INDIVIDUAL PROPERTY/DISTRICT  
MARYLAND HISTORICAL TRUST  
INTERNAL NR-ELIGIBILITY REVIEW FORM

F-7-31

Property/District Name: Urbana Historic District, Montgomery County Survey Number: F 7-63 to 73

Project: I 270 from MD 121 to I-70 and US 15 from I-70 to north of Hollywood Road, Montgomery + Frederick Counties Agency: SHA

Site visit by MHT Staff: no  yes Name Ron Andrews Date 11/26/90

Eligibility recommended  Eligibility not recommended

Criteria:  A  B  C  D Considerations:  A  B  C  D  E  F  G  None

Justification for decision: (Use continuation sheet if necessary and attach map)

The core of Urbana retains sufficient integrity to meet National Register standards. The district still conveys a sense of the small 19th and early 20th century community. It is significant under Criteria C for its collection of 19th and early 20th century vernacular buildings representative of the small commercial centers of the Piedmont Region. Under Criteria A, it is significant for its association with the economic development of southeastern Frederick County, serving as a commercial center for the immediate surrounding farming community.

Documentation on the property/district is presented in: Review Compliance Files letters dated 2/7/90 and 10/15/90 from SHA and MHT inventory forms for properties in Urbana F 7-63 through 73

MARYLAND COMPREHENSIVE HISTORIC PRESERVATION PLAN DATA - HISTORIC CONTEXT

I. Geographic Region:

- Eastern Shore (all Eastern Shore counties, and Cecil)
- Western Shore (Anne Arundel, Calvert, Charles, Prince George's and St. Mary's)
- Piedmont (Baltimore City, Baltimore, Carroll, Frederick, Harford, Howard, Montgomery)
- Western Maryland (Allegany, Garrett and Washington)

II. Chronological/Developmental Periods:

- Paleo-Indian 10000-7500 B.C.
- Early Archaic 7500-6000 B.C.
- Middle Archaic 6000-4000 B.C.
- Late Archaic 4000-2000 B.C.
- Early Woodland 2000-500 B.C.
- Middle Woodland 500 B.C.- A.D. 900
- Late Woodland/Archaic A.D. 900-1600
- Contact and Settlement A.D. 1570-1750
- Rural Agrarian Intensification A.D. 1680-1815
- Agricultural-Industrial Transition A.D. 1815-1870
- Industrial/Urban Dominance A.D. 1870-1930
- Modern Period A.D. 1930-Present
- Unknown Period (  prehistoric  historic )

III. Prehistoric Period Themes:

- Subsistence
- Settlement
- Political
- Demographic
- Religion
- Technology
- Environmental Adaption

IV. Historic Period Themes:

- Agriculture
- Architecture, Landscape Architecture, and Community Planning
- Economic (Commercial and Industrial)
- Government/Law
- Military
- Religion
- Social/Educational/Cultural
- Transportation

V. Resource Type:

Category: Rural Village

Historic Environment: Agricultural

Historic Function(s) and Use(s): Commercial, residential, industrial

F-7-31  
Urbana Survey District  
Private

Ca. 1830-1900

Urbana's survey district encompasses about 7 acres and 16 contributing structures, principally residences of log, brick, and frame dating from about 1830 to 1900. The Wesley Chapel Methodist Episcopal Church (F-7-67) and the Smith Store and Residence (F-7-68) are the only two non-residential buildings. The earlier structures are log, but have been considerably altered on the exterior in terms of siding and roofing and many have additions and replacement features such as porch columns, shutters, and doors. The best early examples of architecture in the survey district are "Many Makes One", a brick Greek Revival dwelling of about 1830 with an attached doctor's office, and the Smith Store and Residence, also built in the 1830's. Both buildings have transoms, apparently original windows, and few major additions which alter their principal facades. The Smith Store has been recently rehabilitated and is used as an office building. The best examples of the late 19th century vernacular Queen Anne style are 3528 and 3524 Urbana Pike, both of which have cross gables with shingled surfaces and decorative trim on the porches and bargeboards. The district is minimally significant as an example of a linear turnpike town of the stated period. The level of alteration and surrounding modern construction has reduced its integrity and original extent as compared with other similar towns of the period such as Kemptown (F-7-41). In the larger vicinity of Urbana, but not included in the survey district, are other properties associated with its history such as the National Register property Landon (Stancioff House; F-7-3), the Zion Episcopal Church (a ruined 1802 church which was one of the earliest buildings in the vicinity; F-7-64), St. Ignatius of Loyola Catholic Church, an 1880's frame church (F-7-66), and the Dixon House (Peter Pan Inn; now Cracked Claw Restaurant, F-7-73).

CONTRIBUTING RESOURCE COUNT: 16

The Urbana Survey District is located along Urbana Pike (Md. 355) from the 3500 block southward to the intersection of Fingerboard Road (Md. 80), encompassing about 7 acres and approximately 16 contributing structures in the village of Urbana, Frederick County, Maryland. The village is irregularly developed around the extended intersection of the two highways, which form a rough tie shape, sharing a straight east-west segment between the bifurcated routes to the east and west. The most densely built part of the village has historically been the western section nearest the three churches of Urbana, Zion Episcopal Church (F-7-64), Wesley Chapel Methodist Episcopal Church (F-7-67), and St. Ignatius of Loyola Catholic Church (F-7-66) and the survey district includes the strongest concentration of structures remaining in this area. The Wesley Chapel, now the Urbana United Methodist Church, and the present St. Ignatius Rectory are the only religious buildings in the survey district, the other two having been isolated by modern, non-contributing structures and loss of integrity in linkages to the Urbana Pike concentration. The survey district is primarily residential, but a former store and residence is currently being used as an office building. Urbana's founding is generally keyed to the establishment of Zion Church in 1802, but its growth was slow and occurred principally between about 1830 and 1900. The district's buildings generally reflect this time period. The dwellings are mostly vernacular frame and log structures with german, weatherboard, or modern artificial siding. Most have three or five bays and one-story porches, with 1-1/2 or 2 story rear wings. The former store and residence and one other dwelling are brick, both dating from about 1830. The buildings of the later 19th century are frame and show the influence of the Queen Anne and other Victorian period historically based architectural styles in decorative trim and massing. Most of the houses are in good condition, but at least two dwellings are unoccupied, reflecting the pending change in the surrounding environment of Urbana which involves a large, planned-use development extending primarily north, northeast, south, and west of the village. The presently heavily traveled intersection of the two highways is planned for upgrading and widening to meet the expected traffic loads accompanying the development. Dates of the buildings are based on land records, architectural details, and historical maps.

Following are brief descriptions of the contributing buildings in the survey district:

St. Ignatius Rectory, 3523 Urbana Pike: The two-story dwelling has log structure under the present vinyl siding. Built about 1830-1840, it has three bays with a side hall entrance under a pedimented entry porch, probably a modern replacement of an earlier porch. The windows are 6/6 with replacement shutters. The roof is covered with pressed metal. The chimney is at the interior south gable. (Owner: Reverend William Borders, Archbishop, c/o Evelius Gallagher, 1 Charles Center, Baltimore, MD 21201).

Prepare both a summary paragraph of significance and a general statement of history and support.

The Urbana Survey District is minimally significant for its exemplification of a linear turnpike village of the period about 1830 to 1900. The core of the survey district is a group of log, brick, and frame dwellings built during this period which retain a fair to good level of integrity. The district also has a late 19th century brick church, the Wesley Chapel Methodist Episcopal Church (F-7-67) and a former store and residence combination, the Smith Store (F-7-68) which reflect the period of Urbana's ascendancy as a small community serving both travelers and local residents. The village was historically an extended group of buildings on the north and south sides of both the Frederick-Georgetown turnpike and Fingerboard Road, which linked Urbana to Buckeystown. The eastern section of the village was particularly widely spaced in terms of building relationships with a farmstead bordering the north side of Fingerboard Road. The center of activity tended to concentrate near the vicinity of the churches, including in addition to the Methodist church, the 1802 Zion Episcopal Church and the 1880's St. Ignatius Catholic Church. These two churches are, however, not in the survey district, having been isolated by modern non-contributing structures from the current survey district. By comparison, Kempton's Survey District (F-7-41), also a linear community of approximately the same period oriented toward a major road, has a more cohesive concentration of contributing structures and the levels of integrity are higher. Urbana appears to retain a fair level of intact historical character and appearance.

The architecture of the buildings is moderate to minimal in significance, with the Smith Store and "Many Makes One", a brick 1830's Greek Revival dwelling with an attached doctor's office being the best examples of the early period of the village's development. Other early structures, mostly log, have been considerably altered in terms of exterior cladding and additions. The late 19th century is best represented by the Queen Anne-influenced cross-gabled houses at 3528 and 3524 Urbana Pike. These show the shingled surfaces and decorative trimwork associated with the vernacular interpretation of the Queen Anne and other late Victorian historical styles. Although Urbana's larger village context, including the National Register site Landon (Stancioff House; F-7-3), was the site of considerable troop movements during the Civil War, no specific significance in the military theme can be linked to the survey district. Undoubtedly the Battle of the Monocacy north of the village in July, 1864 caused many local houses and churches to be used as temporary hospitals and raids on local stores and taverns by both armies took place. These

7.1 Description (Continued)

Wesley Chapel Methodist Episcopal Church (Urbana United Methodist Church), F-7-67: The third church building of the Methodist congregation of Urbana, the brick one-story church was built in 1895, replacing the second church built in 1853, which had replaced the original 1833 log building. It has a three-bay west elevation with a projecting foyer and flanking Gothic arched stained glass windows. The windows are late 1940's replacements of the original plain glass windows. Brick buttresses punctuate the wall surface on all elevations. An oculus window is in the western gable with an inset stone inscribed "Urbana Wesley Chapel 1853, Rebuilt 1895". The north and south elevations have four bays, those of the rear portion of the south elevation being obscured by a modern link built to connect the church with the parish hall on the south. On the east end of the church is a projection added in the 1950's flanked by arched windows. The roof of the main church is composition. The adjoining one-story parish hall is probably the considerably altered Bennett Creek Methodist Episcopal Church or House's Chapel, built in 1881 by George E. House near his farm on Thurston Road near Bennett Creek. In 1933, the chapel was dismantled and rebuilt on the present site to serve as the parish house. The brick veneer was probably added between the 1933 and 1950. (Owner: Urbana Methodist Church, Rt. 2, Frederick, MD 21701)

3524 Urbana Pike: The circa 1900 frame house has two stories, a central cross gable, and a three-bay northeast elevation. A one-story porch with a turned spindle frieze, turned columns, and scroll-sawn brackets extends across the main elevation. The exterior is covered with vinyl siding and the roof is standing seam metal. The cross gable is faced with patterned shingles and gable bargeboard decoration is on both the cross gable and the end gables. The windows are 1/1 with replacement paneled shutters. The center bay on the second story has paired windows. A two-story rear wing extends from the northwest corner of the house. (Owner: John A. and Karen Main, 3362 Urbana Pike, Frederick, MD 21701)

3519 Urbana Pike: The circa 1900 frame building was built as the Methodist Parsonage by a local contractor, Charles Dudderar, possibly on the site of an earlier structure which appears on the 1873 Titus Atlas map. The existing building has an off-center gable front with a one-story porch across the west elevation. A polygonal one-story bay window is located in the north bay and the entrance is in the center bay. The transom and sidelights have been covered. A pair of 1/1 windows occupies the south bay. The second story has narrow, 1/1 windows in the outer bays with replacement shutters. The gable face is covered with patterned shingles and has a single round-arched window. The chimneys are at the interior gable ends and a two-story rear wing extends to the east. (Owner: Urbana Methodist Church, Rt. 2, Frederick, MD 21701)

Smith Store and Residence (F-7-68), 3513 Urbana Pike: The recently rehabilitated brick structure has two sections, the northwestern being the two-bay facade of the two-story dwelling and the lower height 1-1/2 story southern section being the storeroom and former post office for Urbana. Built

7.2 Description (Continued)

in 1830, it was acquired in 1863 by Thomas Smith who ran the store until 1889. The dwelling section has 6/6 windows in a common bond facade and a three-light transom above the paneled door. A replacement wood stoop has been built in front of the door. The wood lintels and sills are plain. The roof is composition materials with an interior brick chimney on the north gable end. The store section has a three-bay facade with an extra, irregularly placed bay near the residence. The windows are 6/6 and the doorway is wider than in the residence end, with a four-light transom. Two gabled dormers project from the roof. A replacement porch is also at the door of the store section. At the rear of the building is a two-story wing connecting with the residence section. The building is currently used as an office. (Owner: Kiplinger Washington Editors, 1729 H St. N.W., Washington, D.C. 20006)

3528 Urbana Pike: The circa 1870 frame dwelling has five bays and a center cross gable with a one-story porch over the first story. The windows are 2/2, flanked by replacement shutters. The exterior is covered with vinyl siding and the roof with pressed metal. The central gable has a Gothic arched window and bargeboard decoration. The first story has double entries. The porch columns have been replaced by cast iron supports. An enclosed one-story addition is located on the north gable end and a two-story rear wing extends from the west elevation. (Owner: Thomas S. and Alice V. Hipkins, 3528 Urbana Pike, Frederick, MD 21701)

3509 Urbana Pike: A 1-1/2 story log house with considerable modern alterations, the dwelling now has vinyl siding and a shed dormer in the west roof slope. The three-bay elevation has a center entrance with an entry porch. The 6/6 windows are paired in the dormer and the roof is covered with composition material. A two-story extension at the rear of the house has a shed roof. According to research by Kiplinger Washington Editors, the log house was once used as a shoe shop/dwelling combination. Its log structure may date from the 1840's. (Owner: Edwin L. & Jean Wood, 3509 Urbana Pike, Frederick, MD 21701)

3505 Urbana Pike: The unoccupied dwelling has two-story and three bays with a one-story porch on the first story. The exterior is covered with composition material. The windows are 6/6 with molded lintels and the door has a narrow transom. The porch has turned columns and scroll-sawn brackets. The roof is corrugated metal. The house was probably built about 1861-1866 according to land records. From 1920 to 1934, it was owned by William Cadle, a physician who carried on his local practice from the house. (Ownership uncertain from land and tax records)

"Many Makes One", 3501 Urbana Pike: The large, white-painted brick house has a three-bay southwest elevation and a small one-story addition on the north gable end which was used variously as a doctor's office and the local post office in the late 19th and early 20th century. The building also once housed the "Urbana Male Institute", which also occupied at least one other building across the Pike. The house was built about 1830-1840 and has Greek Revival influences in the door and window trim. The principal elevation has five bays with an

7.3 Description (Continued)

entry porch with Tuscan columns over the center doorway. The windows are 6/6 with louvred shutters and the door has four panels with a transom and sidelights. The cornice is corbeled and the roof is covered with composition material. (Owner: Paul E. and Margaret Albaugh, c/o Ahalt, P. O. Box 182, Middletown, MD 21769-0182)

3526 Urbana Pike: The two-story frame house was apparently built in the 1880's, although a local history written in 1976 states that a 1-1/2 story log house was incorporated in the structure. The exterior is covered with vinyl siding and the principal elevation on the northeast has a one-story porch with brackets, dentil molding, and turned columns over the three-bay first story. The windows and shutters are modern replacements and the roof is standing seam metal. (Owner: Kiplinger Washington Editors)

3514 Urbana Pike: The two-story frame house has three bays with a one-story porch with brackets across the main elevation. The windows are 2/2 and the exterior siding is composition, as well as the roof. An interior chimney is located at the north gable end. A modern addition is on the southwest or rear elevation. The house was probably built about 1870 and according to research by Kiplinger Washington Editors, it was originally located in the eastern section of Urbana near the site of the present Turning Point Inn. It was moved in the first decade of the 20th century to its current site. (Owner: Eugene W. and Jean L. Harley, 3514 Urbana Pike, Frederick, MD 21701)

3504 Urbana Pike: A two-story white-painted brick dwelling built about 1860, this building was possibly part of the "Urbana Male Institute" along with "Many Makes One" across the Pike and a now-demolished building on the south to which it was linked by an enclosed passage. The extant building has a cross gable with decorative bargeboard and a one-story porch with turned columns and dentil molding trim which extends around to the north gable end. Two entrances are in the four bays of the main elevation, with replacement glass panel doors. The windows are 2/2 with louvred shutters. The roof is pressed metal and a dog-tooth cornice course is just below the eaves. The central gable has a shingled surface. At the rear of the house is a two-story wing and an enclosed one-story porch. Just west of the wing is a brick smokehouse with a corrugated roof. In the north gable end is a diamond patterned vent and the vertical board door is flanked on the south by two mismatched windows. (Owner: Ward Family Partnership, 1300 Piccard Drive, Rockville, MD 20850)

3432 Urbana Pike: The two-story frame house appears to date from about 1875-1890 and is apparently the replacement structure for the earlier building which, with 3504, was part of the "Urbana Male Institute" in the period just before the Civil War. The house has asbestos shingle siding and a central cross gable with a Gothic arched window. Below the gable are a pair of lancet windows. The three bays of the main elevation have 2/2 sash in the windows flanking the center bay. The doorway has a transom and sidelights, but no porch. The roof has a decorative bargeboard and composition roofing in a diamond pattern. (Owner: Thomas G. Defries and Esperanza Mullican, 13509 Wisteria Drive, Germantown, MD 20874)

7.4 Description (Continued)

3442 Urbana Pike: The two-story frame house built about 1890 on the south side of the intersection of Fingerboard Road and Urbana Pike has asbestos shingle siding and a one-story porch on the east elevation. Facing the main intersection is a cross gable with shingled surface and a pair of casement windows in the center. Below the gable are a pair of two-story projecting bays with 2/2 windows. An interior chimney is located at the east gable end. The roof is standing seam metal. The house was built by Frank A. Knott, one of the owners of Knott and Geisbert's garage and farm equipment supply firm dating from the 1920's, located just east of the survey district. (Owner: Katherine Kemper and Evelyn Reynolds, 8520 Fingerboard Rd., Frederick, MD 21701)

Urbana Survey District
