

HA-1488

After 1902

Keen-Hopkins House
635 Roland
Bel Air
Private

This house is one of the best examples of the mature Queen Anne style as built in Bel Air. Particularly interesting is the large front gable with a triplet window and patterns of shaped shingles. The two story bay window on the north side is unparalleled in Town. A paneled first level is topped by a shingle-skirted level of slightly different shape, all under a large shingled gable carried on massive carved brackets.

The L-shaped board and batten barn on the rear of the lot is older than the house. It originally belonged to the Ferry-Webster House across the street at 703 Roland. It probably dates to around 1890.

ADDENDA (May 1990)

Keen House
635 Roland Avenue
HA-1488

Paragraph 1

- 1) Change Line 6 to read: "**Hexagonal** shingles decorate the second story . . . "
- 2) Change Line 8 to read: "The west, north and south elevations of the house have large, wide gables, the bottom two-thirds of which are slightly recessed and contain a **triplet window** of 1/1 double-hung sash."
- 3) Change Line 15 to read "**vinyl** shingles."

Paragraph 2

- 1) Insert the following sentence on Line 5 after the words "wind break:" "**There is a glass and frame screen door.**"

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This two and a half story, four bay Queen Anne house is at 635 Roland in the Town of Bel Air, Harford County, Maryland. It has recently been aluminum-sided except on the bay window and in the gables. L-shaped, the house has a three bay main block (south). The ell is on the north side and terminates in a gable topped two story hexagonal bay window with paneling above and below the windows on the first story. Fish scale shingles decorate the second story of the bay, slightly overhanging the first. The gable is supported on massive brackets half the length of the second story. The west, north and south elevations of the house have large, wide gables, the bottom two-thirds of which are slightly recessed and contain three slender 1/1 double-hung sash windows. The top third has a ventilator. The whole gables are shingled in rows of fish scale and common shingles. The front gable has an additional diagonal pattern in the common shingles and have cornice returns at the bottom. The south elevation, the only one without its gable, has, instead, a gable-roofed, slate-sided dormer with cornice return and the same patterned shingles. The second story windows are 1/1 double-hung sash. The first story windows are 2/2 except for three 6 pane casements in the west bay of the south elevation which serve to light the stairwell.

A large plain chimney straddles the ridge of the main block. The front porch is L-shaped, with a joined shed roof carried on slender doric columns. There are two entrances in front. The major one, which leads to the entrance hall is in the south bay of the west elevation. It has a 15 pane door enclosed in a glass and panel wind break. A secondary entrance, to the present living room (former dining room) is in the north bay of the west elevation of the ell. It has a transom over a pair of 5 pane french doors.

The back door is in the south bay of the rear elevation. This section was formerly a two story shed-roofed porch. It has all been enclosed except the north bay on the second story, which is still open and has a plain square post and plain square balusters in the balustrade. The little gable roofed "dog-house" addition to the rear is the entrance to the cellar.

The ground floor interior has four parts: to the southwest the entrance hall, to the northwest, through a large square arch which hides sliding double doors, the former parlor, now the dining room, to the northeast the former dining room, now the parlor, and to the southeast the kitchen.

The dog-leg, closed string staircase rises against the south wall of the hall. It has turned balusters, a turned newel with a block and round finial, and a spandrel under it with recessed panels. Round pendant balls hang from the staircase turn. The only fireplace in the house is at an angle in the southwest corner of what is now the parlor. It has reeded engaged colonettes and a molded frieze and shelf. Behind (to the east of) the kitchen are a pantry (n) and the enclosed porch (s) which serves as a laundry room. There is a wierd little triangular hall between the parlor, the pantry, and the kitchen. This little triangular space occurs in other houses in Dallam's Second Addition where the rooms did not come out just right.

The second story has three bedrooms and two baths. The third story (or attic level) has two bedrooms, the south of which has a fixed basin.

The woodwork in the house is molded with carved corner blocks in a "door bell" design. Two of the three bedroom doors have a two pane transom that opens from the side.

SPECIFIC DATES after 1902

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

This elegant Queen Anne house was built, probably shortly after 1902 by Harry Keen, partner in Hanway and Keen Lumber Company, the successor to Edward Ferry's Lumber Yard by the railroad station. Edward Ferry's own house was across Hall Street - 703 Roland - and Ferry also owned this lot. The board and batten barn on the east portion of the lot is said to have belonged to Ferry and is older than the house. Ferry and his mother, Barbara Dunnigan, got in financial difficulties around the turn of the century, sold their Bel Air property and moved to Philadelphia. He sold this lot to W. Frank Keen in 1899 for \$500 (96/44). In 1902 Keen and the Ferrys sold it to Mary D. Keen (Mrs. Harry Keen) for \$600 to Keen (108/4). The Keens probably built the house shortly thereafter. Family legend in the Hopkins family suggests that the house is so irregular because Keen built it from left-overs from the lumber yard.

Mrs. Keen sold the house to Annabel W. Hopkins (Mrs. Wylie Hopkins, Sr.) in 1920 (169/35). At the time there was a \$3000 mortgage on it. The present owner, Harry Hopkins, inherited it from his mother.

The Maryland Historic Sites Inventory was officially created by an Act of the Maryland Legislature, to be found in the Annotated Code of Maryland, Article 41, Section 181 KA, 1974 Supplement.

The Survey and Inventory are being prepared for information and record purposes only and do not constitute any infringement of individual property rights.

RETURN TO: Maryland Historical Trust
 The Shaw House, 21 State Circle
 Annapolis, Maryland 21401
 (301) 267-1438

According to Mrs. Harry Hopkins, her mother-in-law rented a second story room and bath to young officers and their wives stationed at Aberdeen and Edgewood during World War II, and so she changed the parlor and dining room so that she could have more privacy.

A board and batten, gable roof, L-shaped barn still occupies the east portion of the lot by the alley. According to Mrs. Hopkins, it is older than the house.
