DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This house, located on 123 Church Lane is a two stories high rectangular framehouse with cross gabled roof. The house is resting on a stone foundation and is covered with chestnut shingles.

The front or south facade is three bays wide on the first floor with two 1/1 double hung windows with louver shutters and a central door. The second floor is also three bays wide with three 1/1 double hung windows with louver shutters. The cross gable roof on this facade contains a gable dormer and has two brick inside chimneys on each side.

This facade also contains a three bays wide porch supported by four wooden columns. This columns provide also the support for the x shaped wooden railings. The porch is roofed by aluminum shaders.

The west facade is two bays wide on both floors with two 1/1 double hung windows. On the northwest corner of this side there is a bulk head cellar door that leads into the cellar.

There is no fenestration on the east side.

The south Facade is onebay wide with a garage door. This garage is an addition to the house as evidenced by the door that leads into to the kitchen as it used to be a window. Before being a garage it used to be an open side porch, which was closed by the present owner in 1951.

Mr. Harmon has also added a concrete block shed onthe backyard of this south facade.

SPECIFIC DATES

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

This dwelling is important because it represents one of Maryland's typical construction techniques of the rural areas, the framhouse. Besides the above mentioned reason, it is also important because it is part of the nineteenth century streetscape of this village of Texas.
