

the method of proceeding that would have rendered your Services most useful and agreeable to his Majesty. But as you say you are determined not to be so diverted, let your Proceedings give Evidence of the Sincerity of your Words, and I shall rejoice at it, and shall willingly lose the Remembrance of your extraordinary Behaviour towards myself, in the Pleasure I shall receive, when I shall see your Actions correspond with the Protections you make of Duty to his Majesty and Affection for his Service: This is the great Point you are met upon, and I must say, you have already let so much Time go by, that you have no more to lose, if you really mean to act like good Subjects, and avoid an odious Distinction that must inevitably be made between the Behaviour of a Maryland Lower House of Assembly and that of all the other Colonies, who have been applied to on this important Business.

As for not giving you an Answer to your Address in relation to the Levy of One Pound of Tobacco per Poll, I have deferred it purely in respect to his Majesty's Service, which ought to have engrossed our whole Attention, and which if it had, would have saved me the Pain of answering an Address of so strange a nature as what you have sent me this Day, which as I know to be the Production of a few, so to a few, very few do I impute it.

Mr. Green;

The inclosed is a Postscript of a Letter I received lately from London: As it is something curious, it may be agreeable to many of your Readers to have it inserted in your Gazette. I have no great Faith in Jesuitical Prophecies; yet I cannot but hope the Author of this Piece will be a true Prophet. I am, Sir, &c.

Angl. Give Peace in our Days O Lord, because there is no other that fighteth for us, but only thou our God.

This is a French Prophecy, said to have been made by a Jesuit at Paris. The Sense of the Words, and the Addition of the Figures, arising in that Order from the Vowels, are certainly to give us a Peace in the Year 1745.

This is a pretty extraordinary Invention, and much admired by the Curious here in England; as they say not less firmly believed and relied on by great Numbers in France; as the Author is said to have made several other Predictions, which have really proved true.
