DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE	
<p>The 1860 Martenet map of Anne Arundel County shows Sweetzer's Bridge crossing the Patapsco River at approximately the same location as the present Route 648 bridge. Two buildings are marked on the South side of the river. The toll-house on the West side of the road and another structure, identified only as belonging to the Bridge Company on the Eastside of the road. It is not possible to determine from the maps whether or not the road (Route 648) alignment has changed since 1860 but it is believed that one of the two buildings marked on the map is still standing.</p> <p>A small 1 1/2 story brick house, located on the East side of the present road, stands out among the neighboring structures. It is commonly believed to have been the bridge-keeper's house.</p> <p>Several features make this building unusual. First, it is oriented with its end, rather than its front, elevation towards the road, allowing a clear view of the road for some distance in either direction. Secondly, it is one of two houses in the same area having a peculiar arrangement of chimneys. (see H.H. Thomas House [83]). The two chimneys rise flush with the long North wall. The fireplaces are oriented parallel to the roof-ridge rather than perpendicular as is the custom.</p> <p>The brick walls are laid in common bond. Each window opening is topped by a flat arch. The house stands on a full, raised basement. The West end wall, which faces the road has three bricked-in openings at the basement level. The one in the center has no arch. The others do.</p> <p>The front (South) elevation of the house has 5 bays with a door in the center bay. There are two dormers on the South side of the roof, one on the North side. The three windows on the North wall are irregularly spaced. All of the windows in the house have 6/6 pane sashes.</p> <p>There is a small frame addition, one story high on a brick foundation attached to the East end of the building.</p> <p>The house is in good condition.</p>
