Prepare both a summary paragraph of significance and a general statement of history and support.

Franklinville was a small mill community built on the banks of Little Gunpowder Falls, a suitable natural resource for a water powered industry. Franklinville Mill was constructed in 1826 and changed ownership several times during the nineteenth century. It was one of seven Maryland properties incorporated by Mt Vernon Woodberry Mills in 1899, a national industry specializing in the highly efficient production of cotton duck. Under the management of this large corporation, Franklinville with its Presbyterian church, dance hall and general store with post office, took on the character of a 19th century planned mill community. Company employees occupied duplex houses clustered around the mill and were provided their essentials right there in the village. Franklinville's standard of living hinged upon the responsible management of Mt Vernon Woodberry, Inc., which derived its success from the profits of each mill under its control.

Although this house is completely altered, it retains the form and probably the frame fabric of most of the Franklinville duplexes. Its most distinct remaining feature is the massive central chimney found on all of these houses.
