

PRINCE GEORGE'S COUNTY  
HISTORIC SITE SUMMARY SHEET

Survey #: P.G. #86A-3 Building Date: 1923

Building Name: Proctor House

Location: 12005 Duley Station Road

Private/Residence/Occupied/Good/Inaccessible

Description

The Proctor house is two stories, of frame, gable-roofed with a "T" shaped plan. The house is on a hill facing the Railroad right-of-way and Duley Station Road to its west. The three-bay north (front) facade has central entrance, the door having three horizontal panels and one upper light of glass. The raised, three bay entrance porch has turned posts and turned spindle brackets. The windows are 3/1 new, aluminum surrounds and louvered shutters. Two corbelled brick chimneys flank the central entrance at the gable ridge. There is a raised seam metal roof, with lightning rods at each gable end and at the center of the roof ridge. The house is one bay on the the gable ends. It has a boxed cornice with small returns and is sided with asbestos shingle. The house is on a cement foundation. A projecting two-by-one-bay gable wing centered on the south (rear) facade forms the "T" shaped plan. It also has a cement foundation and appears contemporary with the main structure. There is a corbelled brick chimney at the gable ridge of the south wing.

Significance

The Proctor House was built in the early 1920's by Elizabeth Nettie Proctor. The Proctor family has lived in southern Prince George's County for many generations. Mrs. Proctor acquired the property because of its access to the Pope's Creek Branch of the Baltimore and Potomac Railroad. Duley Station was east of the house, across Duley Station Road. Mrs. Proctor worked in Washington, D.C. An older, part log house on the site was removed to build the present structure. This had been the home of Enoch G. Duley, a farmer, from 1867 to 1898. The earlier house appeared on the 1861 Martenet Map. The Proctor House is a simple vernacular building similar to others built in the County in the late 19th and early 20th century. The Proctor House is significant for its vernacular architecture. There has been a house on the site since at least 1861, making the Proctor House also significant as a local landmark.

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The Proctor House was built on the site of an older, partially log house in 1923. The present structure is two stories, of frame, gable-roofed with a "T" shaped plan. The house is on a hillock facing the Pennsylvania Railroad right-of-way and overlooking Duley Station Road to its west.

The three-bay north (front) facade has central entrance, the door having three horizontal panels and one upper light of glass. The raised, three bay entrance porch has turned posts and turned spindle brackets, and a new metal balustrade.

The windows are 3/1 double hung sashes throughout the structure. They have new, aluminum surrounds and louvered shutters. There are two interior chimneys of corbelled brick which flank the central entrance, at the gable roof ridge. There is a raised seam metal roof, with lightning rods at each gable end and at the center of the gable ridge of the main structure.

The house is one bay on the the gable ends. It has a boxed cornice with small, primarily decorative cornice returns. It is sided with blue, wood grained asbestos shingle.

The house is on a cement foundation. There are three light eyebrow basement windows in the foundation on the east and west facades. A projecting two-by-one-bay gable wing centered on the south (rear) facade forms the "T" shaped plan. It also has a cement foundation and appears to be contemporary with the main structure. There is a corbelled brick interior chimney at the gable ridge of the south wing. A shed roof porch is on the south facade of the main block, to the west of the rear wing.

There is a frame garage/shed on a poured cement slab base to the south west of the house.
