Old Annapolis Road Bridge
New Market
Public

1910

The Old Annapolis Road Bridge is a single span pony steel truss bridge of simple pratt design, 77 feet long and 16.5 feet wide. It was built by the York Bridge Company of York, Pennsylvania in 1910 as indicated by a plaque on the bridge. The York Bridge Company built most of the small pratt bridges in Frederick County during the early part of the twentieth century.

SPECIFIC DATES 1910

BUILDER/ARCHITECT York Bridge Co.

STATEMENT OF SIGNIFICANCE

The Old Annapolis Road Bridge was constructed by the York Bridge Company of York, Pennsylvania in 1910.

According to Polk's York City Directory, the York Bridge Company was in business between 1902 and 1917 and advertised as the Bridge Builders of Iron and Steel Structural Work.

There are over forty iron and steel truss bridges still in existence in Frederick County, Maryland, But, with increasing development in the area many of these bridges will be destroyed because of additonal tonnage requirements demanded on highway structures.

Iron truss bridges portray an important step in bridge engineering design and were the most popular for of bridge construction in Frederick County, Maryland between the 1870's and the 1930's. One of the earliest mentions of iron bridges in Frederick County is found in The Frederick Examiner dated Setpember 13, 1854, which states that iron, rather than wood, was now being used for bridge building and it was hoped that iron bridges would soon be built in the county. It was not until the 1870's however, that the county commissioners began using iron truss bridges almost exclusively in county bridge construction. Some of the most popular companies contracted to do the work were the Wrought Iron Bridge Company, Canton, Ohio; King Iron Bridge and Manufacturing Company, Cleveland, Ohio; Groton Bridge Manufacturing Company of Groton, New York and the York Bridge Company of York, Pennsylvania.
