DESCRIBE THE PRESENT AND ORIGINAL IF KNOWN PHYSICAL APPEARANCE

The building has facades facing Fayette and Green Streets. The facades are discussed respectively.

The facade is 7 bays wide and 3 stories high with running bond brick building and stone foundation walls. From the east, the first bay is punctuated by a continuous two-story high half-arched window. At the second story facade it is flat and double hung with six-over-six lights; on the second story it is half-arched, double hung with six-over-twelve lights. These two windows, which comprise one, are accompanied by a wood sill and half-arched brick lintel. The window is housed in a shallow recession. The third story facade of this bay is punctuated by three double hung flat windows with one-over-one lights, stone sills, and played brick lintels. The main story facade is punctuated by a double hung window with sixteen-over-fifteen lights, a high pitched gable and with a mansard effect on the upper half bay.

The adjacent bay to the west is punctuated at the first story facade by a pair double doors and accompanying flat half light transoms which surround two stone steps and a stone stoop.

The door and transom are housed in a marble surround with a half pediment. The second story facade is punctuated by a double hung half window of six-over-six lights, stone sills, and played brick lintel. The third story facade is punctuated by two flat windows double hung with one-over-one lights and accompanied by stone sills and played brick lintels. The remaining four bay facades are punctuated by a flat double hung window of six-over-six lights with stone sills and half-arched brick lintels. The main story facade continues with these four bays in a high pitched gable end with a mansard effect punctuated by a gable end half-arched casement window with a stone sill and half-arched played brick lintel.

The Green Street facade is five bays wide and three stories high with brick building and stone foundation walls and symmetrical fenestration. A painted wood cornice supported by brackets spans the facade wall. From the south the first four bays are identical, with each facade of each bay punctuated by two flat windows of six-over-six lights with stone sills and half-arched brick lintels.

The first bay facade of one northernmost bay is punctuated by two flat wood doors and accompanying flat single light transoms that surround a stone stoop. The doors and transoms are housed in a marble surround that carries the school name. Two flat casement windows of six-over-six lights and sharing the same half-arched brick lintel and stone sill surround the door hooding. The second and third story facades of this bay are each punctuated by a flat double hung window of six-over-six lights, stone sill, and half-arched brick lintels.

Fenestration is symmetrical throughout the building facades.

SPECIFIC DATES _____ BUILDER/ARCHITECT _____

STATEMENT OF SIGNIFICANCE

Significant as an example of adaption of Queen Anne style to institutional architecture. One of the best examples of this treatment remaining in the business district.

Possibility of adaptive use.
