Resource Count: 1

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The Lacy Shaw House is a 1½-story, 3-bay bungalow-style house on the west side of the Old Columbia Pike in the Silver Spring vicinity, Montgomery County. Constructed in 1924, the building is a traditional bungalow form with integral porches and shed roof dormers with exposed rafters on both the front and rear elevations. The porch on the front elevation has formed concrete piers with chamfered wood posts above. A decorative band with an egg and dart pattern divides the piers and posts. The rear porch is enclosed.

The structure has a side gable, asphalt shingle roof and an interior brick chimney. It is of wood frame construction with wood siding on the first story and wood shingles on the dormers and in the gable ends. The structure has a concrete foundation and double-hung wood windows.

The east, or front facade has a full-width integral porch. The first story entrance is a glass and wood paneled door with six lights. The fenestration pattern is symmetrical with two 6/1 double-hung windows on the first story. There are triple 4/1 double-hung windows in the dormer. Typical elements of the bungalow-style, including an integral porch and a large shed dormer with exposed rafters, are evident in this elevation.

Centered on the south elevation is a wood door with four lights. The fenestration pattern is irregular with two, 3-light fixed sash windows on the basement level and one paired 6/1 double-hung window on the first floor. There is also a single, 6/1 double-hung window on the first story. A 6/1 double-hung window and a vent with wood louvers are located in the gable end.

The west, or rear elevation has an integral enclosed porch and a large shed dormer. The fenestration pattern is asymmetrical with four paired 6-light casement windows, one 6/1 double-hung window and a glass and wood panelled door on the first story. There are three 6/1 double-hung windows in the dormer. Typical elements of the bungalow style including an integral porch and shed dormer with exposed rafters, are evident on this elevation.

The north elevation has a projecting bay with a shed roof. The fenestration pattern is symmetrical with two 3-light fixed sash windows on the basement level and two paired 6/1 double-hung windows on the first story. There are two 2/1 double-hung windows and a vent with wood louvers in the gable end. Typical elements of the bungalow style, including a projecting bay, are evident on this elevation.

The property is located on the west side of the Old Columbia Pike with residential property to the south, commercial property to the north and a school to the west. The property's setting is altered by the intrusion of commercial development.

8. Significance (Continued)

The "motor car", first manufactured for sale in 1895, prompted expansive economic and social changes after the turn of the century. The automobile and an improved system of roads offered further opportunity for suburban expansion; new communities appeared, in some cases quite distant from railroad and streetcar lines. Although Fairland remained a small community until after the Second World War, development occurred along the Columbia Pike.

The bungalow became the dominant style of middle and working class housing in the period between 1900 and 1920. It was a style spread primarily by plans sold in popular catalogues, rather than by architects. Bungalows are typically one-and-a-half-story structures, with low, horizontal lines and an integral porch on the front of the house. They are also characterized by a series of broad gables that form contiguous and receding planes. Gables often are bracketed and have wide projecting eaves. Roofs are gently pitched and often have either gable or shallow shed dormers. Windows are either sash or casement with many lights or single panes of glass. Bungalows are also notable for their earth-tone stains and use of natural materials such as stones, shingling, or stucco. The bungalow form frequently features Craftsman-style detailing, such as exposed rafter tails, wood brackets under eave overhangs, three-over-one double-hung sash windows, and wide wood frames around doors and windows. There are numerous variations to the bungalow style such as the Colonial, Swiss, and Spanish.

Bungalows were enormously popular in the early years of the twentieth century because they were inexpensive to design and build. Their emergence coincided with the rise in the number of working and middle class Americans who could afford to purchase a house (Klein 1985, 44).

National Register Evaluation:

The Lacy Shaw House, constructed in 1924, is eligible for the National Register of Historic Places under Criterion C. The property is an excellent example of the bungalow style, with finely articulated decorative details, and a high degree of integrity. The period of significance of the property is from 1924 to 1947. The property is not eligible under Criterion A, as research conducted indicates no association with any historic events or trends significant in the development of national, state or local history. Historic research indicates that the property has no association with persons who have made specific contributions to history, and therefore, it does not meet Criterion B. In addition, the property is not eligible under Criterion D, as it has no known potential to yield important information.

10. Geographical Data (Continued)

Verbal Boundary Description and Justification:

The National Register boundaries of the Lacy Shaw House at 13308 Old Columbia Pike, follow the current property lines of parcel P88 on Tax Map KR 341. This approximately .20 hectare (.5 acre) parcel is bounded on the north, south and west by adjacent tax parcels, and on the east by the Old Columbia Pike. The boundary includes the house. According to deed research, the parcel was approximately .80 hectare (2 acres) at the time the house was constructed in 1924, however, it was reduced to its current size in later years. The property is bounded on the north by a small, modern shopping plaza, on the south by residential property, on the west by a wooded area, and on the east by the Old Columbia Pike.
