The Old Episcopal Rectory

223 West Montgomery Avenue

Built: 1874-75

Builder: Joseph Haney

Private

Many of the original architectural elements mentioned in the existing specifications and contract for the construction of this house are extant. Its vernacular touches using the Italianate vocabulary are still in evidence, although the house has been enlarged several times. From its construction until 1952 it housed the Episcopal Rectors and their families; its site was donated to the Church by Miss Margaret J. Beall and platted as "The Rectory Lot" in the subdivision of her estate.

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The subject house faces south on West Montgomery Avenue in a row of late-19th century houses with consistent deep setbacks. A number of large deciduous trees, located near and around the house, shade the sizeable lot. Cement steps from the West Montgomery sidewalk lead to a brick front walk.

A main block and three additions comprise this house that was constructed in several stages in the late 19th century. The two-story main block (c. 1874) is in form a two-thirds Georgian or side-hall plan. A rear two-story addition with low-pitched roof sloping to the east appears to be constructed at approximately the same time and may be the original kitchen. The second 2-1/2-story, 2-by-1-bay cross gable addition extends to the east of the main block, but is set back from the front facade of the main block. The third addition is a 1-1/2 story, gable-roofed 1-by-1 bay building connected by a semi-enclosed, covered passageway. These probably were built in 1888. The house and all additions are set on a brick foundation and covered with a tin seamed roof. The cross gable addition, however, is covered with a patterned tin roof.

The original sheathing on the house was German siding. At a later date, horizontal clapboard was installed over the original. Currently, there is a third layer: asbestos shingle with a scalloped lower edge. The rear building has horizontal clapboard siding.

BN A
The three-bay south facade of the main block has Italianate stylistic elements. These include the four decorative braces supporting the overhanging eave, exposed rafters, and decorative window and door surrounds. An off-center brick chimney rises above the center bay. The second-story has a single 2-over-2 sash window in each bay. Elongated 2-over-2 sash windows are in the first and second bays of the first floor; a wooden exterior door with glass storm door and clear light transom above is in the third bay. Ornate lamps are located on either side of the front door. Wooden steps and railing lead to the front door. Most windows have louvered plastic shutters.

The two-bay south facade of the recessed addition has a 2-over-2 sash window in each second-story bay and 2-over-2 elongated sash window in each first-story bay. A 1-over-1 attic window is centered in the gable pediment which is enclosed with a decorative frieze and architrave that match the cornice decoration. All the windows have flat lintels and louvered shutters.

The west facade includes the gable end of the main block and the taller side of the rear addition. It is three bays wide with 2-over-2 sash windows in each bay of both floors.

Continued on attachment 7.1

M: 26/10/45

The Old Episcopal Rectory
Attachment 7.1

The north facade consists of the two-bay rear addition with asymmetrical window placement that includes single 2-over-2 sash windows on first and second stories, second bay, and a single one-light window in the first bay, second story. Single 2-over-2 sash windows occupy the first and second stories of the one bay east addition. Brick flues are found on the north, west, and northeast corners.

The one-bay east facade has a 2-over-2 sash window on both floors and a 1-over-1 window in the pediment. The pediment features and window surrounds are similar to the south facade of this addition.

Probably original to the first addition (rear two-story) were two porches facing east. The upper one appears to have been enclosed about the time the horizontal clapboard siding was added to the main house as there is no German siding on the east or north side of the addition. Alternatively, this addition could have been added at the same time as the clapboard siding. The present owners enclosed the lower porch in 1985.

A one-car garage which once stood to the north (behind) the rear building was removed by the Deans.

Prepare both a summary paragraph of significance and a general statement of history and support.

Significance

The vernacular building constructed to house the Rector of Christ Episcopal Church is particularly interesting for the existence of specifications and contracts submitted by the local carpenter and preserved by the Church Vestry. Despite some later minor additions to the building, its use as the Rectory until 1952 followed by a thirty year ownership by one family has allowed the building to retain most of the original architectural elements.

History and Support

The first Parsonage erected by members of Christ Church was built in 1833 on the south side of Darnestown Road. The Vestry Ledger Book records the pledges and donations to this cause, along with payments for such things as "33 panes of glass".^{1/} But during the Civil War and for some years thereafter, the Church suffered from intermittent vacancies in the pastorate, an unsettled congregation and the consequent lack of funds.^{2/} Margaret Beall's decision to subdivide her 67 acre estate and to donate Lot #10 as a "Rectory Lot" allowed the Vestry to sell the old building to an outgoing pastor in lieu of past salaries owed him.^{3/}

Bids for the construction of a 22-1/2 by 31-1/2 ft. two-story frame building with 14 X 16 ft. kitchen were submitted by three local house-joiners/carpenters; the contract for the new Rectory was awarded to Joseph Haney at a cost of \$2,093.00. (See attached Specifications 8.2, 8.3, 8.4, 8.5) The bids were undated; however, from the following Minute Book entry it appears that construction began in 1874:

November 9, 1874 -- Resolved that R.T. Brown be called as Rector of this Parish provided he will come for \$600 a year and use of the Parsonage when finished.

By 1887, the fortunes of the congregation had improved to the extent that a new Gothic-style Church was nearing completion on the site of the original 1821 Church. In the same year a two-room addition was made to the Montgomery Avenue Rectory, along with "suitable stabling" and a 16 foot wide Rector's Alley leading from the rear of the building to Harrison Street.

Continued on attachment 8.1

M: 26/10/45
The Old Episcopal Rectory
Attachment 8.1

The Vestry was fortunate to have local architect/builder T.C. Groomes as a member of the congregation. Under his guidance necessary repairs and modifications were made, many of these improvements financed by the Ladies Guild. These included a steam heating system for \$445.00 in 1907; permission for the ladies to paint the Rectory "if they desire to do so" (1909); sewer hook-up and plumbing system (1914), and various porch and roof repairs. (1917-1919).

For 70 years the families of the various Rectors tenanted the house. Among them was Canon Rudd who not only beautified the Church with his masterful carvings of new rails and pulpit, but who planted a famed monochrome garden known as The Blue Garden behind the Rectory. During the 1940's asbestos shingle siding was installed on the house to cover the deteriorated original wood,^{4/} but by 1952 the Rectory required so much repair that the Vestry decided to sell the property to Mr. and Mrs. John Dean.^{5/}

The Deans modernized the interior and removed the front porch, but in their 32 year ownership retained most of the architectural detailing of bracketing, window and cornice trim. The present owners purchased the Rectory in 1984.

Footnotes:

1. Original Ledger for Christ Church 1821-1834. All other Minutes are taken from the original Register of Proceedings of the Vestry from October 5, 1829 to January 9, 1926.
2. Maude Wilson Betts, Piscataway to Prince George's Parish, a Church history privately published in 1975, p. 13.
3. Lot #10 of Beall's Subdivision was deeded to the Vestry by Margaret Beall and recorded in 1876 at Montgomery County Land Record EBP 14/207:
Feeling especial and deep interest in the prosperity and perpetuity of the Congregation of Christ Church... and desirous to promote the welfare of said Congregation ... (by) providing a lot of ground as a site for a Parsonage...
4. Interview with Mrs. Edna Black, widow of Reverend Raymond P. Black who served as Rector from 1940 to 1970.
