A CARD

FROM
J. MONROE MERCER,
OF "FONT HILL,"
Hochester Post Office,
Howard Co., Md.

To the Farmers of Howard County:
Having long felt the need of some FOOD FOR CROPS more lasting and valuable than any of the popular fertilizers of the day, I have watched with interest and sought diligently to discover a manure which would combine in large proportions, regardless of cost, those elements which would restore permanent fertility to the soil.
Having been a farmer for many years myself, with large opportunities for observation of the effect of many different fertilizers, I have never been altogether satisfied with any until I tried

The Popplein Silicated Super-Phosphate of Lime.

On an indifferent piece of land I have raised with this manure two corn crops and an oat crop, all very large, in the successive years, and the last of these crops (corn) planted Jan. 27th of this year, being now from 10 to 14 feet high, with large stalks and ears, rapidly maturing, which I will take great pleasure in showing to my neighbors.
To insure the introduction of this most valuable manure into our county, I have consented to be made sole agent for its sale in the county, and offer it to my friends and the public at the unprecedented low price of \$38.00 per ton.

Human Sacrifice in India.

A case of samadh has recently occurred in the district of Kaira in Gujarat. The particulars were furnished to me by Mr. Frederick Sheppard, the energetic Collector, in whose camp I stayed twice during my Indian travels.

In what may be called the Brahminical period of Hindoosim, human sacrifice must have prevailed. It is even believed by many that the sects called Sakta formerly ate portions of the flesh and drank the blood of the victims sacrificed at the secret orgies. The first idea of sacrifice seems to have been that of supplying the deities with nourishment. Gods and men all feasted together. Then succeeded the notion of the need of vicarious suffering, or life for life, blood for blood. Some deities were believed to thirst for human blood, and the blood of animals was substituted for that of men. Other forms of immolation were once common in India.

The Thugs maintained that they sacrificed to the gods. On returning to my camp I ordered the apprehension of all those who had assisted in the samadh, and soon afterward received a report that the man had been actually buried in a vault in his own house, but had been taken out alive. He was, however, very weak, and died the following morning.

It was then reported to me that the limbs, though cold, had not stiffened, and the people, ready as of old to be deceived, and always inclined to attribute the smallest departure from the ordinary course of events to supernatural agency, declared that the Bhat was not dead, but lying in the samadh trance. There was, however, no doubt as to the fact that the limbs, though cold, had not stiffened, and the people, ready as of old to be deceived, and always inclined to attribute the smallest departure from the ordinary course of events to supernatural agency, declared that the Bhat was not dead, but lying in the samadh trance.

Our Cousin the Gorilla.

Mr. Pongo is a very nice beast, but he is not so clever as Augustus, nor so sympathetic as Flok, and one feels about him after a little while as one feels about the heavy child in a nursery, that he is good and safe, but hardly amusing. There is something disconcerting about him, too, though it is in one's own mind, not in his nature, as the inclination, to treat him rather as a human being, the unattractive, than as an animal of the exceptionally intelligent kind. One speaks to him with marked distinctness and emphasis, and puts him, not with the flippant smartness one would bestow upon "Nature's Punchinello," his companion, but gravely, and with an effort to make him understand, as one might put one of the harmless "cases" at the Earlwood Asylum. In the quiet heaviness of his manner there is something that makes one feel patient and painstaking, as with a creature of slow brain and perception; and when he claps his dreadfully human hands, with the black skin in wrinkles on them like ill-fitting gloves, and pounds them on the floor, demanding notice and applauding himself, one claps and nods at him just as one would at a deficient. He is singularly dumb, too, rarely uttering any sound at all, while one of his friends chatters freely, and the other barks in all the exuberant delight of games of play, of which Mr. Pongo is for the most part only a spectator, decidedly at a disadvantage where general liveliness is in question. When seated on the ground, with his gray back, his round, neatly-formed head, with comparatively small and close-set eyes, turned to the right, one, as long as he sits, his small legs, so disproportionate in size to his powerful arms, hidden, his lean thighs tucked close to his thick, bulging, rigid sides, he is wonderfully like a very strongly-built child to whom "rickets" has come unaccountably and in contradiction of his apparent constitution. Mr. Pongo's face is ashy, and his attention is declared him to be "very good natured"; the eyes are serious and quiet, but no means so melancholy as the eyes of most monkeys with whom we have previously been acquainted; and when he hitches himself against the wires of his cage, his legs extended, one arm lying across his chest, and the other raised, he looks like a child, and his attention is declared him to be "very good natured"; the eyes are serious and quiet, but no means so melancholy as the eyes of most monkeys with whom we have previously been acquainted; and when he hitches himself against the wires of his cage, his legs extended, one arm lying across his chest, and the other raised, he looks like a child, and his attention is declared him to be "very good natured";
