

A - V - A - 028  
Old Porter Farm  
Eckhart

c. 1840

The Porter Farm House was built in the first half of the 19th century. It is built in the "salt box" style and is covered by clapboards. The windows are two-over-two and six-over-six lights with plain trim. A three bay end porch with shed roof covers the main entrance and the roof is presently supported by locust poles. The main entrance features the original verticle paneled door and hardware.

# 7. Description

<input type="checkbox"/> fair	<input type="checkbox"/> unexposed			

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The Porter farmhouse is located on the east side of Route 638 and north of Cemetery Road to the north of Eckhart. The two-story log house is situated along the southern side of a bowl-shaped meadow which drains to the northeast.

The two-story log structure rests on a stone foundation. The three-bay facade faces south. A porch covers the facade, and a vertical-plank shed-roofed addition covers the rear. The main structure is covered by a metal-clad gable roof. An interior brick stove-flue chimney at the west end may replace an earlier chimney occupying this position.

The facade includes a central entrance. Doors are located on either floor level on the west end. The first floor doorway appears to have been cut in later, and may have originated as a window. The second floor doorway includes apparently original moldings.

Double-hung 6/6 sash windows framed with a quirk ogee/astragal molding light the facade. A small square window lacking its sash appears east of center on the second floor of the facade. Two windows, now boarded up, are located on the rear of the shed addition.

Plain lapped weatherboards cover the entire house. The V-notched logs are exposed and whitewashed under the porch.

The interior consists of a hall and parlor floor plan with a beaded board partition wall. A boxed stair occupies the northwest corner. Beaded chair rails and baseboards appear on both floor levels. A simple mantel stored on the second floor includes a molding matching those on the architraves.

Prepare both a summary paragraph of significance and a general statement of history and support.

The old Porter farmhouse was built in the early to mid nineteenth century as a residence for the Porter family. The Porter name is one of several early settler names to have moved into Western Maryland, and this frame house is associated with one of the early Porter land claims. The Porter family has always owned the land and a more modern one-and-a-half story farmhouse now is used as the family residence.

Although this property is believed to have been owned by the Porters in the early 19th century, the title search is blocked by mid 19th century New York Mining Company ownership. The house appears to have been constructed in the first half of the 19th century.

The size of the building and the hall and parlor floor plan is typical of early buildings in George's Creek, such as the Thomas Wright Farm (AL-VI-B-036). A significant early feature is the sparse fenestration of the second floor. On the facade, a single small window is placed off center.

**DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE**

The old Porter Farm house is located along Route 638, Parkersburg Road in Eckhart, Allegany County on the east side of the road at the intersection of Cemetery Road.

The old house consists of a two story, three bay wide square shaped facade. The house is a frame structure that is covered with clapboards, and is supported by a crude stone foundation with a plain water table. The roof of the structure is gabled with simple rafter ends and is covered with replaced tin materials. The windows in the house include double hung wooden sash frames with two-over-two and six-over-six lights and plain trim. The main entrance is located on the southeastern face and features the original verticle paneled door and hardware. A three bay end porch with shed roof, covers the main entrance and the roof is presently supported by locust poles. No evidence of any chimneys can be found on the roof, however the roof has been recovered and the original chimneys were most likely from pot belly stoves and made of metal materials.

The old farm house is badly deteriorated and practically in the state of ruins, however it is still used for the storage of farm tools.

**STATEMENT OF SIGNIFICANCE**

The old Porter farmhouse was built in the early to mid nineteenth century as a residence for the Porter family. The Porter name is one of the several early settler names to have moved into Western Maryland, and this frame house is a symbol of one of the early Porter land claims. The Porter family has always owned the land and presently a more modern one and a half story farm house now is used as the family residence.

Although the old farm house is now in ruins it remains a cultural reminder of the early settlers and farmers of Allegany County.

Date Constructed - Mid 19<sup>th</sup> - Early 19<sup>th</sup>  
Condition - Ruins

Key points regarding interior architecture.

1. Floor plan

No through hall--How many rooms long and deep?  
Where is stairway? Straight or winding?

With through hall--Rooms on both sides? How many?

Rooms on one side only? How many?

Is stair in through hall?

Open or enclosed? Straight--one run. Straight--landing

How many? Curved.

If not in hall, where is stair?

2. Wall finish: plaster, paneled, board partition

Note presence of chair rail, cornice, etc.

3. Fireplaces: How many? Parallel to walls or diagonal in corner?

Mantels: wood--mouldings, pilasters, columns  
masonry--marble(what color?), brick

3. Doors: on the inside of exterior doors, note the presence of applied flush boards and their direction (diagonal, vertical, horizontal). In general are doors paneled or ledge or other?

4. Door and window trim: plain, architrave; fluted, reeded; pilasters

5. Kitchen: Where is original if extant or known (marked by very large fireplace)? Separate building; wing to principal dwelling; within principal dwelling? On which floor of any of the above?

6. Note presence of wood (if any) on any wooden member described.
