

CARR-1413

2534 Mayberry Road
Taneytown (vicinity)

Summary:

The brick house at 2534 Mayberry Road was undoubtedly built as a one-room schoolhouse, probably about 1905. It sits a little northeast of the cluster of homes that is the village of Mayberry, and was surely built to serve that community and the farms that surround it. The structure is very typical of the brick schools built in the late-nineteenth and early-twentieth centuries in Carroll County, being three bays by three bays and one story tall. It probably ceased functioning as a school between 1925 and 1935, when the County built large central school buildings in the larger towns and began busing children to them. In its conversion to a private residence, the exterior has not undergone much change.

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The house at 2534 Mayberry Road is approximately 4½ miles east of Taneytown in northwestern Carroll County, Maryland. The building faces south toward a bend in the road. It is a 1½-story, three-bay by three-bay structure with a rubble stone foundation, 8-to-1 common bond brick, and a gable roof with inverted-V-seam metal and a north-south ridge. The south elevation has a center entrance with one light over two panels in the door. There is a single 4/4 double-hung sash on each side of the door. There is a one-story, three-bay porch that has a shed roof, Doric columns, square-in-plan vertical balusters, German siding underneath the porch deck, and a rubble stone foundation. The gable end of the south elevation has new paired 1/1 sash. Originally there was a small opening with a straight brick jack arch, but this has been bricked up.

On the west elevation, the brick has been repointed or rebuilt below the level of the wood sills. There are three 4/4 sash with splayed brick jack arches. There is a shed roof dormer with two 6/6 sash and with wood shingles on the sides. A brick chimney is located in the center of the building, centered on the ridge. The east elevation also has three 4/4 sash. They have bullnose-moulded frames. It also has a typical dormer like that found on the west elevation. There is a small window in the north bay below the 4/4 sash that has a wood lintel and two lights. There is an interior brick chimney on the north end and a CMU addition attached to the north elevation.
