

AL-V-A-285, Hoffman Hollow Survey District
Hoffman Hollow Rd.
Clarysville, Allegany Co. MD
Not Eligible

The Consolidation Coal Company built Hoffman Hollow in the late 1860s or early 1870s. This typical company town housed miners from the Hoffman mine. Although at its peak in 1880, 203 people lived in the town there are only about a dozen houses remaining today. Many of the buildings were destroyed during construction of Route 48, now Interstate Route 68.

The vernacular frame dwellings in Hoffman Hollow are mainly two-story or saltbox shaped buildings. They have been largely altered in design, materials, workmanship, and feeling by modern materials such as aluminum and vinyl siding and by additions. The adjacent interstate highway has drastically marred the entire setting. Therefore this survey district is recommended as not eligible for the National Register of Historic Places.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Hoffman Hollow Survey District is located on the northern side of Md. Rt. 48 east of the intersection of Rt. 48 and Rt. 36, south of Frostburg in the Georges Creek coal region of Allegany County. Hoffman Road travels NE to SW through the survey district. The terrain of the survey district is hilly.

A 1½ story, 4 bay by 2 bay log house, (AL-V-A-025, Map #3) has walls of v-notched logs. Additions and aluminum siding have obscured much of the original building.

The architecture of the survey district is characterized by vernacular-styled frame buildings. The majority of these are saltbox houses. The 1½ story, 3 bay by 1 bay structures rest on stone foundations and have gabled roofs. Shed-roofed porches shelter their facades. Shed-roofed additions abutting their rear elevations give these buildings the saltbox shape common to the Georges Creek region. An example is #15 on the attached map. One saltbox house in Hoffman Hollow, #16 on the attached map, is five bays wide, which may indicate that this dwelling was the home of a mine boss or foreman.

Several buildings in Hoffman Hollow are typical 2 story, 3 bay by 1 bay frame houses based on the ell plan. They rest on stone foundations and have gabled roofs. Shed or hip-roofed porches shelter their facades. An example is #2 on the attached map.

STATEMENT OF SIGNIFICANCE

Hoffman Hollow is a typical company town in the Georges Creek coal region of Allegany County. The town was built by the Consolidation Coal Company, probably during the late 1860's or early 1870's to house miners employed at the company's #3, or Hoffman Mine.¹ It was common in the Georges Creek region during this period for houses to "spring up" in the vicinity of newly opened mines.² The houses of the town were either built by the company or by employees of the company who leased building lots from the company.³ The monthly rent for Consolidation company houses in the early 1880's was between \$3.50 or \$6.00.⁴ The population of the town in 1880 was 203 people.⁵

The Hoffman Mine was one of the larger mines in the Georges Creek region. Approximately 500 men were employed in the mine early in the 20th century. ⁶In 1885 Consolidation installed the first ventilation fans in the region at the Hoffman Mine.⁷ It was one of only 2 mines in the region at which bathing facilities were provided for the miners.⁸ Most of the buildings associated with the mine were removed during the construction of Maryland Route 48.
