

ABSTRACT

G-IIA-262

MASON-DIXON LINE: MILESTONE NO. ---(217)

1767 (mound only)

Markleysburg, Pennsylvania vicinity

Public/private

Milestone No. ---(217) is a small mound of stones and silt known as Guard's Mound, and is believed to be the remains of an original Mason and Dixon cairn of 1767 when erected to mark their 193rd mile west of the northeast corner of Maryland, the beginning of their 230.228-mile West Line, the English provincial boundary later known as the Mason-Dixon Line, famous for its historical impact and innovative survey methods. Left unmonumented in 1902 during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary, it is now a loosely strewn mound, scarcely measurable (rising a roughly estimated 1½ feet high by about 6 feet in diameter), and has a large dead tree stump in the middle and a multiple property boundary corner spike driven into the ground at the base of the west side of the stump. If found to be the correct mound, when ^{this site is} resurveyed by a civil engineer, it will be significant on the national and state levels primarily as one of the thematic group series of some 248 markers still visually defining the West Line. Locally, as one of the some 42 markers along the present Garrett/Somerset-Fayette county boundary it will also be significant symbolically for its relationship to the colonial and Civil War heritage of these counties (if identified visually), and as a multiple property corner survey point.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This marker is a small mound of stones^{and silt}, ^{known as Guard's Mound,} only, is believed to be the remains of an original Mason and Dixon cairn of 1767 when erected to mark their 196th mile west of the "Post Marked West in Mr. Bryan's Field" (193 miles west of the northeast corner of Maryland, the beginning of their 230.228-mile West Line). It is still distinguishable as a mound, but has been heaved by a large tree (now a dead stump) growing out of the center, and silted from the hillside wash over time, now leaving it a^{loosely} strewn, unmeasurable mound, rising about 1½ feet by a roughly estimated 6 feet in diameter. As a multiple property boundary survey corner, it is also marked by an iron spike driven in^{to the ground} near the tree stump on the west side. (* see below)

The area here is the west^{wooded} slope of an unnamed hill, rising between Reason Run to the east and Guard Road to the west, with only^{sparsely} scattered settlement along the road. The site is within Election District 2 of Garrett County, MD, and Henry Clay Township of Fayette County, PA; about 1¼ miles northeast of the scattered settlement of Asher Glade, MD, and about 2 miles southeast of the village of Markleysburg, PA; at a point about 90 feet south of the old pipeline and about 50 feet east uphill from Guard Road. It cannot be seen from the road, but is the most likely candidate for the mound on the entire hillside at the Line, and can be distinguished when closeby.

The 1900-03 Resurvey notes (MGS Vol. 7, 1908, pp.99-100) describe the site a a "Small mound of stones with a good sized tree growing in it, on the east side of the road It was intended that a monument should be set in this mound and one was sent here for that purpose, but owing to the difficulties presented by the tree with its numerous spreading roots, the assistant who was charged with the duty of setting it concluded that it would make too long and expensive a job and he therefore placed the monument on the next ridge to the westward, where it was noted under the next number."

* It should be noted here that although we were quite sure this site was the correct one (as shown on the 1900-03 Resurvey engineer's map, Plate LXXI), only a civil engineer can verify this through a resurvey. In the meanwhile, the original records will be traced at the National Archives during the Phase II of the Mason-Dixon Line boundary marker project, n additional information^{found} will be forwarded for the Trust's and Maryland Geological Survey files.

(see Thematic Group National Register nomination form for further descriptions of the original Mason and Dixon cairns and list of sites noted by them in their journal)

STATEMENT OF SIGNIFICANCE

This small mound of stones with a large dead/^{tree}stump in the middle is significant on the national and state levels primarily as one of the thematic group series of some 248 markers still visually defining Mason and Dixon's West Line, the 230.228-mile English provincial boundary later known as the Mason-Dixon Line, famous for its historical impact and innovative survey methods. This site was originally surveyed and marked by a cairn in 1767, and the remains left unmonumented at the time of the 1900-03 Resurvey of the Maryland-Pennsylvania boundary. Locally, as one of some 42 markers along the present Garrett/Somerset-Fayette county boundary, the mound, even though deteriorated, is also significant symbolically for its relationship to the colonial and Civil War heritage of these counties, and as a multiple property corner survey point.
