

ANNUAL REPORT

FY 2021

Looking back over fiscal year 2020-2021, the word that comes to mind most often is adaptation. The Queen Anne's County Library was proud to offer a year of adaptive practices, allowing us to continue to serve our communities as we re-opened doors, resumed services and continued with remote and off-site programs and offerings. In the coming year we will continue our mission to empower our community through easy access and connections to knowledge and opportunities. Eliminating barriers to access and ensuring equity in all of our library services will continue to be our focus in FY 22. As we prepare to welcome more people through our doors with in-person programming and meeting room spaces, we also look forward to the completion of our Kent Island Branch expansion, allowing more spaces and technology to best meet community needs. We thank all of our community supporters who helped make this expansion and renovation a reality and we look forward to a new year of continued growth and opportunities to serve.
