For sale, Freight or Charter,
The new patent Brig
ACHILLES,
Of about 166 63-95 tons burthen, then, built under the inspection and direction of Mr. G. Livingston, of Poughkeepsie—all her plank, walrus, knees and oak timber, have been well water-seasoned and dried before they were used, (which management has heretofore, on a vessel built at the same place, and by the same person, insured a duration of more than 18 years, without a single graving piece in either whales or bottom, although owned and used in the West-Indies about 15 years of the time.) Her two lower rudder hinges are copper, as are the spikes at her hood ends; all her butt bolts and iron spikes are composition covered, so that she is ready for coppering.
The Achilles has been one voyage to the W. Indies, and is, by the captain and mate who sailed in her, supposed to be not only the fastest sailing vessel they ever met with, but one of the best of sea boats, carrying her spars and canvas at least equal, if not superior to any other vessel they have ever seen. When going out, although very deeply laden, she made ten miles an hour close haul on the wind; and returning, although her bottom was very foul, in 23 hours from opposite Cape Charles light-house, directly E. she ran so as to bring the light house at Sandy Hook, directly W. a distance very considerably beyond 500 miles; including the trais she made in her course, the average run was between 13 and 14 knots an hour.—Enquire of
