Stephen Haines Farmstead

Johnsville, Maryland

Private

The Stephen Haines Farmstead features an 1850's brick house with outstanding Gothic Revival trim on its porch and cross gable and the additional interest of a square cupola on the roof. The domestic outbuildings include a two-story frame and stone dairy with servants or slave quarters on the upper level. Agricultural operations of the mid to late 19th century are exemplified by the six farm outbuildings in the group.

7.1 Description

The Stephen Haines Farmstead, located on the west side of Clemsonville Road about 1/2 mile north of Pearre Road near Johnsville, Maryland, is an agricultural group centered on a two-story brick farmhouse built about 1850 with an elaborate porch and cupola. Associated with the house are 3 domestic outbuildings: a 2 story frame and stone dairy, a brick smokehouse and a chicken house. The agricultural outbuildings are a frame bank barn, a concrete block dairy barn, two frame corn cribs, a hog shed, and a frame shed of unknown use.

The dwelling house has a four-bay principal elevation facing east. A cross gable is ornamented by paired brackets and a truss with scroll-sawn details. A three-part arched window is centered in the gable. The east elevation is flemish bond brick on an exposed stone foundation. The double entrances in the two center bays have paneled doors and plain rectangular transoms. Sash on the east elevation is 2/2; on the other elevations, it is 6/6. The roof is standing seam tin with chimneys at each gable end. The cupola is square and centered on the ridgeline. It has rusticated wood siding and a balustrade.

The west elevation of the house is dominated by an ell extending from the northwest corner of the main section. On the south side of the ell is a screened, two-story porch.

Domestic Outbuildings:

Dairy: This is a stone and frame building located north of the house with an exposed lower level on the north. It appears to have had several functions in addition to the dairy on the lower level. The frame upper story faces a north elevation side entrance to the main house, suggesting it may have housed servants or slaves. A small chimney projects from the standing seam gable roof.

Smokehouse: A small square brick building immediately west of the ell, the smokehouse has a standing seam gable roof.

Chicken house: The frame chicken house has a shed roof and faces south. It is located south of the dwelling house.

Agricultural Outbuildings:

Bank barn: The frame bank barn and the rest of the agricultural group are located east of the dwelling house on both sides of the driveway from Clemsonville Road. The barn appears to be contemporary with the house. It has a stone base and vertical siding. The roof is standing seam. The forebay is on the west, where a one-story concrete block loafing shed, circa 1950, is attached at right angle to the barn.

Dairy barn: Located on the north side of the entrance driveway is a concrete block and frame dairy barn, circa 1940 in date, with an adjoining milk shed and terra cotta silo.

Stephen Haines Farmstead
Frederick County

Survey No. F-8-95

7.2 Description (Continued)

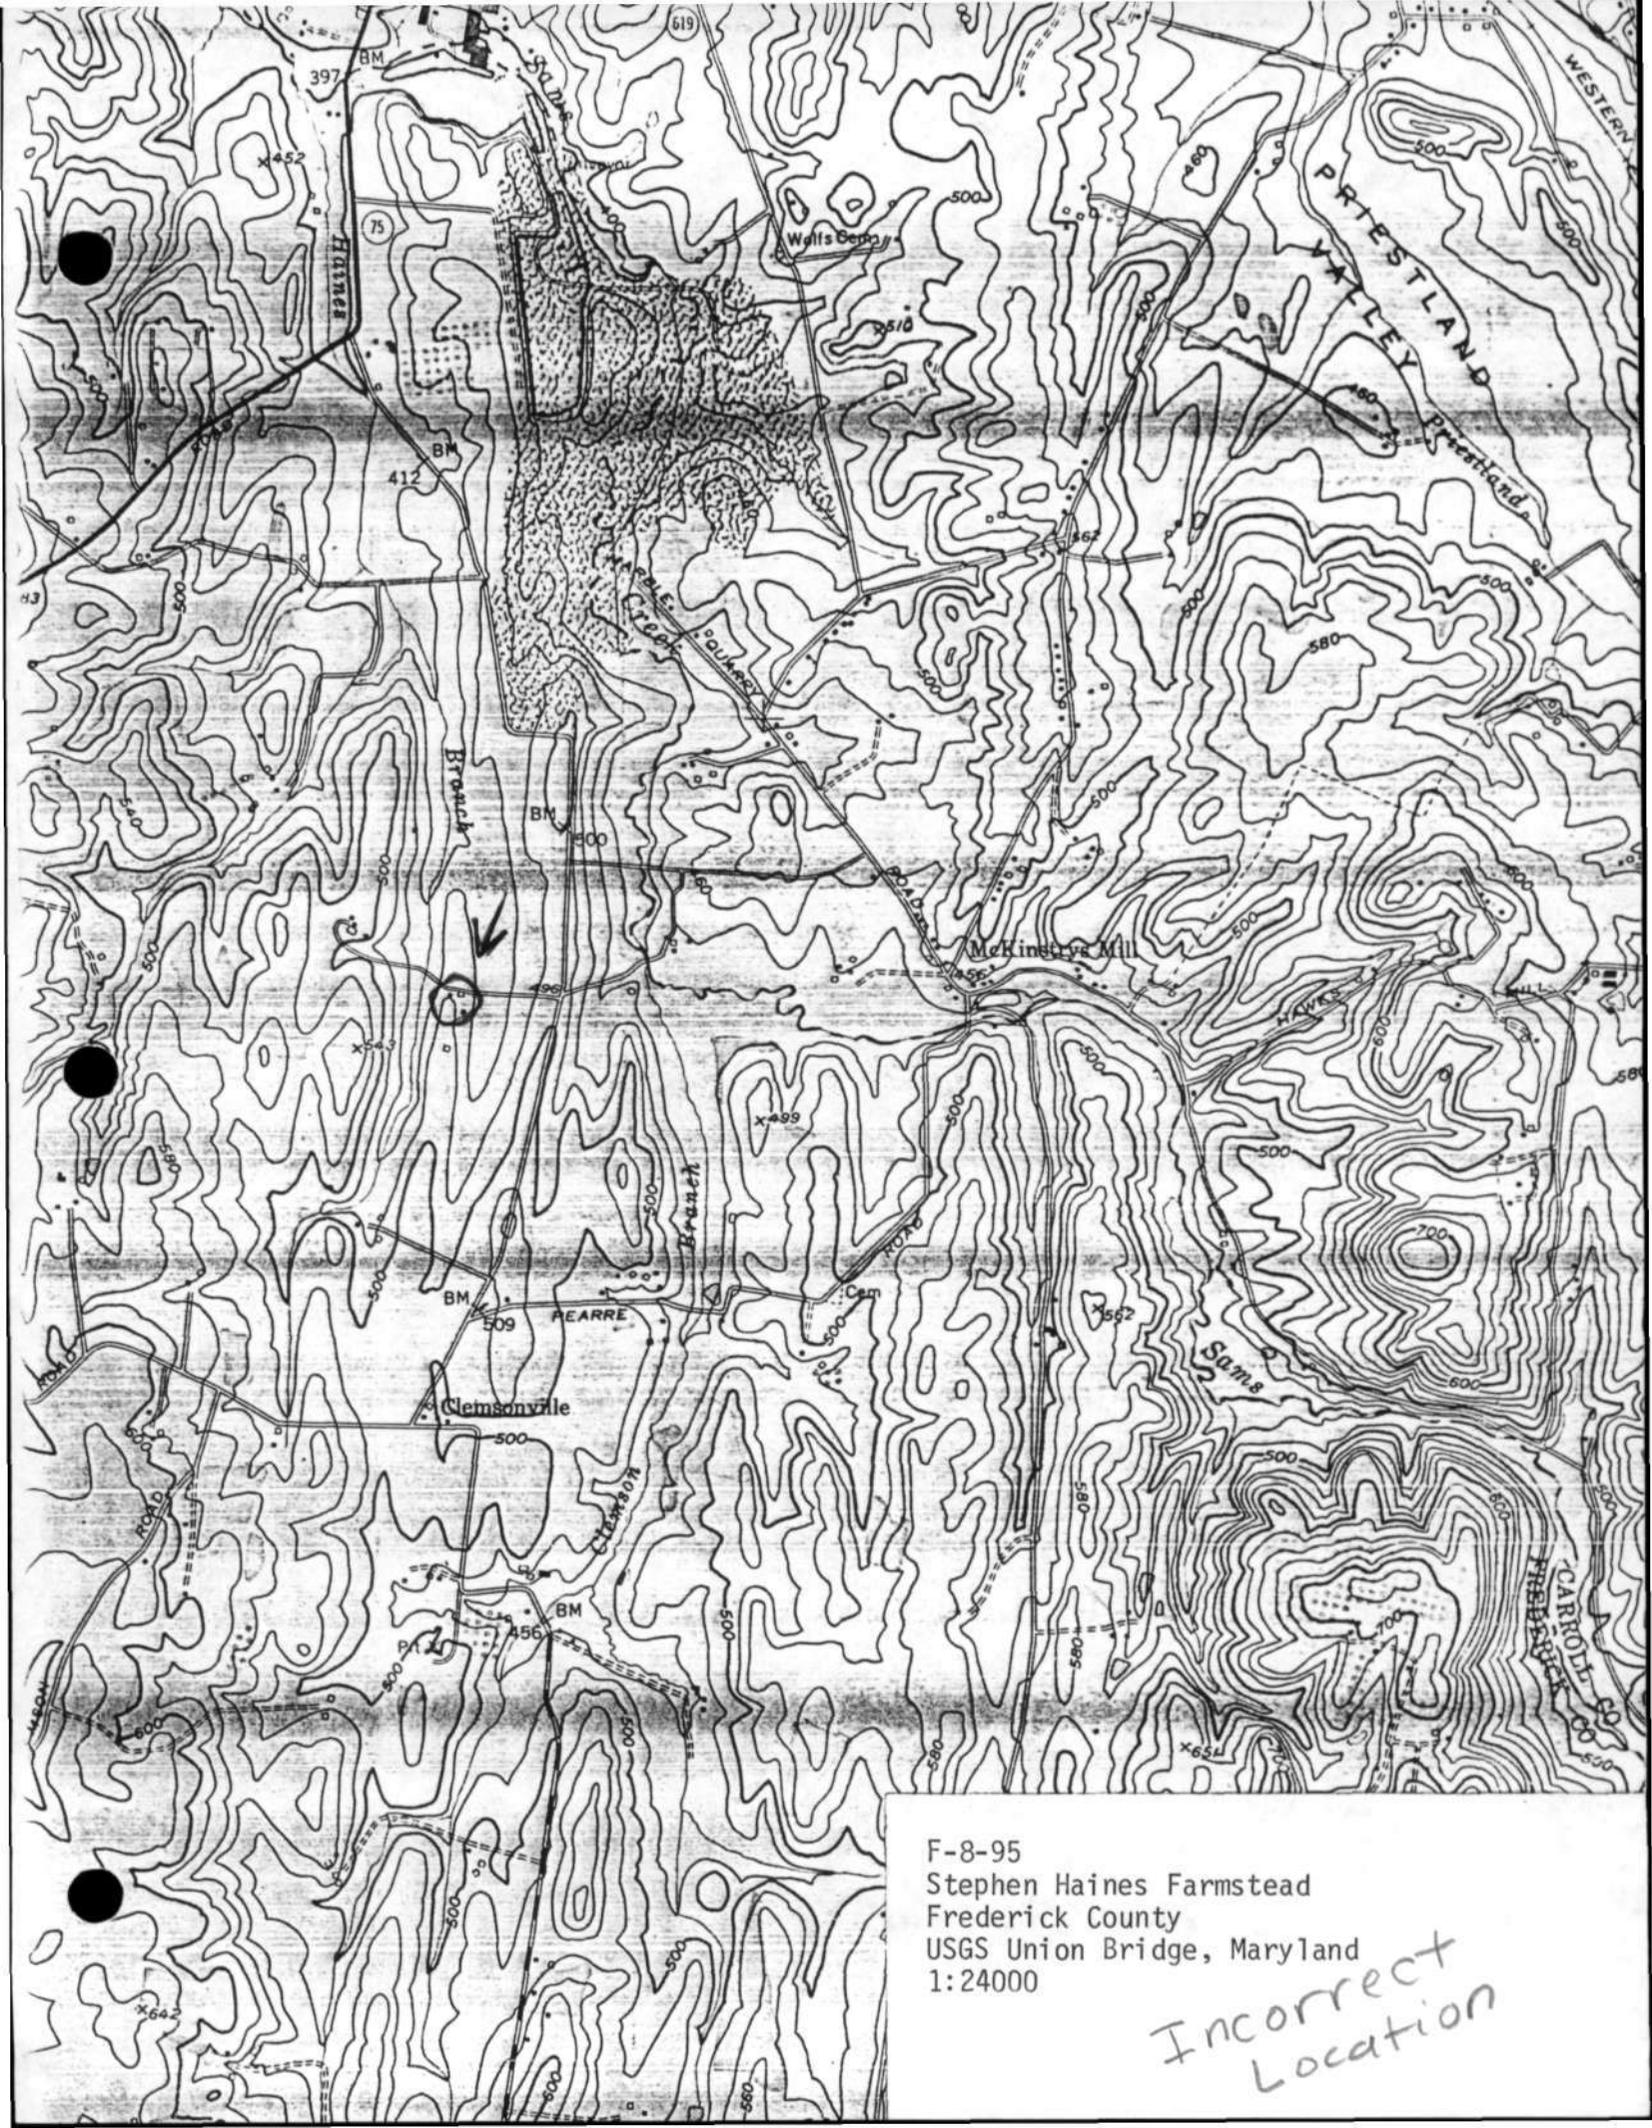

Corn cribs: Two frame corn cribs are located side by side west of the loafing shed. Each has a standing seam roof.

Hog shed: A frame hog shed, partially deteriorated, stands at the south edge of the agricultural group. It has vertical siding and a gable roof.

Agricultural shed: A frame, gable roofed agricultural shed of undetermined use is located south of the corn cribs.

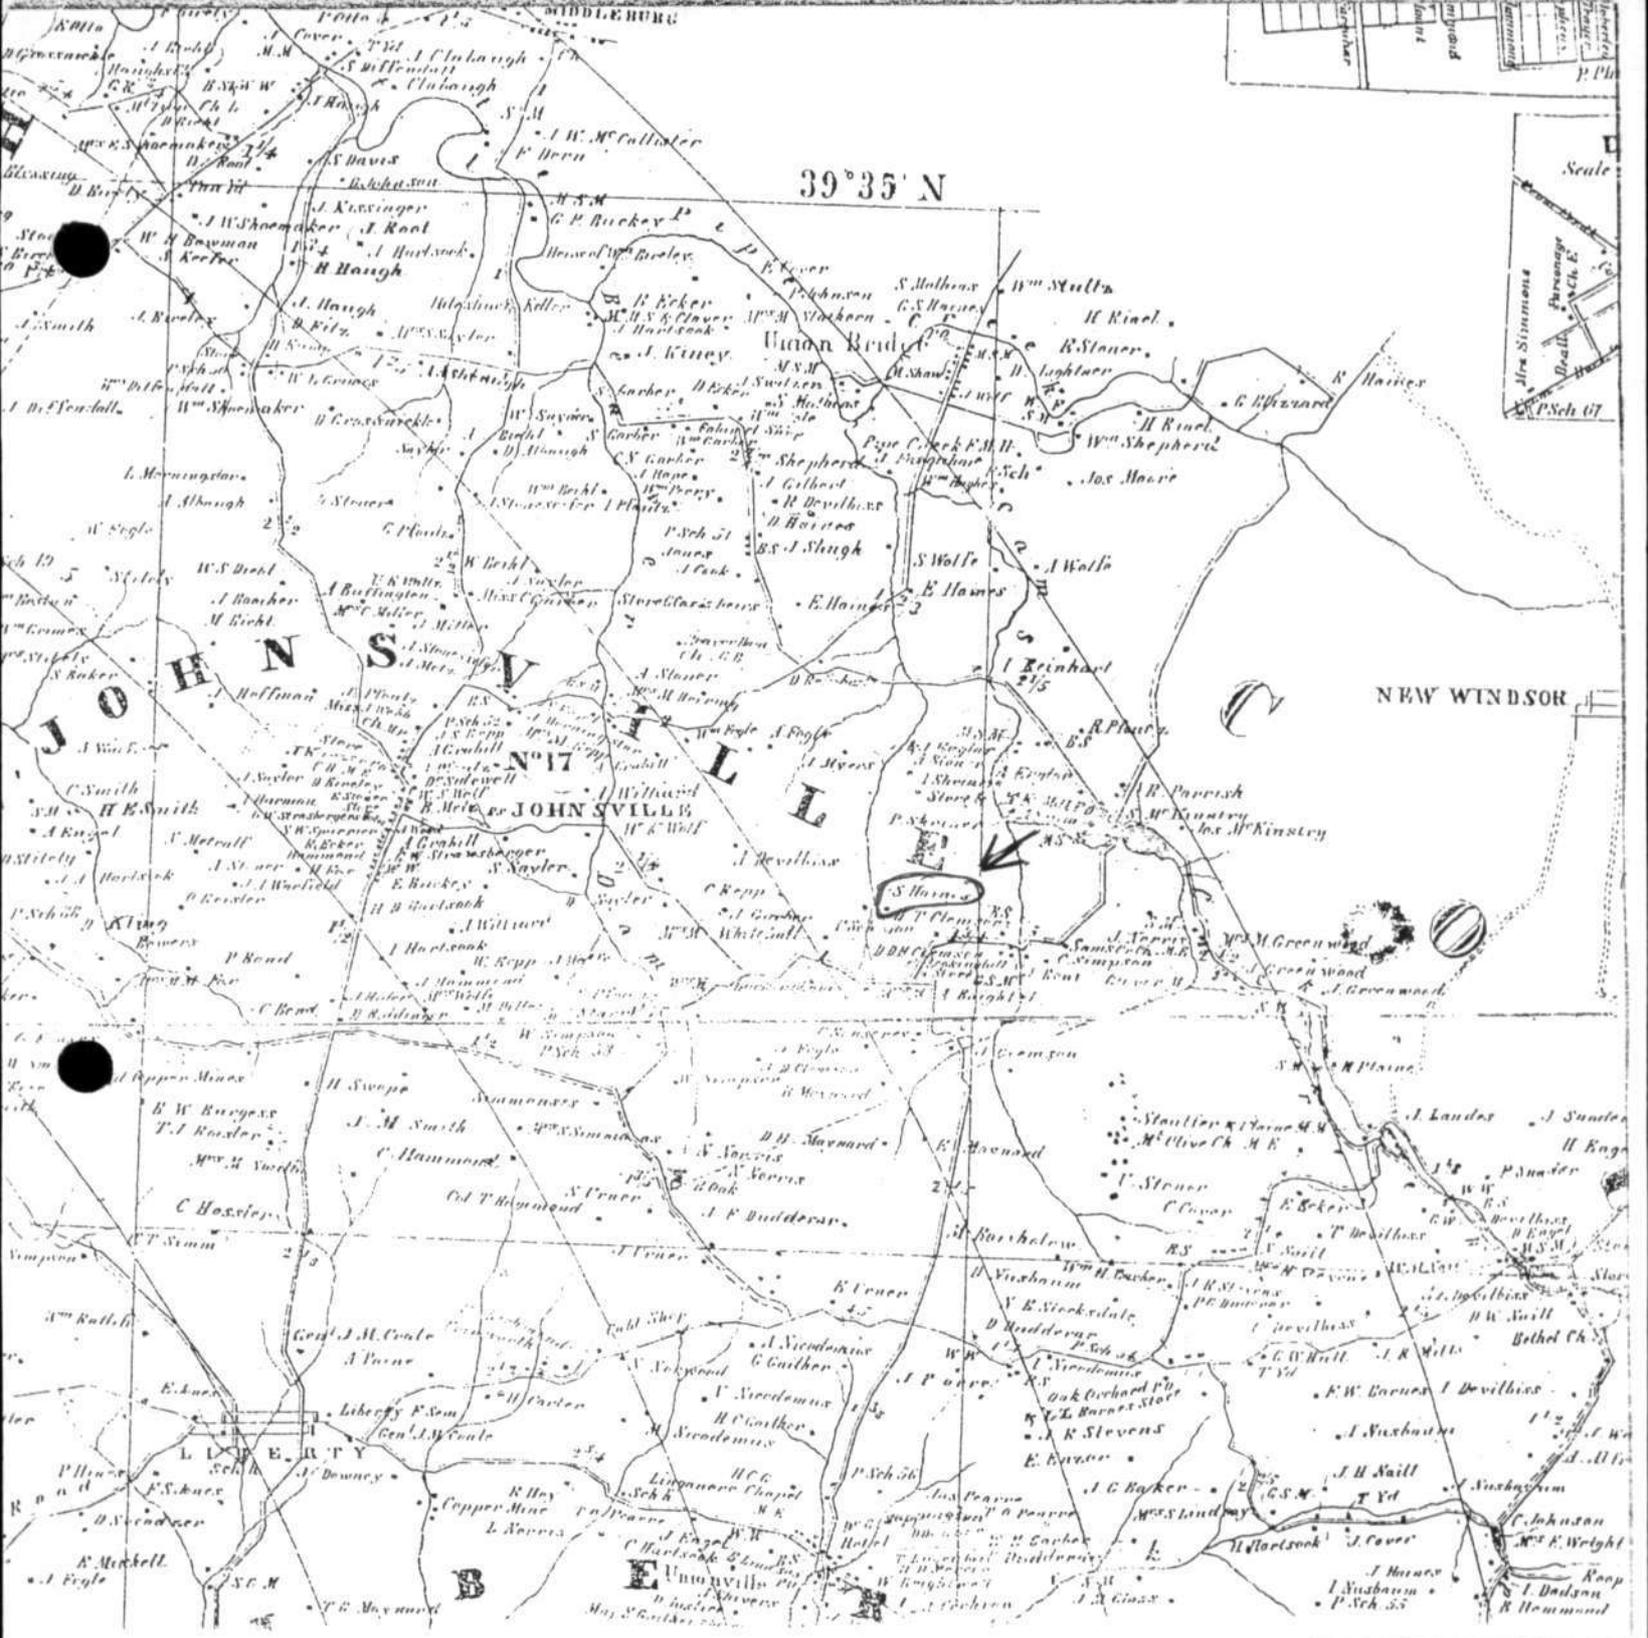

8.1 Significance

The Stephen Haines Farmstead is a good example of the mid-19th century farmstead in Frederick County, retaining most of its domestic outbuildings and a considerable number of agricultural structures with few alterations. The dwelling house is architecturally significant for its elaborate scroll-sawn porch and gable trim. Based on Gothic Revival designs, the craftsmanship is of a high quality, indicating both the skill of the unknown carpenter and the cultural level of the owner. Stephen Haines, the probable builder, received the farm property by will from his father and by purchase from his brother. He is identified on the 1858 and 1873 maps as the owner of the property, confirmed by the chain of title. Compared with other farms in the Johnsville area, the Haines Farmstead is more complete in terms of its outbuildings. The Israel Rinehart House (F-8-93), about 1/4 mile north of the Haines House has a good variety of remaining outbuildings including a rare dry house. The Haines Farm's most important outbuilding is the dairy, which deserves more study and description. Architecturally, the Haines House is outstanding in terms of its decoration, rating with the C. Repp House (F-8-94), also a nearby property, in fine trimwork. The Haines House should be more fully described and its interior plan documented.
