DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This is a two story brick and limestone, detached, corner building. It is approximately nine bays wide and five bays in depth with a "T" shaped wing seven bays wide and three in depth and with a loading dock on the rear. All walls are of a small, white brick laid in Flemish bond and the center section of the front facade and the surrounds of all other windows are faced with Indiana limestone. The central seven bays of the front were built in the Greek Revival style and divided by Doric fluted attached columns having classic Greek  fretbands on the three sides of the capitals. The entranceway occupies the center bay with glass double doors topped by a metal cornice with five acroteria shaped forms of acanthus leaves and a band of small patera. All windows of the building are of 12/12 sash with those on the front protected by ornamental iron grills in a geometric pattern  as over the door. The entrance is approached by a two section porch of nine granite steps with a wrought iron railing in the center and contained on either side by low walls supporting round ornamental iron lamp posts carved with acanthus leaves, having the top sections fluted and lighted by acorn shaped light globes. On either side of the porch, the building is landscaped by large yew trees and lawn areas with a tall flatpole on the corner. The center section of columns and fenestrations is headed by a projecting moulded cornice with evenly spaced heads of lions in relief and with flat pendant modillions. The frieze is adorned by a wide band of Triglyphs and patera,  classic Greek temple ornamentation. The building is topped by a flat  parapet. The roofs of both sections are flat with the material not visible. This building rests on a high foundation.

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

This is a landmark building designed in an attractive Greek Revival style and a good addition to the examples of the various styles found in Frederick. Unfortunately, the Post Office Department plans demolition rather than remodelling of the interior for the new, larger post office complex.

On the left front corner is a cornerstone with the following inscription:

*William C. McIdoo
 Secretary of the Treasury
 James A. Wetmore
 Acting Supervisory Architect
 1917*
