Private

Facing southeast, this two-story, three-bay frame commercial building once had a central door with 6/6 sash flanking windows, and three 6/6 sash windows on 2nd floor. Now, the 2nd floor 6/6 windows remain, but the 1st floor has a door in the southwest bay and a polygonal shop window covering the right two bays. The two-light transom above the door may be the original, moved from the center. The asbestos siding has been removed from the front facade.

The northeast gable end has one 6/6-sash window on each floor.

The rear (northwest) facade has three floors. The 2nd and 3rd floors of the right half project slightly above the 1st floor and out from the left half. This right half has one 6/6 sash window centered on each floor. The left half has two 6/6 sash windows on each floor.

The southwest side of the building projects about 6 feet beyond its neighbor (HO-311). The 2nd and 3rd floors of the exposed side have one 6/6 sash window centered on each floor.
