Swan's Harbour

Rocky Ridge

Private

Swan's Harbor is an important early dwelling house, dating from the early nineteenth century, in the region. Its architectural form, a one and one-half story stone building, is a rare survivor in the area where 2 story stone dwelling houses are more common. The three room plan evident in the interior connects it to the German tradition of vernacular architecture widely seen in Frederick County. The agricultural buildings are not contemporaneous with the house but reveal agriculture to be a significant endeavor from the nineteenth century through present day.

7.1 Description:

Swan's Harbour is situated in close proximity to the town limits of Rocky Ridge, Maryland. This one and one-half story stone and log house faces west with a gable roofline oriented on a north/south axis. A complex of agricultural buildings encircles the dwelling house with the largest concentration directly located to the southeast; all appear to be more recent than the dwelling house.

The house was constructed in two sections; a three room plan stone section, circa 1816, and a single pen log section, circa 1850. The rectangular stone section, of uncoursed fieldstone, is one and one-half stories and 3 bays wide with a gable roof of standing seam tin. Some of the window openings have jack arches for lintels. Two brick exterior end chimneys are located on the south elevation. The log section is one story and measures approximately 16 feet x 24 feet. Sheathed in german siding, it is 2 bays wide with a gable roof of standing seam tin.

The principal facade, facing west, has two openings located on the northern half of the elevation; a off-center door and a 1/1 window. The basement level has a 6 light fixed window. An entry hood (recent addition) covers the door. The east elevation is covered in stucco; it includes an off-center door and two windows (1/1). A recent shed roof dormer is located in the roof. The basement level has a 6 light fixed window with an segmentally arched brick lintel and a segmentally arched brick door opening. A open porch with a standing seam tin flat roof extends across the facade to include one bay of the log section. The south elevation has symmetrical window openings (1/1) with stone jack arches. Log beam ends are visible at the gable eaves. The exterior brick chimney is placed in the center of the elevation. The north elevation has one window opening in the upper floor and is otherwise concealed with the attached log section which extends north.

The west facade of the german sided, log addition has two 2/2 windows, symmetrically placed. The east elevation has a door and a window; the north elevation has no openings.

The interior has a three room plan, indicative of the German influence, in the main section combined with a single pen in the log addition. The interior has been much altered throughout the house but has a few original details. The large room to the south has a large stone fireplace centrally placed, original chair rail and door surrounds. A smaller room is partitioned to the west. The room to the north has a boxed staircase to the upper story. The upper story is divided into two rooms; a bathroom has been added. Walls have been covered with plywood and ceilings with acoustic tile. The basement contains an arched fireplace and hand-hewn logs that were whitewashed.

Many of the outbuildings date from the mid-twentieth century when the Stambaugh family began their beef and dairy cattle operations. Some outbuildings are older, however, dating from the late nineteenth century. A grain and machine shed with exposed rafters is covered in vertical siding with sliding doors opening on the west elevation. A late nineteenth century bank barn has a louvred vent window in the gable end and has been covered in aluminum siding. A garage, also sheathed in aluminum siding, has sliding doors. An older shed close to the house has been covered with new vertical siding.

8.1 Significance:

Swan's Harbor is an important early dwelling house, dating from the early nineteenth century, in the region. Its architectural form, a one and one-half story stone building, is a rare survivor in the area where 2 story stone dwelling houses are more common. The three room plan evident in the interior connects it to the German tradition of vernacular architecture widely seen in Frederick County. The agricultural buildings are not contemporaneous with the house but reveal agriculture to be a significant endeavor from the nineteenth century through present day.

Considered within its historic context, Swan's Harbour is important in exemplifying the three room plan, one and one half story stone house type in a region where 2 story stone houses were more popularly constructed. There are no other houses with the same proportions and dimensions in the region similar to Swan's Harbour. Although the interior has been greatly altered, the form and plan remain intact, providing a significant illustration.

According to the original deed (in possession of the current owner), Swan's Harbour was a tract of 295 acres which was purchased by George Ott in 1816. Before the Ott purchase, the land was a portion of three tracts owned by two early speculators, James Brooke and Jacob Valentine. Between 1858 and 1873, John A. Koontz sold the property to a neighbor, George W. Barrick, who lived there until his death in 1895.
