

CAPSULE SUMMARY

BA- 527

**Foard-Hutschenreuter House
6200 East Hutschenreuter Road
Glen Arm, Baltimore County
Ca. 1850
Private**

The Foard-Hutschenreuter House was constructed circa 1850 near Fork Meeting House in the Eleventh District of Baltimore County. The house first appears on the 1877 Hopkins Atlas, indicating that Benjamin F. Foard was the resident. Remaining in the Foard family into the 20th century, the 1915 atlas shows the house occupied by Mrs. Foard. In the mid-19th century, the town of Fork Meeting House was a small rural community near Joppa Road and the Harford Turnpike. According to the 1850 Atlas of Baltimore County, the village had a post office, a meetinghouse, a tavern, and a number of dwellings. The town continued to remain small in nature and by 1877, there was also a hotel, a store, and the Fork School. In 1915, the map continued to show the schoolhouse, meetinghouse, store, and hotel. However, at this time, there appears to be a more densely populated residential area near the intersection of what is currently Harford and Fork Roads and the town was then referred to as Fork rather than Fork Meeting House.

The vernacular dwelling fronts northwest at the end of a long driveway. The original estate has been divided up and sparsely subdivided towards Mount Vista Road. The random rubble stone foundation supports a wood frame structure clad in vinyl siding. Standing two-and-a-half stories high and five-bays wide, the dwelling features a side gable, asphalt shingle roof with three interior end chimneys made of brick. Two of these chimneys rise from the crest of the main roof and have been rebuilt. The third chimney rises from the crest of the one-and-a-half story ell, both of which have been parged with concrete. Five 6/6 windows pierce the façade as well as three 6/6 vinyl windows. All the windows have square-edged vinyl surrounds. A portico that was added at a later date features square wood posts and a gabled roof. The portico protects the offset entry with its single-leaf, wood-paneled door. Projecting to the southeast is a one-story, shed roof addition with a concrete block foundation and vinyl siding. Extending beyond the length of the main block, the addition has paired vinyl 6/6 windows, two sliding two-light vinyl windows, and two wood doors that are paneled with lights.

7. Description

Inventory No. BA- 527

Condition

excellent deteriorated
 good ruins
 fair altered

Prepare both a one paragraph summary and a comprehensive description of the resource and its various elements as it exists today.

Built circa 1850, this vernacular dwelling fronts northwest at the end of a long driveway. The original estate has been divided up and sparsely subdivided towards Mount Vista Road. The random rubble stone foundation supports a wood frame structure clad in vinyl siding. Standing two-and-a-half stories high and five-bays wide, the dwelling features a side gable, asphalt shingle roof with three interior end chimneys made of brick. Two of these chimneys rise from the crest of the main roof and have been rebuilt. The third chimney rises from the crest of the one-and-a-half story ell, both of which have been parged with concrete. Five 6/6 windows pierce the façade as well as three 6/6 vinyl windows. All the windows have square-edged vinyl surrounds. A portico that was added at a later date features square wood posts and a gabled roof. The portico protects the offset entry with its single-leaf, wood-paneled door. Projecting to the southeast is a one-story, shed roof addition with a concrete block foundation and vinyl siding. Extending beyond the length of the main block, the addition has paired vinyl 6/6 windows, two sliding two-light vinyl windows, and two wood doors that are paneled with lights.

Located northeast of the main dwelling is a circa 1850 springhouse. This random rubble stone building has a side gable roof with asphalt shingles and an asphalt-shingle-clad door. It stands at the bottom of a hill one-story high and one-bay square.

Closer to the house, but still to the northeast is a circa 1850 carriage house. Its random rubble stone foundation supports a vertical board structure with a front gable, metal standing seam roof. On the façade there is a double-leaf vertical board door and a one-light window with a broken pane in the gable end. Projecting from the northeast elevation is a one-story addition circa 1970 with a concrete block foundation, vertical board siding, and a side gable metal standing seam roof. This tractor shed addition is open on one side with bracketed square posts.

Next to the carriage house the ruins of a smokehouse that was originally constructed of random rubble stone. Constructed circa 1850, the ruin's window and door have been infilled with stone. Attached to the rear is a concrete block addition.

Located to the south of the main dwelling is a circa 1950 poultry shelter that is banked into a hill. Constructed of concrete block, this front gabled building has a metal standing seam roof. The doors and windows of the three-bay-shelter have been removed, but the square-edged wood surrounds remain. A distinguishing feature is a shed roof dormer that appears to have a grain-related function.

Behind the smokehouse ruin are two circa 1990 wood frame sheds with pressed vertical board siding and gable roofs.

Specific dates 1850 ca. **Architect/Builder** Unknown

Construction dates 1850 ca., 1960 ca.

Evaluation for:

National Register Maryland Register not evaluated

Prepare a one-paragraph summary statement of significance addressing applicable criteria, followed by a narrative discussion of the history of the resource and its context. (For compliance projects, complete evaluation on a DOE Form – see manual.)

The Foard-Hutschenreuter House was constructed circa 1850 near Fork Meeting House in the Eleventh District of Baltimore County. The house first appears on the 1877 Hopkins Atlas, indicating that Benjamin F. Foard was the resident. Remaining in the Foard family into the 20th century, the 1915 atlas shows the house occupied by Mrs. Foard. In the mid-19th century, the town of Fork Meeting House was a small rural community near Joppa Road and the Harford Turnpike. According to the 1850 Atlas of Baltimore County, the village had a post office, a meetinghouse, a tavern, and a number of dwellings. The town continued to remain small in nature and by 1877, there was also a hotel, a store, and the Fork School. In 1915, the map continued to show the schoolhouse, meetinghouse, store, and hotel. However, at this time, there appears to be a more densely populated residential area near the intersection of what is currently Harford and Fork Roads and the town was then referred to as Fork rather than Fork Meeting House.
