Our Washington Letter.

From our regular correspondent
Washington, Aug. 31, 1888
Senator Sherman during the course of a speecn in the Senate, made the startling announcement that in 1885 the balance of trade (with foreign countries) was in favor of the United States to the amount of \$163,000,000, while in the fiscal year ended June 30, 1888, it was \$49,000,000 against the United States Senator Beek contended that the balance in our favor last year was \$6,000,000. Taking either stat ment 2s correct, the effect is perfectly astounding, and such a state of things cannot keep up without danger of a serious financial panic in this country.

The man who in this world would rise.

Must either bust or advertise.

It is said that the juice of the was a fact of things cannot keep up without danger of a serious financial panic in this country.

in this country.

The preceedings of Congress are very amusing these days. They consist mostly of what would be called, in the language of the prize rang, sparring for position. And the agil.

It is said that the juice of the was lapsed about 5:30 a. m. and buried nine of the firemen.

Two of them—A. L. Eck and John Kelley—were taken out alive, but in Church Hill, containing 2 acres.

Sparring for position. And the agil.

Sparring for position. And the agil. sist mostly of what would be called, in the language of the prize rang, sparring for position. And the agility displayed by the members of both parties in jumping over and under a given question is very funny to a person that is not interested; but it, as some chance word may result in losing the member the coveted remomination from his district. Let us be thankful we are not politicians.

Senator Allison's statement makes the appropriations for the current fiscal year \$421,000,000, and the estimated income from all sources \$440,000,000. That will leave a surplus of \$19,000,000 jrst about the sum that \$19,000,000 jrst about the sum that \$101.20. Same to same. Lot in Church Hill, containing 2 acres. Consideration \$101.20. The company recognize what many others are beginning to do, that although this peninsula is the greatest fruit-producing section for the size in the world, yet it is not producing one half the fruit and vegetables it is capable of doing. It is susceptible of being made a veritable garden. Labor capital and additional skill are what are peeded. This is a fact to which being made a veritable garden. Labor capital and additional skill are what are peeded. This is a fact to which Baltimere City could bear testimony if the peninsula were more accessible by railroad to the metropolis of the state.
