**DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE**

Harmony Hall is a two-and-one-half-story Georgian country house of red brick set in Flemish bond. Over 65 acres surround the house and provide a wooded setting. There is a marvelous open vista from Harmony Hall to Broad Creek and the Potomac River which enhances the architectural ambiance of the house. Crossing this open space to the river is an English ha-ha, built to keep stock from wandering up to the house. Likewise there is an open lawn from the east elevation of the house to Livingston Road with a gravel driveway. These open vistas give the house its historic setting and contribute to the beauty and charm of the site.

Before 1793 the house and surrounding acres were named "Battersea". According to tradition the center house standing today originally had side wings for which there still exist partially buried foundations. The west elevation of the house facing the Potomac River remains much as it appeared in 1723 with a simple gabled roof and seven vertical bays, six of which contain shuttered windows on the first and second floors. The seventh and central bay contains a Georgian styled door with triangular pediment, entablature, and pilasters at each side. Above the door on the second floor is a shuttered window. Railed divided steps built in 1930 lead to the door.

Originally, the east front of the house lacked the two dormer windows, and the central brick pediment with large bull's eye window, and the double front doors that appear today. Henry Chandlee Forman in his Early Manor and Plantation Houses of Maryland states that the bull's eye window, the foliated dormers, the cornice and the double doors on the front were all added in the late eighteenth century. Charles W. Collins who owned and restored the house in the 1930's states in a typed manuscript owned by the National Park Service that the pediment with bull's eye cornice and the two dormer windows "appear to have been added about 1768 which was the year that Broad Creek Church was enlarged.... As a part of this remodeling of Harmony Hall, the road front door was changed from a single six panel door into a larger and higher double door. The bricks used at this time in refashioning the doorway and in the bull's eye cornice were hand-made but smaller and redder than the original bricks. The early workmanship and design is apparent. The house originally had three windows in the north, and four in the south end, but these were closed up probably at the time of the above mentioned changes. The river front to the west stands today as it was originally built, except for the steps which I added in 1930." National Park Service historical architects have questioned the date of the bull's eye window and two dormers. Their age cannot be resolved until there is further investigation of the fabric of the building.

All four sides of the house have a molded brick course forming a water table at the basement level. The east and west elevations each have basement windows six on a side. There is a stringcourse of molded brick between the first and second stories on the east and west side as well as a wood cornice at the roof line containing fretwork in a Greek key pattern. Both north and south ends of the house have brick chimneys. Two small attic windows remain on each side. The roof is covered with composition shingles which replaced a slate roof. The house is known to once have had a "seal ridge tin" roof which replaced the original which was probably wood shingles. A non-historic, gabled brick entrance to the basement is at the west end of the north wall.

CONTINUATION SHEET

ITEM NUMBER 7 PAGE 2

A story-and-a-half brick pantry wing was added to the south end in 1930. The south wall of this new addition never received a covering of red brick over its end wall of hollow clay tiles. The pantry wing is connected by a covered passage to a larger kitchen also built in 1930.

The interior of the house contains some very fine woodwork dating from the earliest period. An exceptionally fine staircase is the chief adornment of the entrance hallway. The landing of the staircase has saddles on the rails. The dining room contains a huge cupboard set into the wall with two sets of doors and a rounded arch molding. Rooms contain ornamental cornices with much fretwork design and also much wood paneling and wainscoting. Four mantels with classical Georgian moldings frame the end fireplaces, two to each floor.

The first and second floors of the main house contain two rooms separated by the traditional central hall. Closets and bath have been added on the second floor. The attic follows the same arrangement modified with added closets and bath. The basement is divided into recreation room, hallway, and three storage rooms all of modern design. Interior floorboards are doweled together with black walnut pegs cut by hand and set at intervals.

A number of outbuildings surround the house. These are all of early 20th century construction and are classified as non-historic.

OUTBUILDINGS

1. Servant's Quarters #1 - One and one half story frame servant's cabin of board and batten with overhanging front porch supported by a pair of log posts. The ridge of the roof is pierced by a brick chimney which runs from the middle of the ridge line to the middle of the one room cabin. The building has windows on the other three sides.
2. Servant's Quarters #2 - Very similar in design to the Servant's Quarters #1, this cabin differs in that it has four wooden posts supporting the front porch. Both cabins are located along the south gravel road into Harmony Hall from Livingston Road. They are the beginning of the "plantation street" style cluster of outbuildings.
3. Garage - This modern garage, built around 1930, has been carefully fitted into the historic scene and serves to complement the "plantation street" buildings nearby. It is located 50 yards south of Harmony Hall itself and fits into the whole complex unobtrusively.

CONTINUATION SHEET

ITEM NUMBER 7 PAGE 3

4. Smokehouse - A one story small clapboard building with pyramidal roof. It is painted white and fits into the "plantation street" motif.
5. Bungalow - A two story, concrete-block bungalow with metal roof and dormer on east side. Main entrance is at the north side through an enclosed gabled porch. The building was erected in the early twentieth century.
6. Shed - Located approximately 75 yards south of Harmony Hall, this small one room, one story frame shed has board and batten siding and a metal overhanging gabled roof. A metal flashing painted white covers the siding and the stone foundation up to a level of about three feet. This building was built around the turn of the 20th century.
7. Shed - This frame shed is located directly east of the garage (about 15 yards) and directly south of the main house (about 60 yards).
8. Log Shed - A building made of roughly hewn logs and planks about 29-25 feet high standing about 25 yards south of the entrance road to Harmony Hall. The bottom six feet of the building is open to the ground, giving it the appearance of being a building on stilts. The building looks precarious. It is separated from the rest of the plantation by a chain-link fence.

ITEM NUMBER 7 PAGE 4

Want Water or Lyles House

Located at the edge of a tributary of Broad Creek to the northwest of Harmony Hall are the ruins of the house Want Water. Of the story-and-one-half rectangular building with frame sides, brick ends and gambrel roof, only the two brick walls with end chimneys and fieldstone foundations remain. The standing brick end walls are set in Flemish bond with window and door openings flanking the sides of the chimney at each end. Some rotting floor joists remain on the fieldstone foundation. The house was standing in the 1930's when it was recorded by the Historic American Building Survey. The HABS drawings and photographs indicate rich interior paneling which has since disappeared. There were three dormer windows on each side of the gambrel roof. The deed for Want Water was patented by Colonel Thomas Addison on October 16, 1708. Colonel Thomas Addison was the only son of Colonel John Addison, a privy councillor of Lord Baltimore. The house appears to date from the first half of the eighteenth century.

## STATEMENT OF SIGNIFICANCE

Harmony Hall is an early eighteenth century Georgian house with Potomac River frontage. Architecturally it ranks with the early Potomac River plantation houses and is an early 13th century house of Maryland. Its original interior woodwork is basically intact. In the 1930's Harmony Hall was recorded by the Historic American Buildings Survey of the U.S. Department of the Interior.

The tract of land on which the house is located was patented on October 27, 1662, under the name of "Battersea" by Humphrey Haggett, a lawyer who practiced in the county court. A residence has been on the site from that time to the present. According to local tradition the present house was constructed in 1723, the same year in which the nearby brick building of St. John's parish, Broad Creek was built by the same contractor.

The connection with St. John's parish, Broad Creek continued throughout the eighteenth century. Rev. Joseph Messenger was installed as rector of Broad Creek Church in 1781. During a portion of his ministry he occupied "Battersea" as the rectory.

The name Harmony Hall was given to the place in 1793 by Mrs. Walter Dulany Addison who was Elizabeth Hesselius, daughter of the famous colonial portrait painter. As a bride she lived there with her husband for a year in 1792-1793, along with her brother-in-law John Addison and his new wife. The two brothers Walter Dulany and John Addison rented the brick mansion of "Battersea" for a year from Dennis Magruder while their own estate Oxon Hill Manor was rented out. So harmonious was the experience of the two couples living together that Mrs. Walter Dulany Addison named the place "Harmony Hall." This name and the romantic story surrounding it outlived the legal name of "Battersea," and the house has been known as Harmony Hall ever since.

In the 1920's "Harmony Hall" was purchased by Charles W. Collins who restored the then-deteriorated building, built the additions, and the outbuildings. On November 4, 1966, Mr. Collins' widow, Sue Spenser Collins, sold the house, outbuildings and 65.7 acres of the property to the National Park Service, retaining a life occupancy. The Park Service bought the property as part of a proposed parkway to Fort Washington which never fully materialized.

PRINCE GEORGE'S COUNTY  
HISTORIC SITES SUMMARY SHEET

P.G. County Survey # 80-11 Date ca. 1723 (?)  
 Building Name Harmony Hall (Battersea)  
 Location 10511 Livingston Road, Oxon Hill  
 Open to Public      yes   x   no

Harmony Hall is a two-and-one-half story brick mansion, laid in Flemish bond, with a gable roof, and a flush chimney at each gable end. It stands in a beautiful location, commanding an exceptional view of Broad Creek and the Potomac River. The west (riverfront) facade has seven bays; the entrance is in the central bay, with pediment, entablature and pilasters. The east or carriage facade has two foliated dormer windows, and a central pediment with large bullseye window. Both facades have a stringcourse of molded brick between first and second stories, and a wooden cornice of Greek key pattern. A pantry and kitchen wing were built on the south side in the 1930's.

There are several original Georgian features in the interior of the main block, most notably an exceptionally fine staircase, ornamental cornices, and four mantels with classic Georgian moldings.

The land on which Harmony Hall stands was patented in 1662 as Battersea. Early in the eighteenth century, the western portion of Battersea, on which the house stands, came into the hands of William Tyler. Tradition maintains that the mansion was constructed circa 1723, at the same time as the building of nearby St. John's Church at Broad Creek. After three generations of Tylers, the Battersea mansion was sold in 1769 to Enoch Magruder, who devised it to his daughter, Sarah Lyles, upon his death in 1786. The name "Harmony Hall" was given to the place in 1793, when two young couples (Walter Dulany Addison, his brother, John Addison, and their brides) rented it briefly from Enoch Magruder's son. It has been known by this name ever since.

In the 1890's, Harmony Hall was acquired by Robert Stein, a Prussian immigrant and prominent merchant. In 1929, it was sold to Charles Collins, who restored the deteriorated building and built the additions and outbuildings. His widow sold the house and grounds to the National Park Service, retaining for herself a life estate.

SUPPLEMENTAL INFORMATION AND PHOTOGRAPHS MAY BE ADDED ON SHEET OF SAME SIZE

HARMONY HALL was probably built in 1722 or 1723 on land called "Battersea", patented in 1662 to Humphrey Haggett, a lawyer. The house was named "Harmony Hall" in 1793 by the wife of Walter Dulaney Addison, daughter of Hesselius, the portrait painter.

Col. Lyles owned HARMONY HALL in 1795. The grand staircase has saddles in the rails. The bullseye window, the foliated dormers, the cornice, and the double door on the front, were all added in the late Eighteenth Century. The brick base and string course are moulded.

WANT WATER was patented in 1708 by Col. Thomas Addison, only son of Col. John Addison, a privy councillor of Lord Baltimore. The house was probably built by the patentee. In 1761 Enoch Magruder owned the place. Inside is rich paneling in ruinous condition. The stair is small and boxed.
