DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE	
<p>This dwelling house is located 1/4 mile south of U.S. 40, just east of the Conococheague Creek at Route 2, Williamsport, Maryland. It is situated on a slight rise of ground and faces south.</p> <p>The house is a four-bay, two-story stone dwelling with white trim. Internally placed brick chimneys are located inside each gable end. The roof is covered with grey shingles which are not original. A three-bay concrete block addition is attached to the east end of the structure.</p> <p>The walls of the house are constructed of local limestone. The facade consists of cut and squared stones known as ashlar, while the rear and end walls display coursed field stone.</p> <p>There are no arches over the windows or doors. Instead, above each opening at the main floor of the facade is a large rectangular stone lintel. Other openings are without stone embellishment.</p> <p>The original exterior woodwork is quite simple. The eaves are finished with board boxing rather than with a cornice. The window and door framing lacks decorative woodwork.</p> <p>The house has a rather large number of windows relative to its size. Openings are present at the exposed (west) side as well as the front and back of the house. The double pane sashes are not original to the dwelling.</p> <p>Two front doors are located at the second and third bays of the facade. They each contain a three-light transom. These doors enter into rooms rather than into hallways.</p> <p>The lintels of the window and door openings at the main floor are at a uniform height, adding to the symmetry of the front of the house. The first floor windows of the facade are higher than those in the gable and rear walls.</p> <p>A 20th century porch sheds the two center bays of the front of the house. It is supported by square posts which carry a flat roof with a ballustrade.</p> <p>There is no substantiated date indicating the year that this house was built. The building complex of which this house is a part contains a barn and other outbuildings related to agricultural use. The property includes 159 acres. The house is not now threatened by destruction.</p>

STATEMENT OF SIGNIFICANCE

The area of significance of this structure is its architecture. Although this house is not dated, its appearance would suggest that it was probably built in the mid-19th century. The numerous windows and the ashlar facade are unusual in houses dated earlier than mid-century in the county.

Stone house construction is quite common in Washington County. Many of these houses contain four bays with off-center front doors. Apparently in the interest of symmetry, the two center bays of the first floor of this house were both constructed as doors.

A great number of early settlers in Washington County were people of German descent who migrated to the area from central Pennsylvania. German surnames are evident in the early land records of much of Washington County, especially in the area west of Hagerstown. Four bay houses are common in the area and possibly reflect traditional German techniques.

According to local historians, an early road passed close to the site of this house leading to a fording of the Conococheague Creek a short distance southwest of the dwelling.
