Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The Esworthy House is a c.1900 rural vernacular farmhouse which has been extensively enlarged by modern additions on both sides and rear elevations. The house, located on the east side of Esworthy Road, is reached by a gravel driveway which runs along the south side of the house and terminates in a circle at the rear (east) elevation. Mature deciduous trees are located on the south and west sides of the house. From the back, there are extensive views of open fields and woods.

The main block of the dwelling is a two story, three bay, frame I house which faces south. The side-gable roof is composition-covered. Walls are covered with vinyl siding. Windows have two over two sash with molded lintels and louvered shutters. A center door with a single-pane transom is sheltered by a one story, one bay portico supported by decorative metal posts with flat roof outlined by a wooden balustrade.

The house has four additions, two of which are vinyl-covered and two of which are brick. Extending from the east end of the main block is a one story, three bay wide, gable roof, brick wing. The roof is composition-covered and there is a large internal end chimney located on the ridge. The windows are compatible with those found on the main block. The entrance is located on the rear (north) elevation.

Extending to the rear from the northwest corner of the main block is a two story, three by two bay ell with an external chimney between the northmost second and third bays on the west elevation and an internal chimney centered on the ridge line. The roof is corrugated metal and the siding is vinyl except for the first story on the elevation which is clad in brick. Windows are two over two sash and shuttered. A five light bay window is located on the rear (north) elevation on the first story.

A one story, gable roof addition extends from the southwest end of the rear ell at the point where it joins the main block.. Sided with vinyl, the addition terminates in a glass-enclosed porch has entrances on both the south and west.

At the rear (north) of the house, and extending at an angle from the northeast corner of the ell, is a one story, flat roof brick addition which has a curved northeast wall. A row of louvered windows is located along both the east and north elevations. The entrance, on the north elevation, is reached by a short flight of steps with metal railings.

(Continued)

Continuation Sheet

M: 24-32 - Esworthy House - Twin Oaks/Haywire Farm

Section 7: Description

Page 7.1

The one story, curved brick wing at the rear and the one story wings at the east and west ends were added in the 1950s and later to provide space for a bathroom, dining room, kitchen, and large Florida-Room or sunroom.

To the west of the house is a long, side gable garage/storage shed with a composition roof and clapboard siding which is not contributing.

A springhouse was located on the property in 1979. Current information about this building was not available.

A dairy barn, corncribs, and a bank barn, which were located north and west of the house, are no longer extant.

Prepare both a summary paragraph of significance and a general statement of history and support.

Summary: This resource has some historical significance for its association with the family for whom Esworthy Road was named, but its architecture has been dramatically changed through many additions and modern entrance portico.

This house type with three bays, side gable, and asymmetrical fenestration, found throughout the Darnestown area, was in use from the 1850s through the first few years of the 20th century. Other examples include the neighboring Sunrise Farmhouse, 1856 section (24/31), the Nathan Allnut House, c1903 (24/2), and the Edward Hayes House, 1850s (24/19 Darnestown Historic District). The integrity of the Esworthy House has been dramatically compromised with artificial siding, porch replacement, and side and rear additions which significantly change the appearance of the house.

The house was built about 1900 by George and Grace Esworthy where they lived for 40 years. The construction date is estimated from tax assessment records which rose from \$40 in 1899 to \$350 in 1902 and oral history.¹

George farmed his land along the road which became known as Esworthy Road. George's parents, Joseph and Lavinia, who owned land including this property since 1875, had a house located near the intersection of Esworthy and Seneca Roads.²

In the 1920s or 1930s, George Esworthy turned to dairy farming as did many farmers in the area. When he was older and had difficulty finding hired help, he sold the 175-acre farm in 1941 to Harry H. Steidle who built a new house to the east and installed a Czech refugee family in the Esworthy House.³ The farm was subdivided and the house and 4.7 acres sold to the Pagels who did extensive remodeling to the house from 1951 to 1980. (See attached chain of title.) The bank barn burned during the 1950s. The house now sits on a 2.69 acre lot.

Prepare both a summary paragraph of significance and a general statement of history and support.

The Esworthy House is a circa. 1900 rural vernacular farmhouse.¹ Although the main block of the house has not been substantially altered, two modern additions have been made to it. These additions, especially the larger one to the rear, are not sympathetic to the architectural style of the original house and thus have changed the overall appearance of the house significantly. Better Examples of this style of dwelling can be found in the area.

The house was built on land which Lavinia Esworthy purchased in 1875 at a public auction.² Later, a trustee conveyed the property in 1894 to Joseph W. Esworthy (perhaps Lavinia's husband) for his³ lifetime to be passed on to George and Frank Esworthy afterwards. Thus the property stayed in the Esworthy family for many years (until 1941). The house was probably built about 1900 and may possibly have incorporated into its construction a small earlier dwelling.

George and Grace Esworthy sold the house in 1941 to Harry and May Steidle.⁴ The Steidles made a large one story brick addition about 1957 which included a bathroom, dining room, kitchen and a large "Florida room." In 1951 the house was sold to Robert and Darja Pagel who made the second addition.⁵ The house was purchased in 1980 by the present owners, Maurice and Diane Daughterty.⁶

¹This house has been said to have been built about 1880, and Joseph Esworthy's residence does appear on the 1879 map. However, the site location of the 1879 map does not exactly match the present site nor does the 1880 date connect with the tax assessments which fall from an improvement value of \$350 in 1902 to \$40 in the previous entries beginning in 1899.
