

have been in your paper, over the signature of "A Mechanic and Subscriber," in which are proposed Messrs. STEPHEN and ELLICOTT. The political sentiments of the former are well known, and so, indeed, are those of the latter. Mr. E. stands high in the opposition party; and that the people of Baltimore (three fourths of whom are well known to differ from him in political opinions) should delegate him to speak their sentiments, and to enact laws for their government, is to me matter of astonishment. An "Union of honest men," has been sounded by the oppositionists from New-Hampshire to Georgia; and although I attribute no dishonesty to either party, yet it is an indisputable fact that there is a great discordance between the opinions of the different parties, both as to the forms of constitutions, and the manner of executing the laws. I trust, therefore, that the Republicans of Baltimore will not suffer themselves to sink into a state of apathy or to trust their rights in the hands of those who, when in power, strove to degrade a great portion of their fellow-citizens below the scale of rationality, by styling them the "swinish multitude." That our public affairs may continue to be conducted in the same fair and liberal manner in which they are at present, must, I think be the sincere wish of every true American and honest Republican. For that purpose, therefore, I take the liberty of proposing, as our next Delegates from the City of Baltimore, to the General Assembly of Maryland, Messrs. JOHN STEPHEN and THEODORE BLAND, gentlemen who, I am persuaded, will always hold in view the best interests of the people.

**A MECHANIC.**

Among the many nominations of republicans to offices of honour, none seem to have so much weight as that of James J. Wilkinson, esq. of this city: as representative to the general assembly; but as some of our republican citizens may not be acquainted with him, it is necessary to inform them, the claim he holds on their independent suffrages as a decided democratic republican—while his country was toiling for its independence, and his relations and friends all engaged in her cause, his youth precluded his exertions, but his father, general Joseph Wilkinson, stood one of the foremost in that glorious struggle, whose exertions with those of his brother gen. Wilkinson of the American army, and now governor of the Mississippi territory, need not be the theme of panegyric to the voters of Baltimore city—'tis only necessary to say—he is the son of the one, and the nephew of the other, and if any thing else is wanting, he is also the nephew of the present governor of Maryland; men, whose patriotism, energy or valour dare not impeach.

Educated in mercantile pursuits, and acquainted with the real interests of this state, the encouragement of agriculture and the mechanic's prosperity are to him an object of primary importance; and having the advice of his friends, he has consented to serve, and hold that station, whatever it may be, which his country calls on him to fill—an ambition worthy the son of the father. Let, then, every man who respects the good old cause, put his hand to the plough, and let the industrious mechanic shove the plane which brings independence in support of the pure American blood, whose fathers and forefathers have secured to them; let them elect a man whom they have the security of a race of worthy relations as a guarantee for his civism and the real interests of the state, an enemy to monopoly and oppression, either abroad or at home—and no federalist.

**TRUE BLUE.**

As the time is fast approaching when it will be necessary for you to exercise the right of suffrage, and to designate suitable characters to represent you in the General Assembly of the state; I take the liberty of recommending to your notice and support, Mr. EDWARD ARSQUITH, as a gentleman fully qualified to discharge the important duties of a legislator. His talents and his principles are too well known to require any eulogy at this period, and as it is the wish of numbers that he should be put in nomination, an opportunity will now occur, by electing Mr. A. to give dignity and importance to your choice.

**A VOTER.**

We understand that Mr. POWELL, Manager of the Boston Theatre, intends appropriate an early night, in the ensuing theatrical season, for the benefit of the Orphan Children of the late much respected Mr. Hodgkinson.

The successful conduct of the war at Tripoli has given honor to the United States before all nations. It had been the subject of ridicule to some speculators at home, who are obliged in silence to behold the new honors it will bring to our administration.

We must expect every effort will be made by the British to embitter our minds against Spain. But happily for us they have no influence in that count. Should the war break out with Spain, the English could plunder us more sure. But as the present state of Spain forbids all its abilities for the present war, we have reason to hope that many circum-

stances will facilitate an accommodation with advantages to these states. We apprehend war, from any circumstances we possess, very little.

The attachments of the interior states to the present administration continue to increase universally. Our new friends in Louisiana, are reconciled beyond any expectations.

We are informed, that on Monday evening about 8 o'clock, a man on horseback, belonging to Framingham, was stopped on Medford turnpike, by two armed footpads, and robbed of 150 dollars. He at first attempted to escape, when they fired their pistols at him—the bullets missed the rider, but lodged in the body of the horse.

**GIDEON GRANGER, Esq.** Postmaster-General, we understand, is at Suffield, Connecticut, dangerously ill of a fever.

The Board of Health of Philadelphia report, for 24 hours ending on Saturday at 12 o'clock—five admissions into the hospital—two deaths—two discharged, cured—sixty nine patients in the house—twenty-three convalescents—six cases in Southwark—two in the city—and twenty-one adults and three children buried.

A British ministerial paper says—"So severe are the orders to blockade the enemy's ports, that our cruisers are directed to stop all neutrals attempting to enter them."

Account of flour, butter, and lard, inspected within the city and precincts of Baltimore for the last quarter, ending the 30th day of September, 1805. 83,706 barrels of wheat flour, 6,026 half barrels do., 262 barrels of rye flour, 122 do. of Indian meal, 1,190 kgs of butter, 446 do of lard.

**COUNTERFEITS.**—Last night a young man, a native of Bremen, was taken up in the Northern Liberties, by the police officers, with several counterfeit bank notes in the various stages of completion. It appears, that he has been employed, during 6 or 8 months past, in executing with considerable ingenuity, the notes of the different banks of this city. All the figures, &c. are drawn with a fair pencil, an operation manifestly requiring much time and perseverance. The paper is of common flimsy texture, which he has rendered plausible probably by some chemical process. He has, however, in many of them betrayed an ignorance of the language, by grossly misspelling the words; and the names of the president, &c. although traced from the genuine signatures, are often most clumsily mistated. A tailor, who appears to have acted as the circulator of these spurious notes, was apprehended at the same time. The officers employed deserve much praise for their persevering vigilance.

**Mammoth Tree.**—This remarkable tree stands in the town of Jefferson, Cayuga county, on the land of John Swartwout, Marshal of the district of New York. It measures 47 and a half feet in circumference, and contains a hollow in which at least 17 men can march and stand in a circle. This enormous production of nature is said to be button-wood, and is supposed to have been the habitation of Indians and hunters a number of years ago. Being at first a natural hollow, the inside is probably somewhat improved by art, having one side open as a door; the largeness of the hollow is astonishing, making quite a large and commodious apartment. What renders this tree the more singular is that it is still green and thrifty, and may continue growing larger for a number of years to come.

**Jefferson, (Cayuga county) Sept. 6.** To ALL WHO DISBELIEVE.—Be it known, that we the subscribers, instigated by curiosity, have this day seen a TREE in the above town on the Montezuma Estate, which measured 47 and a half feet in circumference, two feet above the surface of the earth. This tree contained a hollow, into which we all walked, and stood in a circle, as far round as our number extended; the circle being incomplete by at least six men; on exact measurement we found the diameter of the hollow on the surface to be upwards of fifteen feet.

During the Pop's late residence at Paris, the most constant homage was paid to him by numerous exhibitions to explain the progress of the useful arts in that country. One circumstance, however, but little known, though unparalleled in the Annals of Printing, deserves to be recorded: On the 1st of February, his holiness visited the Imperial Printing Office. As he passed along the galleries, 150 presses furnished him, as he passed, with a sheet each, upon which was given the Lord's Prayer in some different language or dialect. In Hebrew, Samaritan, Chaldee, Arabic, Syriac, Rabbinical, ancient and vulgar Arabic, Armenian, Persian, and

also all the languages and letters of the Crimea, of the Malay, of Java, of Indostan, of the Mogul Empire, of China, and of Tartary; in all forty six dialects of Asia. We cannot enumerate all the European languages and dialects, but they amounted to 75. Africa furnished 12, and America the remaining 17. The reputation of the French press is well known, and the constant attention paid by that nation to the art of printing, even amidst their revolutionary horrors, enabled them to pass before the eyes of the Roman Pontiff whatever has been employed to improve or enrich the noblest and most useful art known to man.

*[Boston, September 26.]*  
The ship **George & Harriet**, from Boston, for Havana, on the 30th July, lat. 32, long. 61, encountered a hurricane. During the storm a sea struck her, which carried away the bowsprit and all the masts, forced open the hatchways, started off the stern, and washed overboard all the hands on deck, of whom one man perished. She very soon filled with water, but being loaded with lumber did not immediately founder. The crew continued on deck 15 days, and were finally saved by the brig **Orient**, who took them off and carried them to Guadeloupe.

**FROM NANTUCKET, 9 mo. 21st, 1805.**  
*Messrs. Russell & Cutler,*  
"This day arrived here, sloop Hawk, Starbuck, 21 days from Alexandria and 8 from Norfolk. Captain S. informs, that the fever had broken out at Norfolk, and that it was quite sickly. On the 19th instant, lat. 40, N. long. 71, 30, W. capt. S. was boarded by the second mate of the ship Hamilton, Adame, (then in sight) from Bordeaux for New-York, who informed him, the Hamilton, within 50 miles of Sandy Hook, was captured by the British sloop of war Busy, and ordered for Halifax. Captain Adams was on board his own ship, and requested his owners in New-York might be informed of it, through the medium of the papers."
