My dear Freund

I am glad to know of the progress you are making with the scheme for a psycho-social Institute and will expect to hear further from you. As I have assured you before I am anxious to aid you in any

way that seems possible when the final form of the undertaking is determined. Besides such assurance you know my interest in Mexico in the enlightened measures of your department. You has my good wishes for the new bill of which you send a section - an admirable section.

I am now expecting - unless held back by something - to sail for England on June 13 or 20, to be gone probably until about Sept. 1 - largely for rest and pleasure! If you can use me for the purposes of seeing men - having your plans mature enough by that time - pray let me know. Re.
