DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

This house is located at the southeast corner of the intersection of the old Cavetown Pike and White Hall Road in the village of Chewsville, Washington County, Maryland. It is situated near the center of the community and faces north.

The main or west portion of the structure is a one-and-a-half story, four-bay log dwelling with black and white trim. Attached on an axis with it is a three-bay, two-story section which is apparently an addition.

The walls are set on foundations of local rubble fieldstone. Buff shingle siding sheaths the walls at all elevations, concealing log construction.

The windows are placed rather at random in the walls. Several first story windows in the west section contain nine-over-six pane sashes, while others have two-over-two light Victorian period sashes with the upper sashes showing arch topped panes. Three shed-roof dormers protrude from the north slope of the roof.

Three entrances are located in the front elevation. The main opening is located in the second bay from the west end of the house. The entranceway is framed simply with a transom present over the door. The other two entrances are in the east portion of the house. They are plain in appearance and are without transoms.

The roof is covered with sheet metal and extends for several inches beyond the end walls of the house. There is no decorative work associated with the eaves boxing or barge area. Small brick chimneys rise from inside each gable end. A third flue is centrally placed.

The house is in good condition and is located on a 137' X 183' lot.

STATEMENT OF SIGNIFICANCE

The area of significance of this house is its architecture. Constructed of log, it represents a major building tradition for Washington County and the Cumberland Valley. Log was used as a building material in the area from the earliest days of settlement to late in the 19th century. Many buildings of log are in existence today, encased with various forms of siding or bricks.

This house is said by local historians to be the oldest building in Chewsville. If this statement is true, the structure could date from the late 18th or early 19th century. The majority of houses in Chewsville appear to have been built during the mid to late 19th century.

For further information on this and other properties in the Chewsville election district, contact Howard L. Spessard, 911 View Street, Hagerstown, Maryland 21740
