DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE

The house is a large framed structure, built in several sections. The present main facade is five bays; the three east bays, being parts of two older, framed buildings and the two west, a more recent addition. The present interior chimney was an end chimney for the older section. At the south end, there is an external stone chimney with a brick stack. The doorway is centrally positioned on the older section; windows are 6/6 double hung sash. The sheathing is weatherboard. Across the entire facade is a shed-roofed porch.

The east end of the house is a one story, log structure that had a central doorway on the north facade and flanking windows. The loft floor joists appear to have been added; there are signs of earlier floor joists at a lower level. There is at present no chimney. The floor has been raised but the original door sill is visible. The two sections sit at an angle to each other and are connected by a lean-to passage (now the kitchen).

East of the house is a dairy with a loft room entered through the gable. The foundation is stone and the sheathing tongue-and-groove.

There is a barn with a sawn frame and built using principal and secondary wall posts and studding. The roof rafters are log.

A corn crib or tobacco barn is built of log with inverted V-notching. The roof rafters are also log, with collars half-lapped over each pair. It sits on stone piloti. A second crib is framed with hewn members mortised, tenoned, and pegged. The log rafters are birdmouthed over the plate and joined at the ridge with a vertical joint.

Another log shed is board-and-batten sheathed. The bank-barn is framed with a stone foundation. The members are sawn and joined with shouldered mortises and tenons. It has horizontal weatherboarding and louvered windows with pedimented heads.
