DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Bear Creek Bridge is a steel, two-panel Pratt pony truss bridge. Its connections are rivetted. Its wooden plank deck is supported by wood stringers and lateral bracing and steel floor beams. Steel lattices are attached to the panels as additional protection to the motorists from falling. The overall length of the bridge is 54'. The height from the deck to the top of the panels is 6', and the length of a panel is 13' 10".

STATEMENT OF SIGNIFICANCE

This bridge is similar to several other small steel truss bridges in Garrett County which were erected in the first years of the twentieth century (compare G-II-A-060, Buffalo Run Bridge and G-III-A-034, Deep Creek Bridge). Such bridges are relatively uncommon in Garrett County.
