Tome Memorial Hall, Tome School for Boys
Bainbridge Naval Training Center
Port Deposit vicinity
Public (Restricted)
1903

Tome Memorial Hall was the main building of the Tome School for Boys, a boarding school adjunct of the Jacob Tome Institute in Port Deposit. The Tome School for Boys was organized by James Cameron Mackenzie, the planner of the Lawrenceville School in New Jersey which is considered the prototype of the non-sectarian college preparatory boarding school. Under Navy ownership, the Hall became the instructional and administrative building of the Naval Academy Preparatory School.

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

Tome Memorial Hall is a three-story rectangular stone building on the northwest side of the grounds of the Susquehanna Job Corps Center (formerly Bainbridge Naval Training Center and Tome School for Boys) near Port Deposit, Maryland.

The main facade consists of a three-bay central mass with flanking wings of five bays each. A tetrastyle Ionic portico of limestone projects above three double-doored entries. The portico has a full pediment with modillions and a carved ornamental wreath. A copper-sheathed clock tower consisting of three contrasting polygonal levels crowns the central roof. The open belfry at the top is in the form of a temple with Corinthian columns. The cupola is topped by a quill weathervane. The original slate roof has been replaced by composition material. A massive copper anthemion cornice extends around the entire building except for the rear portion of the central block. The north and south elevations of the Hall have monumental tabernacle doorways.

The most important feature of the interior is the two-story foyer which has double marble staircases and a filigreed cast iron railing and balustrade.

Prepare both a summary paragraph of significance and a general statement of history and support.

Tome Memorial Hall was the main building of the Tome School for Boys, a boarding school adjunct of the Jacob Tome Institute in Port Deposit. The Tome School for Boys was organized by James Cameron Mackenzie, the planner of the Lawrenceville School in New Jersey, which is considered the prototype of the non-sectarian college preparatory boarding school. This type of school proliferated in the late nineteenth and early twentieth centuries and Mackenzie was widely known as the foremost educator in America during this period.

The Hall and other school buildings were designed by the firm of Boring and Tilton (William A. Boring and Edward L. Tilton), the designers of the U.S. Immigration Station, Ellis Island, New York, for which they received the Gold Medal Award of the 1900 Paris Exposition. The firm also designed several other schools and institutes in New York, Connecticut, and New Jersey.

The Hall, like most of the other major buildings, is constructed of Port Deposit granite and Indiana limestone. It was built by the contractors Doyle and Doak of Philadelphia beginning in late 1900 and completed in May 1903 at a cost of approximately \$120,731. It contained the school administrative offices, assembly hall, library, classrooms, and physics, chemistry and biology laboratories, and the manual training shops.

The Hall's monumental character was intended to convey the serious purpose of the school and was the focal point of the formal entrance to the grounds from the public road (present U.S. Route 222). The Hall, the Tome Inn (Van Buren House), and the Director's Residence were parts of the nucleus of the School. It was used for school ceremonies for both the boarding school and the Tome Institute in Port Deposit.

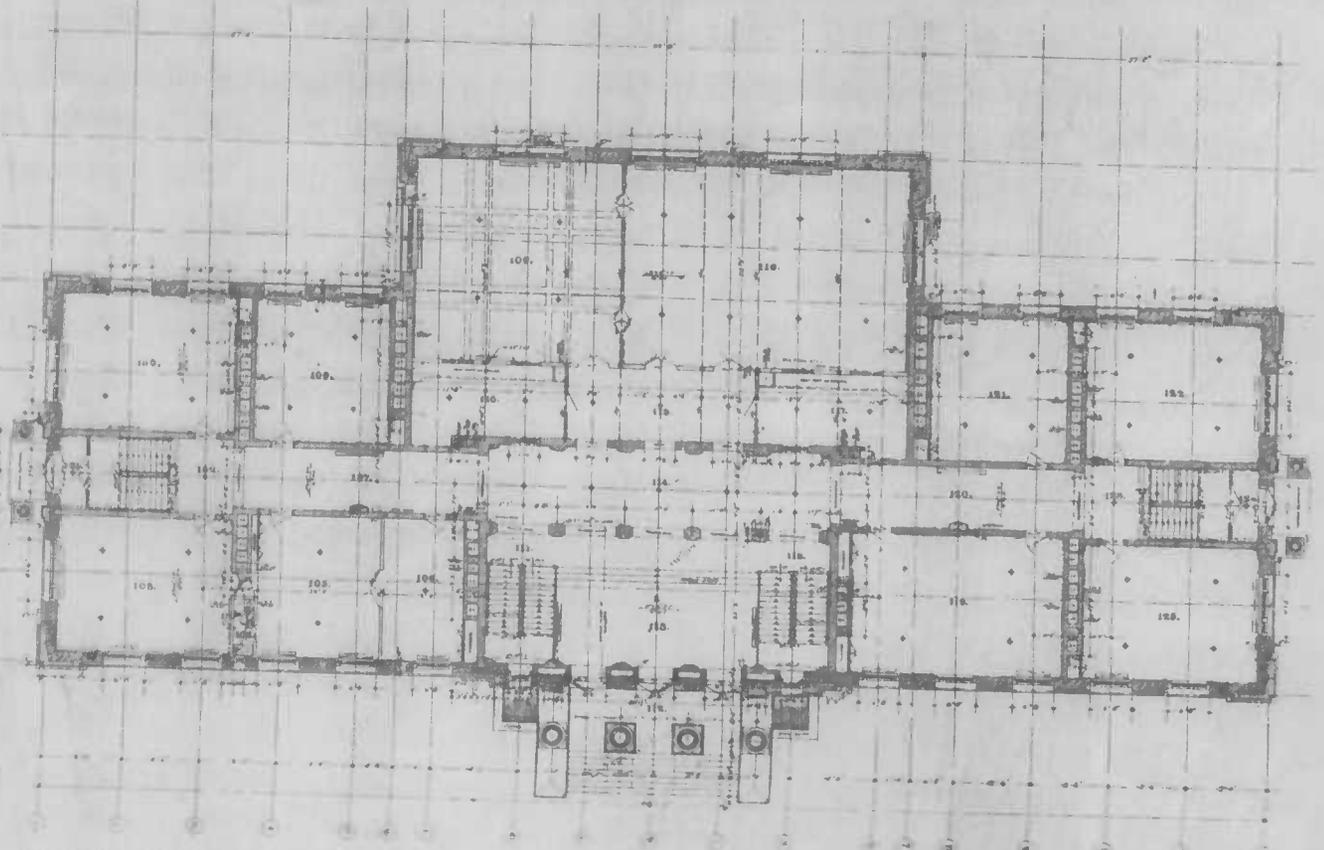

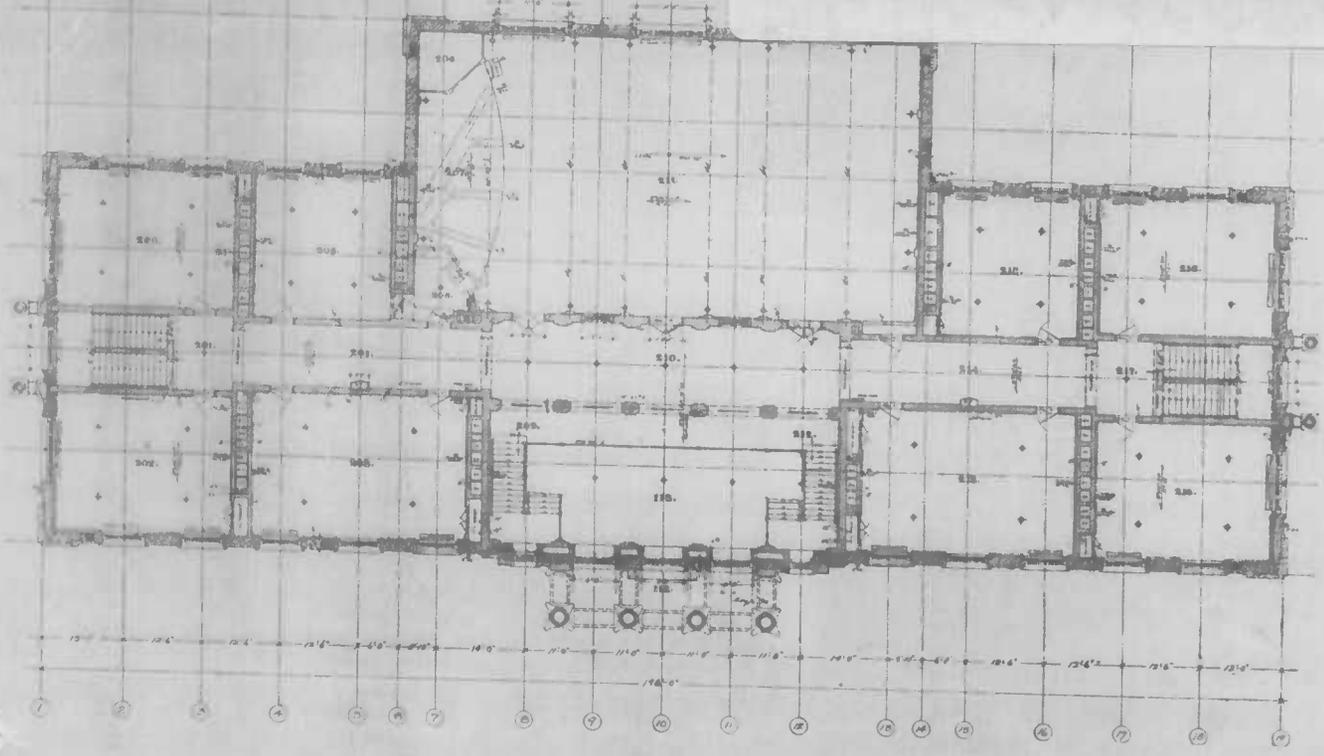

In 1942, when the U.S. Navy acquired the former Tome School property as the nucleus of the Bainbridge Naval Training Center, the Hall became the instructional and administrative building of the Naval Academy Preparatory School, one of several service schools located on the base.
