

Loch Leven
CH-43
Welcome vic.
Private

C. 1775; 1857

Standing on a high ridge in view of the Port Tobacco River, Loch Leven is a two-story, gambrel roof, frame structure with a massive chimney attached to the west gable end. Originally constructed before 1783, the dwelling was extensively remodeled around 1857. In its overall siting, form and construction, Loch Leven shows many similarities to Maxwell Hall (CH-196), which is currently listed on the National Register of Historic Places, and Mt. Tirzah, destroyed by fire in 1969. Loch Leven was likely built for William C. Brent. During the mid 19th century the dwelling and surrounding 660 acres was owned by Barnes Compton, president of the Maryland Senate from 1868-1870.

Prepare both a one paragraph summary and a comprehensive description of the resource and its various elements as it exists today.

Standing on a high ridge with a view of the Port Tobacco River, Loch Leven is a two-story, gambrel roof, frame dwelling constructed before 1783. Its most prominent feature is the massive brick chimney on the west end, similar to that found at Maxwell Hall (CH-196 NR) and Mt. Tirzah (CH-81), which was destroyed by fire in 1969. The dwelling was extensively renovated in the mid 19th century. Much of the interior woodwork dates from this period. A one story wing was attached to the east wall in the mid-20th century. A 20th century shed and garage near this wing share the site.

The dwelling faces south and is five bays in length, resting on a continuous brick foundation. Pedimented dormers break the roof on both the north and south elevations. A shed-roof porch extends the full width of the south elevation, resting on six chamfered wood posts. Matchstick paneling covers the ceiling porch. The centered multi-panel door with a box-lock, is surrounded by sidelights and a transom. Two 6/6 windows flank the door on the first floor while three 6/6 dormer windows light the second floor.

The chimney on the west elevation has a free standing stack and measures 18 feet at the base. It is laid in Flemish bond with a molded watertable and double paved shoulders. Evidence of a bricked-over pent is found in the chimney at first floor height. This elevation also includes two second-story 6/6 shuttered windows.

The rear elevation includes identical fenestration as that found on the south end. The door and single bay, unsheltered porch contains Victorian trim, most evident in the surround. The floor is of recent brick. The house has been reclad with vinyl siding since it was surveyed in 1971. A one-story kitchen wing was added to the east wall. The east elevation probably included a chimney, similar to that found on the west wall, although visible evidence for this was not found due to later additions.

Currently, the interior consists of a center hall, flanked by two rooms on either side. The second story also includes a center hall four smaller rooms. The stair including mid 19th century newel, is approached from the north wall, near the 19th century exterior door embellishments. The dwelling originally included four rooms and a centered rear stair passage. During the 19th century renovations, a partition wall was installed to extend the rear passage through the house. While much of the woodwork was replaced in the 19th century, the second-story west wall mantel and the first-floor mantel found in the northwesternmost chamber, may be original.

Evaluation for:

National Register

Maryland Register

not evaluated

Prepare a one-paragraph summary statement of significance addressing applicable criteria, followed by a narrative discussion of the history of the resource and its context. (For compliance reports, complete evaluation on a DOE Form - see manual.)

Loch Leven is an important example of 18th century architecture in Charles County. Similar in many respects to Maxwell Hall (CH-196 NR) and Mt. Tirzah (CH-81) which burned in 1969, Loch Leven is one of only two known similar examples of this dwelling to remain standing in Charles County. Constructed before 1783, Loch Leven was likely built for William C. Brent. In that year, tax records describe the site as a "good dwelling house, kitchen and most other necessary houses". In 1798, it received a value of \$1200. During the mid-19th century the property was in the possession of Barnes Compton, president of the Maryland Senate from 1868-1870. (1)

Throughout the first three quarters of the eighteenth century, Charles County's economy and social structure solidified on the tobacco culture. Large tracts of land remained in the hands of a small elite class of landowning families. Tobacco was cultivated, almost to the exclusion of other crops, using slave labor. The social hierarchy was based on three main classes: the wealthy large landowners; a significant group of poor tenants renting land from the large landowners; and the slaves.

Like other southern Maryland counties, the exclusive cultivation of tobacco governed the physical development of the county throughout the 18th and early 19th centuries. Unlike corn and wheat, tobacco cultivation did not encourage the development of significant urban centers for the shipping and processing of the crop. Instead, the county's landowners remained isolated, on individual farmsteads that comprised small "villages" made up of the main dwelling house, several slave quarters, and ancillary domestic and agricultural outbuildings. Individual wharves served as shipping points for crops.

DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE

LOCH LEDEN IS A MOST ATTRACTIVE ONE STOREY GAMBREL ROOFED FRAME DWELLING SITUATED UPON A RIDGE OVERLOOKING THE NOT TOO DISTANT CONFLUENCE OF THE PORT TOBACCO + POTOMAC RIVERS.

THE S. ELEVATION, FACADE, IS 5 BAYS IN LENGTH WITH THE DOOR CENTERED. THIS DOOR POSSESSES BOTH SIDE LIGHTS + AN OVER LIGHT. THE LOWER ROOF RAISE IS BROKEN BY THREE PEAKED DORMERS REGULARLY SPACED.

A LARGE CHIMNEY MEASURING 18' AT THE BASE DOMINATES THE W. ELEVATION. THIS CHIMNEY POSSESSES THE USUAL FREE STANDING STACK BUT AN INTERESTING FEATURE IS DETECTED IN THE FORM OF A SMALL BRICKED IN PENT WINDOW CENTERED AT THE 1ST. LEVEL OF THE S. CHIMNEY BASE. THIS CHIMNEY IS SIMILAR IN DESIGN (THOUGH LARGER) TO ONE FOUND AT MOUNT TIRZAH, 1774, IN THE SAME COUNTY, AND IS VERY SIMILAR IN DESIGN TO THAT CHIMNEY AT MAXWELL HALL, CHAS. CO., CA. 1750, WHICH IS ALSO 18' AT THE BASE + RETAINS TRACES OF A "HIDDEN PENT" WINDOW, THOUGH AT THE 2ND. LEVEL.

ALMOST ALL OF THE INTERIOR MOULDINGS + FLOORS DATE FROM THE MID NINETEENTH CENTURY. ~~PREVIOUS~~

AFTER 1750.

RECENT 1 STOREY KITCHEN ADDITION AT THE E END. ~~of 1~~

PORCH AT THE S. ELEVATION IS PLAIN & A RECENTLY LAID BRICK FLOOR.

DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

The house is a two story white clapboard house with gambrel roof and dormer windows on both the north and south sides. There is a one story wing on the east end. The most outstanding exterior feature is a very large brick chimney 13 feet wide at the base containing three fireplaces. Two fireplaces are in downstairs rooms and the third is in a bed room. The upper part of the chimney is free-standing.

There is a porch 40 feet long across the front of the house. Opening onto the porch is a wide center hall running through to the north door which was apparently the original front door, as the old county road went right by it at that time. Interesting molding frames the door. There are several large panes of glass over it forming a sort of rectangular fanlight and panels of glass at the sides. Both outside hall doors are original including the locks with large brass keys.

The stairway is graceful and has quite pretty molding as does a panel across the ceiling at the foot of the stairway. There are plaster medallions in both the hall and living room ceiling. Most of the rooms both upstairs and down contain the original random width pine flooring and either original or very old doors and trim. The mantels over the three fireplaces are also original.

The south side of the house affords an unusually lovely view of the surrounding countryside with both Nanjemoy Creek and the Potomac River visible in the distance.

Old land records show a drawing of a two story house with a wing on one end, about the dimensions of the present wing added in 1957.

STATEMENT OF SIGNIFICANCE (Include Personages, Dates, Events, Etc.)

The house is believed to have been built about 1690, but research is not yet complete. The oldest land records have not yet been explored. It appears that a certain William Chandler Brent was the owner of the property, as acquired by him from Edward Neale, in 1803, as recorded in Liber I.B.No. 5, folio 374. William C. Brent then devised this land to James R. Brent, and thereafter a commission was appointed, and the land was allotted in divisions to Harriet Brent, et al., and she conveyed her interest to Francis Neale, as recorded in Liber I.B. No. 19, folio 193, and the interest of the other heirs having been acquired subsequently by the said Francis Neale. In 1857 this property was sold by Nicholas Stronestreet, Trustee, to James Neale, as recorded in Liber J.S. No. 2, folio 58. In Liber J.S. 2, folio 110, James Neale sold to Charlotte Compton, a one-fifth or a two-tenths part of Goose Creek. Charlotte died leaving Adele Fergusson as the only surviving child, and her husband, Wilson Compton. James Neale in 1857 sold a one-half interest to Barnes Compton, as recorded in Liber J. S. No. 2. folio 111, and in Liber J. S. No. 2, folio 112, James Neale sold to Wilson Compton a three-tenths interest therein. There was a division of this property between Wilson Compton and Barnes Compton, and in 1871 Wilson Compton conveyed his interest to William Compton who went bankrupt, and his interest was sold at public auction to Henry Neale. A partition suit was filed by Adele Fergusson, stating that she was entitled to a one-fifth interest belonging to her father, Wilson Compton, and as recorded in Liber J. S. No. 2, folio 58, Equity Records, Adele Fergusson, was awarded Parcel No,2, containing 116 acres and 17½ perches.
