4. NOTABLE FEATURES, HISTORICAL SIGNIFICANCE AND DESCRIPTION OPEN TO PUBLIC NO

This house exhibits the typical profile of a Federal town house. It is deep and narrow with a broad gently sloping A-roof. There are twin chimneys built into the left end wall of the house with a curtain between them. The house is three bays wide and slightly deeper. All the windows are 6/6 sashes. The door occupies the right front bay and has a new pedimented frame around it. There are two round-hooded dormers with pilasters on the roof. The house is set on a high basement and has a water-table capped with cyma curve brick. There is a four string belt-course, with the top row of brick projecting out slightly further. There is a stairhall window at the rear of the house which cuts between the two floors. There are random glazed bricks throughout the brickwork. The front of the house is Flemish bond while the sides and rear are common bond. To the left of the main house is a c. 1850 four bays 1-1/2 story addition.

This house is a very sophisticated design and presents a very attractive facade. It stands out as ~~one of the best~~ a *fine* Federal period house.

Condition: Excellent
