

PRINCE GEORGE'S COUNTY
HISTORIC SITE SUMMARY SHEET

Survey #: P.G. #70-44 Building Date: 1918-1921

Building Name: Bagelmann House

Location: 6129 Princess Garden Parkway, Lanham, Maryland

Private/Residence/Occupied/Good/Inaccessible

Description

The Bagelmann House is a two-story bungalow-style dwelling constructed of rock-faced cement block. It is set on a knoll overlooking Princess Garden Parkway to its west. The three-bay main facade has central entrance through a fifteen-light door with a five-light transom and five-light sidelights. There is a cement lintel above the door and double 6/1 windows flanking the entrance. The first story is sheltered by a high, three bay entrance porch incorporated beneath the house roof. The roof is supported by short ionic columns of molded cement, on high rock-faced cement block bases. The porch has overhanging eaves with projecting rafter ends, as do the dormers and cornice around the building. A two-bay hipped dormer centered above the entrance at second level has two 6/1 windows. The north facade is also surmounted by a centered dormer. There are eyebrow windows in the rock-faced cement block foundation. The fourth bay projects and is incorporated beneath the house roof slope. The south facade is identical to the north facade. The three-bay east (rear) facade has a central rear entrance accessible from a two-bay cement block stoop.

The interior of the house has a central stairhall with two north and two south rooms. The closed string stair has rectangular balusters and a rectangular newel post. An original mantel has a white-painted brick surround with corbelling below the mantel shelf. There are two outbuildings to the rear of the house. Both date to the time of house construction. The garage is a rectangular building of rock-faced cement block, having a hipped roof. A gazebo north of the garage is of wood lattice, hexagonal in shape, with a hipped roof and overhanging eaves with projecting rafter ends. The gazebo shelters a cement-capped well.

Significance

The Bagelmann House was built after 1918 for Gustav and Anna L. Bagelmann, who purchased lots 123 and 124 in the Princess Gardens Subdivision in 1914. Princess Gardens, platted in 1903 by E. Baker Evans, had easy access to the District of Columbia via train from Lanham Station. Gustav Bagelmann was the chef for the Hotel Harrington in Washington, D.C. Anna L. Bagelmann was a supervisor of candy making at the Fanny Mae Company. The Bagelmans held the house property until 1956, and family members still reside in the area. The Bagelmann house is a detailed bungalow, of rock-faced cement block. Older houses in the vicinity of the same material were constructed by Charles Serrin, a carpenter employed at the U.S. Navy Yard and a resident of the subdivision. Serrin used an iron form to mold the cement block into its rock-faced appearance.⁵ Other important details include the molded cement porch columns. The Bagelmann house is significant as an outstanding example of Bungalow style in Prince George's County. It is among the earlier of the houses in the subdivision and housed long-time area residents, a people who were skilled trades workers.

Acreage: 1.3 acres

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The Bagelmann House is a two-story bungalow-style dwelling constructed of rock-faced cement block. It is set on a knoll overlooking Princess Garden Parkway to its west.

The three-bay west (main) facade has central entrance through a fifteen-light door with a five-light transom and five-light sidelights. There is a cement lintel above the door and the double 6/1 double-hung-sash windows flanking the entrance. The windows also have cement sills. The first story is sheltered by a high, three bay entrance porch incorporated beneath the house roof slope. The porch is reached by a flight of cement stairs. The roof is supported by short ionic columns of molded cement, on high rock-faced cement block bases. Between the column bases is a cement lattice, providing the porch balustrade. The porch has overhanging eaves with projecting rafter ends, as do the dormers and cornice around the building. A two-bay hipped dormer centered above the entrance at second level has two 6/1 windows and is sided with the hexagonal asphalt shingle which also covers the roof.

The four-bay north facade is also surmounted by a centered dormer. There are two-light eyebrow windows in the rock-faced cement block foundation. The fourth bay projects and is incorporated beneath the house roof slope.

The south facade is identical to the north facade. The three-bay east (rear) facade has a central rear entrance accessible from a two-bay cement block stoop. The facade is surmounted by a three-bay dormer similar in appearance to the two-bay dormers on the other facades. A wooden stairway leads from the rear stoop to a door in the first bay of the dormer.

The interior of the Bagelmann House has a central stairhall with two north and two south rooms. The closed string stair has rectangular balusters and a rectangular newel post, stained a medium brown. An original mantel has a white-painted brick surround with corbelling below the mantel shelf.

There are two outbuildings to the east (rear) of the house. Both appear to date to the time of house construction. The garage is a rectangular building of rock-faced cement block, having a hipped roof. A gazebo stands just north of the garage. It is of wood lattice, hexagonal in shape, with a hipped roof and overhanging eaves with projecting rafter ends. The gazebo shelters what appears to be a cement-capped well. There are two holly trees by the garage and four metal hardwood trees in the rear yard. The front yard has two large evergreens fronting on the road.

Prepare both a summary paragraph of significance and a general statement of history and support.

The Bagelmann House was built after 1918 for Gustav and Anna L. Bagelmann. The Bagelmanns purchased lots 123 and 124, a total of 2.6 acres, in the Princess Gardens Subdivision in 1914.¹ Princess Gardens, platted in 1903 by E. Baker Evans², had easy access to the District of Columbia via train from the nearby Lanham Station.

Gustav Bagelmann was the chef for the Hotel Harrington in downtown Washington, D.C. Anna L. Bagelmann was a supervisor of candy making at the Fanny Mae Company.³ The Bagelmanns held the house property until 1956, and family members still reside in the area.⁴

The Bagelmann house is a large, architecturally detailed bungalow, constructed of rock-faced cement block. Older houses in the immediate vicinity of the same building material were constructed by Charles Serrin, a carpenter employed at the U.S. Navy Yard and a resident of the Princess Gardens Subdivision. Serrin used an iron form to mold the cement block into its rough, rock-faced appearance.⁵ Other important details include the molded cement front porch columns.

The Bagelmann house is significant as an outstanding example of Bungalow style in Prince George's County. It is among the earlier of the houses in the subdivision and housed long-time area residents, a couple who were skilled trades workers. The Princess Gardens subdivision is an early example of the suburban movement in the United States. It was a neighborhood of skilled tradesworkers employed in Washington, D.C. and residing in railroad accessible suburbs.
