DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

This house is located about 1/4 mile south of U.S. Route 40, about three miles west of Hagerstown in Washington County, Md. It is situated on an area of level ground at the top of a gentle slope and faces north.

The structure is a two-story, five-bay frame dwelling with a two-story three-bay el, possibly of log, extending to the rear or south.

The walls of the main section of the house appear to be of frame construction and are sheathed with asbestos shingle siding. Within the decorative shingles are set in an imbricated pattern. The rear section is much plainer in appearance with thick walls which usually denote log construction in Washington County.

Windows appear to be spaced evenly in the front elevation. The openings are large with two-over-two pane double-hung sashes held within narrow frames topped with decorative architraves. The windows are flanked with two-panel shutters at the lower story and with louvered shutters at most second story levels.

The main entrance is located in the center bay of the front or west elevation. The door is topped with a two-light transom and is trimmed similarly to the windows. Window and door openings in the rear section are much smaller than those in the main section but have similar decorative trim.

Modern asphalt shingles cover a roof structure which extends beyond the end walls of the house. Decorative brackets are present under the barge board. A large steeply gabled dormer with gingerbread trim extends from the north slope of the roof. Inside end flues of brick with corbeled tops are present in the main section while a larger brick flue is located inside the south end wall of the el.

The house is in good condition and stands on a tract containing 191 acres.

STATEMENT OF SIGNIFICANCE

The area of significance of this house is its architecture. Constructed of frame with late Victorian period trim, it is an example of late 19th century rural architecture in the Victorian Gothic idiom.

The rear section of the building with its possible log construction reflects earlier vernacular building traditions.
