS), and certain other facilities. Except for BCPS, the outstanding debt is to be repaid through capital lease payments from the State, as the State has entered into capital lease arrangements for the use of the facilities financed with the debt proceeds.

In April 2013, the BCPS Construction and Revitalization Act was passed. The General Assembly authorized the Authority to issue up to \$1.1 billion in debt as limited obligations of the Authority, payable solely from the BCPS Financing Fund, established under the Act. As of June 30, 2019, the Authority has issued BCPS Construction and Revitalization Program Revenue Bonds totaling \$746,440,000. In support of the bonds, the Authority will receive \$60,000,000, annually, \$20,000,000, each from the State of Maryland, Baltimore City, and Baltimore City Board of School Commissioners (BCBSC). Sources of revenues include a portion of State lottery revenues, a portion of state education aid currently committed to Baltimore City Public Schools, and other taxes collected by or payable to Baltimore City.

Expenditures for Baltimore City Public School Construction are projected to be spent over an eight-year period while the revenues will be collected for at least thirty (30) years, which will decrease unrestricted net position until the revenues are fully received.

In May 2019, the Authority issued the Maryland Stadium Authority Sports Lease Revenue Bonds, Tax-Exempt, Series 2019A for \$20,595,000. The proceeds will be used for issuance costs and various construction projects for M&T Bank Stadium. Interest is payable semiannually at the rate of 4.0% to 5.0% per annum. This bond will mature in March 2026.

Also, in May 2019, the Authority issued Maryland Stadium Authority Sports Lease Revenue Bonds, Taxable, Series 2019B for \$30,405,000. The proceeds will be used for issuance costs and various construction projects at the Warehouse at Camden Yards. The bonds are interest-only until March 2027 when principal payments begin. Interest is payable semiannually at the rate of 3.0% to 3.5% per annum. The bond will mature in March 2039.

As of June 30, 2019, the Authority had outstanding revenue bonds for the construction, renovation and expansion of certain facilities as follows (amounts expressed in thousands):

	Outstanding	Interest	Maturity
Facility	Amount	Rates	Date
Baseball Stadium	\$20,362	0.8% to 6.1%	December 15, 2023
Football Stadium	60,174	Variable	March 1, 2026
Hippodrome Performing Arts Center	4,698	0.7% to 2.5%	June 15, 2022
Montgomery County Conference Center	7,400	4.0% to 5.0%	June 15, 2024
Camden Station	4,055	3.0% to 5.2%	December 15, 2024
Camden Yards Complex	40,475	2.8% to 3.5%	March 1, 2039
Baltimore City Public Schools Construction	831,587	5%	May 1, 2047
Total	\$968,751		

12. Insurance:

The self-insurance liabilities represent the State's liability for its various self-insurance programs. The State is self-insured for general liability, property and casualty, worker's compensation, environmental and anti-trust liabilities and certain employee health benefits. Commercial insurance coverage is purchased for specialized exposures such as aviation hull and liability, steam boiler coverage and certain transportation risks. There were no significant reductions or changes in the commercial insurance coverage from the prior year, and the amount of settlements have not exceeded insurance coverage for any of the past three fiscal years.

All funds, agencies and authorities of the State participate in the self-insurance program (Program). The Program, which is accounted for in the general fund, allocates the cost of providing claims servicing and claims payment by charging a "premium" to each fund, agency or public authority, based on a percentage of each organization's estimated current-year payroll or based on an average loss experienced by each organization. This charge considers recent trends in actual claims experience of the State as a whole and makes provision for catastrophic losses.

The Program's liabilities are reported when it is probable that a loss has occurred and the amount of that loss can be reasonably estimated. Liabilities include an amount for claims that have been incurred but not reported. Because actual claims liabilities depend on such complex factors as inflation, changes in legal doctrines, and damage awards, actual claims paid could differ from these estimates. Claims liabilities are reevaluated periodically to take into consideration recently settled claims, the frequency of claims and other economic and social factors. Non-incremental claims adjustment expenses have been included as part of the liability for claims and adjustments for the general liability, property and casualty, workers' compensation, environmental and anti-trust liabilities. Liabilities for incurred workers' compensation losses to be settled by fixed or reasonably determinable payments over a long period of time are reported at their present value using a 4% discount rate. The worker's compensation and property and casualty costs are based upon separately determined actuarial valuations for the following fiscal years ending. The employee health benefits liability is calculated based on claims subsequently reported and claims trends.

Changes in the self-insurance liabilities during the fiscal year 2019 were as follows (amounts expressed in thousands):

	Beg	ginning of	С	laims and				End of	Α	mounts
	Fis	scal Year	C	hanges in		Claim	Fi	scal Year	Dι	ie Within
	L	iability	E	Estimates]	Payments	I	iability	C	ne Year

Component units workers' compensation		38,326		5,683		6,607		37,402		5,610
Total self-insurance costs	\$	425,730	\$	1,658,595	\$	1,648,368	\$	435,957	\$	148,243

As of June 30, 2019, the Program held \$212,390,000, in cash and investments designated for payments of these claims.

Changes in the self-insurance liabilities during fiscal year 2018 were as follows (amounts expressed in thousands):

	Beginning of	Claims and		End of	Amounts
	Fiscal Year	Changes in	Claim	Fiscal Year	Due Within
	Liability	Estimates	Payments	Liability	One Year
Property, casualty and general liability	\$ 17,762 \$	9,705 \$	9,860	\$ 17,607 \$	7,277
Employee health benefits	103,000	1,653,751	1,653,751	103,000	103,000
Workers' compensation	247,413	69,183	64,308	252,288	26,768
Governmental activities self-insurance costs	368,175	1,732,639	1,727,919	372,895	137,045
Business-type activities workers' compensation	14,772	2,521	2,784	14,509	2,176
Component units workers' compensation	38,773	5,479	5,926	38,326	5,749
Total self-insurance costs	\$ 421,720 \$	1,740,639 \$	1,736,629	\$ 425,730 \$	144,970

As of June 30, 2018, the Program held \$243,915,000, in cash and investments designated for payments of these claims.

13. Fund Equity:

The unrestricted deficit for governmental activities on the government-wide statement of net position is \$36,101,866,000. A portion of the deficit results from the State incurring a debt for the purposes of capital acquisition and construction on behalf of local governments and private organizations. Since the incurrence of this debt does not result in capital assets of the State, the debt is not reflected in the net position category, net investment in capital assets, but rather in the unrestricted net position category. As of June 30, 2019, the State had reported outstanding general obligation bonds and capital leases applicable to these non-State projects of \$6,521,210,000. Without State financing for these capital assets, the State would have reported an unrestricted deficit for governmental activities in the amount of \$29,580,656,000.

The statement of net position for the primary government reported \$2,391,654,000, of restricted net position, including \$215,796,000, restricted by enabling legislation.

Detail of the fund balance categories and classification shown in the aggregate on the governmental funds balance sheet is as follows (amounts in thousands):

			Special Revenue

Total fund balances \$	2,693,368	\$	248,712	\$	607,375	\$	3,549,455

A portion of the general fund's committed fund balance, in the amount of \$890,709,000 as of June 30, 2019, includes the State Reserve Fund, which consists primarily of the Revenue Stabilization Account with a balance of \$876,495,000. The Revenue Stabilization Account is authorized in Section 7-311 of the State Finance and Procurement Article, Annotated Code of Maryland. Appropriations are required to be transferred to the Revenue Stabilization Account in years when the account balance is less than 7.5% of estimated general fund revenues. If the account balance is at least 3% but less than 7.5%, an appropriation of \$50,000,000, or whatever lesser amount is necessary to bring the account balance to 7.5% of estimated general fund revenues is required; if the account balance is less than 3%, the required appropriation is \$100,000,000.

Transfer of funds from the Revenue Stabilization Account may occur only to support the operation of State government on a temporary basis and only in amounts that are not otherwise offset by reductions made by the General Assembly in the general fund appropriations. These circumstances are not expected to occur routinely.

Transfer of funds from the account that does not result in a balance below 5% of estimated general fund revenues must be authorized by (1) an act of the General Assembly or (2) a specific provision of the State budget bill as enacted. Transfers resulting in a balance below 5% must be authorized by an act of the General Assembly other than the budget bill. The use of a budget amendment for fund transfer is prohibited.

The unrestricted deficit in net position in other enterprise funds of \$7,431,000, for the Economic Development Insurance Programs occurred because of restrictions for insuring mortgages.

14. Segment Information:

The State's Economic Development Loan Program contains two separately identifiable activities that have separately issued revenue bonds outstanding: housing loans of the Community Development Administration and water quality loans and grants of the Maryland Water Quality Administration.

The Community Development Administration (CDA) has issued revenue bonds, the proceeds of which were used for various mortgage loan programs. The assets of the loan program and revenues of each mortgage loan program are pledged as collateral for the revenue bonds. The bond indentures require the CDA to separately account for the identifiable activity's revenues, expenses, gains and losses, assets and liabilities.

The Maryland Water Quality Administration has issued revenue bonds to encourage capital investment for wastewater treatment systems and bay restoration. These bonds are payable solely from, and secured by, the revenue, money or property of the Maryland Water Quality Administration. The bond indentures require separate accounting for the identifiable activity's revenues, expenses, gains and losses, assets and liabilities.

Summary financial information for the two loan programs is presented below:

15. Retirement Benefits:

Maryland State Retirement and Pension System (System):

The State is an employer in the cost-sharing multiple-employer public employee retirement system established by the State to provide pension benefits for State employees (other than employees covered by the Maryland Transit Administration Pension Plan described below) and employees of 148 participating political subdivision or other entities within the State.

The State Retirement Agency (the "Agency") is the administrator of the Maryland State Retirement and Pension System (the "System"). The System was established by the State Personnel and Pensions Article of the Annotated Code of Maryland to provide retirement allowances and other benefits to State employees, teachers, police, judges, legislators, and employees of participating governmental units. Responsibility for the System's administration and operation is vested in a 15-member Board of Trustees. The System is made up of two cost-sharing employer pools: the "State Pool" and the "Municipal Pool". The "State Pool" consists of the State agencies, boards of education, community colleges, and libraries. The "Municipal Pool" consists of the participating governmental units that elected to join the System. Neither pool shares in each other's actuarial liabilities, thus participating governmental units that elect to join the System (the "Municipal Pool") share in the liabilities of the Municipal Pool only.

The State of Maryland is the statutory guarantor for the payment of all pensions, annuities, retirement allowances, refunds, reserves, and other benefits of the System. The State is obligated to annually pay into the accumulation fund of each State system at least an amount that, when combined with the System's accumulation funds, is sufficient to provide benefits payable under each plan during that fiscal year. The System is accounted for as one defined benefit plan as defined in accounting principles generally accepted in the United States. Additionally, the System is fiscally dependent on the State by virtue of the legislative and executive controls exercised with respect to its operations, policies, and administrative budget. Accordingly, the System is included in the State's reporting entity and disclosed in its financial statements as a pension trust fund.

The System prepares a separately audited Comprehensive Annual Financial Report, which can be obtained from the Maryland State Retirement and Pension System, 120 E. Baltimore Street, Suite 1600, Baltimore, Maryland 21202-1600 or located at http://www.sra.state.md.us/Agency/Downloads/CAFR/.

Plan Description:

The System is administered in accordance with the State Personnel and Pensions Article of the Annotated Code of Maryland and consists of several plans which are managed by the System's Board of Trustees. All State employees and employees of participating entities are covered by the plans.

"Retirement System" – retirement programs for substantially all State employees, teachers, State Police and judges who are not members of the State Pension System.

"Pension System" – retirement programs for employees and teachers hired after January 1, 1980, and prior employees who elected to transfer from the Retirement System.

The System provides retirement, death and disability benefits in accordance with State statutes. For participants enrolled prior to July 1, 2011, vesting occurs after five years of service. A member terminating employment before attaining retirement age, but after completing five years of service becomes eligible for a vested retirement allowance provided the member does not withdraw his or her accumulated contributions. Members of the Retirement System may retire with full benefits after attaining the age of 60, or completing 30 years of service credit, regardless of age. Members of the Pension Systems may retire with full benefits after attaining the age of 62 with five years of service, or after completing 30 years of service credit, regardless of age. State Police members enrolled prior to July 1, 2011, may retire with full benefits after attaining age 50, or completing 22 years of service credit, regardless of age. Members of the Law Enforcement Officers System may retire with full benefits at age 50, or completing 25 years of service credit, regardless of age.

The annual benefit for Retirement System members is equal to 1/55 (1.8%) of the member's highest three-year average final salary multiplied by the number of years of service credit. A member may retire with reduced benefits after completing 25 years of service, regardless of age. A member of the Pension System enrolled prior to July 1, 2011, will generally receive, upon retirement, an annual service retirement allowance equal to 1.2% of the member's highest three-consecutive year average final salary multiplied by the number of years of service credit on or before June 30, 1998, plus 1.8% of the highest three-consecutive year average final salary multiplied by the number of years of service credit after June 30, 1998. The annual benefit for a Pension System member who is employed by a participating governmental unit that does not provide enhanced pension benefits is equal to 0.8% of the member's highest three-consecutive year average final salary multiplied by the number of years of service credit, with a provision for additional benefits for compensation earned in excess of the Social Security Integration Level base. A member of either type of pension system enrolled prior to July 1, 2011, may retire with reduced benefits after attaining age 55 and completing 15 years of service.

For new Pension System members hired on or after July 1, 2011, benefit reforms enacted during the 2011 Legislative Session establish the pension benefit multiplier at 1.5% rather than 1.8%, calculate average final compensation based on the five highest consecutive years of service rather than the three highest, and allow vesting after ten years of eligible service rather than five years.

The annual retirement allowance for a State Police member is equal to 2.55% of the member's highest three-year average final salary multiplied by each year of service and may not exceed 71.4% of member's three years average final compensation. The annual retirement allowance for a member of the Law Enforcement Officers Pension System (LEOPS) is 2.0% of the member's highest three-consecutive year average final salary (AFC) multiplied by each year of service up to a maximum of 30 years plus 1.0% AFC of accumulated credible service in excess of 30 years. Neither the State Police Retirement System nor Law Enforcement Officers Pension System provide for an early retirement. Other reforms similar to those enacted for System employees and teachers were enacted for other systems in the State Pool.

Funding Policy:

In accordance with the State Personnel and Pensions Article of the Annotated Code of Maryland, employer contribution rates are established by annual actuarial valuations using the entry age normal cost method and other actuarial assumptions adopted by the Board of Trustees. In accordance with the law governing the Systems, all benefits of the System are funded in advance. The entry age normal cost method is the actuarial cost method used to determine the employers' contribution rates. Members of the Retirement system are required to contribute to the System a fixed percentage of their regular salaries and wages, 7% or 5%, depending on the retirement plan selected. Under the 2011 Pension Reforms, members of the Pension System are required to contribute to the System 7% of their regular salaries and wages. Members of the Pension System who are employed by a participating government that does not provide enhanced pension benefits are required to contribute to the System 5% of the regular salaries and wages that exceed the Social Security wage base. State Police members are required to contribute 8% of their regular salaries and wages to the System. Members of the Law Enforcement Officers Pension System are required to contribute 7% of earnable compensation. All contributions are deducted from each member's salary, and the resulting payments are remitted to the System on a regular and periodic basis.

The contribution requirements of the System members, as well as the State and participating governmental employers, are established and may be amended by the General Assembly of the State of Maryland. Contribution rates for employer and other nonemployer contributing entities are established by annual actuarial valuations using the Individual Entry Age Normal Cost method with projection and other actuarial assumptions adopted by the Board of Trustees. These contribution rates have been established as the rates necessary to fully fund normal costs and amortize the unfunded actuarial accrued liability.

The unfunded actuarial liability was being amortized in distinct layers. The unfunded actuarial liability which existed as of the June 30, 2000, actuarial valuation was being amortized over a 40-year period (as provided by law) from July 1, 1980 and as provided by law, any new unfunded liabilities or surpluses arising during the fiscal year ended June 30, 2001, or any fiscal year thereafter, was being amortized over a 25-year period from the end of the fiscal year in which the liability or surplus arose. However, in the 2014 legislative session, the Legislature changed the method used to fund the System. The unfunded liability for each System is being amortized over a single closed 25-year period.

During fiscal year 2019, for the State Pool, the State paid \$1,928,499,000 of the required contribution totaling \$1,928,499,000 which was 18.1% of covered payroll and 100.0% of the required payment. The State makes non-employer contributions to the System for local school system teachers for retirement costs other than normal costs. The covered payroll amount includes amounts for employees for whom the State pays retirement benefits, but does not pay the payroll. As of June 30, 2019, the State's membership includes 167,508 active members, 43,720 vested former members, and 145,642 retirees and beneficiaries.

Assumptions and Other Inputs:

The significant actuarial assumptions and other inputs listed below were used to measure the total pension liability as of the measurement date of June 30, 2019:

Valuation method	Individual Entry Age Normal Cost Method
Salary increases	0% to 8.50% per year (excludes wage inflation) varies by plan
Inflation	2.60% general, 3.10% wage
Rate of return on investments	7.40%
Discount rate	7.40%
Post-retirement benefit increase	2.19% - 3.10% for service prior to July 1, 2011
	1.46% - 3.10% for service after June 30, 2011 (depending on system and provisions)
	Pub-2010 Mortality Tables with projected generaltional mortality improvements based on the MP-
Mortality	2018.

System's Fiduciary Net Position:

The System's fiduciary net position has been determined on the same basis used by the system. The System's financial statements are prepared on the accrual basis of accounting. Accordingly, investment purchases and sales are recorded as of their respective trade dates. Employer and member contributions are recognized in the period when due, pursuant to statutory or contractual requirements. Benefits and refunds are recognized when due and payable in accordance with the terms of the Plans. Investments are reported at fair value.

Long-term contributions receivable:

In addition to actuarially determined contributions, certain withdrawn employers also make annual installment payments, including interest at the actuarially assumed rate of return in effect at the time of withdrawal (7% or 7.5% per year), for liabilities associated with employees that have elected to stay in the System when their employer elected to withdraw. As of June 30, 2019, the outstanding balance was \$12,741,000. These payments are due over various time periods, based on the date of the employer's withdrawal.

Discount rate:

A single discount rate of 7.40% was used to measure the total pension liability. This single discount rate was based on the expected rate of return on pension plan investments of 7.40%. The projection of cash flows used to determine this single discount rate assumed that plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Pension Liabilities, Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions:

As of June 30, 2019, the State reported a liability of \$19,674,034,000, (\$17,906,864,000, for Governmental Activities, \$298,096,000, for Business-Type Activities and \$1,469,074,000, for Component Units), for its proportionate share of the net pension liability (NPL). The NPL was measured as of June 30, 2019, and the total pension liability (TPL) used to calculate the NPL was determined by an actuarial valuation as of June 30, 2018. The State's proportion of the NPL was based on adjusted contributions to the System in fiscal year 2018 relative to adjusted contributions of the State and all participating local governments, actuarially determined. As of June 30, 2019, the State's proportion was 93.77%.

During the year ended June 30, 2012, the State passed legislation that required local school boards of education to fund the current service cost for teachers included in the Teachers Retirement and Pension System (TRS) which is included in the State of Maryland Retirement and Pension System. The intent of the legislation was for the State to be responsible for past service costs, actuarial gains and losses, and the unfunded liability. As a result, the State has determined that the NPL of TRS qualifies as a special funding situation and as such the entire liability associated with TRS and the related deferred outflows and inflows is included in the State's financial statements. The NPL for the TRS is \$10,790,035,000, and for the other State systems is \$8,883,999,000, as of June 30, 2019.

The State recognized pension expense of \$2,063,889,000 consisting of \$1,131,920,000 applicable to the TRS and \$931,969,000 applicable to the other State systems, for the year ended June 30, 2019 (\$1,703,417,000 for Governmental Activities, \$41,918,000 for Business-Type Activities and \$318,554,000 for Component Units). At that date, the State reported deferred outflows and deferred inflows of resources related to the State systems from the following sources (amounts expressed in thousands):

	Deferred Outflows	Deferred Inflows
	of Resources	of Resources
Changes in actuarial assumptions	\$ 575,187	
Difference between projected and actual earnings on pension plan investment	720,586 \$	-
Contributions made subsequent to the measurement date	1,928,499	
Difference between expected and actual experience		1,597,146
Total	\$ 3,224,272 \$	1,597,146
TRS	\$ 1,768,321 \$	875,939
Other State Systems	1,455,951	721,207
<u>Total</u>	\$ 3,224,272 \$	1,597,146

	Year ending June 30,	,	
The net amount reported as deferred outflows	2020	\$	525,263
of resources related to pensions (non-contributions)	2021		79,671
will be recognized in pension expense as shown to	2022		(566,412)
the right (amounts expressed in thousands):	2023		(278,749)
	2024		(61,146)
	Total	\$	(301,373)

Contributions:

Deferred outflows of resources related to MSRPS of \$1,928,499,000, resulting from State contributions subsequent to the measurement date, will be recognized as a reduction of the NPL in the year ended June 30, 2020.

Sensitivity of the net pension liability to changes in the discount rate:

Regarding the sensitivity of the net pension liability to changes in the single discount rate, the following presents the plan's net pension liability, calculated using a single discount rate of 7.40%, as well as what the plan's net pension liability would be if it were using a single discount rate that is 1-percentage-point lower or 1-percentage-point higher (amounts expressed in thousands):

	1% Decrease	Discount Rate	1% Increase
	6.40%	7.40%	8.40%
State's proportionate share of the NPL	\$28,337,361	\$19,674,034	\$12,484,096

Information included in the MSRPS financial statements:

Actuarial assumptions, long-term expected rate of return on pension plan investments, discount rate, and pension plan fiduciary net position are available at https://sra.maryland.gov/annual-financial-reports.

Maryland Transit Administration Pension Plan (Plan):

The Plan is a single employer contributory plan, which covers all Maryland Transit Administration (Administration) employees covered by a collective bargaining agreement and all those management employees who were employed by the Baltimore Transit Company. In addition, employees who enter the management group as a result of a transfer from a position covered by a collective bargaining agreement maintain their participation. The Maryland Transit Administration was given authority to establish and maintain the Plan under Transportation Article, Section 7-206(b)2(ii), of the Annotated Code of Maryland. The Plan is administered and funded in compliance with the collective bargaining agreements. The Plan prepares separately audited financial statements, which can be obtained from the Maryland Transit Administration Pension Plan, William Donald Schaefer Tower, 8 Saint Paul Street, Baltimore, Maryland 21202 or located at http://www.mdot.maryland.gov/newMDOT/Finance/index.html.

Plan Description:

The Plan provides retirement, normal and early, death and disability benefits. Members may retire with full benefits at age 65 with five years of credited service or age 52 with 30 years of credited service. The annual normal retirement benefit is 1.4% - 1.6% (1.3% prior to September 8, 2002) of final average compensation multiplied by credited service, with minimum and maximum benefit limitations. Participants are fully vested after five years of credited service (seven years for participants hired after May 18, 2013).

As of June 30, 2019, membership in the Plan includes 2,642 active members, 550 vested former members, and 1,950 retirees and beneficiaries. There were no investments in, loans to, or leases with parties related to the Plan. There were no Plan investments representing 5 percent or more of total Plan assets. For the year ended June 30, 2019, the Administration's covered and total payroll was \$148,445,000.

Funding Policy:

The Administration's required contributions are based on actuarial valuations. The entry age normal cost method is the actuarial cost method used to determine the employer's contribution rates and the total pension liability. All administrative costs of the Plan are paid by the Plan.

During fiscal year 2019, the Administration paid \$41,597,000, of the required contribution totaling \$64,649,000, which was 28.0% of covered payroll and 64.3% of the required payment.

Assumptions and other inputs:

The significant actuarial assumptions and other inputs listed below were used to measure the total pension liability as of the measurement date of June 30, 2019:

Method of funding	Level Dollar Entry Age Normal
Discount rate	4.53%
Post-retirement benefit increase	2.1% COLAs
Salary increase	Varies by participant service
Inflation	3.20%
Investment rate of return	7.50% including inflation
Mortality	RP 2014 Blue collar Tables with MP-2014.
Cost of living adjustments	2.1% per year

Plan Fiduciary Net Position:

The Plan's fiduciary net position has been determined on the same basis used by the pension plan. The Plan's financial statements are prepared on the accrual basis of accounting. Accordingly, investment purchases and sales are recorded as of their respective trade dates and all contributions and benefits including refunds of employee contributions are recorded in the period when they become due. Investments are reported at fair value.

Net Pension Liability of the Plan:

The total pension liability of the Plans was determined by an actuarial valuation as of July 1, 2018, rolled forward to June 30, 2019, and the adjustment to the roll-forward liabilities were made to reflect the following assumptions change in the 2019 valuation:

Benefits changed for certain employees. The dollar per month maximum benefit was eliminated, the vesting requirement increased to 10 years, pensionable earnings were limited to 2,392 hours per year and employee contributions increased to 2%.

Change of assumptions: Discount rate increased from 4.52% to 4.53% and the COLA assumption changed from 2.5% to 2.1%.

The components of the net pension liability as of June 30, 2019, are as follows (amounts expressed in thousands):

Total pension liability	\$ 1,261,419
Less Plan fiduciary net position	(329,024)
Employer net pension liability	\$ 932,395
Plan fiduciary net position as a percentage of the total pension liability	26.1%

Investments:

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of geometric real rates of return were adopted by the Board after considering input from the Plan's investment consultant(s) and actuary(s). For each major asset class that is included in the Plan's target asset allocation as of June 30, 2019, these best estimates are summarized in the following table:

		Long-Term Expected
Asset Class	Target Allocation	Real Rate of Return
Public equity	37%	6.3%
Credit/Debt Related Strategies	9%	3.9%
Rate sensitive	19%	1.3%
Absolute return	8%	3.0%
Private equity	13%	7.5%
Real Assets	14%	4.5%
Total	100%	

The above was the Board of Trustees adopted asset allocation policy and best estimate of geometric real rates of return for each major asset class as of June 30, 2019.

For the year ended June 30, 2019, the annual money-weighted rate of return on pension plan investments, net of the pension plan investment expense, was 6.4%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

Discount rate:

A single discount rate of 4.53% was used to measure the total pension liability. The projection of cash flows used to determine this single discount rate assumed that employer contributions will be made based on MTA's actual contributions over the prior three fiscal years. The projected benefits include expected cost-of-living adjustments (COLAs) to benefits for pensioners and beneficiaries. Based on these assumptions, the Plan's fiduciary net position is not expected to be available to make all future benefit payments of current plan members.

Sensitivity of the net pension liability to changes in the discount rate:

The net pension liability of the MTA calculated using the discount rate of 4.53% as well as what the MTA's net pension liability would be if it were calculated using a discount rate that is 1% lower (3.53%) or 1% higher (5.53%) than the current rate, is as follows (amount express in thousands):

	1% Decrease	Discount Rate	1% Increase
	3.53%	4.53%	5.53%
Net pension liability	\$1,124,206	\$932,395	\$775,604

Pension expense, deferred outflows of resources and deferred inflows of resources and changes in net pension liability:

The components of the pension expense for the Plan as of June 30, 2019, are as follows (amounts expressed in thousands):

	Amount
Service cost	\$ 36,027
Interest on the total pension liability	56,519
Projected investment earnings	(24,031)
Employee contributions	(3,006)
Administrative expenses and other	2,325
Subtotal	67,834
Changes of benefit terms	(203)
Other changes in fiduciary net position	6,720
Amortization - changes of assumptions	16,986
Amortization- actual investment earnings different than assumed	(4,251)
Amortization-differences between actual and expected experience	(6,436)
Subtotal	12,815
Total components recorded as pension expense	\$ 80,649

For the year ended June 30, 2019, the MTA recognized pension expense \$80,649,000. As of June 30, 2019, the MTA reported deferred outflows of resources and deferred inflows of resources related to pension from the following sources (amounts expressed in thousands):

	Deferred Outflows of	Deferred Inflows of
	Resources	Resources
Differences between actual and expected experience	\$ 11,590	\$ 31,003
Changes of assumptions	160,544	165,999

Deferred Compensation Plan (Plan):

The State offers its employees a deferred compensation plan (Plan) created in accordance with Internal Revenue Code Sections 457, 403(b), 401(a) and 401(k). The Plan, available to eligible State employees, permits participants to defer a portion of their salary until future years. Participation in the Plan is optional. The deferred compensation is not available to employees until termination, retirement, death or unforeseeable emergency. State law provides that the Governor appoint the nine member Board of Trustees of the State's Supplemental Retirement Systems. The Board is responsible for the implementation, maintenance and administration of the Plan. The Plan prepares separately audited financial statements, which can be obtained from the Maryland Teachers & State Employees Supplemental Retirement Plans, William Donald Schaefer Tower, Suite 200, 6 Saint Paul Street, Baltimore, Maryland 21202 or located at http://msrp.maryland.gov/agency.htm.

The State of Maryland Match Plan and Trust was established by the State on July 1, 1999. The plan is designed to be a tax-qualified 401(a) defined contribution matching plan under Internal Revenue Code section 401(a). Under plan provision, the State contributes to each participant's account an amount equal to each participant's contributions to the State's Supplemental Retirement Plan during the same plan year. By statute, the maximum amount contributed to this plan for each participant is \$600 for each State fiscal year. An employee's interest in his/her account is fully vested at all times. The match program continues to be established and funded in statute. During the year ended December 31, 2018, the State suspended the match contribution. For the plan year ended December 31, 2018, the State contributed \$36,000, to the 401(a) plan and participants contributed \$74,579,000, \$2,363,000, and \$87,096,000, to the 457, 403(b), and 401(k) plans, respectively.

16. Other Postemployment Benefits, Health Benefits (OPEB):

State Employee and Retiree Health and Welfare Benefits Program:

Plan Description:

The State Employee and Retiree Health and Welfare Benefits Program (Plan) is a single-employer defined benefit healthcare plan established by State Personnel and Pensions Article, Sections 2-501-2-516, of the Annotated Code of Maryland. The Plan is self-insured to provide medical, hospitalization, prescription drug and dental insurance benefits to eligible state employees, retirees and their dependents. State law grants authority to establish and amend benefit provisions to the Secretary of the Department of Budget and Management (DBM). In addition, the Secretary shall specify by regulation the types or categories of State employees who are eligible to enroll, with or without State subsidies, or who are not eligible to enroll.

The Postretirement Health Benefits Trust Fund (OPEB Trust) is established as an irrevocable trust under Section 34-101 of the State Personnel and Pensions Article to receive appropriated funds and contributions which will be used to assist the Plan in financing the State's postretirement health insurance subsidy. The oversight of the OPEB funds is the same Board of Trustees that oversees the Maryland State Retirement and Pension Systems. The Board of Trustees consists of 15 members. The Maryland State Retirement and Pension System prepares separately audited financial statements for the OPEB Trust Fund. The report may be obtained from the Office of the Comptroller, Attention: Plan Administrator, P.O. Box 746, Annapolis, Maryland 21404.

Funding Policy:

The contribution requirements of Plan members and the State are established by the Secretary. Each year the Secretary recommends to the Governor the State's share of the costs of the Plan. Funds may be separately appropriated in the State's budget for transfer to the OPEB Trust. Applicable administrative expenses are payable from the OPEB Trust, but may not exceed \$100,000, annually.

Generally, a retiree may enroll and participate in the health benefit options if the retiree retired directly from State service with at least five years of creditable service, ended State service with at least ten years of creditable service and within five years before the age at which a vested retirement allowance normally would begin, or ended State service with at least 16 years of creditable service. For members hired on or after July 1, 2011, they are required to have completed at least 25 years of creditable service, retired directly from State service with at least ten years of creditable service and within five years before the age at which a vested retirement allowance normally would begin. As of July 1, 2019, the State's Plan membership includes 80,910 active employees, 2,612 vested former employees, and 76,660 retirees and beneficiaries. Based on current practice, the State subsidizes approximately 50% to 85% of retiree premiums to cover medical, dental, prescription and hospitalization costs, depending on the type of insurance plan. The Plan assesses a charge to retirees for post-employment health care benefits, which is based on health care insurance charges for active employees. During fiscal year 2019, the State did not appropriate funds to the OPEB Trust to prefund future OPEB costs.

Assumptions and Other Inputs:

The significant actuarial assumptions and other inputs listed below were used to measure the total OPEB liability as of the measurement date of June 30, 2019:

Valuation cost method	Entry Age Normal Cost Method
Asset valuation method	Five - year smoothed market
Rate of return on investments	7.45%
Inflation Rate	2.60%
Mortality	RP-2014 Healthy Retiree Mortality Rates with Generational Projection Using Scale MP-2014 for healthy retirees.
	RP-2014 Disability Mortality Rates with Generational Projection Using Scale MP-2014 for disabled retirees.
	RP-2014 Pre-Retirement Mortality Rates with Generational Projection Using Scale MP-2014 for pre-retirement.
Aggregate salary growth	3.10% including inflation
Method to determine blended rate	3.50% represents an unblended pay-go rate
Healthcare cost trend rate	Medical: Under 65 - 8.75% graded to 4.50% over 17 years
	Over 65 - 7.00% graded to 4.50% over 10 years
	Prescription drugs: 9.50% graded to 4.5% over 20 years
	Dental: 3.00%
Individual salary increase	Vary by group, and years of service

OPEB Plan's Fiduciary Net Position:

The Plan's fiduciary net position has been determined on the same basis used by the plan. The Plan's financial statements are prepared on the accrual basis of accounting. Accordingly, investment purchases and sales are recorded as of their respective trade dates. Employer contributions are recognized in the period when due, pursuant to statutory or contractual requirements. Benefit and refunds are recognized when due and payable in accordance with the terms of the Plans. Investments are reported at fair value.

Net OPEB Liability of the Plan:

The Net OPEB Liability was measured as of June 30, 2019. Plan Fiduciary Net Position was valued as of the measurement date and the Total OPEB Liability was determined from an actuarial valuation as of June 30, 2019.

The components of the net OPEB liability are as follows (amounts expressed in thousands):

Total OPEB liability	. \$	14,640,716
Less: Plan fiduciary net position		350,732
Employer net OPEB liability	\$	14,289,984
Plan fiduciary net position as a percentage of the total OPEB liability		2.40%

Investments:

The long-term expected rate of return on OPEB plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of geometric real rates of return were adopted by the Board after considering input from the Plan's investment consultant(s) and actuary(s). For each major asset class that is included in the Plan's target asset allocation as of June 30, 2019, these best estimates are summarized in the following table:

		Long-Term
	Target	Expected Real
Asset Class	Allocation	Rate of Return
Public equity	37%	6.3%
Private equity	13	7.5
Rate Sensitive	19	1.3
Credit opportunity	9	3.9
Real Assets	14	4.5
Absolute return	8	3.0
Total	100%	

The above was the Board of Trustees adopted asset allocation policy and best estimate of geometric real rates of return for each major asset class as of June 30, 2019.

The annual money-weighted rate of return, net of investment expenses, on Plan investments for the year ended June 30, 2019, was 6.52%. A money-weighted rate of return expresses investment performance, net of OPEB plan investment expense, adjusted for the changing amounts actually invested.

Discount rate:

The Discount rate used to measure the total OPEB liability was 3.50% as of June 30, 2019. The projection of cash flow used to determine the discount rate assumed that the State would not make additional contribution to the OPEB Trust and continue to fund the Plan on a pay-as-you-go basis. Based on those assumptions, the OPEB Plan's fiduciary net position was not projected to cover a full year of projected future benefit payments. Therefore, all future benefit payments are discounted at the current index rate for 20 year, tax-exempt general obligation municipal bonds with an average rating of AA/Aa or higher (3.50%).

Sensitivity of the net OPEB liability to changes in the healthcare cost trend rate:

Regarding the sensitivity of the net OPEB liability to change in the healthcare cost trend rates, the following presents the plan's net OPEB liability, calculated using current rates, as well as what the plan's net OPEB liability would be if it were calculated using rates that are 1-percentage-point lower or 1-percentage-point higher (amounts expressed in thousands):

	1% Decrease	Current Healthcare Cost	1% Increase
	in Trend Rates	Trend Rates	in Trend Rates
Net OPEB Liability	\$11,940,528	\$14,289,984	\$17,309,754

Sensitivity of the net OPEB liability to changes in the discount rate:

Regarding the sensitivity of the net OPEB liability to change in the single discount rate, the following presents the plan's net OPEB liability, calculated using a single discount rate of 3.50%, as well as what the plan's net OPEB liability would be if it were calculated using a single discount rate that is 1-percentage-point lower or 1-percentage-point higher (amounts expressed in thousands):

	1% Decrease	Discount Rate	1% Increase
	2.50%	3.50%	4.50%
Net OPEB Liability	\$16,873,663	\$14,289,984	\$12,243,349

OPEB Expense, Liabilities and Deferred Outflows of Resources and Deferred Inflows of Resources related to OPEB:

The components of the OPEB expense for the Plan as of June 30, 2019, are as follows (amounts expressed in thousands):

Service Cost	\$ 337,321
Interest on the total OPEB liability	426,193
Current period benefit changes	2,544,752
Expensed portion of current-period difference between expected and	
actual experience in the Total OPEB liability	67,025
Sub Total	3,375,291
Expensed portion of current-period changes of assumptions	
or other inputs	68,748
Projected earnings on plan investments	(24,531)
Expensed portion of current-period differences between actual	
and projected earnings on plan investments	614
Recognition of beginning of year deferred inflows of resources as OPEB expense	(142,913)
Recognition of beginning of year deferred outflows of resources as OPEB expense	47,740
Sub Total	(50,342)
Total components recorded as OPEB expense	\$ 3,324,949

The State recognized OPEB expense of \$3,324,949,000 for the year ended June 30,2019. At that date, the State reported deferred outflows and deferred inflows of resources related to the State plan from the following sources (amounts expressed in thousands):

	De	ferred Outflows]	Deferred Inflows
	(Of Resources		Of Resources
Changes in actuarial assumptions	\$	402,863	\$	683,501
Difference between projected and actual earnings on OPEB plan investments		3,390		
Difference between expected and actual experience in the Total OPEB liability		620,571		
Total	\$	1,026,824	\$	683,501

	Year ending June 30,		
The net amount reported as deferred outflows	2020	\$	41,133
of resources related to OPEB	2021		41,133
will be recognized in OPEB expense as shown to	2022		41,133
the right (amounts expressed in thousands):	2023		41,133
	2024		62,027
	2025		116,764
	Total	\$	343,323

The changes in employer's net OPEB liability at June 30, 2019 are as follows (amounts expressed in thousands):

Total OPEB liability	
Service cost	\$ 337,320
Interest	426,193
Change of benefit terms	2,544,752
Differences between expected and actual experience	459,791
Changes of assumptions	471,611
Benefit payments, including refunds of member contributions	(499,502)
Net change in total OPEB liability	3,740,165
Total OPEB liability-beginning	10,900,551
Total OPEB liability-ending (a)	14,640,716
Plan fiduciary net position	
Net investment income	21,460
Net change in plan fiduciary net position	21,460
Plan fiduciary net position-beginning	329,272
Plan fiduciary net position-ending (b)	350,732
Net OPEB liability-ending (a)-(b)	\$ 14,289,984

A part of the increase in the net OPEB liability in the amount of \$2,544,752,000, was due to (1) extending the Employer Group Waiver Program (EGWP) prescription drug program for Medicare eligible retirees through December 31, 2020, (the EGWP was scheduled to terminate on December 31, 2018) and (2) adoption of Senate Bill 946 which provides continued drug benefits for certain Medicare retirees as of January 1, 2021. The existing EGWP program will be eliminated at that date. The State passed legislation to eliminate the prescription drug coverage of Medicare eligible retirees effective December 31, 2018. The retirees filed suit in September 2018 alleging violations of contract clauses and contract claims. The State has been enjoined from discontinuing the current prescription drug program since October 2018. Senate Bill 946 was passed after the commencement of the suit. A preliminary injunction hearing is scheduled for December 2019. An injunction in favor of State retirees could result in the future increase in net OPEB liability and the mandated expenditure.

Contributions:

For the fiscal year ended June 30, 2019, retiree plan members contributed \$98,964,000, or approximately 16.5% of total retiree premiums, and the State contributed \$499,502,000, or approximately 83.5%. These contributions funded the premium (benefit) payments only.

Maryland Transit Administration Retiree Healthcare Benefit:

The Maryland Transit Administration Retiree Healthcare Benefit (MTA OPEB) provides retiree health care benefits under a collective bargaining agreement to all employees who are members of the MTA pension plan, except transfers from union to management positions who are required to enroll in the State Employee and Retiree Health and Welfare Benefits Program. The MTA currently funds retirees' health care on a pay-as-you-go basis. The MTA does not currently have a separate fund set aside to pay health care costs.

Plan Description:

The MTA OPEB provides medical, hospitalization, prescription drug, dental and vision insurance benefits to eligible MTA employees, retirees and their dependents. Members are eligible at age 65 with five years of service or age 52 with 30 years of service provided the member is enrolled in an MTA health plan at normal retirement. Members are also eligible at age 55 if the sum of the participant's age plus years of actual credited service equals at least 85 and the participant is enrolled in an MTA health plan at early retirement, disability with 5 years of service and surviving spouses. A separate audited GAAP-basis postemployment benefit plan report is not available for the healthcare plan.

As of June 30, 2019, 2,350 active employees and 1,411 retirees and beneficiaries were covered by healthcare insurance provided by MTA.

Funding Policy:

Based on current practice, MTA subsidizes approximately 50% to 100% of retiree healthcare premiums depending on the type of insurance plan and whether the retiree receives Medicare. Retirees make the same contribution as active employees, however Medicare is handled separately.

Assumptions and Other Inputs:

The significant actuarial assumptions and other inputs listed below were used in the actuarial valuation as of June 30, 2018, the most recent valuation date, to measure the total MTA OPEB liability as of June 30, 2019:

Method of funding	Entry Age Normal, Level Percentage of Payroll
Aggregate salary growth	3.20%
Inflation	3.20%
Healthcare cost trend rate	Medical and Prescription: 5.40% in FY 2019 decreasing to 5.30% Pre-Medicare and 4.90%
	Post-Medicare in FY 2050
	The ultimate rate 3.90%.
	Dental and Vision: 4.50 % per annum
Mortality	RP2014 Blue Collar Fully Generational projected from 2014 using Scale MP-2018
Amortization method	Level Percentage of Payroll Closed
Amortization period	15 years as of July 1, 2019

Net OPEB Liability of the Plan:

The Net MTA OPEB liability was measured as of June 30, 2019 based on an actuarial valuation made as of June 30, 2018, and the components of the net MTA OPEB liability are as follows (amounts expressed in thousands):

Total OPEB liability	\$ 728,867
Less: Plan fiduciary net position	 -
Employer net OPEB liability	\$ 728,867
Plan fiduciary net position as a percentage of the total OPEB liability	 0.00%

Discount rate:

The discount rate used to determine the total OPEB liability is based on an index rate for 20-year tax exempt general obligation municipal bonds with an average rating of AA/Aa or higher. The discount rate used for the MTA OPEB to measure the total OPEB liability was 3.62%.

Sensitivity of the net OPEB liability to changes in the healthcare cost trend rate:

Regarding the sensitivity of the net OPEB liability to change in the healthcare cost trend rates, the following presents the plan's net OPEB liability, calculated using current rates, as well as what the plan's net OPEB liability would be if it were calculated using rates that are 1-percentage-point lower or 1-percentage-point higher (amounts expressed in thousands):

	1% Decrease	Current Healthcare Cost	1% Increase
	2.90%	3.90%	4.90%
Net OPEB Liability	\$607,702	\$728,867	\$887,376

Sensitivity of the net OPEB liability to changes in the discount rate:

Regarding the sensitivity of the net OPEB liability to change in the single discount rate, the following presents the plan's net OPEB liability, calculated using a single discount rate of 3.62%, as well as what the plan's net OPEB liability would be if it were calculated using a single discount rate that is 1-percentage-point lower or 1-percentage-point higher (amounts expressed in thousands):

	1% Decrease	Discount Rate	1% Increase
	2.62%	3.62%	4.62%
Net OPEB Liability	\$862,058	\$728,867	\$622,800

OPEB Expense, Liabilities and Deferred Outflows of Resources and Deferred Inflows of Resources related to OPEB:

The components of the OPEB expense for the Plan at June 30, 2019, are as follows (amounts expressed in thousands):

Service Cost	\$ 41,137
Interest on the total OPEB liability	29,487
Changes in assumptions	(32,402)
Difference between expected and actual experience	(1,759)
Sub Total	
Total components recorded as OPEB expense	\$ 36,463

The MTA OPEB recognized OPEB expense of \$36,463,000 for the year ended June 30, 2019. At that date, the MTA OPEB reported deferred outflows and deferred inflows of resources related to the MTA plan from the following sources (amounts expressed in thousands):

	Deferred Outflows	s Deferred	Inflows
	Of Resources	Of Res	ources
Changes in actuarial assumptions	\$	- \$	212,584
Difference between expected and actual experience			12,314
Total	\$	- \$	224,898

	Year ending June 30,	
The net amount reported as deferred inflows	2020	\$ (34,162)
of resources related to OPEB will be recognized	2021	(34,162)
in OPEB expense as shown to the right	2022	(34,162)
(amounts expressed in thousands):	2023	(34,162)
	2024	(34,162)
	Thereafter	(54,088)
	Total	\$ (224,898)

The changes in employer's net OPEB liability as of June 30, 2019 are as follows (amounts expressed in thousands):

Total OPEB liability	
Service Cost	\$ 41,137
Interest	29,487
Differences between expected and actual experience	(14,073)
Changes of assumptions	(145,356)
Benefit payments, including refunds of member contributions	(15,617)
Net change in total OPEB liability	(104,422)
Total OPEB liability-beginning	833,289
Total OPEB liability-ending (a)	 728,867
Plan fiduciary net position

Fian nductary net position-beginning	
Plan fiduciary net position-ending (b)	-
Net OPEB liability-ending (a)-(b)	\$ 728,867

17. Commitments:

As noted in Note 2, encumbrance accounting is used to account for outstanding commitments for open purchase orders and unfulfilled contracts in some governmental funds. Amounts related to encumbrances are reported in the general fund, \$500,934,000, the special revenue fund, \$8,908,000, and the capital projects fund, \$618,245,000, as of June 30, 2019.

State agencies and programs lease office space under various agreements that are accounted for as operating leases. Many of the agreements contain rent escalation clauses and renewal options. These leases contain termination for convenience clauses providing for cancellation after a certain number of days' notice to lessors. In addition, these leases contain appropriation clauses indicating that continuation of the lease is subject to appropriation by the legislature. Rent expenditures for the year ended June 30, 2019, were approximately \$99,634,000.

As of June 30, 2019, the governmental funds, other than the Department of Transportation, had commitments of approximately \$175,801,000, for service contracts.

As of June 30, 2019, the Department of Transportation and Maryland Transportation Authority had commitments of approximately \$6.7 billion and \$921,614,000, respectively, for construction of highways and mass transit facilities.

Approximately 30.9% of future expenditures related to the Department of Transportation commitments are expected to be reimbursed from proceeds of approved Federal grants when the actual costs are incurred. The remaining portion will be funded by other financial resources of the Department of Transportation.

The Department of Transportation, as lessor, leases space at various marine terminals, airport facilities and office space pursuant to various non-cancellable operating leases with scheduled rent increases. Minimum future rental revenues are as follows (amounts expressed in thousands):

Years Ending June 30,		Amounts
2020	. \$	133,965
2021		100,055

2022	94,823
2023	80,999
2024	75,777
2025-2029	172,421
2030-2034	2,539
Total	\$ 660,579

The cost and accumulated depreciation of the assets as of June 30, 2019, were \$1,427,723,000 and \$833,517,000, respectively.

Total minimum future rental revenues do not include contingent rentals that may be received under certain concession leases on the basis of a percentage of the concessionaire's gross revenue in excess of stipulated minimums. Rental revenue was approximately \$240,002,000, for the year ended June 30, 2019.

As of June 30, 2019, the enterprise fund loan programs had committed to lend a total of \$550,337,000, in additional loans and had committed \$3,900,000 for service contracts. The Community Development Administration, also an enterprise fund loan program, had \$459,475,000 of revenue bonds outstanding that are not included in the financial statements of the Administration because the bonds are not guaranteed by the State or any other program of the State or any political subdivision. The revenue bonds are secured solely by the individual multi-family project properties, related revenues, applicable credit enhancements or investments equal to the debt outstanding.

As of June 30, 2019, the higher education fund had commitments of approximately \$396,608,000 for the completion of projects under construction.

18. Contingencies:

The State is party to legal proceedings that normally occur in governmental operations. The legal proceedings are not, in the opinion of the Attorney General, likely to have a material, adverse impact on the financial position of the State as a whole.

As of June 30, 2019, economic development loan programs were contingently liable to financial institutions for \$3,269,000 for the repayment of loans for small businesses. Non-major enterprise funds were contingently liable as insurers of \$408,804,000 of \$488,783,000, mortgage loans made by public and private lenders.

Non-major component units were contingently liable as insurers of \$4,339,000 of \$16,691,000, economic development and growth bonds issued by financial institutions.

The State receives significant financial assistance from the U.S. Government. Entitlement to the resources is generally conditioned upon compliance with terms and conditions of the grant agreements and applicable Federal regulations, including the expenditure of the resources for eligible purposes. Substantially all grants are subject to financial and compliance audits by the grantors. Any disallowances as a result of these audits become a liability of the fund which received the grant. As of June 30, 2019, the State has recognized liabilities of \$034,156,000, and \$28,400,000, in the general fund for Medicaid claims to the Federal government related to disallowed costs and misallocated costs to establish a marketplace for health insurance benefits for low income individuals and employees of small companies in Maryland, respectively. The State estimates that no additional material liabilities will result from such audits.

19. Tobacco Settlement:

Maryland has a Cigarette Restitution account for all revenues received from any judgment against or settlement with the tobacco industry. Expenditures from the account are made by an appropriation in the annual State budget. The law provides that at least 50% of the appropriations shall be made for tobacco or health related purposes and the remaining appropriations may be for any public purpose. Currently, 30% of the appropriations shall be made for the Maryland Medical Assistance Program (Medicaid). Appropriations of 0.15% of the account are required to be appropriated for enforcing the escrow requirements for nonparticipating tobacco product manufacturers. Transfers of \$142,476,000 were made from the proceeds in the Cigarette Restitution account for fiscal year 2019 expenditure of appropriations.

As part of the Master Settlement Agreement between the states and the tobacco companies, Maryland's share during fiscal year 2019 was \$137,221,000, including the award from the arbitration panel for attorney fees. This amount does not include \$22,066,000 the tobacco companies paid to the disputed account pending the outcome of litigation.

It is estimated that the payments made to the State pursuant to the Master Settlement through fiscal year 2024 will total \$3.49 billion. The actual amount received each year, however, will reflect adjustments for inflation and cigarette shipment volume. In addition, the State expects to receive \$118,716,000 during that same period pursuant to an award for attorney fees by the national arbitration panel.

20. Landfill Closure:

State and Federal laws require the Maryland Environmental Service (the Service) to cover and to perform certain maintenance and monitoring functions at Midshore Regional Landfill I, Easton Landfill, Midshore II, and Hobbs Road Landfill sites for 30 years after closure. Although closure and post closure care charges will be paid near and after the date the landfills stop accepting waste, the Service reports a portion of these closure and post closure care costs as a liability based upon the estimated useful life of the landfills.

Midshore I's current cells are approximately 93% filled as of June 30, 2019. The landfill stopped accepting waste on December 31, 2010, was capped, and is now in the post closure monitoring and maintenance period. Total closure and post closure care costs for the landfill are currently estimated to be \$3,040,000 as determined through engineering studies, and \$1,689,000 has been recognized as a liability on the June 30, 2019, Combining Statement of Net Position, Non-Major Component Units.

A flyover is performed annually in July to assist in the calculation of the landfill's remaining capacity based upon the volume of cubic yard capacity. Midshore II's current cells, which are expected to close in 2042, are approximately 23% filled as of June 30, 2019. Total closure and postclosure care costs for the landfill are currently estimated to be \$19,841,000 as determined through engineering studies, and \$3,869,000 has been recognized as a liability as of June 30, 2019. Actual costs may be subject to change due to inflation, deflation, technology, and changes in applicable laws and regulations

A receivable from project participants corresponding to the accrued liability has also been recorded. Under Federal regulations, the Service has satisfied its financial assurance requirements based upon the local government financial ratio tests of the project participants as of June 30, 2018. The Service expects to satisfy these requirements as of June 30, 2019, using the same criteria.

21. Service Concession Arrangements:

In fiscal year 2013, the Maryland Department of Transportation entered into a long-term lease with Ports America Chesapeake (PAC) to manage, operate and maintain the Dundalk Marine terminal. This agreement satisfies the criteria established to be considered a service concession arrangement.

Under the terms of the ground lease, the Department transfers rights to PAC for a term of 50 years. After 50 years ownership of the Dundalk Marine Terminal will revert to the Department. PAC charges and collects fees from the user for container lifts, short tons of roll on-roll off, break-bulk and bulk cargo and pays the operating costs, management fee and debt service associated with the project. The Department has the ability to approve what services the operator is required to provide. As of June 30, 2019, the capital assets, net of accumulated depreciation, and deferred concession arrangement receipts were \$46,417,000.

The Department has entered into a light rail transit public private partnership concession arrangement. The construction, operating and maintenance risk is being managed by Purple Line Transit Partners, LLC (PLTP) through a 6-year construction and 30 year operating period. The PLTP will finance, develop, design, build, equip, and supply light rail vehicles under an availability-based concession agreement with the Department. Construction began in August 2017. The Department paid a total of \$603,867,000, for construction costs to date. As of June 30, 2019, the capital assets and deferred service concession arrangement receipts were \$98,734,000.

In fiscal year 2013, Maryland Transportation Authority and Areas USA entered a 35-year Service Concession Arrangement (SCA) agreement to redevelop and operate two travel plazas along the John F. Kennedy Memorial Highway (I-95). The structure of the agreement between the Authority and Areas USA is a long term lease and concession. The Authority retains ownership of the property and assets. All property and improvements, with the exception of the fueling systems, are returned to the Authority at the end of the 35 year lease. Under the agreement, the Authority should realize reduced future operating and capital expenses; debt capacity will be reserved for core business activities; and revenue is guaranteed over the life of the agreement. Areas USA invested \$55,890,000, which required no public subsidy or debt, to redesign and rebuild both the Maryland House and Chesapeake House travel plazas. Areas USA will operate and maintain the travel plazas through the year 2047. The unamortized balance as of June 30, 2019, is \$47,917,000, which is reported in the deferred inflow of resources on the Statement of Net Position.

The University System of Maryland has entered into a long-term lease of university-owned land and other SCA agreements with a quasi-governmental issuer of debt and a developer to build, and an operator to manage, student housing projects at seven of the System's institutions.

Under the terms of the ground lease, the System transfers rights to university-owned property for a term of 40 years to the quasi-governmental issuer of debt (the project 'owner'). The project owner contracts with a developer to build student housing on the property, as well as an operator that manages the facility on behalf of the owner. Each student housing project is financed using tax-exempt debt that limits the use of the project to uses that support the institution. The owner of the project charges and collects rent from the students, and pays the operating costs and debt service associated with the project. The residual cash flow from the project, after paying all operating costs and management fees, is paid to the university as the ground lease payment. The institution has the ability to approve what services the operator is required to provide and the rates that can be charged.

Upon final payment of the outstanding debt associated with the project, or upon termination of the ground lease, whichever is sooner, the building's ownership transfers to the university and the owner's rights to use land revert to the university.

As of June 30, 2019, the Statement of Net Position reflects net capital assets of \$306,296,000, and deferred service concession arrangement receipts of \$270,574,000, from this transaction.

22. Tax Abatements:

For financial reporting purposes, the tax abatement is defined as an agreement between the government and an individual or entity through which the government promises to forgo tax revenues and the individual or entity promises to subsequently take a specific action that contributes to the economic development or otherwise benefits the government or its citizens. The following tax abatement programs were granted and administered by the State of Maryland during fiscal year 2019. There were two tax abatement programs in 2019 for which a company received a tax abatement of \$5 million or greater. The two programs were the Film Production Activity Tax Credit to the Knight takes King Production in the amount of \$7.2 million and the Aerospace, Electronics or Defense Contract Tax Credit to Northrop Grumman Corp. in the amount of \$7.5 million.

Name of Program	Tax Abatements - FY 2019 ⁽¹⁾	Tax Filings - FY 2019 ⁽²⁾	Program Description
Economic Developr	nent Programs:	'	
Film Production Activity Tax Credit	\$7,200,000	1	The program is designed to maintain current level of film production in the state, increase the current level of film production in the state and maintain the positive impact on the State's economy. Production companies must incur a minimum of \$500,000 direct costs in Maryland to participate in the program. The companies are reimbursed 25% of qualifying direct costs incurred in Maryland for films and 27% of qualifying direct costs incurred in Maryland for television series. The authority under which abatements are entered into is the Annotated Code of Maryland: Tax General Title 10, Subtitle 7, Section 10-730. State business income tax is abated. Taxes are being reduced by an allowance of credit against income taxes. Taxpayers receive the full amount of the credit regardless of the tax liability (refundable). There are no provisions for recapture of credit.
One Maryland Tax Credit	\$16,300,000	95	The program provides two income tax credits to businesses that initiate major investment projects in Maryland's economically distressed jurisdictions. The Project Tax Credit can be \$5 million and the Start Up Tax Credit can be \$500,000. The business must create at least 25 new positions paying at least 150% of the federal minimum wage. Tax being abated is the State business income tax. Taxes are reduced as an allowance of the credit against taxes. If the credit is less than the tax liability the credit may be used over a 14 year period. After the 4th tax year but before the 15th year after the project has been placed in service the business may apply the excess credit for project costs to non-project related tax income and a portion may be refunded. The authority under which abatements are entered into is the Annotated Code of Maryland: Economic Development Title 6, Subtitle 4, Section 6-401-6-406. There is no provision for recapturing abated taxes.
Aerospace, Electronics or Defense Contract Tax Credit	\$7,500,000		The program creates a tax credit against the State income tax for a business operating a qualified aerospace, electronics or defense contract tax credit project. The purpose of the program is to keep aerospace, electronics and defense contractors employing Maryland workers and to help the Maryland economy. The credit is \$2.5 million a year for each of the three programs for 5 years. The maximum credit is \$7.5 million a year and \$37.5 million total. A business entity operating a project must create or retain 10,000 positions and expend at least \$25 million in capital expenditures in Maryland. The taxes are reduced as a credit against state business income taxes. The authority under which the abatements are entered into is the Annotated Code of Maryland, Tax General, Title 10, Subtitle 7 Section 10-737. If the credit allowed in any tax year exceeds the total income tax otherwise payable by the qualified business entity for that taxable year the business entity may claim a refund in the amount of the excess (refundable). The credit must be recaptured if during either of the 2 years after the credit year the number of qualified positions falls below a rolling average over the past 2 years of 10,000. If the credit is required to be recaptured, the credit is recomputed and reduced on a proportionate basis, based on the reduction of the rolling average number of qualified employees over the past 2 years. The recomputed credit is then subtracted from the amount of credit previously allowed. If, during any of the 2 years after the credit year, the rolling average of qualified positions falls below 9,000 for the past 2 years, all the credits shall be recaptured.
Biotechnology Investment Incentive Tax Credit	\$12,500,000	235	The purpose of the program is to increase investment in Maryland Biotechnology Companies. Investors may receive a credit on their corporate or personal Maryland State income tax equal to 50% of investment not to exceed \$250,000 and for investment in companies in certain counties, 75% of investment not to exceed \$500,000. Taxes being abated are State of Maryland corporate or personal income tax. Authority under which abatements are entered into is the Annotated Code of Maryland, Tax General, Section 10-725. Taxes are reduced as an allowance of credit against income taxes. The amount in excess of the state income tax liability may be refunded (refundable). Amount is limited to the amount in the Biotechnology Investment Incentive Tax Credit Fund. If within 2 years after the close of the tax year for which the credit was claimed the investor sells, transfers of disposes or its ownership interest or if the company ceases to have its headquarters and base of operations in Maryland, the credit must be recaptured on the investors' Maryland income tax return.

Housing and Community Development Program:

Trousing and Comm	zame, zevelopine		
Sustainable Communities Tax Credit	\$10,300,000	192	The purpose of the program is to encourage private sector investment in the rehabilitation and re-use of Competitive Commercial Projects and to promote investment in local economies. Owners of income-producing properties may earn a state income tax credit capped at \$3 million that is equal to 20% of the eligible rehabilitation expenses. The annual appropriation is \$9 million. The tax being abated is the State of Maryland Business or Individual Income Taxes. Authority to abate taxes is the Annotated Code of Maryland; State Finance and Procurement Article; Section 5A-303. A pro-rated percentage of the credit is subject to recapture if disqualifying work is performed or the certified rehabilitation is disposed of during the 5 year period that begins with the year the certified rehabilitation was completed.
Total tax credits administered by State	\$53,800,000	524	

The State's tax revenues were reduced by \$5,700,000 under tax abatement agreements entered into and administered by the counties and municipalities, namely the Enterprize Zone Tax Credit, as follows:

Name of Program	Tax Abatements - FY 2019 ⁽¹⁾	Tax Filings - FY 2019 ⁽²⁾	Program Description
Enterprise Zone Tax Credit	\$5,700,000	157	The program is designed to bring new businesses and jobs to the State in areas that need revitalization. Businesses enter into an agreement with counties or municipalities to construct or make improvements to buildings located in an enterprise zone. Businesses may receive from the State \$1,000 to \$9,000 in tax credits over three years for hiring new employees at the new or renovated facilities, Business income taxes are being abated. Taxes are being reduced by an allowance of credit against State of Maryland income tax. The authority under which abatements are entered into is the Annotated Code of Maryland, Tax Property, Title 9 Subtitle 1, Section 9-103, Tax General Section 10-702, and Economic Development Article Section 5-1401 (e). If the credit allowed in any taxable year exceeds the State income tax for that taxable year, a business entity may apply the excess as a credit against the State income tax for succeeding taxable years until the earlier of the full amount of the excess is used or the expiration of the 5th taxable year from the date on which the business entity hired the qualified employee to whom the credit first applies. There are no provisions for recapturing abated taxes.
Total tax credits administered by counties and municipalities	\$5,700,000	157	

⁽¹⁾ Gross dollar amount the government's tax revenues were reduced for fiscal year 2019 as a result of tax abatement agreements

⁽²⁾ Number of income tax returns filing for credit in fiscal year 2019

23. Asset Retirement Obligations

The University System of Maryland (USM) owns and operates facilities and equipment subject to certain legal and regulatory requirements to perform asset retirement activities. A non-power training nuclear reactor operated at USM is subject to statutory and regulatory requirements promulgated by the U.S. Nuclear Regulatory Commission (NRC) under Title 10 of the Code of Federal Regulations (CFR). The reactor was subject to estimated asset retirement obligations of \$13,057,000, as of June 30, 2019, and was fully depreciated.

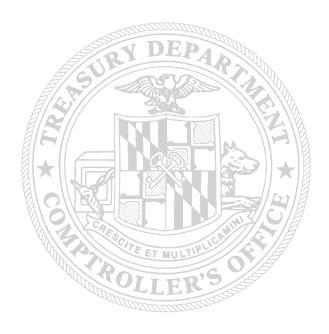

USM is periodically required by the CFR to provide various disclosures to the NRC in order to maintain the operating license for the reactor, including, but not limited to, projected operating costs, decommissioning costs, and funding assurances. USM is in compliance with all such requirements as of June 30, 2019.

USM also owns and operates various equipment assets, including gamma cell irradiators and underground oil tanks, that are subject to statutory or regulatory asset retirement obligations of individually nominal dollar values. All such assets were fully depreciated as of June 30, 2019.

Asset retirement obligations were estimated based upon the historical decommissioning costs of similar assets, stated in current dollars using the Implicit Price Deflator issued by the U.S. Department of Commerce, with current personnel costs and a contingency factor of 25%. Total asset retirement obligations, included in accounts payable and accrued liabilities, of \$15,057,000, and deferred outflows of resources of \$12,405,000, are included on the statement of net position as of June 30, 2019. USM is financially prepared to fund and satisfy all asset retirement obligations when required.

Notes to Schedule of Employer Contributions

	Notes to Schedule of Employer Contributions
Valuation Date:	June 30
	Actuarially determined contribution rates are calculated as of June 30, which is 12 months prior to the
	beginning of the fiscal year in which contributions are reported.*
Methods and Assumptions Used to Det	ermine Contribution Rates:
Actuarial Cost Method	Entry Age Normal
Amortization Method	Level Percentage of Payroll, Closed
Remaining Amortization Period	21 years
Asset Valuation Method	5-years smoothed market; 20% collar
Other Information:	
Notes	There were no benefit changes during the fiscal year. Adjustments to the roll-forward liabilities were
	made to reflect the assumption changes associated with the 2018 Experience Study for the period
	July 1, 2014 to June 30, 2018. Assumptions first used for the 2019 actuarial valuation and used in the
	calculation of the Total Pension Liability for the fiscal year 2019 are as follows:
Inflation	2.60% general, 3.10% wage.
Salary Increases	3.10% to 11.60%
Investment Rate of Return	7.40%
Retirement Age	Experience-based table of rates that are specific to the type of eligibility condition. Last updated for the
-	2018 valuation pursuant to an experience study of the period 2014-2018.
Mortality	Public Sector 2010 Mortality Tables with generational mortality projections using scale MP-2018.

^{*}Prior to 2017, the Actuarially Determined Contribution is equal to the greater of, (1) The actuarially determined contribution under the System's funding policy before application of the corridor funding method, plus reinvested savings contributions and 2) Employer normal cost plus 30-year amortization of the unfunded liability, plus reinvested savings. Thereafter, the actuarially determined contribution is under the System's funding policy.

^{*} Schedule is intended to show information for 10 years. Additional years will be displayed as they become available.

Notes to Required Supplementary Information For the Year Ended June 30, 2019

Budgeting and Budgetary Control:

The Maryland Constitution requires the Governor to submit to the General Assembly an annual balanced budget for the following fiscal year. This budget is prepared and adopted for the General Fund, which includes all transactions of the State, unless otherwise directed to be included in another fund and the Special Fund, which includes the transportation activities of the State, fishery and wildlife funds, shared taxes and payments of debt service on general obligation bonds. In contrast, the GAAP special revenue fund includes the operations (other than debt service and pension activities) of the Maryland Department of Transportation. The budgetary Federal fund revenue and expenditures are included in the GAAP General and Special Funds as federal revenues and expenditures by function. An annual budget is also prepared for the Federal Fund, which accounts for substantially all grants from the Federal government, and the current unrestricted and restricted funds of the Universities and Colleges. In addition to the annual budget, the General Assembly adopts authorizations for the issuance of general obligation bonds. The expenditures of the resources obtained thereby are accounted for in the capital projects fund.

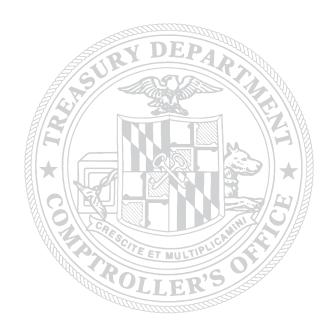

All State budgetary expenditures for the general, special and federal funds are made pursuant to appropriations in the annual budget, as amended from time to time, by budget amendments. The legal level of budgetary control is at the program level of the general, special and federal funds. State governmental departments and independent agencies may, with the Governor's approval, amend the appropriations by program within the budgetary general fund, provided they do not exceed their total general fund appropriations as contained within the annual budget. Increases in total general fund appropriations must be approved by the General Assembly. For the fiscal year ended June 30, 2019, the General Assembly approved a net increase in General Fund appropriations of \$52,079,000. Appropriations for programs funded by, in whole or in part, from the special or federal funds, may permit expenditures in excess of original special or federal fund appropriations to the extent that actual revenues exceed original budget estimates and such additional expenditures are approved by the Governor. Unexpended appropriations from the general fund may be carried over to succeeding years to the extent of encumbrances, with all other appropriations lapsing as of the end of the fiscal year. Unexpended appropriations from special and federal funds may be carried over to the extent of (a) available resources, and (b) encumbrances. The State's accounting system is maintained by the Comptroller in compliance with State Law and in accordance with the State's Budgetary Funds. It controls expenditures at the program level to ensure legal compliance. The "Agency Appropriation Unencumbered Balance Report," which is available for public inspection at the Office of the Comptroller, provides a more comprehensive accounting of activity on the basis of budgeting at the legal level of budgetary control.

The original and amended budget adopted by the General Assembly for the general, special and federal funds is presented in the Schedule of Revenues, Expenditures and Encumbrances, and Changes in Fund Balances, Budget and Actual for the year ended June 30, 2019. The State's budgetary fund structure and the basis of budgeting, which is the modified accrual basis with certain exceptions, differ from that utilized to present financial statements in conformity with generally accepted accounting principles. The budgetary system's principal departures from the modified accrual basis are the classification of the State's budgetary funds and the timing of recognition of certain revenues and expenditures. A summary of the effects of the fund structure differences and exceptions to the modified accrual basis of accounting, as of June 30, 2019, is provided in the "Reconciliation of the Budgetary General and Special Fund, Fund Balances to the GAAP General and Special Revenue Fund Balances" immediately following the budgetary schedule.

Combining Financial Statements

COMPREHENSIVE ANNUAL FINANCIAL REPORT, STATE OF MARYLAND

Non-major Governmental Funds

Debt Service Funds

General Obligation Bonds, Debt Service Fund: Transactions related to resources obtained and used for the payment of interest and principal on general long-term debt obligations are accounted for in the general obligation bonds debt service fund.

Transportation Bonds, Debt Service Fund: Transactions related to resources obtained and used for the payment of interest and principal on transportation long-term debt obligations are accounted for in the transportation bonds debt service fund.

Capital Projects Funds

Transactions related to resources obtained and used for the acquisition, construction or improvement of certain capital facilities, including those provided to political subdivisions and other public organizations are accounted for in the capital projects fund. Such resources are derived principally from proceeds of general obligation bond issues, federal grants and operating transfers from the State's general fund. The State enters into long-term contracts for construction of major capital projects and records the related commitments as encumbrances.

Non-major Enterprise Funds

Transactions related to commercial types of activities operated by the State are accounted for in the enterprise funds. The non-major enterprise funds consist of the economic development insurance programs of the Department of Housing and Community Development and Maryland Correctional Enterprises, which utilizes inmate labor from State correctional institutions to manufacture goods, wares and merchandise to be sold to State and federal agencies, political subdivisions and charitable, civic, educational, fraternal or religious associations or institutions.

Fiduciary Funds

The Pension and Other Post-Employment Benefits Trust Funds include the Maryland State Retirement and Pension System, Maryland Transit Administration Pension Plan, Deferred Compensation Plan and Post-Employment Health Benefits Trust Fund. The Pension Trust Funds reflect the transactions, assets, liabilities and net position of the plans administered by the State and the Maryland Transit Administration and are accounted for using the flow of economic resources measurement focus. The Deferred Compensation Plan, which is included with a year end of December 31, accounts for participant earnings deferred in accordance with Internal Revenue Code Sections 457, 403(b), 401(a) and 401(k). Amounts deferred are invested and are not subject to Federal income taxes until paid to participants upon termination or retirement from employment, death or for an unforeseeable emergency. The other Post-Employment Health Benefits Trust Fund (OPEB Trust) accumulates funds to assist the State's Employee and Retiree Health and Welfare Benefits Program finance the State's postretirement health insurance subsidy. The OPEB Trust is administered by the Board of Trustees for the Maryland State Retirement and Pension System, and its transactions and account balances are accounted for using the flow of economic resources measurement focus.

The agency funds are custodial in nature and do not present the results of operations or have a measurement focus. The State uses agency funds to account for the receipt and disbursement of patient and prisoner accounts, various taxes collected by the State for distribution to the Federal government and political subdivisions and amounts withheld from employee's payroll.

Non-major Component Unit Financial Statements

Non-major Component Units

Non-major component units are comprised of the following proprietary fund type entities:

Maryland Environmental Service

The Maryland Environmental Service was created as a body corporate and politic. The Service helps private industry and local governments manage liquid, solid and hazardous wastes. In accordance with direction from the Governor, the Service plans and establishes major resource recovery facilities, solid waste management plans and hazardous waste management programs.

Maryland Industrial Development Financing Authority

The Maryland Industrial Development Financing Authority was established as a body corporate and politic and a public instrumentality of the State to provide financial assistance to enterprises seeking to locate or expand operations in Maryland.

Maryland Food Center Authority

The Maryland Food Center Authority is a body corporate and politic which was created to establish and operate a consolidated wholesale food center within the Greater Baltimore Region and is subject to State regulations.

Maryland Technology Development Corporation

The Maryland Technology Development Corporation was established as a body corporate and politic and a public instrumentality of the State to assist in the commercialization of technology developed in the universities and the private sector. The Corporation administers the Maryland Technology Incubator program, Maryland Stem Cell Research Fund and Maryland Venture Fund.

Statistical Section

COMPREHENSIVE ANNUAL FINANCIAL REPORT, STATE OF MARYLAND

STATISTICAL SECTION

This part of the State's comprehensive annual financial report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the State's economic condition.

Table of Contents

Einanaial Tuanda	
Financial Trends	
These schedules contain trend information to help the reader understand how the State"s financial position and well-being have changed over time	138
Revenue Capacity	
These schedules contain information to help the reader assess the State's most significant own-source revenues	146
Debt Capacity	
These schedules present information to help the reader assess the affordability of the State's current levels of outstanding debt and the State's ability to issue additional debt in the future	150
Demographic and Economic Information	
These schedules offer demographic and economic indicators to help the reader understand the environment within which the State's financial activities take place	154
Operating Information	
These schedules contain service data to help the reader understand how the information in the State's financial report relates to the services the State provides and the activities it performs	156

Sources: Unless otherwise noted, the information in these schedules is derived from the comprehensive annual financial reports for the relevant year.

⁽¹⁾ See the Expenses by Function, Primary Government and Revenues, Primary Government schedules for detailed information on expenses and revenues.

⁽²⁾ Beginning net position balances were restated for fiscal year 2009 to recognize pollution remediation obligations for governmental activities and a prior period adjustment for capital assets of the Maryland Transportation Authority in the business-type activities. Beginning net position was restated for fiscal year 2010, 2014, 2015 and 2018 due to implementation of GASB Statements No. 53, 65, 68 and 75, respectively.

⁽¹⁾ For general obligation bonds, the debt limit is based on separate enabling acts for particular objects or purposes that are enacted during each legislative session. There is no separately mandated maximum amount for the issuance of general obligation bonds. For transportation bonds, the General Assembly each year establishes a maximum aggregate outstanding amount that does not exceed \$4,500,000,000.

⁽²⁾ The 2018 session of the General Assembly established a maximum outstanding principal amount of \$874,700,000 as of June 30, 2019, for all nontraditional debt of the Department. Nontraditional debt outstanding is defined as any debt instrument that is not a Consolidated Transportation Bond or GARVEE bond. This debt includes certificates of participation, debt backed by customer facility charges, passenger facility charges, or other revenues, and debt issued by the Maryland Economic Development Corporation or any other third party on behalf of the Department.

Source: The Maryland Department of Transportation, The Secretary's Office, Office of Finance.

⁽¹⁾ The State's sales tax and the Vehicle Excise Tax (Titling tax) was increased from 5% to 6%, effective January 1, 2008. In addition, effective July 1, 2008, the percentage of titling tax retained by the Department was increased incrementally to fiscal year 2014 from 76% to 93.6%.

⁽²⁾ The Department was allocated 6.5% of the State's sales tax effective July 1, 2008. The distribution was reduced to 5.3% in fiscal years 2010 and 2011 and ended July 1, 2011.

⁽³⁾ The Transportation Trust Fund transferred \$40,000,000 of the Department's share of Highway User Revenues to the Revenue Stabilization Account in fiscal year 2012.

⁽⁴⁾ The allocation of the corporate income tax to the Department was changed from 24% to 17.2% in fiscal year 2012, 9.5% in fiscal year 2013, 19.5% through fiscal year 2016, and 17.2% thereafter.

⁽⁵⁾ The motor fuel tax rate was increased based on growth of the Consumer Price Index and applies a sales and use tax equivalent to the price of motor fuel beginning in fiscal year 2014.

⁽¹⁾ These amounts are estimates.

⁽²⁾ Maryland's portion of the National Highway System was recently expanded beginning in 2013 due to Federal Highway Legislation.

⁽³⁾ Restructuring of training programs in 2009 has led to reduced funding for the Partnership for Workforce Quality Program (PWQ) through 2017.

⁽⁴⁾ CDA relies completely on the reporting of two different Master Servicers on the underlying loans that comprise the Mortgage-backed securities held by CDA at fiscal year end.

⁽⁵⁾ Large reduction of faculty count is due to exclusion of faculty at Clinical Medicine at UMB, faculty at extension services, and continuing education faculty beginning in 2013.

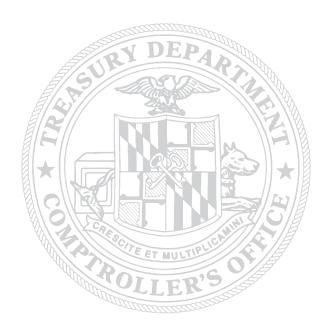

⁽⁶⁾ Legislative scholarships are not included due to a change in awarding practices begun in FY 2012.

⁽⁷⁾ Crashes investigated by Maryland State Police; prior to 2016 included allied agencies.
